Article 13	571 - 654
Article 14	655
Article 15	656 - 780
<b>Appendix</b>	
Charter of Fundamental Rights and Freedoms	

## INTRODUCTION

1. The International Covenant on Economic, Social and Cultural Rights (the “Covenant”) was opened for signature in New York on 19 December 1966. The Covenant was signed in New York in the name of the Czechoslovak Socialist Republic on 7 October 1968.
2. The Federal Assembly of the Czechoslovak Socialist Republic approved the Covenant on 11 November 1975. The president then ratified the Covenant with a comment to Article 26 paragraph 1. The instruments of ratification of the Czechoslovak Socialist Republic were deposited with the Secretary-General of the United Nations on 23 December 1975.
3. The Czech Republic came into existence on 1 January 1993 as one of two successor states of the Czech and Slovak Federal Republic. By notice of 22 February 1993 addressed to the Secretary-General of the United Nations, the depository of the Covenant, the CR succeeded to the obligations arising from the Covenant for the former CSFR as of 1 January 1993.
4. The International Covenant on Economic, Social and Cultural Rights entered into force for the Czechoslovak Socialist Republic in accordance with its Article 27 on 23 March 1976. The full text of the Covenant, together with the text of the International Covenant on Civil and Political Rights was published in the Collection of Laws under No. 120/1976 Coll. The text of the Covenant thereby became accessible to everyone and generally binding. Under Article 10 of the Constitution of the Czech Republic the Covenant has precedence over the law.
5. The initial report of the Czech Republic is submitted for the period from 1 January 1993 to 31 December 1999 (the “report period”). Preparation of the initial report of the CR, submitted in accordance with Articles 16 and 17 of the Covenant, was based on:
  - a) Revised general directives (17/06/91.E/C.12/1991/1.) on the form and content of reports on the fulfilment of obligations arising from the Covenant, presented by states parties;
  - b) Relevant facts and new measures adopted by the Czech Republic to fulfil obligations arising from the Covenant in the report period.
6. The report was prepared by the Human Rights Department of the Office of the Government of the Czech Republic based on documentation from central state administration bodies: the ministries of Transport and Communications, Culture, Defence, Local Development, Labour and Social Affairs, Justice, Education, Youth and Sports, the Interior, Foreign Affairs, Health, Agriculture, the Environment, the Czech Statistical Office, the Council for Radio and Television Broadcasting, the Research and Development Council of the Government of the Czech Republic, the CR Government Board for People with Disabilities, Council for National Minorities of the Government of the Czech Republic. Additional documentation was provided by non-government non-profit organisations and academic institutions.

## GENERAL PART

### A. Country and the People

7. The Czech Republic has an area of 78,866 km<sup>2</sup>, and as of 31 December 1998 it had a population of 10,299 thousand. The population density is 130 people per km<sup>2</sup>.
8. The present population of the Czech Republic is of a regressive type, i.e. the proportion of children is lower than the proportion of the oldest age groups (people over 50); the total number of inhabitants is declining, even after adding migration, and on average the population is ageing. At higher ages there is a significant preponderance of women. The economic burden on the population at a productive age is increasing, particularly in view of the pension system, which is based on current financing of pensions by economically active people.

#### **Population by main age groups** (as of 31 December of each year)

Indicator	1993	1994	1995	1996	1997	1998
Age: 0 - 14 (%)	19.5	18.8	18.3	17.9	17.4	17.0
15 – 59 (%)	62.5	63.2	63.7	64.1	64.6	64.9
60 and over (%)	18.0	18.0	18.0	18.0	18.0	18.1
Average age	36.8	37.0	37.3	37.6	37.9	38.2
Ageing index <sup>1)</sup>	92.4	95.4	98.1	100.8	103.5	106.4

<sup>1)</sup> the number of people aged 60 and over per 100 children aged 0 - 14

Source: Czech Statistical Office, 1999

9. Information about population structure by other important characteristics, nationality, education, religious faith and economic activity, come from the last census of the population, houses and apartments in 1991:
  - a) The Czech Republic is a very homogeneous country by nationality: in 1991, 95 percent of all people described themselves as being of Czech nationality (including Moravian and Silesian). The most numerous other nationalities are Slovak (3%), Polish (0.6%), German (0.5%) and Romani (0.3%). The country also has inhabitants of Hungarian, Ukrainian, Russian, Bulgarian, Greek and other nationalities.
  - b) In the census, more than half of inhabitants stated that they did not have a religion, or did not answer the question. The total number of people who reported having a religion listed primarily Christian churches, especially the Roman Catholic church (89% of those reporting a religion).
  - c) The education level of the population (highest completed education level for people over 25) in 1991 was as follows: 32 percent of the adult population completed elementary education, 59 percent completed secondary academic or trade education, 9 percent attained university education. Younger generations reach a higher education level than did the older generations. Among people aged 25 to 29 there were only 11 percent with only elementary education, among people aged 50 to 59 there were 37 percent, and among people aged over 60 the number was over 56 percent.
  - d) In 1995 in the group of employers there were 11 percent with only elementary education, 45 percent had trade education without an academic secondary school diploma, 32 percent were academic secondary school graduates, and almost 11 percent of employers had completed higher education.

- e) The economically active population of the Czech Republic has several characteristic features: most of them are employees (with employment income), the dominant sector is industry, the number of workers in agriculture is declining, the number of people working in non-manufacturing fields is continually increasing, over 90 percent of women at a productive age are employed.
10. During the nineties the population environment worsened, and important demographic indicators declined: the marriage, fertility and birth rates. From 1994 onward the number of inhabitants declined naturally. At the same time, however, the life expectancy (life expectancy at birth) increased, more among men than women. The increase in the life expectancy was affected primarily by a decrease in infant mortality and mortality among seniors, i.e. in both outer age groups. However, mortality declined in all age groups, even more among people forty and over than among younger people.

### Population and vital statistics in 1993 to 1998

Indicator	1993	1994	1995	1996	1997	1998
Life expectancy: men	69.3	69.5	70.0	70.4	70.5	71.1
women	76.4	76.6	76.9	77.3	77.5	78.6
Live births per 1000 inhabitants	11.7	10.3	9.3	8.8	8.8	8.8
Deaths per 1000 inhabitants	11.4	11.4	11.4	10.9	10.9	10.6
Natural increase per 1000 inhabitants	0.3	-1.0	-2.1	-2.2	-2.1	-1.8
Marriages per 1000 inhabitants	6.4	5.7	5.3	5.2	5.6	5.3
Divorces per 100 marriages	45.8	52.9	56.7	61.4	56.2	58.8

Source: Statistical Yearbook of the CR, 1999.

11. The high divorce rate is a continuing negative phenomenon. In 1997, virtually 42 percent of marriages entered in divorce, whereas when the Czech Republic was created this was only 36 percent. At the same time, demographic behaviour in the nineties also shows positive changes in the population's family behaviour – the average age at first marriage and the birth of a first child is increasing. The number of couples living together, so-called de facto marriages, is also increasing.
12. The demographic situation is increasingly influenced by immigration, which is slowing the population ageing process and the number of inhabitants. The number of foreigners with long-term and permanent residence permits in the country is increasing. Whereas in 1993 there were 7.5 such foreigners per 1 thousand inhabitants, in 1997 the number was 23.4 foreigners. In absolute terms that meant 77,700 people in 1993 and 209,800 citizens of foreign countries in 1997<sup>1</sup>. The main source countries for immigration to the Czech Republic are Slovakia, Vietnam, the Ukraine, Germany, and the Russian Federation.
13. Internal migration shows a long term gradual decrease in the amount of moving, especially over longer distances. The largest population loss is in medium sized cities with 54 to 100 thousand inhabitants and in large cities. In contrast, municipalities with 2 to 5 thousand inhabitants located near industrial and administrative centres are gaining population. This suburbanisation process has primarily social and ecological causes. Population loss and ageing are also continuing in the smallest rural municipalities with up to 200 and 500 inhabitants.

<sup>1</sup> Source: Population Development in the Czech Republic 1998. Faculty of Natural Sciences of Charles University, Prague 1999.

## **B. Economic Situation**

14. Since its creation in 1993, the Czech Republic continues to strengthen the market economy and create conditions for faster and sustainable economic growth and improvement of the population's standard of living. The key aim of economic policy here is entry into the European Union. The country will be able to handle the competitive pressure and market forces in the EU, provided that it speeds up its structural reforms<sup>2</sup>.
15. The economic structure of the Czech Republic is similar to economically developed countries. In 1997 agriculture (including forestry, hunting and game management and fish farming) was roughly 5 percent of the total number of economically active persons, and 4 percent of gross domestic product. In 1997 gross domestic product per capita reached roughly 63 percent of the average achieved in European Union countries, i.e. 160,089 CZK per inhabitant (ca. 12 thousand Euro).
16. The dominant form of ownership is private ownership. However, the state still has significant holdings, for example in electricity distribution companies, in mines, steel mills and some of the larger banks. A large part of agricultural land also remains in state hands, although the market in land was also liberalised. Most goods have market prices, but household energy and services prices, including rents, are still regulated. The prices of passenger bus and railroad transportation and telecommunications services are also regulated.
17. In the first years of the independent republic, after an initial decline in manufacturing, related to the first steps in transition to a market economy, the situation in the national economy improved, so that in 1995 the growth in GDP was 6.4 percent, and in 1996 it was 3.8 percent. The recovery process was interrupted by stagnation in manufacturing in 1997 (real growth in GDP of only 0.3%) and considerable economic recession in 1998 and 1999. The changes in the rate of economic growth during the entire period were affected primarily by fluctuation in the influx of foreign capital, which was 15.8 percent of GDP in 1995, but only 2 percent in 1997 and 4.7 percent in 1998.
18. After very low unemployment in the early years of the period of transition to a functioning market economy, the unemployment rate indicator grew quickly in 1997 to 1998; in mid- 1999 it was over 8 percent. The growth in unemployment reflects the slowdown in economic growth and restructuralisation of the entrepreneurial sector.
19. Inflation in the Czech Republic – considering the transformation of the economy – was relatively low in the report period; it ranged between 8 and 11 percent, and in 1999 it even declined to 2.5 percent. The Czech Republic's fiscal policy was highly disciplined, which was apparent until 1997 in, among other things, approving balanced state budgets. Beginning in 1996 the budget deficit began to grow, to 1.5 percent of GDP in 1998, despite of efforts to limit state expenditures. The level of public debt is relatively low – only 13.2 percent of GDP. However, in view of the hidden deficits caused by off-budget operations and the high number of state guarantees for economic revival programs, the actual public debt is estimated at up to double the stated figure.

---

<sup>2</sup> Joint evaluation by the Government of the Czech Republic and the European Commission, concerning priorities of economic policy of the Czech Republic. Approved by Resolution of the Government of the Czech Republic of 8 September 1999 No. 910.

## Growth of main indicators of the national economy in the Czech Republic

Indicator	1994	1995	1996	1997	1998
Real GDP growth in %	2.7	6.4	3.9	1.0	-2.3
Inflation rate in %	10.0	9.1	8.8	8.5	10.7
Unemployment rate in %:					
according to ILO definitions	3.8	4.1	3.5	4.7	7.3
registered	3.2	3.0	3.5	5.2	7.4
Balance of public budgets: % of GDP	-1.3	-1.3	-1.8	-2.2	-1.5
Balance of current account: % of GDP	-1.9	-2.7	-7.6	-6.1	-1.9
Foreign debt: ratio of debt/exports (in %)	5.1	5.8	6.9	7.1	6.5
Direct foreign investments: net, % of GDP	-	5.0	2.5	2.5	4.5

Source: European Commission Regular Report on the Czech Republic, 1999

20. The Czech economy has a high degree of openness, so it is very sensitive to developments in foreign goods and financial markets. In 1998 the degree of openness<sup>3</sup> was 125 percent.
21. In 1993 to 1997, difficulties appeared in the relationship of quick economic growth to external balance. However, in 1998 the current account deficit in balance of payments decreased to a mere 1.9 percent of GDP, in particular as a result of a marked decline in economic activity, low raw materials prices, and a decline in imports caused by the recession.
22. The worsening productivity of the national economy in recent years reflects the basic weaknesses of the Czech entrepreneurial and financial sector. Restructuralisation in the entrepreneurial sector is happening slowly, and in a limited extent. It is hindered by the immaturity and imperfection of the nascent market institutions, an inadequate framework for company administration and unclear ownership. Inadequacies in seeking enforcement of rights worsen the situation.

### C. State Government and Local Self-Government

23. The Czech Republic is administratively divided into districts, which are further divided into municipalities. There are 76 districts, three of which are also large cities: Brno, Plzeň and Ostrava. One district has an average of 83 municipalities. The capital city of Prague is an independent territorial unit; its jurisdiction corresponds to a region, and the jurisdiction of its city districts corresponds to districts. The smallest administrative units are municipalities, of which the Czech Republic has over 6 thousand. Roughly 10 percent of them have the status of a town, and roughly 75 percent of the country's population lives in them. In contrast, small rural municipalities of up to one thousand inhabitants comprise 78 percent of all municipalities, but only 16 percent of the population lives in them.
24. In the report period, only municipalities were self-governing units. Higher territorial self-governing units (regions) were created by a constitutional act in 1997<sup>4</sup>. This act defines the borders of fourteen new regions by the territory of the districts which each region

<sup>3</sup> The degree of openness is expressed as the ratio of the sum of imports and exports of goods and services to gross domestic product.

<sup>4</sup> Constitutional Act No. 347/1997 Coll., on Creation of Higher Territorial Self-governing Units and Amending Constitutional Act No. 1/1993 Coll., the Constitution of the Czech Republic.

contains. The act went into effect on 1 January 2000. State government in districts is provided by district offices, whose activities and jurisdiction are governed by a special law<sup>5</sup>.

25. In the report period, the basic territorial self-governing unit was a municipality. A municipality is administered by a body of representatives as a public law corporation, which can have its own property and operate under its own budget. The state may interfere with the activities of territorial self-governing units, including municipalities, only if it is required to protect the law, and only in a manner provided by law. Representative bodies are elected by secret ballot on the basis of universal, equal and direct suffrage, and their term of office is four years<sup>6</sup>. Within the limits of their jurisdiction, the representative bodies can issue generally binding decrees<sup>7</sup>.
26. Legislative power in the Czech Republic belongs to the Parliament. The Parliament consists of two chambers, the Chamber of Deputies and the Senate. Every citizen of the CR who has reached the age of 18 has the right to vote for deputies and senators.
27. The Chamber of Deputies has 200 deputies, elected for a period of four years. Elections to the Chamber of Deputies are held by secret ballot on the basis of universal, equal and direct suffrage, on the principle of proportional representation. Every citizen of the CR who has the right to vote, is not subject to a restriction on exercise of the right to vote on election day<sup>8</sup> and has reached the age of 21 is eligible to be elected to the Chamber of Deputies, with the exception of a statutory restriction on personal freedom for reasons of protecting public health<sup>9</sup>.
28. The Senate has 81 senators, elected for a period of six years. A third of the senators are elected every two years. Elections to the Senate are held by secret ballot on the basis of universal, equal and direct suffrage, on the principle of a majority system. Every citizen of the CR who has the right to vote, has reached the age of 40, and is not subject to a restriction on exercise of the right to vote on election day<sup>10</sup> is eligible to be elected to the Senate.
29. The head of state is the president of the republic, elected by Parliament at a joint session of both chambers<sup>11</sup>. The president's term of office is five years, and no one can be elected more than twice consecutively. Every citizen of the CR who can be elected to the Senate is eligible to be elected president of the republic. The president of the republic has the right to participate in sessions of both chambers of Parliament and Government meetings.

---

<sup>5</sup> Act No. 425/1990 Coll., on District Offices, Regulation of their Jurisdiction and on Certain other Related Measures, as subsequently amended.

<sup>6</sup> Under Act No. 152/1994 Coll., on Elections to Representative Bodies in Municipalities and Amending and Supplementing Certain other Acts, as subsequently amended.

<sup>7</sup> Under Act No. 367/1990 Coll., on Municipalities (Municipal Establishment), as subsequently amended.

<sup>8</sup> Under Act No. 247/1995 Coll., on Elections to the Parliament of the Czech Republic and Amending and Supplementing Certain other Acts, as amended by Act No. 212/1996 Coll. (§ 2 and § 25).

<sup>9</sup> § 2 of Act No. 247/1995 Coll.: *Restrictions on exercise of the right to vote are a) limitations of personal freedom set by law for reasons of protection of public health (§ 5 par. 2 lt. b) and § 9 par. 4 lt. a) of Act No. 20/1966 Coll., on Public Health, as amended by CNC Act No. 548/1991 Coll.), b) removal of legal capacity (§ 10 and 855 of the Civil Code).*

<sup>10</sup> Under Constitutional Act No. 1/1993 Coll., the Constitution of the Czech Republic and Act No. 247/1995 Coll., on elections to the Parliament of the Czech Republic and Amending and Supplementing Certain other Acts, as subsequently amended (§ 2 and § 57).

<sup>11</sup> Under Constitutional Act No. 1/1993 Coll., the Constitution of the Czech Republic and Act No. 90/1995 Coll., on the Rules of Procedure of the Chamber of Deputies .

30. The supreme body of executive power is the Government, which consists of the prime minister, deputy prime ministers, and ministers. The Government is responsible to the Chamber of Deputies. The prime minister is named by the president, who names the other ministers at the proposal of the prime minister. A minister may not perform activities whose nature is in conflict with performance of his position. The Government may submit a motion for a vote of confidence to the Chamber of Deputies. The Chamber of Deputies may give the Government a vote of no confidence. The prime minister submits his resignation to the president of the republic; other ministers submit their resignation to the president of the republic through the prime minister. The Government makes decisions collectively. The consent of a majority of ministers is required to pass a Government Resolution. The Government is authorised to issue decrees to implement the law, within its bounds. Ministries, other administrative bodies<sup>12</sup> and territorial self-government bodies may issue legal regulations on the basis of and within the bounds of a law, if they are authorised to do so by the law.
31. Under the Constitution of the Czech Republic (the “Constitution”) management of state assets and observance of the state budget is inspected by an independent body – the Supreme Audit Office. The president and vice president of the Supreme Audit Office are named by the president of the republic at the proposal of the Chamber of Deputies. The status, jurisdiction, organisational structure, and other details concerning the Supreme Audit Office are set by law<sup>13</sup>.
32. The state’s central bank is the Czech National Bank. The main purpose of its activities is to care for the stability of the currency; its activities can be interfered with only on the basis of the law. The status, jurisdiction, and other details are set by law<sup>14</sup>. The bank is governed by a seven-member bank council. Its members are appointed and recalled by the president of the republic. Membership of the bank council is incompatible with the position of a deputy in a legislative body, a minister, or membership in top bodies of other banks or companies.

#### **D. Political System**

33. Under the Constitution, the political system is based on the free and voluntary formation of and free competition among political parties and political movements, which respect the fundamental democratic principles and which renounce force as a means of promoting their interests. Political decisions are based on the will of the majority, manifested in free voting. The decisions of the majority take into consideration the protection of minorities.
34. After elections in 1996, representatives of six political parties entered the Chamber of Deputies of the Parliament. After early elections in 1998, the Chamber of Deputies now has representatives from five political parties. In 1996 five political parties were represented in the Senate, and there were 10 independent senators (12%); after elections in 1998 and supplemental elections in 1999, the Senate contains six political parties and 12 independent senators (14%).

---

<sup>12</sup> The activity and jurisdiction of the highest state government bodies are governed by Czech National Council Act No. 2/1969 Coll., on Establishment of Ministries and other Central Bodies of State Administration of the Czech Republic, as subsequently amended, and regulations related to that Act.

<sup>13</sup> Act No. 166/1993 Coll., on the Supreme Audit Office, as subsequently amended.

<sup>14</sup> Act No. 6/1993 Coll., on the Czech National Bank, as subsequently amended

35. The last communal elections were held in the Czech Republic in 1998. At the level of municipal representative bodies the political spectrum is extremely varied; in addition to representatives of parliamentary parties and independent candidates there are also representatives of non-parliamentary political parties and political movements, or people elected from coalitions of political parties and movements, associations of political parties and independent candidates and associations of independent candidates, created for a given election. In 1998 a total of 53 such entities were successful in elections. While parliamentary parties won 20.3 percent of all mandates on the communal level, candidates without party affiliation received 77 percent of mandates.

### **E. Judiciary**

36. Under Article 4 of the Constitution, basic rights and freedoms enjoy the protection of the judicial power. The judicial power is exercised in the name of the republic by independent courts. Judges are independent in the exercise of their positions. The position of a judge is incompatible with the position of president of the republic, member of parliament, or any position in public administration. The law specifies which other activities are incompatible with the position of a judge<sup>15</sup>.
37. It is the responsibility of the courts to provide protection of rights in a manner set forth by law. Only a court decides questions of guilt and punishment for crimes. The court system consists of the Supreme Court, the Supreme Administrative Court, high, regional and district courts, and regional commercial courts. The jurisdiction and organisation of a court are provided by law. A judge is appointed to the position by the president of the republic, without a time limit. When making decisions, a judge is bound by the law. All parties to proceedings have equal rights before the courts. Proceedings before the courts are oral and public, with exceptions provided by law. A decision is always announced publicly.
38. The judicial body for protection of constitutionality and domestic law is the Constitutional Court<sup>16</sup>. The Constitutional Court of the Czech Republic, which began its activities on 1 July 1993, followed the brief existence of the Constitutional Court of the CSFR. Review of constitutionality is connected with the application of norms which are part of the constitutional order of the republic, particularly with application of the Constitution and the Charter of Fundamental Rights and Freedoms (the “Charter”). However, this fact also leads the court to apply international law, primarily the special category of international treaties on human rights and fundamental freedoms in accordance with Article 10 of the Constitution.
39. The Constitutional Court is also the last opportunity for domestic remedy of decisions of state bodies, particularly general courts. In a conflict between international and domestic law, the Constitutional Court applies international and regional (European) treaties on human rights, particularly the International Covenant on Civil and Political Rights (reliance on individual provisions of the Covenant has appeared in approximately 30 of the Constitutional Court’s decisions since it began its activities), the International Covenant on Economic, Social and Cultural Rights, the Convention on the Rights of the Child and the European Convention on the Protection of Human Rights and Fundamental Freedoms, as amended by supplemental protocols. The Constitutional Court annuls legal regulations or their parts which are in conflict with the constitutional order of the Czech

---

<sup>15</sup> Act No. 335/1991 Coll., on Courts and Judges, as subsequently amended.

<sup>16</sup> Act No. 182/1993 Coll., on the Constitutional Court, as subsequently amended.

Republic (mostly provisions of the Charter) or with an international agreement. In its decisions to date, annulling a legal norm, or part of one, exclusively due to conflict with an international agreement is an exceptional occurrence (decision of the Constitutional Court No. 41 of 9 April 1997 on the legal institution of “institutional upbringing,” where the Constitutional Court annulled § 171 par. 1 lt. d) of the Criminal Code<sup>17</sup> due to its conflict with Article 3 part. 1 of the Convention on the Rights of the Child). The Constitutional Court also pointed to a more extensive concept of protection of human rights and fundamental freedoms, guaranteed by an international treaty on human rights, compared to domestic law (resolution No. 30 of 10 April 1998 on freedom of religion and faith under Article 16 par. 1 of the Charter, compared to Article 18 par. 1 of the International Covenant on Civil and Political Rights). The Constitutional Court adopted a concept for the interpretation of many concepts and the overall approach to issues of protection of human rights and fundamental freedoms analogous to that of the European Court for Human Rights; by doing so it significantly contributes to strengthening the values and foundations of a democratic society, founded on respect for human rights and fundamental freedoms.

40. The Constitutional Court is composed of 15 judges appointed by the president of the republic for a period of ten years. Who is entitled to file an application for proceedings and under what conditions, as well as other rules of proceedings before the Constitutional Court, are set by law. In their decision making, the Constitutional Court judges are bound only by constitutional acts, international treaties under Article 10 of the Constitution of the CR and the Act on the Constitutional Court and proceedings before it. Executable decisions of the Constitutional Court are binding for all bodies and persons.
41. The state prosecutor’s office<sup>18</sup> files complaints in the name of the state in criminal proceedings, performs the duties assigned to it in connection with them by the Criminal Procedure Code<sup>19</sup>, and also performs other tasks, if so provided by law, e.g. the Civil Procedure Code<sup>20</sup>. The system of state prosecutor’s offices consists of the Supreme State Prosecutor’s Office, high, regional, and district state prosecutor’s offices.

## **F. Protection of Human Rights**

42. The Constitution of the Czech Republic was adopted on 16 December 1992. Under the Constitution, the Czech Republic is a sovereign, unitary, and democratic state governed by the rule of law, founded on respect for the rights and freedoms of human beings and of citizens. All citizens may do that which is not prohibited by law; and nobody may be compelled to do that which is not imposed upon her by law. Fundamental rights and freedoms enjoy the protection of the judicial power. Under Article 3 of the Constitution, the constitutional order also includes the Charter of Fundamental Rights and Freedoms<sup>21</sup> (the “Charter”). The Charter recognises the inviolability of the natural rights of a human being, the rights of a citizen, and the sovereignty of the law.
43. The Charter implements into the legal order the major part of rights set forth in the International Covenant on Civil and Political Rights and in the International Covenant on

<sup>19</sup> Act No. 141/1961 Coll., on Criminal Court Proceedings (the Criminal Procedure Code), as subsequently amended.

<sup>20</sup> Act No. 99/1963 Coll., the Civil Procedure Code, as subsequently amended.

<sup>21</sup> Act No. 2/1993 Coll., on Promulgation of the Charter of Fundamental Rights and Freedoms as Part of the Constitutional Decree of the Czech Republic, as subsequently amended.

Economic, Social and Cultural Rights. Inclusion of the Charter in the constitutional order of the Czech Republic was ensured by including the corresponding provisions of both covenants in the legal order. In addition, by a constitutional act<sup>22</sup> the CR assumed all obligations which arose to the CSFR under international law as of the day of its dissolution (except obligations related to territory to which the sovereignty of the CR does not extend). This measure ensured continuity of observance of all obligations of the former federation and the Czech Republic, even over and above the framework of obligations arising from the Charter.

44. Legal norms concerning human rights and fundamental freedoms are contained not only in the Constitution of the CR and the Charter of Fundamental Rights and Freedoms, but also in substantive law and procedural law regulations of civil, criminal and administrative law (the Civil Code and the Civil Procedure Code, the Criminal Code and the Criminal Procedure Code, the Administrative Procedure Code<sup>23</sup>) and other legal regulations.
45. All constitutional acts, statutes and generally binding legal principles in effect in the Czech Republic, i.e. including the texts of ratified international treaties, are promulgated in the Collection of Laws and published in a commented version with references to case law<sup>24</sup>. Under § 9 of the Act on the Collection of Laws of the Czech Republic<sup>25</sup> all municipalities are required to obtain at least one copy of the Collection of Laws and ensure that it is accessible to everyone. In the report period, accessibility of legal regulations was also ensured by a Decree on Compulsory and Working Copies<sup>26</sup>. Under this decree, the Collection of Laws was required to be sent free of charge by the publisher, in one to five copies, to all district public libraries, libraries of institutions of higher education and scholarly libraries and archives<sup>27</sup>. The Collection of Laws is also accessible in electronic form on the Internet.
46. Protection of rights under Article 2 of the International Covenant on Civil and Political Rights, and under Articles 2 and 4 of the International Covenant on Economic, Social and Cultural Rights, is provided primarily through the institution of a constitutional complaint, which can be submitted to the Constitutional Court by:

---

<sup>22</sup> Act No. 4/1993 Coll., on measures related to the dissolution of the Czech and Slovak Federal Republic.

<sup>23</sup> Act No. 40/1964 Coll., the Civil Code, as subsequently amended.

Act No. 99/1963 Coll., the Civil Procedure Code, as subsequently amended.

Act No. 140/1961 Coll., the Criminal Code, as subsequently amended.

Act No. 141/1961 Coll., on Criminal Court Proceedings (the Criminal Procedure Code), as subsequently amended.

Act No. 71/1967 Coll., on Administrative Proceedings (the Administrative Procedure Code), as subsequently amended.

<sup>24</sup> As of 1 January 2000, publishing legal regulations is newly regulated by Act No. 309/1999 Coll., on the Collection of Laws and Collection of International Treaties. International treaties are published in the Collection of International Treaties in the language which is official under international law for their interpretation and simultaneously in Czech translation.

<sup>25</sup> Act No. 545/1992 Coll., on the Collection of Laws of the Czech Republic.

<sup>26</sup> Decree of the Ministry of Education and Culture No. 140/1964 Coll., on Compulsory and Working Copies, as subsequently amended.

<sup>27</sup> On 14 March 2000 a new decree went into effect concerning distribution of period press, decree of the Ministry of culture No. 52/2000 Coll., which determines the regional jurisdiction of recipients of regional compulsory copies of period press (in accordance with § 9 par. 6 Act No. 46/2000 Coll., on Rights and Obligations when Publishing Period Press and Amending Certain Other Acts – the Press Act). Under this decree, the authorised recipients of compulsory copies of period press are national scientific libraries and the City Library of the City of Prague.

- a) a natural person or legal entity, against a legally effective decision or other measure by a public authority, if the person or entity believes that there has been a violation of its fundamental right or freedom guaranteed by a constitutional act or international agreement on human rights and fundamental freedoms by which the CR is bound,
  - b) a local administration body, against illegal interference by the state,
  - c) a political party, against a decision to dissolve it, or against another unconstitutional or illegal decision about its activities.
47. Together with a constitutional complaint, a proposal can be submitted to annul a legal regulation or part of one, if the fact which is the reason for the constitutional complaint arose through application of that regulation and if, according to the plaintiff, that regulation conflicts with constitutionally or internationally guaranteed rights and freedoms.
48. The law governs proceedings before the Constitutional Court in accordance with generally recognised democratic principles of court proceedings: the proceedings are public, decision making is independent and unbiased, the participants have equal status and are entitled to use their native language.

### **International Treaty Documents on Human Rights**

49. The Czech Republic ratified and is bound by the following important international law documents on human rights.
- a) the International Convention on the Elimination of All Forms of Racial Discrimination,
  - b) the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights,
  - c) the Convention on Elimination of All Forms of Discrimination Against Women,
  - d) the Convention on the Rights of the Child,
  - e) the Convention for the Protection of Human Rights and Fundamental Freedoms and Protocols to this Convention,
  - f) the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment,
  - g) the Framework Convention for the Protection of National Minorities,
  - h) the European Social Charter and Protocols to the Charter.

The texts of ratified international treaties and other important international documents are published in the Collection of Laws in the Czech language<sup>28</sup>. The texts of initial and

---

<sup>28</sup> **International conventions related to the Czech Republic's membership in the UN:**

Universal Declaration of Human Rights: approved by the UN General Assembly 10 December 1948, No. DE01/48 in Czech legal regulations.

International Covenant on Civil and Political Rights (ICCPR): the text of the Covenant is published under No. 120/1976 Coll.

International Covenant on Economic, Social and Cultural Rights (ICESCR): text of Covenant under No. 120/1976 Coll.

International Convention on the Elimination of All Forms of Racial Discrimination (CERD): Convention text under No. 95/1974 Coll.

Convention on Elimination of All Forms of Discrimination Against Women (CEDAW): the text of the Convention is published in the Collection of Laws under No. 62/1987 Coll.

Convention against Torture and Other Cruel, Inhuman or Degrading Treatment of Punishment (CAT): the text of the Convention is in the Collection of Laws under No. 143/1988 Coll. and 39/1997 Coll. (withdrawal of reservations made in the first ratification and to selected articles).

Convention on the Rights of the Child (CRC): Convention text under No. 104/1991 Coll.

periodic reports on fulfilment of obligations arising from international covenants and conventions are published in print (usually by the responsible compiler/ministry) and on the Internet. The introductory report on fulfilment of the Covenant will be published and disseminated in the same manner.

50. An important element of the Czech legal order is the constitutional principle set forth in Article 10 of the Constitution of the Czech Republic, under which ratified and promulgated international treaties on human rights and fundamental freedoms by which the Czech Republic is bound are directly applicable, and have precedence over the law. This fact was also expressly stated in a decision of the Constitutional Court of the Czech Republic<sup>29</sup>.
51. The European model of protection of human rights and fundamental freedoms guaranteed by the European Convention for the Protection of Human Rights and Fundamental Freedoms and protocols to it is the international mechanism of protection of human rights and freedoms. Reform of the mechanism of the European Court for Human Rights, in the form of Protocol 11 to the Convention, also contributed to this fact. The Convention entered into force for the CSFR on 18 March 1992 and for the Czech Republic on 1 January 1993. Protocol No. 11 to the Convention, implementing the new control mechanism, entered into force on 1 November 1998.
52. In May 1999 the Parliament of the Czech Republic passed the Act on Freedom of Access to Information<sup>30</sup>, which permits provision of information related to the jurisdiction of state bodies and territorial self-government bodies. It also sets conditions under which the information is provided. The Act goes into effect on 1 January 2000.

---

#### **International conventions related to the Czech Republic's membership in the Council of Europe:**

Convention for the Protection of Human Rights and Fundamental Freedoms, including protocols. Text promulgated in the Collection of Laws under No. 209/1992 Coll. with amendments No. 41/1996 Coll. and No. 243/1998 Coll.

Framework Convention for the Protection of National Minorities: Convention text under No. 96/1998 Coll.

European Social Charter: By resolution of No. 776 of 25 November 1998, the government approved the proposal of the Minister of Labour and Social Affairs to ratify the European Social Charter (1961), the Additional Protocol to the European Social Charter (1988) in the proposed extent, and the Amending Protocol to the European Social Charter (1991) and to sign the revised European Social Charter (1996) subject to ratification. The Chamber of Deputies approved the Charter in July 1999, and the Senate in August 1999. Instruments of ratification were deposited with the general secretary of the Council of Europe on 17 November 1999. The European Social Charter was published in the Collection of International Treaties under No. 14/2000 Coll. I.T., and the additional protocol was published under No. 15/2000 Coll. I.T. The amending protocol has not been published yet. The Ministry of Labour and Social Affairs, which prepared the proposal to ratify the Charter and the Protocols to it, submitted it for approval, at the request of the Ministry of Foreign Affairs, presented as a treaty under article 10 of the Constitution, i.e. as an international treaty on human rights. The Chamber of Deputies changed this concept and passed it not and adopted it not by the approval procedure under art. 39 par. 4, but only under art. 49 par. 2 of the Constitution. The European Social Charter is therefore not a human rights treaty under art. 10 of the Constitution.

<sup>29</sup> Decision No. 3/1995 Coll., of the Constitutional Court of the CR in the matter of a proposal to annul certain provisions of Art. I Act No. 74/1994 Coll., Amending and Supplementing the Labour Code No. 65/1965 Coll., as subsequently amended, and Certain Other Acts.

<sup>30</sup> Act No. 106/1999 Coll., on Free Access to Information.

## **Protection of Human Rights at the level of Central State Administration Bodies**

53. Individual areas of protection of human rights were monitored until 1998 within the jurisdiction of individual ministries (particularly the Ministries of Labour and Social Affairs, Education, Youth and Sports, the Interior, Justice, Culture, Health, and the Minister without Portfolio); monitoring and evaluating fulfilment of international obligations was the responsibility of the Ministry of Foreign Affairs.
54. In 1998 the Government created the position of a government commissioner for human rights<sup>31</sup>. A key institutional measure for improvement of the existing situation and also a response to the demands of international organisations for institutional safeguarding of protection of human rights in the country was the creation of the Council for Human Rights of the Government of the Czech Republic (the “Council”)<sup>32</sup>. The Council is a consulting and co-ordinating body of the Czech Government for issues of protection of human rights and fundamental freedoms of persons in the jurisdiction of the CR. The Council:
- a) monitors the condition of human rights and fundamental freedoms in the country, as they are enshrined in the Charter of Fundamental Rights and Freedoms;
  - b) monitors domestic fulfilment of the CR’s international obligations in the area of protection of human rights, particularly fulfilment of international treaty documents set forth in point 48;
  - c) ensures fulfilment of the government’s obligations arising from international treaties, and in co-operation with the Ministry of Foreign Affairs, submits reports within the inspection mechanisms of these treaties to the appropriate international organisations (the UN, the Council of Europe), if these tasks are not assigned to other state administration bodies;
  - d) submits to the Government, through the deputy prime minister and chairman of the Legislative Council of the Government, information, proposals and positions concerning fulfilment of obligations arising from international treaties by which the CR is bound or to which it is preparing to accede;
  - e) presents to the Government, annually by the end of March, a Report on the Status of Human Rights in the CR for the previous year;
  - f) monitors the observance of the human rights of foreigners.

Until the Council was created, no procedures, including organisational ones, were created and institutionalised which ensured the positive participation of the public, primarily non-government organisations. In the Council, conditions for co-operation with non-government non-profit organisations were created. Representatives of state administration, at the level of deputy ministers, and representatives of the general public are represented in equal measure in the Council. At present the Council has 20 members in addition to the chairman and vice chairman. The chairman of the Council is the government commissioner for human rights.

---

<sup>31</sup> Resolution of the Government of the Czech Republic of 9 September 1998 No. 579.

<sup>32</sup> Resolution of the Government of the Czech Republic of 9 December 1998 No. 809, on Improvement of Protection of Human Rights in the Czech Republic (on the 50<sup>th</sup> anniversary from the adoption of the Universal Declaration of Human Rights).

55. In the report period the Czech Republic had not created the institution of a public protector of rights (ombudsman), who would provide protection from illegal or otherwise incorrect decisions or proceedings by government offices. The Act on the Public Protector of Rights was passed in December 1999 and published in the Collection of Laws on 30 December 1999<sup>33</sup>. Under this Act, the public protector of rights in the CR may enter into the proceedings of ministries, district and financial offices and other state administration bodies; his jurisdiction also extends to the police, the army, the prison services, protective and treatment institutions. He does not have the authority to force a given office to take certain actions, but the law authorises him to report inadequacies to a higher body or the Government, or to make a matter public. He cannot interfere with the activities of the parliament, the president of the republic, the Government, the Supreme Audit Office, state prosecutor's offices, or the courts. The law does not permit the ombudsman to represent citizens in court. Under § 28 of the cited Act, the Act on the Public Protector of Rights will go into effect 60 days after its promulgation in the Collection of Laws – 28 February 2000.

### **Non-government non-profit organisations**

56. Non-government non-profit organisations play an important role in the protection of human rights. Through generally beneficial activities, aimed at promoting better conditions for a certain population group or strengthening the identity of its members, they promote some of the fundamental human rights set forth in the basic documents: the Constitution, the Charter, the Universal Declaration of Human Rights and other norms.
57. Non-government non-profit organisations are organisations which are an expression of voluntary citizen participation in fulfilment of mutually or generally beneficial aims. They are not established or operated with the participation of state bodies, and the purpose of their activities is not achieving profits. They are:
- a) Civic associations<sup>34</sup> (groups, unions, clubs, etc.): associations of citizens, i.e. particularly natural persons, for a certain purpose. Legal entities may also be members. The law does not further specify the division of associations by purpose. From the day the Act on Association of Citizens went into effect (1 May 1990) until the end of 1999 the Ministry of the Interior registered over 42 thousand civic associations, approximately 33 thousand of them in the report period.
  - b) Special purpose facilities of churches<sup>35</sup>: Registered churches autonomously, independently of the state, establish and operate their special purpose facilities, through which they implement their charitable, social, educational and cultural aims. These entities provide publicly accessible services, usually on a high professional level. According to information from the Ministry of Culture, registered churches currently operate 168 special purpose facilities with their own legal status.
  - c) Generally beneficial companies<sup>36</sup> are legal entities which provide the public with generally beneficial services under pre determined conditions, equal for all users. Neither the founders, members nor employees of their bodies may use their profits for their own benefit. The law provides that this kind of company must use its profits to

---

<sup>33</sup> Act No. 349/1999 Coll., on the Public Protector of Rights.

<sup>34</sup> Established under Act No. 83/1990 Coll., on Citizens' Assembly, as subsequently amended.

<sup>35</sup> Established under Act No. 308/1991 Coll., on Freedom of Religious Faith and the Status of Churches and Religious Societies.

<sup>36</sup> Established under Act No. 248/1995 Coll., on Generally Beneficial Companies and Amending and Supplementing Certain Acts.

provide the services stated in its founding deed. In 1999, 480 generally beneficial companies were registered in the register kept by the register court.

- d) Foundations and foundation funds<sup>37</sup> are special purpose associations of assets established for purposes of achieving generally beneficial aims. To achieve its aims, a foundation may use revenues from its assets and other property. The total value of foundation assets (a minimum of 500 thousand CZK) may not decline under this value during the entire period of the foundation's existence. In contrast, a foundation fund may use all its assets for its purpose, which is more a one-time goal. Foundation assets and other property may consist of money, securities, real estate and chattels, property rights and other assets which meet the prerequisite of permanent revenue and are not subject to any lien rights. In 1999 there were 245 foundations and 607 foundation funds listed in the foundation register kept by the register court.
58. Subsidies from the state budget are provided to finance the activities of civic associations, generally beneficial companies, and special purpose facilities of churches. At present, 11 ministries provide state subsidies. The subsidies are fully in their jurisdiction, and are provided in the form of co-financing one-year projects which the non-government non-profit organisations submit on the basis of an agreement concluded between the ministry and the subsidy recipient. A recipient must use and account for subsidies in the calendar year in which they were provided. The provision of subsidies is governed by the following regulations:
- a) The State Budget Rules<sup>38</sup>. In July 1999 the Government approved a substantive outline of new budget rules<sup>39</sup>. The new budget rules will introduced the definition of state subsidy policy, lacking until now, and rules for providing subsidies and returnable financial assistance from the state budget and proceedings for removing them. It is expected that more detailed conditions for the provision of state subsidies to non-profit organisations will be provided by a special law.
- b) In the report period, provision of subsidies from the state budget was governed by the Rules for Providing Subsidies from the State Budget<sup>40</sup>. The government's new Rules for Providing Subsidies from the State Budget of the CR to Civic Associations<sup>41</sup>, in effect as of 1 January 2000, address the provision of subsidies more suitably than the previous rules, and, in particular, solve certain problems which appeared from the subsidy practices of past years (wider opportunities to pay salaries, evaluation of selection proceedings by the end of the previous calendar year, regulation of salaries provided from state subsidies, more precise conditions for providing investment subsidies and unification of conditions for providing subsidies for all ministries).
- c) One-year agreements on the provision of state subsidies, concluded by a central state administration body – the subsidy donor – with the subsidy recipient. This practice will also be replaced by the new budget rules, as it is not regulated by law and leads to

---

<sup>37</sup> Established under Act No. 227/1997 Coll., on Foundations and Foundation Funds and Amending and Supplementing Certain Related Acts (the Foundations and Foundation Funds Act).

<sup>38</sup> Act No. 576/1990 Coll., on Rules of Managing Budget Funds of the CR and Municipalities in the CR (the State Budget Rules), as subsequently amended.

<sup>39</sup> The government submitted the government draft of the Act to the Chamber of Deputies on 18 November 1999, the Chamber of Deputies sent it to committees for discussion. The Act is to go into effect on 1 January 2001.

<sup>40</sup> Approved by Resolution of the Government of the Czech Republic of 27 November 1992 No. 663, on the state budget of the Czech Republic for 1993.

<sup>41</sup> Government Rules for providing Subsidies from the State Budget of the CR to Civic Associations, newly approved by Resolution of the Government of the Czech Republic of 23 July 1999 No. 642, with effect as of 1 July 1999.

a number of problems (it doesn't set penalties for failure to fulfil contractual obligations, etc.).

59. Non-government non-profit organisations' sources of income may be (in summary) the following: income from the organisation's own activities, membership contributions for most civic associations, which are membership corporations, a foundation investment fund, support from municipal budgets, domestic and foreign foundation sources, the business sphere (sponsorship gifts), public collections and gifts from natural persons, part of the income from lotteries and games, tax and fee reductions.
60. In 1999, the Government Council for Non-Government Non-Profit Organisations, whose chairman is the minister without portfolio, prepared the first extensive analysis of the financing from the CR state budget of civic associations, special purpose facilities of churches, generally beneficial companies, foundations and foundation funds. After discussing the analysis, the Government charged its ministers: by the end of 1999, to prepare a method outline of nation-wide priorities in state subsidy policy toward non-government non-profit organisations, unify basic technical and organisational rules for providing state subsidies; by the middle of 2000, to standardise record-keeping about these subsidies; by the end of 2000, to implement uniform criteria for entering information about them in the information system of the Central Subsidy Register<sup>42</sup>.

#### Amount of state subsidies distributed to non-government non-profit organisations

Source: Ministry documentation for the Analysis of Financing Civic Associations, Special Purposes Facilities of Churches, Generally Beneficial Companies, Foundations and Foundation Funds from the State Budget.

61. The Government Council for Non-Government Non-Profit Organisations is also preparing materials for a Government decision on further use of funds intended for the Foundation Investment Fund (Nadační investiční fond), for the benefit of foundations<sup>43</sup>. The first phase of distributing funds for support of foundation activity took place in 1999, when funds acquired by selling shares of entities owned by the state, and gathered in a special account of the National Property Fund, in the amount of 500 million CZK were distributed. The money was divided among the following areas: social and humanitarian, health care, culture, human rights protection, environmental protection, education and others.
62. Relatively new civic associations, but very important in terms of their purpose, operating in the Czech Republic in the area of human rights since 1997, are the so-called citizens advice bureaux. A citizens advice bureau is an institutionalised form of general consulting, organised by non-government entities, which provides free, independent, confidential and unbiased services to individual citizens. Their aim is to ensure that citizens will not suffer from not knowing their rights and obligations, not being familiar with available services, or an inability to effectively express their needs. On the basis of analysis of citizens' problems the advice bureaux inform the appropriate state and local authorities about inadequacies in legislation and unsolved problems. The advice bureaux work on the British model of Citizens Advice Bureaux and form a nation-wide network.

<sup>43</sup> Under Act No. 171/1991 Coll., on the jurisdiction of bodies of the Czech Republic in matters of transfers of state property to other persons and on the National Property Fund of the Czech Republic, as subsequently amended. The Fund's property is not part of the state budget and it can be used – among other things – for transfer to the Foundation Investment Fund (FIF) for purposes of support for foundations specified by the Chamber of Deputies at the proposal of the government (§ 18 par. 2 lt. a) of the cited Act). Conditions for distributing funds from the FIF in the first phase were set by Government Resolution No. 360 of 27 May 1998; the basic rules for distribution of funds acquired through sales of shares intended for FIF in the second stage were approved by Government Resolution No. 1002 of 29 September 1999.

63. At the end of 1999 the Association of Citizens Advice Bureaux (established in February 1997) included nine advice bureaux and registered 40 new applicants for membership. Advice bureaux in the Association are bound to use uniform methods. Member organisations of the Association work with the Czech bar association; in 1997 to 1999 they received financial support particularly from the British Know-How Fund, the Ministry of Labour and Social Affairs, the SWIF fund (within the National Education Fund) and the Foundation for Development of a Civic Society. The citizens advice bureaux are already an indispensable component of social work. In February 1998 the CR Government approved the substantive outline of an Act on Social Assistance, which relies on citizens advice bureaux as one of the services of social work.

### **G. International Co-operation**

64. The Czech Republic involvement in international institutional structures plays an important role in international co-operation in the protection of human rights, including economic, social and cultural rights.

#### **The Czech Republic's membership in selected international governmental organisations**

Organisation	Czech abbreviation	International abbreviation	Membership since	
			CR	CSR
United Nations	OSN	UN	1993	1945
Organisation for Security and Co-operation in Europe	OBSE	OSCE	1993	1975

65. In connection with the prepared entry into the European Union (the "EU"), the Czech Republic makes use of technical and financial assistance from the EU, primarily through the PHARE program. Funds released to the Czech Republic from 1995 to 1997 reached a total of 224 million ECU. The assistance is shared between the European Investment Bank, The European Bank for Reconstruction and Development, the World Bank and other financial institutions. Technical and financial assistance is concentrated on:

- a) Building institutions (about 30%): strengthening democratic institutions, the state based on the rule of law and public administration through training events, technical assistance, and harmonisation with the structure of bodies in EU member states. It also concentrates on protection of intellectual property, protection of the environment,

integration of the Roma, developing welfare protection, achieving equal opportunity for women and men, etc.

- b) Investment support (about 70%) with the aim of ensuring necessary investments which will permit the Czech Republic's infrastructure to be adapted to the acquis communautaire. This support concentrates on restructuralisation of agricultural production, regional development, and investment into human and intellectual capital (including ensuring participation in the framework program for research and technological development). It also concentrates on meeting Community norms in environmental protection, agriculture, industry, work safety and health, transportation and telecommunications. Projects for developing small and medium-sized businesses are also supported.

## SPECIAL PART

### Measures adopted to fulfil obligations, by individual articles of the International Covenant on Economic, Social and Cultural Rights

#### PART A: ARTICLES 1 TO 5 OF THE COVENANT

##### ARTICLE 1

*1. All peoples have the right of self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development.*

66. The Czech Republic came into existence on 1 January 1993 by the division of the former Czech and Slovak Federal Republic, as a sovereign state founded on democratic principles, where people are free and equal in dignity and in rights. The Czech Republic, as a democratic country, freely determines its political status and freely implements its political, economic, social and cultural development. The foundation for this free decision making about the affairs of the Czech Republic is its Constitution.
67. As provided in Article 2 of the Constitution, the people exercise all state power through the bodies of legislative, executive and judicial power. Under Article 5 of the Constitution, the political system is founded on the free and voluntary formation of and free competition among those political parties which respect the fundamental democratic principles and which renounce force as a means of promoting their interests. Political decisions are based (under Art. 6 of the Constitution) on the will of the majority manifested in free voting, and the decision making of the majority takes into consideration protection of minorities.
68. As a sovereign state, the Czech Republic is an independent entity in international politics and a subject of international law. The globalisation process on the one hand, and regionalisation on the other hand, i.e. processes which lead to transferring part of a state's decision making powers to the level of international organisations, in the first case, and to a lower administrative and organisational level in the second case, restrict the states decision-making autonomy.
69. Under Article 11 of the Constitution, the territory of the Czech Republic forms an indivisible whole, whose national boundaries may be changed only by a constitutional act. Territorial self-governing units, which are part of it, are territorial communities of citizens with the right to self-government. A territorial self-governing unit can be created or dissolved only by a constitutional act. The state may intervene in their affairs only if it is required for the protection of law, and only in a manner provided by law.
70. The Czech Republic assumed the international obligations of the CSFR, including obligations arising from the International Covenant on Economic Social and Cultural Rights and the International Covenant on Civil and Political Rights<sup>44</sup>. The rights contained in both covenants are implemented primarily in the relevant provisions of the Constitution and of the Charter.

---

<sup>44</sup> Decree of the Ministry of Foreign Affairs of 10 May 1976 No. 120/1976 Coll., on the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights.

71. The right to self-determination is also supported in Article 3 of the Charter, which reads:

- (1) *Everyone is guaranteed the enjoyment of his/her fundamental rights and freedoms without regard to gender, race, colour of skin, language, faith and religion, political or other conviction, national or social origin, membership in a national or ethnic minority, property, birth, or other status.*
- (2) *Everybody has the right freely to choose his/her nationality. It is prohibited to influence this choice in any way, just as is any form of pressure aimed at suppressing a person's national identity.*
- (3) *Nobody may be caused detriment to his/her rights merely for asserting his/her fundamental rights and freedoms.*

***2. All peoples may, for their own ends, freely dispose of their natural wealth and resources without prejudice to any obligations arising out of international economic co-operation, based upon the principle of mutual benefit, and international law. In no case may a people be deprived of its own means of subsistence.***

72. The Preamble to the Constitution contains a resolution *to guard and develop together the natural and cultural, material and spiritual wealth ....* A prerequisite for fulfilment of this part of the preamble and the state's obligation to accept laws and other legal regulation is Article 7 of the Constitution. Under this article, *the state shall concern itself with the prudent use of its natural resources and the protection of its natural wealth .*

73. Nothing prevents the Czech Republic from disposing of its natural wealth and resources without detriment to any obligations arising from international economic co-operation, founded on reciprocal benefit and international law. Because no such circumstances exist, they also do not influence the enjoyment of other rights protected by the Covenant.

74. Natural wealth and natural resources, as an essential part of external living conditions, are the subject of unified and independent legal regulation of the environment. The framework law is the Act on the Environment<sup>45</sup>. This law primarily formulates the basic principles for protection of the environment and defines basic concepts. Under § 1, the Act on the Environment is based on the principle of permanently sustainable development, and §§ 11 to 16 set forth the basic rules for protection of the environment.

75. The intensive exploitation of natural wealth bordering on devastation of the environment which took place until 1990 was restricted during the nineties, with the increasing importance of the services and processing industry sector in the national economy. Public interest in the protection of and care for the environment is expressed in a set of laws (see the text on Article 12 of the Covenant par. 2b), concerning all main components of natural wealth and the environment. These laws concern protection of water, air, the earth, nature and the countryside, but also waste management, minerals mining, nuclear safety, food chains and evaluation of complex influences on the environment. Given the limited resources of natural wealth, their exploitation is inseparable from protection.

---

<sup>45</sup> Act No. 17/1992 Coll., on the Environment, as subsequently amended, particularly Act No. 123/1998, on the Right to Information about the Environment.

***3. The States Parties to the present Covenant, including those having responsibility for the administration of Non-Self-Governing and Trust Territories, shall promote the realisation of the right of self-determination, and shall respect that right, in conformity with the provisions of the Charter of the United Nations.***

76. The Czech Republic is part of the joint efforts of democratic countries to build and strengthen the community of peace, security, co-operation, democracy and prosperity. It strives to create an international community in which force is an unacceptable method of resolving disputes between states, in which threats and risks are jointly identified and addressed, and in which various forms of political and economic co-operation are developed.
77. The Czech Republic bases its relationships with other states on the principle of peaceful cohabitation and economic and cultural co-operation, in accordance with the principles of the United Nations Charter. It promotes international co-operation according to the principle of reciprocal benefit and non-interference in the internal affairs of a foreign state. On the other hand, it understands the importance of shared responsibility and international solidarity, and is prepared to take part in all activities that lead to strengthening confidence in international relations and ensuring security.
78. The Czech Republic has no territorial claims against neighbouring states and none are made against it. It is not responsible for administration of any non-self-governing or trust territories. Its relations with the other successor state to the former CSFR, the Slovak Republic, are non-conflicting, orderly, and, since 1998, even friendly and better than standard.
79. The Czech Republic is a member state of the Council of Europe. It uses its membership to develop and strengthen European legal and ethical values, pluralist democracy, a state based on the rule of law, and protection of human rights and minority rights.
80. The Czech Republic has entered the European integration process and is seeking membership in the European Union. The legal foundation for relations between the Czech Republic and the European Communities is the **Europe Agreement Establishing an Association between the European Communities and their Member States, of the one part, and the Czech Republic, of the other part, of 1993**, which entered into force on 1 February 1995. On 17 January 1996 the Czech Republic submitted an application for membership, and in 1998 it began negotiations on accession to the EU.
81. In March 1999 the Czech Republic became a member state of the North Atlantic Treaty Organisation (NATO). It thus joined an important international organisation for collective defence.

## ARTICLE 2

*1. Each State Party to the present Covenant undertakes to take steps, individually and through international assistance and co-operation, especially economic and technical, to the maximum of its available resources, with a view to achieving progressively the full realisation of the rights recognised in the present Covenant by all appropriate means, including particularly the adoption of legislative measures. General comment on its implementation.*

82. Most rights and obligations arising from the International Covenant on Economic, Social and Cultural Rights and from the International Covenant on Civil and Political Rights are part of a constitutional act - the Charter. The fundamental rights and freedoms from the International Covenant on Economic, Social and Cultural Rights governed by the Charter enjoy the protection of the judicial power. Under Article 36 par. 1 of the Charter, *everyone may assert, through the legally prescribed procedure, his/her rights before an independent and impartial court or, in specified cases, before another body.*
83. Article 10 of the Constitution, under which *ratified and promulgated international treaties concerning human rights and fundamental freedoms which have been duly ratified and promulgated and by which the Czech Republic is bound are directly applicable and take precedence over statutes*, plays an important role by the interpretation of the Covenant, acts and other legal regulations.
84. Steps taken by the Czech Republic to achieve full implementation in the economy of the rights recognised by the Covenant were directly connected to the transformation of the economy which started in 1990 and its transition to a market economy. However, there was a simultaneous effort to maintain general prosperity and a just and effective redistribution through the state budget.
85. Economic transformation in the Czech Republic, a process unconditionally necessary in order to achieve long-term economic growth permitting real fulfilment of the rights recognised by the Covenant, included the following steps:
- a) setting basic conditions for the development of private enterprise, particularly legislative (basic regulations on individual enterprise, on Corporations, about state companies, the Bankruptcy and Settlement Act, on economic competition, amendment of the Commercial Code, the Trades Licensing Act, etc.);
  - b) liberalisation of prices, which aimed to adjust prices deformed by the centrally planned economy;
  - c) liberalisation of foreign trade – the state monopoly on foreign trade was cancelled at the beginning of the transformation. Restructuring tariffs and abolishing the **Council for Mutual Economic Co-operation** led to a shift in exports from eastern European markets to the markets of member countries of the Organisation for Economic Co-operation and Development<sup>46</sup>, particularly western European countries. European Union countries' share of the Czech Republic's exports in 1999 was almost 70 percent, and the European Union's share of the Czech Republic's total imports was roughly 65 percent;
  - d) privatisation and restructuralisation – this step fundamentally changed the ownership structure in the national economy. The process of privatisation and restructuralisation

---

<sup>46</sup> Organisation for Economic Co-operation and Development (OECD).

is not finished yet; experts today consider the use of the coupon privatisation method very problematic. In an attempt to address the unfavourable situation, the Government, in April 1999, approved a program to solve the economic problems of several industrial business through revitalisation and restructuralisation<sup>47</sup>;

- e) setting the exchange rate – after the initial sharp devaluation of internal convertibility and a strongly pro-export economic policy, external convertibility was achieved in 1995, and in 1997, after introducing a floating exchange rate, all exchange restrictions were removed;
  - f) comprehensive tax reform – the tax system has been standardised since 1993; value added tax was instituted and indirect taxes were strengthened at the expense of direct taxes;
  - g) internal institutional economic and political changes – since its creation the Czech Republic has been a member state of the International Monetary Fund<sup>48</sup> and the World Bank, the World Trade Organisation<sup>49</sup> and other international economic organisations; the Czech Republic is also a party to the Central European Free Trade Agreement<sup>50</sup> and has begun the process of integration into the European Union.
86. One of the criteria used to judge the suitability of steps during privatisation was maintaining low unemployment, and thereby also social peace. When evaluating privatisation projects under the decree of the Ministry for Administration and Privatisation of National Property<sup>51</sup>, the creation of jobs was also considered. This criterion was also used in privatisation by direct sale. Support for employment was also reflected in the conditions for state support for the development of business, particularly in areas most affected by structural changes.
87. One of the basic instruments contributing to free economic, social and cultural development is regional policy. The basic framework for support of regional development is defined in the Principles of Regional Policy which the Government approved in 1998. In this document, regional policy is understood as a planning activity by the state, regional and local authorities, whose aim is to contribute to balanced and harmonic development of the various regions of the CR, to decrease differences between the level of development in individual regions, and to improve the regional economic structure.
88. The Principles of Regional Policy were adopted with the provision that they were to bridge the period until an act on support of regional development was prepared and went into effect. The Government charged the minister for local development with preparing a draft act. The law is expected to go into effect in 2001.
89. In connection with the Czech Republic's on-going preparations for acceptance into the European Union, the main benefit of the Principles of Regional Policy and the new act on support of regional development lies primarily in creating conditions for harmonising Czech regional policy with the regional policy of the Union, particularly basic principles of regional policy, their instruments, institutional safeguarding etc.

<sup>47</sup> Resolution of the Government of the Czech Republic of 14 April 1999 No. 354/1999, on Solving the Economic Situation of Certain Industrial Companies.

<sup>48</sup> International Monetary Fund (IMF)

<sup>49</sup> World Trade Organisation (WTO)

<sup>50</sup> Central European Free Trade Agreement (CEFTA)

<sup>51</sup> Decree of the Ministry for Management of National Property and its Privatisation of the CR No. 324/1991 Coll., Setting a Binding Outline for Preparation of Privatisation Project, as subsequently amended.

90. In July 1999 the Government discussed and took cognisance of a proposed Regional Development Strategy. This is a basic concept document for regional policy in the CR for the coming period, roughly until 2010. The Regional Development Strategy will serve first as a concept document for regional policy in the Czech Republic, on the basis of which program documents will be prepared at the nation-wide and subsequently also the regional level, and will also be a starting base for development programs connected to the structural funds of the European Union.

**2. *The States Parties to the present Covenant undertake to guarantee that the rights enunciated in the present Covenant will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.***

91. The non-discrimination principle is contained in:
- a) Article 1 of the Charter: *All people are free, have equal dignity, and enjoy equality of rights. Their fundamental rights and freedoms are inherent, inalienable, non-prescriptible, and not subject to repeal.*
  - b) Article 3 of the Charter par. 1: *Everyone is guaranteed the enjoyment of his/her fundamental rights and freedoms without regard to gender, race, colour of skin, language, faith and religion, political or other conviction, national or social origin, membership in a national or ethnic minority, property, birth, or other status.*
92. In connection with that, Article 3 par. 3 of the Charter states that nobody may be caused detriment to his/her rights merely for asserting his/her fundamental rights and basic freedoms. The prohibition of discrimination is also contained in Article 24 of the Charter, which states *that a person's affiliation with any national or ethnic minority group may not be to his/her detriment.*
93. These principles apply fully to the rights contained in chapter four of the Charter, i.e. to economic, social and cultural rights.
94. We also refer to the initial and periodic reports of the Czech Republic on fulfilment of obligations arising from the International Covenant on Elimination of All Forms of Racial Discrimination.
95. In the following text we refer to reports on implementation of Conventions of the International Labour Organisation, No. 100 on Equal Remuneration and No. 111 on Discrimination in Employment and Occupation.
96. An express prohibition of discrimination is contained in the amendment to the Employment Act<sup>52</sup>, which went into effect on 1 October 1999. § 1 par. 1 reads: *The right to employment (work) cannot be denied to a citizen because of his/her race, colour, sex, sexual orientation, language, faith or religion, political or other conviction, membership or activity in political parties or political movements, union organisations and other associations, nationality, ethnic or social origin, property, family, health, age, marital and family status or obligations to his/her family, except where this is stipulated by law*

---

<sup>52</sup> Act No. 167/1999 Coll., amending Act No. 1/1991 Coll., on Employment, as subsequently amended, Act No. 9/1991 Coll., on Employment and Jurisdiction of Bodies of the Czech Republic in the Employment Sector, as subsequently amended, Act No. 368/1992 Coll., on Administrative Fees, as subsequently amended, and Act No. 65/1965 Coll., the Labour Code, as subsequently amended.

or cases where there is a factual ground consisting in the preconditions, requirements and nature of the employment (work), which a citizen is to perform and which is necessary for performance of this employment (see also the text to Article 6 of the Covenant). A state body supervising observance of labour law regulations and employment regulations (i.e. the area labour office) may impose sanctions for an employer's violation of this principle. In addition, § 1 par. 2 of the Act also forbids discriminatory advertising: *Parties to legal relationships created under this Act may not be offered employment (work) contrary to the provisions of paragraph 1.* An injured person may seek individual protection through the courts.

97. The principle of forbidding discrimination is also observed by (though not expressly set forth in) generally binding legal regulations governing education and the education system, particularly the main laws, which are: the Act on the System of Elementary Schools, Secondary Schools and Post-secondary Occupational Schools (the "Schools Act")<sup>53</sup>, the Act on State Administration and Local Administration in Education<sup>54</sup>, the Act on School Facilities<sup>55</sup> and the Act on Universities<sup>56</sup>, which proclaims the democratic principles for access to higher education, obtaining appropriate professional qualifications and preparation for research and other specialised activities, under which no one may be discriminated against on the basis of skin colour, gender, religion, national or social origin or membership in an ethnic group. The antidiscrimination principle is also contained in the Act on Public Health<sup>57</sup>, which, among other things, also governs licensing of health care workers educated abroad.
98. The prohibition of discrimination is also contained in § 6 of the Consumer Protection Act<sup>58</sup>: *When selling products or providing services, the seller may not behave in conflict with good morals; in particular, he may not in any way discriminate against the consumer.* Supervision of observance of the non-discrimination obligation (supervision of consumer protection) is performed by the Czech Commercial Inspection under § 23 of the Act.
99. The appropriate state government body (in the case of discrimination, the Czech Commercial Inspection) may impose a fine of up to 500 thousand CZK for violation of obligations provided by the Consumer Protection Act; in setting the fine, the nature of the illegal activity and the extent of its results are taken into account<sup>59</sup>. In practice, discrimination is considered proven if it is found during any (including random) inspection carried out by the Czech Commercial Inspection. A fine of up to 1 million CZK can be imposed for repeated violation of obligations during one year (§ 24 of the Consumer Protection Act). Proceedings under § 23 and § 24 of the cited Act are subject to general regulations on administrative proceedings<sup>60</sup>.

<sup>53</sup> Act No. 29/1984 Coll., on the System of Elementary Schools, Secondary Schools, and Post-secondary Occupational Schools (the Schools Act), as subsequently amended.

<sup>54</sup> Act No. 564/1990 Coll., on State Administration and Local Administration in Education, as subsequently amended.

<sup>55</sup> Act No. 76/1978 Coll., on School Facilities, as subsequently amended.

<sup>56</sup> Act No. 111/1998 Coll., on Universities and Amending and Supplementing other Acts.

<sup>57</sup> Act No. 20/1966 Coll., on Public Health, as subsequently amended.

<sup>58</sup> Act No. 634/1992 Coll., on Consumer Protection, as subsequently amended.

<sup>59</sup> Under Act No. 64/1986 Coll., on the Czech Commercial Inspection, as amended by Act No. 425/1992 Coll., § 12: *In setting the amount of a fine or a disciplinary fine consideration is given to the seriousness, method, duration and consequences of the illegal behaviour, and in the case of an inspected natural person, also to the degree of fault.*

<sup>60</sup> Act No. 71/1967 Coll., on Administrative Proceedings (the Administrative Procedure Code), as subsequently amended, and Act No. 337/1992 Coll., on Administration of Taxes and Fees, as subsequently amended.

100. The prohibition of discrimination contained in the legal order is not always thoroughly observed in practice. Situations in which discrimination occurs for various reasons are described in the texts to Articles 3 and 6 of the Covenant.

### **Guarantees for protection of foreigners' rights**

101. Article 42 of the Charter states in paragraphs 2 and 3:

(2) *Aliens enjoy in the Czech and Slovak Federal Republic the human rights and fundamental freedoms guaranteed by the Charter, unless such rights and freedoms are expressly extended to citizens alone.*

(3) *Wherever legal enactment in force employ the term "citizen", is to be understood to refer to every individual if it concerns the fundamental rights and freedoms that the Charter extends to everybody irrespective of his/her citizenship.*

102. Fundamental human rights and freedoms, guaranteed by the Charter regardless of citizenship, include the right to life (Art. 6), the inviolability of the person and of his/her private life no one may be subjected to torture or to cruel, inhuman, or degrading treatment or punishment. (Art. 7), a guarantee of personal liberty (Art. 8), prohibition of forced labour or service (Art. 9), the right to preservation of human dignity, personal honour, good reputation, protection from unauthorised interference in private and family life, and protection from unauthorised gathering, publication or other misuse of personal data (Art. 10), inviolability of his/her dwelling (Art. 12), protection of confidentiality of correspondence (Art. 13), liberty of movement and the freedom of the choice of residence (Art. 14), freedom of thought, conscience, and religious conviction (Art. 15) and free expression of religion (Art. 16).

103. Limitations in chapter one of the Charter appear only in Article 11, which concerns ownership. Paragraph 2 states: *The law may also provide that certain items of property may be owned exclusively by citizens or legal persons with their headquarters in the Czech and Slovak Federal Republic.*

104. Chapter three of the Charter, which guarantees the rights of national and ethnic minorities, states in Article 24, that membership in any national or ethnic minority may not be to anyone's detriment, i.e. including a foreigner. However, positive rights (Art. 25) – the right to develop their own culture, the right to receive information in their native language and associate in national associations and the right to education in their own language, their right to use their language when dealing with officials and the right to participate in the resolution of matters concerning national and ethnic minorities – apply only to citizens of the Czech Republic.

105. Chapter four of the Charter, Article 26, guarantees everyone, i.e. including foreigners, the right to a free choice of profession, training for it, and the right to run a business and conduct other business activities; it also guarantees everyone the right to acquire the means for his/her needs by work. However, material security in the event that someone is unable to exercise this right through no fault of his/her own, is guaranteed only to citizens. Article 27 of the Charter also guarantee foreigners the right to associate in trade unions, for example.

106. Some other provisions which concern economic, social and cultural rights, apply only to citizens of the Czech Republic, particularly articles concerning participation in the social security system. Thus, for example, only citizens have a right to commensurate material security in old age and during work disability or upon loss of a provider (Art. 30) and

only citizens have the right, based on public health insurance, to free health care (Art. 31). Under Article 30 of the Charter everyone – including foreigners – who suffers from material need, has a right to only such assistance as is necessary to ensure a basic living standard. However, laws governing economic, social and cultural rights also give many rights to foreigners, either based on resident status or based on employment status.

107. The Czech legal order gives foreigners with permanent residence basically the same status as citizens. The most important exceptions are that they do not have the right to vote and are not subject to military service. In the report period, under § 7 of the Act on the Residence of Foreigners in the Czech Republic<sup>61</sup> (also the “Foreigners Act”) a permanent residence permit could be issued for purposes of family unification if a spouse, relative in a direct line or a sibling of the foreigner had permanent residence in the Czech Republic. It was also possible to issue a permit in humanitarian cases or if the residence was justified on grounds of the Czech Republic’s foreign policy interests.
108. Chapter five of the Charter, which guarantees the right to judicial and other legal protection, applies fully to foreigners.
109. In the report period, conditions for entry and stay of foreigners in the Czech Republic were set by the Act on Foreigner’s Stay and Residence. The actual proceedings in which foreigners apply for long term residence in the Czech Republic took place under the relevant provisions of the Act on Administrative Proceedings<sup>62</sup>. If an application was denied, a foreigner had the right to use all ordinary and extraordinary appeals under that Act. Giving foreigners the right to judicial review of administrative decisions made under the Foreigners Act, which considerably strengthened the legal certainty of foreigners, was based on a decision of the Constitutional Court of the CR (No. 160/1998 Coll.), which abolished, with effect as of 13 May 1999, § 32 par. 2 of the Act on Foreigners’ Stay and Residence, which considerably restricted the right to judicial protection. A second decision (No. 159/1998 Coll.) concerned repealing a prohibition on stay in situations of an obligation (unspecified) imposed by a generally binding legal regulation and granting the suspensor effect of an appeal against a ban on stay.
110. In view of the fact that the previous Foreigners Act no longer met actual needs in the changing situation, the Government submitted a new draft Act on the Residence of Foreigners in the Czech Republic. The new Act on the Residence of Foreigners was approved and went into effect on 1 January 2000<sup>63</sup>.
111. Refugees and applicants for refugee status are a special category among foreigners. Article 43 of the Charter states that the Czech Republic grants asylum to foreigners who are persecuted for exercising their political rights and freedoms. Asylum may be denied to someone who acted contrary to fundamental human rights and basic freedoms. Another legal regulation governing the status of refugees is the Convention on the Legal

---

<sup>61</sup> Act No. 123/1992 Coll., on Foreigners’ Stay and Residence in the CSFR, as subsequently amended. As of 1 January 2000 a new Act on Foreigners’ Stay and Residence in the Czech Republic is in effect, No. 326/1999 Coll.

<sup>62</sup> Act No. 71/1967 Coll., on Administrative Proceedings, as subsequently amended.

<sup>63</sup> Act No. 326/1999 Coll., on Foreigner’s Stay and Residence in the Czech Republic and Amending Certain Acts. Conditions for a long-term residence permit are newly-regulated in §§ 65 to 67. Without meeting the condition of a previous uninterrupted stay, a foreigner may apply for a permanent residence permit for purposes of family reunification (with a citizen of the CR), for humanitarian reasons, or in the political interest of the CR. Under § 66 on Permanent Residence Permits, one can also apply after 8 years of uninterrupted stay in the CR for purposes of family reunification with a foreigner with permanent residence. Under § 67 every foreigner may apply for a permanent residence permit after a total of 10 years of uninterrupted stay in the CR.

Status of Refugees<sup>64</sup>. In the report period, the domestic law in effect was the Refugees Act<sup>65</sup>. This Act governed not only the proceedings on the legal status of refugees, but also their actual status.

112. In the report period, the legal status of person who were granted refugee status (“refugees”) was based on the Refugees Act. Refugees were guaranteed the same status as citizens of the Czech Republic, except that they did not have the right to vote, were not subject to military service, and could acquire real estate and perform paid work only under conditions provided by special regulations for foreigners. However, like foreigners with permanent residence, under the Employment Act they had equal rights with citizens of the Czech Republic in terms of employment opportunity. They did not need employment permits.
113. Refugees were also considered foreigners with permanent residence for purposes of health insurance and social security, as well as for purposes of acquiring and losing citizenship of the Czech Republic under the Act on Acquiring and Losing Citizenship<sup>66</sup>. Persons with refugee status, unlike other foreigners, did not have to submit documentation about losing their previous citizenship, and they could also be granted an exception from the requirement of five years residence before filing an application.
114. Until 31 December 1999, the Refugees Act also governed the status of applicants for refugee status. In the report period, applicants for refugee status were required to remain in an assigned refugee camp during the asylum proceedings. An exception could be granted only by the management of the refugee camp, with the consent of the deciding administrative body. Applicants were entitled to housing, free meals and pocket money, and were provided free basic health care. If applicants were granted an exception and they were housed privately, the person who housed them also had to commit to providing them material security. In the report period, under § 7 of the regulation, an applicant was entitled to free provision of an interpreter for the asylum proceedings and was also exempt from all expenses or fees connected with the proceedings.
115. A new asylum law was approved in December 1999. The new Asylum Act<sup>67</sup>, which went into effect on 1 January 2000, is in compliance with valid international regulations on refugees and protection of human rights.

<sup>64</sup> Announcement of the Ministry of Foreign Affairs of the CR No. 208/1993 Coll., the Convention relating to the Status of Refugees (of 1951) and the Protocol to that Convention (of 1967).

<sup>65</sup> Act No. 498/1990 Coll., on Refugees, as subsequently amended.

<sup>66</sup> Act No. 40/1993 Coll., on Acquiring and Losing Citizenship of the Czech Republic, as subsequently amended, in particular the amendment No. 194/1999 Coll.

<sup>67</sup> Act No. 325/1999 Coll., on Asylum and Amending Act No. 283/1991 Coll., on the Police of the Czech Republic, as subsequently amended.

## **The status of Slovak citizens – former citizens of the CSFR**

116. In 1993-99 there was a special category of foreigners, former citizens of the CSFR, who became citizens of the Slovak Republic as of 1 January 1993, although they had permanent residence or lived permanently in the Czech Republic. The Act on Acquiring and Losing citizenship originally addressed acquisition of citizenship of the successor state - the Czech Republic – without regard for the will of the individuals who had been citizens of the CSFR and had permanent residence in the Czech Republic<sup>68</sup>.
117. Many of these former citizens of the CSFR could not, for various reasons, make the election of citizenship of the Czech Republic, which could be made until 30 June 1994 only under conditions provided by § 18 of the Act. Under conditions provided by § 7 par. 1 lt. c) of the Act, the election could be made only by someone who had not been sentenced with legal effect during the previous five years for an intentional crime. The same conditions (except the length of required residence in the Czech Republic, which was extended, after the end of the option period, from two to five years), were also set for granting citizenship on the basis of an application. The process itself of meeting the conditions for an application for citizenship was very demanding financially and administratively. For many applicants with lower education, particularly for many Roma, it was a serious obstacle.
118. As a result of criticism of the cited Act – both international and from non-government organisations monitoring human rights in the Czech Republic – the Act was progressively amended<sup>69</sup>. The problem was not completely overcome until the amendment to the Act on Acquiring and Losing Citizenship, which went into effect on 2 September 1999<sup>70</sup>. This amendment considerably simplifies the procedure for acquiring citizenship for certain citizens of the Slovak Republic. Under § 18 of the Act, a natural person who was a citizen of the CSFR as of 31 December 1992 and who had registered or actual residence in the Czech Republic, and this residence is still in effect, can acquire citizenship of the Czech Republic by proclamation. Such a person does not have to submit a document on losing previous citizenship, and can therefore have dual citizenship (Czech and Slovak). This person also does not have to submit an extract from the criminal register. Such person acquires citizenship of the Czech Republic as of the day a certificate of citizenship is issued.
119. The amendment of the cited Act also confirms the citizenship of those Czech citizens who, during the period provided by the Slovak Citizenship Act<sup>71</sup> elected the citizenship of the Slovak Republic. The Act thus confirms the previous position of the Constitutional Court, that a person who was a Czech citizen as of 1 January 1993 and chose Slovak citizenship after the division of the state did not lose Czech citizenship by making this

---

<sup>68</sup> The dividing criterion was neither the will of the citizen of the former federation nor his permanent residence, but citizenship of one of the republics in the federation (in accordance with Act No. 165/1968 Coll., on Principles of Acquiring and Losing Citizenship, and Act No. 39/1969 Coll., as subsequently amended), which, until the dissolution, had no practical importance other than for “parity” in appointing citizens of both republics to federal government positions and it was not even indicated in identification papers.

<sup>69</sup> Amendments to the Act on Acquiring and Losing Citizenship of the Czech Republic: Act No. 272/1993 Coll., Act No. 337/1993 Coll., Act No. 140/1995 Coll. and particularly Act No. 139/1996 Coll., where § 11 of the Act was expanded by a new par. 3, under which the Ministry of the Interior could waive the condition of a clean criminal record if the applicant was a citizen of the Slovak Republic or a former citizen of the Slovak Republic who had an uninterrupted stay/residence in the Czech Republic as of no later than 31 December 1992.

<sup>70</sup> Act No. 194/1999 Coll., Amending Act No. 40/1993 Coll., on Acquiring and Losing Citizenship of the Czech Republic, as subsequently amended.

<sup>71</sup> Act No. 40/1993 Coll., on Citizenship of the Slovak Republic.

election. Because the Slovak Government expressed a willingness to renew Slovak citizenship under the Slovak Act for those former Slovak citizens who gave up their citizenship at the time of the break-up of the federation, in connection with acquiring Czech citizenship, the opportunity for dual Slovak and Czech citizenship has also opened up for roughly 300 thousand Czech citizens living permanently in the Czech Republic who were Slovak citizens (often only formally) in the time of the CSFR. These citizens, if they are granted citizenship of the Slovak Republic, will not lose citizenship of the Czech Republic. Similarly, Czech citizens who live in Slovakia (i.e. 4 to 5 thousand people), will not lose citizenship of the Czech Republic if they are granted Slovak citizenship. A minor amendment – the ability to waive submission of a document on release from their original state citizenship for those persons who have lived in the Czech Republic for more than 20 years – applies particularly to Polish and Bulgarian citizens.

### ARTICLE 3

***The States Parties to the present Covenant undertake to ensure the equal right of men and women to the enjoyment of all economic, social and cultural rights set forth in the present Covenant.***

120. The principle of equality of men and women is contained in the Constitution of the Czech Republic and the Charter of Fundamental rights and freedoms. Article 3 par. 1 of the Charter states that *Everyone is guaranteed the enjoyment of his/her fundamental rights and freedoms without regard to gender*. This principle is also contained in provisions of the Civil Code<sup>23</sup> and the Civil Procedure Code<sup>20</sup>, the Criminal Code<sup>17</sup> and the Criminal Procedure Code<sup>19</sup>, the Administrative Procedure Code<sup>23</sup>, the Labour Code and the Employment Act<sup>72</sup>, the State Social Care Support Act<sup>73</sup>, the Act on the Family<sup>74</sup> and others.
121. The Charter and other laws protect the individual rights of men and women and formally ensure that the rights guaranteed by the Covenant can be exercised equally by both sexes. Therefore, most legal regulations formulate rights and obligations neutrally in terms of gender. Under Article 29 of the Charter, however: *Women, juveniles, and persons with health problems have the right to increased protection of their health at work and to special work conditions*.
122. Individual rights protected by the Covenant include:
- a) the right to work, education and training for work (see Article 6 of the Covenant),
  - b) the right to just and favourable working conditions, work safety, promotion in employment and the right to rest (see Article 7 of the Covenant),
  - c) the right to form a trade union (see Article 8 of the Covenant),
  - d) the right to social security (see Article 9 of the Covenant),
  - e) the right to an adequate standard of living for a citizen and his/her family (see Article 11 of the Covenant),

---

<sup>72</sup> Act No. 65/1965 Coll., the Labour Code, as subsequently amended.

Act No. 1/1991 Coll., on Employment, as subsequently amended.

<sup>73</sup> Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>74</sup> Act No. 94/1963 Coll., on the Family, as subsequently amended.

- f) the right to the highest attainable standard of physical and mental health (see Article 12 of the Covenant),
- g) the right to education (see Article 13 of the Covenant).

A brief summary of individual rights and their provision with regard to gender (more detailed information, including citations of laws, is contained in the text to the appropriate articles of the Covenant).

123. **The right to work** is formulated neutrally, and no one may be discriminated against on the basis of gender in access to it and in performance of work. The right to preparation and training for work is also neutrally formulated. Women are excluded from certain kinds of work for health reasons; these are, in particular, work underground and work which could endanger their role as mothers.
124. The number of women working have traditionally been high – over 90 percent of women at a productive age work or are seeking work. Women are roughly 45 percent of the total labour force in the national economy. The number of women seeking employment through the Labour Offices exceeds 50 percent.
125. **The right to just and favourable working conditions, and work safety** is also formulated neutrally. In addition, the right to favourable working conditions also includes a requirement for special protection for women, particularly women who are pregnant or nursing and mothers of small children. This requirement justifies various women's entitlements for leave from work (e.g. maternity leave, additional maternity leave), as well as employers' obligation to treat women differently than men (e.g. during pregnancy, to transfer them to different work or send them on business trips only with their consent), or to refrain from certain acts toward them (e.g. not to dismiss them from employment during pregnancy). The present legal framework contains certain elements of inequality in the status of male and female employees which are unjustified in terms of the principle of equal treatment: e.g. entitlements based on care for small children, for which men are also required to be single parents. It is also unjustified that the so-called additional maternity leave (or parental leave, until a child reaches the age of 3) basically pertains to the child's mother, and only exceptionally to the father. Therefore, the amendment to the Labour Code introduces the principle of equal treatment of men and women into employment relationships so as to be in accordance with the law of the European Community.
126. Safety and protection of health at work of pregnant women and mothers is provided at a relatively high European level: institutions like maternity leave, transfer to different work, the ability to refuse night work, protection from dismissal during pregnancy and care for small children are functioning, ingrained and observed by employers. The right to **promotion in employment** and the right to **rest** are also formulated neutrally in terms of gender.
127. The right to **form trade unions** is formulated neutrally. More women than men are organised in unions.
128. The right to **social security** belongs equally to women and to men. Legal regulations do not contain any elements of inequality, except different age requirements for retirement (lower for women, depending on the number of children raised). Nonetheless, this difference too is gradually being evened out; the new Pension Insurance Act in 1995 reduced it by 2 years compared to the previous law.
129. The right to **an adequate standard of living** for a citizen and his/her family and the right to the highest attainable level of **physical and mental health** is also formulated

neutrally. Conditions for providing welfare benefits (state welfare support, social care, social neediness and unemployment benefits) are not differentiated by gender; conditions for health care are also not differentiated.

130. The right to **education**: Although it is consistently formulated neutrally, there are individual fields of education to which girls do not, in fact, have access, or in contrast, which serve primarily for the education of girls. The Committee on the Elimination of Discrimination against Women<sup>75</sup> criticised this fact in discussing the initial report on fulfilment of obligations arising from the Covenant on Elimination of All Forms of Discrimination against Women. It also criticised the fact that the Government does not guide girls to choose technical fields of study. The justification of reasons for which girls are prevented from access to the relevant education activities is currently being verified, and changes are being prepared in an appendix to the Decree of the Ministry of Education, Youth and Sports on Secondary Schools<sup>76</sup>, where the problematic fields are named. The changes will be made so that they will not be in conflict with EEC Council Directive No. 76/207/EEC. They also state that it is not to the detriment of member countries to exclude from the scope of equal treatment of men and women such work activities, including specialised preparation for them, for which the worker's gender is a decisive factor.
131. Women seeking a career in the armed forces have more difficult access to education. The practice of accepting girls to military schools and subsequently placing them in military professions is in conflict with Article 10 of the Convention on the Elimination of All Forms of Discrimination Against Women. Under Articles 3 and 6 of the Covenant, the states parties undertake to adopt measures to ensure equal conditions for choice of employment and occupation, as well as access to studies for men and women in all kinds of expertise and training. Generally there are no professions in the Army of the Czech Republic which women could not perform, but certain jobs (e.g. that of a pilot) are less suitable for women due to their physical demands, and female applicants for studies at military schools are warned of this fact. Accepting girls into fields of study at military secondary schools and universities is guided by the army's needs to fill jobs, which the army guarantees to girls after they are accepted for study. The Ministry of Defence attempts to harmonise the needs and interests of the military organisation with the increasing interest of girls in non-traditional military professions. The Ministry of Defence began partial correction in the 1999/2000 school year, when quotas for accepting girls to military schools began to be eliminated.
132. **Equality of men and women in marital and family matters** is expressed in the Act on the Family. In 1998 an important amendment was passed<sup>77</sup>. For more on the Act on the Family see the text to Article 10 paragraph 1 of the Covenant.
- 133. Promoting the right to equal status of men and women** (equal treatment): Everyone is entitled to turn to the courts with a complaint about violation of the principle of equality without regard to gender. The matter is handled in civil court proceedings in 1999. In the interest of making implementation of the right easier, the Government proposed shifting the burden of proof from the plaintiff to the defendant in an amendment to the Civil

---

<sup>75</sup> CEDAW - Committee on the Elimination of Discrimination against Women.

<sup>76</sup> Decree of the Ministry of Education, Youth and Sports of the CR No. 354/1991 Coll., on Secondary Schools, as subsequently amended.

<sup>77</sup> Act No. 94/1963 Coll., on the Family, as subsequently amended, particularly amendment No. 91/1998 Coll.

Procedure Code<sup>78</sup>. The draft § 133a of the amendment reads<sup>79</sup>: *In labour matters, the court shall deem claimed facts about the party being directly or indirectly discriminated against on the basis of his/her gender proven, unless the contrary is shown in the proceedings.*

134. Observance of the principle of equal treatment of men and women in employment is monitored by employment inspection bodies (Labour Offices and the Ministry of Labour and Social Affairs), which impose administrative fines on employers if they find violations. The mechanisms protecting an individual citizen from discrimination on the basis of gender should be considerably strengthened by the Czech Republic's accession to the Optional Protocol to the Convention on the Elimination of All Forms of Discrimination Against Women, which introduces the institution of individual reporting of violation of rights. The Protocol contains provisions permitting individual reports on violations of rights guaranteed by the Convention to be submitted to the Committee on the Elimination of Discrimination Against Women. The Government approved the proposal for ratification of the optional protocol in November 1999<sup>80</sup> and submitted it to the Parliament for approval.
135. **The Convention on the Elimination of All Forms of Discrimination against Women** was signed in the name of the Czechoslovak Socialist Republic in Copenhagen on 17 July 1980 (further in this text to Article 3 of the Covenant the "Convention"), entered into force for the Czechoslovak Socialist Republic on 18 March 1982<sup>81</sup> and became part of the legal order of the Czech Republic.
136. In accordance with Article 18 paragraph 1 of the Convention, the Czech Republic, in 1994, submitted to the Committee on the Elimination of Discrimination against Women<sup>82</sup> (the "Committee") an extensive initial report on the Convention for the years 1993 - 1994. The Committee's preparations for discussions of this report were only begun at the end of 1997. Therefore, in discussing the initial report before the Committee on 30 January 1998, the Czech Republic added information on developments in 1994 to 1997.
137. In 1999 the Czech Republic submitted to the Committee its second, periodic report, which contains primarily a description of important changes which have occurred since preparation of the initial report, i.e. for the period from 1 January 1995 to 30 June 1999. With reference to the previous report, it sets forth legal and other measures adopted which document progress achieved in eliminating discrimination against women, significant changes in the status and equal rights of women, procedures leading to removing remaining obstacles to the inclusion of women in political, social, economic and cultural life and overcoming problems which were pointed out by the committee after discussing the CR's initial report on fulfilment of the Convention.
138. The report also contains detailed references to official internal documents concerning the equality of men and women approved by the Government of the Czech Republic. They are:

---

<sup>78</sup> Act No. 99/1963 Coll., the Civil Procedure Code, as subsequently amended. The government approved the draft amendment to the Civil Procedure Code by resolution of 16 June 1999 No. 589/1999 and submitted it to the Parliament. The amendment is to go into effect on 1 February 2001.

<sup>79</sup> Under Directive No. 97/80/ES, on the Burden of Proof in Case of Discrimination Based on Sex.

<sup>80</sup> Resolution of the Government of the Czech Republic of 29 November 1999 No. 1284, on the proposal for signature and ratification of the Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women. The Czech Republic signed the optional protocol at the 54th session of the UN General Assembly on 10 December.

<sup>81</sup> Decree of the Minister of Foreign Affairs No. 62/1987 Coll., on the Convention on the Elimination of All Forms of Discrimination against Women.

<sup>82</sup> CEDAW – Committee on the Elimination of Discrimination Against Women.

- a) The Government's Priorities and Procedures in Promoting Equality between Men and Women<sup>83</sup> (the "Priorities"), prepared by the Ministry of Labour and Social Affairs and approved by the Government. By resolution, the Government charged individual ministers to accept and implement measures for actual achievement of equal rights between men and women. The document is divided into separate areas of Government priorities, which are classified by importance. To meet the aims stated in the text, the Government set forth specific measures (procedures), deadlines for their fulfilment, and responsible parties. Each year the Government evaluates how these measures are being fulfilled. Depending on the results of the evaluation, the Government adds new measures or changes the original ones. Thus, this is an open document, whose content can be adapted to current needs. Its preparation, evaluation and updating are shared not only by ministries and lower levels of state administration directly responsible for the formal and actual state of equality between men and women, but also the interested public, particularly non-government organisations of women and social partners (i.e. trade unions and employers' organisations).
- b) A summary report on fulfilment of the Priorities<sup>84</sup>. The evaluation also included proposals for new formulation of original measures, proposals for adding to them, and a proposal to abolish a measure which had already been fulfilled.
139. In April 1999 the Czech Republic submitted to the UN General Assembly evaluation of fulfilment of the conclusions of the Beijing Conference. The report was prepared by the Ministry of Labour and Social Affairs.
140. The Europe Agreement establishing an association between the European Communities and their Member States of the one part and the Czech Republic of the other part, concluded on 4 October 1993, binds the Czech Republic to progressively adapt its existing and future legal regulations so that they will be harmonised with EU regulations. This also means introducing the principle of equal treatment of men and women into all areas of employment relationships and social security. The result is the Czech Republic's commitment to formally ensure legal conditions for exercising and actual implementation of the principle of equal pay for men and women and the principle of equal treatment of men and women, above all in employment, in access to professional education, in conduct of independent trades and in social security.
141. The Government makes adoption of all its measures subject to the principle of equal opportunity for men and women, as it considers application of this principle an effective method for achieving true equality. A prerequisite for applying this principle is raising awareness about the equality of men and women. Individual ministers are required *to include in administrative offices' employee education programs education in human rights, with attention paid to applying the principle of equal opportunity for men and women* (see the Priorities).
142. Independently of the existence of this fundamental document, in May 1999 the Government adopted a new employment policy, called the National Employment Plan<sup>85</sup>. It includes measures aimed at creating equal opportunities for men and women in the labour market. Preparation of the plan verified in practice whether and how individual workplaces are prepared to give priority to the equal opportunity principle over other principles. Based on the experience acquired, and with regard to the results of this method, the Government charged its ministers to have their ministries, on an on-going

<sup>83</sup> Resolution of the Government of the Czech Republic of 8 April 1998 No. 236,.

<sup>84</sup> The Government approved the summary report by resolution of 10 May 1999 No. 452.

<sup>85</sup> Government Resolution of 5 May 1999 No. 418, on the National Employment Plan.

basis, subject planning, decision making and evaluation processes, in all phases of their preparation and implementation, to the viewpoint of equal opportunity for men and women. This is an express commitment by the Government to implement a mainstreaming policy.

143. In connection with this, an amendment to the Employment Act went into effect on 1 October 1999<sup>86</sup>. Amendments of other important laws concerning labour law relationships were presented by the Minister of Labour and Social Affairs in November 1999. The amendments are expected to go into effect in July 2000. They are amendments to the Labour Code, the Act on Wages and Remuneration for Stand-by and Average Earnings<sup>87</sup> and the Act on Wages and Remuneration for Work Stand-By in Budget and Certain Other Organisations and Bodies<sup>88</sup>.

144. The draft amendments contain the following changes:

a) draft amendment of the Labour Code:

- sets the principle of equal treatment of all employees in employment (in access to professional education, in promotion to higher positions or other promotion in employment, in provision of working conditions, in pay),
- forbids discrimination on the basis of gender, marital or family status or family obligations in labour law relationships, including a ban on indirect discrimination,
- forbids sexual harassment,
- forbids retaliatory action (punishment, disadvantaging) of employees who legally seek enforcement of their rights and entitlements arising from labour law relationships (i.e. including an entitlement to equal treatment of men and women in employment),
- governs employees' claims in cases of violation of rights and obligations arising from equal treatment of men and women or undesirable behaviour in the workplace,
- introduces so-called parental leave (by transforming of the existing "additional" maternity leave), and also introduces the principle of equal treatment of both sexes into other conditions for employees caring for children,
- will introduce an employer's obligation to inform an employee about all legal regulations on protection against unequal treatment,
- charges employers to inform women who are pregnant, nursing or have recently given birth about safety and health protection in work.

b) draft amendment of the Act on Wages, Remuneration for Work Stand-By and Average Earnings and the amendment to the Act on Wages and Remuneration for Work Stand-By in Budget and Certain Other Organisations and Bodies:

- will introduce a system of cataloguing jobs and their evaluation for employers who conduct a business,
- will formulate more precisely the principle of equal pay for equal work regardless of gender, i.e. "equal pay for equal work and for work of equal value".

145. Together with the cited laws, changes are also made (by indirect amendment, through the amendment to the Labour Code and other laws) to the Act on the Service Relationships of Officers of the CR Police<sup>89</sup>, the Act on the Security Information

---

<sup>86</sup> Act No. 167/1999 Coll. contains in § 1 a prohibition on discrimination against citizens, including discrimination based on gender, in the right to employment, and a prohibition on discriminatory advertising.

<sup>87</sup> Act No. 1/1992 Coll., on Wages and Remuneration for Stand-by and Average Earnings, as subsequently amended.

<sup>88</sup> Act No. 143/1992 Coll., on Wages and Remuneration for Work Stand-By in Budget and Certain Other Organisations and Bodies, as subsequently amended.

<sup>89</sup> Act No. 186/1992 Coll., on the Service Relationship of Officers of the CR Police, as subsequently amended.

Service<sup>90</sup> and the Act on Professional Soldiers<sup>91</sup>. The principle of equal treatment of men and women is also introduced into individual kinds of service relationships, in the same extent as in the Labour Code (including equalising the status of male and female officers caring for small children).

146. EEC Council Directive No. 76/207/EEC, on implementation of the principle of equal treatment of men and women in access to employment, professional preparation, in promotion in employment and working conditions, states in Article 2, that *this decree shall be without prejudice to the right of Member States to exclude from its field of application those occupational activities and, where appropriate, the training leading thereto, for which, by reason of their nature or the context in which they are carried out, the sex of the worker constitutes a determining factor*. The implementing decree of the Ministry of Health to the Labour Code also applies to this point<sup>92</sup>. The extensive provisions of §§ 1 to 3 of this decree contain definitions of these kinds of work and workplaces.
147. The continuing differences in pay for women and men are thus a permanent focus of the attention of the Government and central state administration bodies. Therefore, in the Czech Republic, earnings by gender are tracked as one of the most important classification criteria in statistical sample surveys on employee wages. This research was last done for the years 1996 and 1997.
148. If we wish to speak about the wage disparity of women, it is necessary to have a general overview of the position of women in the labour market. The structure of women's jobs differs from men's jobs, and this factor is a strong influence on average earnings. Other distinguishing factors are the branches of economic activity and the type of business (ownership sector), employee qualification requirements (education, pay scale), but also age, in relation to the working career of men and women. Average wages are also influenced by many precise factors – particularly the employees' work hours and job description (the work performed). In view of this, the difference found in averages wages of men and women cannot be said to be a clear indication of discrimination by gender.

#### **Average gross monthly wage of employees**

Year	Employees, total	Men	Women	Correspondence rate <sup>1)</sup>
1996	9,610	10,874	8,026	73.8
1997	11,017	12,632	9,275	73.4

1) The correspondence rate is expressed by the ratio of women's wages to men's wages in percent.

149. An analysis prepared in connection with researching employee wages in all sectors of the national economy<sup>93</sup>, reached the following conclusions:

<sup>90</sup> Act No. 154/1994 Coll., on the Security Information Service, as subsequently amended.

<sup>91</sup> Act No. 221/1999 Coll., on Professional Soldiers.

<sup>92</sup> Decree of the Ministry of Health No. 261/1997 Coll., to the Labour Code, which Specifies Work and Workplaces which Are Forbidden to All Women, Pregnant Women, Mothers until the End of the Ninth Month after Childbirth and Juveniles. It also specifies conditions under which juveniles (juveniles) – including women – may exceptionally perform this work for reasons of training for occupations. The decree is not of a discriminatory nature; it protects a woman in her reproductive function.

<sup>93</sup> Holý, D. (1999): Analysis of wage disparity between men and women on the basis of research of wages of employees. Statistika (Statistics) 2/99, Czech Statistical Office, Prague.

- Work hours strongly affect the correspondence rate of average wages; in 1997 only 2.7 percent of men worked less than full time, but 8.5 percent of women did; men also have a higher number of overtime hours.
- Women generally have a higher education level than men, and predominate primarily in categories with completed secondary education. The two highest levels – post-secondary education and scientific training have more men.
- Women predominate in, on the one hand, non-manual jobs, except management and supervisory employees, and among unqualified labourers on the other hand; in contrast, men predominate in qualified labourer professions. There are more men than women in management positions (56%).
- In classification by tariff grades, or pay classes (which indicate the employee's qualifications) women predominate in the lower grades, men in the higher grades. This corresponds to the foregoing types of classifications. Men predominate increasingly in the highest three grades; the highest grade has only 12 percent women.
- Women's working careers are different in timing than men's careers (interrupted by maternity leave, sometimes repeatedly). Generally, an employee's average wage is highest at the end of the working career; in view of their earlier retirement, women reach their maximum at the age of 55-59 (wage growth from the beginning of the career of under 33%), men after the age of 60 (growth of 39%).
- The correspondence rate differs markedly between individual branches of the national economy. It is lowest in trade, motor vehicle repair, and consumer goods (62.3%), then in health care (62.2%), finance and insurance (66.6%). The highest correspondence rate is in transportation, warehousing, the postal service and telecommunications, in other public, social and personal services (82%) and in construction. Women are relatively best paid in comparison to men in fields where there are fewest of them, with the exception of education (78.3% of the average men's wage). However, women's employment is structured more advantageously than men's (women in finance exceed the average women's wage). Women in the same employment structure by sector as men would receive only 72.12 percent of men's wages.
- Women's wage inequality differs by individual jobs: in some areas it is minimal (e.g. elementary school teachers), in other areas women receive considerably less (e.g. printers and typesetters – 58% of men's wages with the same qualifications).

### Ratio of average women's wages to average men's wages by education and age (in %)

		1997	1998
Education	Elementary	74.9	74.6
	Apprenticeship and secondary education without academic diploma	69.1	71.6
	Completed secondary with academic diploma	75.5	72.9
	Post-secondary	68.9	64.9
Age	Under 19	91.4	84.6
	20 – 24	85.0	82.6
	25 - 29	76.3	73.4
	30 - 34	70.5	67.1
	35 – 39	72.6	68.4
	40 – 44	73.0	69.4
	45 - 49	74.4	70.6
	50 - 54	76.8	74.1
	55 - 59	84.9	77.4
	60 and over	68.0	65.5

Source: Czech Statistical Office, research on employee wages

150. To summarise the conclusions: women generally predominate in branches with a lower wage level. They have better primary qualifications for entry into the labour market. However, they have a disadvantageous structure in terms of specific positions in the workplace. Feminised branches generally have lower wages.

#### ARTICLE 4

*The States Parties to the present Covenant recognise that, in the enjoyment of those rights provided by the State in conformity with the present Covenant, the State may subject such rights only to such limitations as are determined by law only in so far as this may be compatible with the nature of these rights and solely for the purpose of promoting the general welfare in a democratic society.*

151. The Charter of Fundamental Rights and Freedoms states in Article 2 par. 2 that *state authority may be asserted only in cases and within the bounds provided for by law and only in the manner prescribed by law. Under par. 3, everyone may do that which is not prohibited by law, and nobody may be compelled to do that which is not imposed upon him/her by law.*

152. Article 4 of the Charter states:

- (1) Duties may be imposed upon persons only on the basis of and within the bounds of law, and only while respecting the fundamental rights and freedoms of the individual.*
- (2) Limitations may be placed upon the fundamental rights and basic freedoms only by law and under the conditions prescribed in the Charter of Fundamental Rights and Freedoms.*

- (3) *Any statutory limitation upon the fundamental rights and freedoms must apply in the same way to all cases which meet the specified conditions.*
- (4) *In employing the provisions concerning limitations upon the fundamental rights and freedoms, the essence and significance of these rights and freedoms must be preserved. Such limitations are not to be misused for purposes other than those for which they were laid down.*
153. Article 9 of the Constitution states, in addition, that *any changes in the essential requirements for a democratic state governed by the rule of law are impermissible*. It further states that *legal norms may not be interpreted so as to authorise anyone to do away with or jeopardise the democratic foundations of the state*.
154. The Charter also, in Article 9 par. 2c and 2d, on forced labour, permits, on the basis of law, services required in the event of natural disasters, accidents or other danger which threatens life, health or considerable property, as well as actions required by law for protection of the life, health or rights of others.
155. The Charter, in Article 11 par. 4, permits expropriation or some other mandatory limitation upon property rights, in the public interest, on the basis of law, and for compensation. Article 12 par. 3 states, that other encroachments upon the inviolability of a dwelling (except house searches for purposes of criminal proceedings) may be permitted by law only if such is necessary in a democratic society for the protection of the life or health of individuals, for the protection of the rights and freedoms of others, or in order to avert a serious threat to public security and order.
156. Article 14 par. 3 of the Charter similarly permits restriction of freedom of movement and residence by law, if it is unavoidable for the security of the state, maintaining public order, etc. A similar restriction of fundamental rights and freedoms is contained in Article 16 par. 4, which concerns religious freedoms.
157. The Constitutional Act on the Security of the Czech Republic<sup>94</sup> provides **restriction of certain rights and freedoms** (and imposition of certain obligations) in a state of emergency, a state of endangerment or a state of war. The Government (in case of danger of delay, the prime minister) may declare a state of emergency for no longer than 30 days in the event of a natural disaster, ecological or industrial breakdown or accident which considerably endangers life, health, property or internal order and security. The Government without delay informs the Chamber of Deputies without delay about the declaration of a state of emergency, and the latter can repeal or extend the declaration.
158. A state of national endangerment occurs when the state's sovereignty or territorial integrity is endangered, but also if its democratic foundations are endangered. Declaring a state of national endangerment is decided by the Chamber of Deputies and the Senate<sup>95</sup>.

---

<sup>94</sup> Constitutional Act No. 110/1998 Coll., on the Security of the Czech Republic. Art. 2: (1) *If there is a direct threat to the sovereignty, territorial integrity, or democratic foundations of the Czech republic, or to a considerable extent internal Decree and safety, lives and health, property or the environment, or if it is necessary to fulfil international commitments on mutual defence, depending on intensity, territorial scope and the nature of the situation, a state of emergency, state of national endangerment, or state of war may be declared. (2) A state of emergency and a state of national endangerment are declared for a limited or for the entire territory of the state; a state of war is declared for the entire territory of the state.*

<sup>95</sup> Constitutional Act No. 110/1998 Coll. on Security of the Czech Republic. Art. 7: (1) *Parliament may, at the proposal of the government, declare a state of national endangerment, if the state's sovereignty or territorial integrity or democratic foundations are directly threatened. (2) The approval of a majority of all deputies and the approval of a majority of all senators are required to pass a resolution on declaration of a state of national endangerment.*

If the mandate of deputies, senators, the president of the republic or a representative body is to end during a state of national endangerment or a state of war, it may be extended by six months.

159. The cited constitutional act was initially criticised by the public for being an overly extensive restriction of fundamental rights and freedoms in the cited situations, because, at the time it was passed, the act had not been made specific in laws which would specify in detail the extent and manner of restricting certain rights and imposing specific obligations on legal entities and natural persons. These laws were passed and went into effect as of 1 December 1999.
160. The Charter simultaneously, under Article 44, permits restricting by law certain rights of members of the armed forces: the right of assembly, right to petition and the right to form trade unions, if related to performance of their duties. It also permits statutory restriction of certain other rights, in cases of measures which are necessary in a democratic society for national security. On the basis of the foregoing, the Act on Professional Soldiers<sup>96</sup> contains restrictions on the right of assembly (§ 44), right of association (§ 45) and the right to freely express religion or faith (§ 46).
161. Under the new Act on Ensuring Defence of the Czech Republic<sup>97</sup>, which went into effect on 1 December 1999, it is possible, in accordance with Article 4 of the Covenant and based on Articles 4, 19, 20 and 35 of the Charter, to restrict certain fundamental rights and freedoms in a state of national endangerment and in a state of war, when the priority is primarily protecting the integrity of the state and thereby also the integrity of every citizen.
162. This Act provides, in § 53 not only a list of rights and freedoms which can be restricted in a state of national endangerment and a state of war in order to achieve effective defence of the state, but also sets forth the basic content of their restriction. In view of the fact that the extent of restriction of fundamental rights and freedoms cannot be predicted, it is proposed that the Government make the decision by a decree in accordance with the Act.

---

<sup>96</sup> Act No. 221/1999 Coll., on Professional Soldiers. Until 30 November 1999, this limitation was defined by Act No. 76/1959 Coll., on Certain Service Relationships of Soldiers, as subsequently amended.

<sup>97</sup> § 53 of Act No. 222/1999 Coll., on Ensuring the Defence of the Czech Republic:

- (1) *To ensure the defence of the state in a state of national endangerment or in a state of war, freedom of movement and residence and the right to peaceful assembly shall be restricted to the degree absolutely necessary .*
- (2) *Restriction on freedom of movement and freedom of residence consists of the duty to obey*
  - a) *a prohibition of entry into designated areas,*
  - b) *an order to remain in the place of permanent residence or to stay in an ordered place,*
  - c) *a prohibition on leaving buildings or constructions designated for protection of inhabitants.*
- (3) *Restriction of the right to peaceful assembly consists of the duty to obey a prohibition on calling an assembly in public areas, including street marches and demonstrations.*
- (4) *Paragraph 2 does not apply to natural persons performing rescue work or ensuring the provision of assistance in cases of direct endangerment of health of life.*
- (5) *The local, personal and time application and specification of restrictions of human rights and fundamental freedoms provided in paragraphs 2 and 3 are ordered by the government. The Decrees are announced in the same manner as a legal regulations and published in the mass media. Restrictions on human rights and fundamental freedoms go into effect at the moment specified in the Decree.*
- (6) *The provisions of the foregoing paragraphs are not to the detriment of the right of the Czech Republic to also restrict other human rights, if permitted by treaties on human rights and fundamental freedoms by which the Czech Republic is bound.*

## ARTICLE 5

***1. Nothing in the present Covenant may be interpreted as implying for any state, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights or freedoms recognised herein, or at their limitation to a greater extent than is provided for in the present Covenant.***

***2. No restriction upon or derogation from any of the fundamental human rights recognised or existing in any country in virtue of law, conventions, regulations or custom shall be admitted on the pretext that the present Covenant does not recognise such rights or that it recognises them to a lesser extent.***

163. Rules for interpretation of Covenant provisions are fully observed in the Czech Republic. No rights guaranteed by the Czech legal order are restricted on the basis that the Covenant does not expressly protect such rights or protects them in a narrower scope than the relevant law. This applies particularly to rights guaranteed by the Charter, which guarantees some rights in a wider scope than the Covenant.

164. The prohibition on suppressing any rights arising from the Covenant is related to fulfilment of obligations contained in Article 5 of the International Covenant on Civil and Political Rights<sup>98</sup> and Article 17 of the European Convention for the Protection of Human Rights and Fundamental Freedoms<sup>99</sup>. These articles forbid individuals, groups, and the public powers from restricting or suppressing any of the recognised rights.

165. In the Czech legal order this principle is also contained in § 3 of the Civil Code<sup>100</sup>: *The exercise of rights and performance of duties (obligations) arising from civil-law relationship may not, without legal grounds, interfere with the rights and justified interests of others, and may not be inconsistent with the principles of proper morality. Individual and legal entities, state authorities (bodies) shall see to it that rights arising from civil-law relationships are not jeopardised or violated, and that any possible dispute between the parties be settled primarily by their agreement. § 7 of the Civil Code states that an individual (natural person) acquires the capacity to have rights and duties (obligations) at birth. This capacity is also possessed by a conceived baby, if it is born alive.*

166. The right to judicial and other legal protection is governed generally by Article 36 of the Charter:

*(1) Everyone may assert, through the legally prescribed procedure, his/her rights before an independent and impartial court and, in specified cases, before another body.*

*(2) Unless a law provides otherwise, a person who claims that his/her rights were curtailed by a decision of a public administrative authority may turn to a court for review of the legality of that decision. However, judicial review of decisions affecting the fundamental rights and freedoms listed in this Charter may not be removed from the jurisdiction of courts.*

<sup>98</sup> Decree of the Ministry of Foreign Affairs of 10 May 1976 No. 120/1976 Coll., on the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights.

<sup>99</sup> Notification No. 209/1992 Coll., of the Federal Ministry of Foreign Affairs on Protection of Human Rights and Fundamental Freedoms as amended by Protocols No. 3, 5 and 8, as subsequently amended.

<sup>100</sup> Act No. 40/1964 Coll., the Civil Code, as subsequently amended.

Paragraph 4 of the cited Article also states that Conditions therefor and detailed provisions shall be set by law.

167. No fundamental right or freedom may be excluded from judicial protection. Court proceedings are based on principles known as the concept of a “fair trial”. The Constitution and the Charter define the principles of a fair trial as follows:

- all parties have equal rights before the court,
- proceedings before courts are oral and public, with exceptions provided by law,
- the decisions are always announced publicly,
- everyone has the right to refuse to testify, if he would thereby incriminate himself or a close person,
- everyone has the right to assistance in proceedings before the courts, other state bodies, or public administration bodies, from the beginning of the proceedings,
- anyone who declares that he does not understand the language in which proceedings are conducted has a right to an interpreter,
- everyone has the right to have his/her case reviewed publicly, without unnecessary delay and in his/her presence, and to be able to respond to all evidence presented,
- in criminal law the principle *nulla poena sine lege*, a presumption of innocence and a prohibition on retroactivity apply,
- in criminal proceedings the defendant has the right to be given time and opportunity to prepare a defence, to defend himself or be defended by a lawyer,
- if the defendant does not choose a lawyer although he is required to have one by law, a lawyer is assigned to him free of charge ,
- the defendant has the right to refuse to testify, and may not be deprived of this right in any way.

168. There is no law in the legal order of the Czech Republic which is in conflict with Article 5 of the Covenant. This, together with the fact that Article 10 of the Constitution guarantees the direct applicability of international treaties and their precedence over statutes, makes it possible to directly apply Article 5 of the Covenant. In labour law relationships the prohibition on misuse is directly stated in § 7 par. 2 of the Labour Code<sup>101</sup>: *No party is permitted to exercise rights or perform duties arising from labour-law relations to the detriment of the other party to the labour-law relations.*

169. Judicial protection of individual rights is one of the basic procedures in the Czech legal order. Everyone may, in the prescribed procedures, seek enforcement of his/her rights before a court which is independent of the executive power and is unbiased. The law may also specify another procedure for reviewing the legality of public administration decisions, but only a court has jurisdiction to review decisions concerning rights and freedoms guaranteed by the Charter. However, it is fundamentally important for legal protection for individuals to know what their rights guaranteed by the Covenant are, as well as for judicial and administrative bodies to be aware of obligations assumed by the Czech Republic as a state party to the Covenant. As was stated before, all constitutional acts, laws and generally binding legal regulations valid in the Czech Republic, i.e. including texts of ratified international treaties, are promulgated in the Collection of Laws, and important legal norms are published in annotated editions with references to case law.

---

<sup>101</sup> Act No. 65/1965, the Labour Code, as subsequently amended

170. Article 36 paragraph 3 of the Charter reads: *Everybody is entitled to compensation for damage caused him by an unlawful decision of a court, other state bodies, or public administrative authorities, or as the result of an incorrect official procedure.*
171. **State liability for damages caused by a decision or incorrect procedure** by its bodies is presently governed by the Act on Liability for Damages Caused in the Exercise of Public Power or by Incorrect Administrative Procedure<sup>102</sup>. This Act states that the state is liable for damages caused by a decision issued in civil court proceedings, in administrative proceedings or in criminal proceedings, or by an incorrect administrative procedure (§ 5 of the cited Act). Territorial self-governing units are liable under conditions set forth by this Act for damages caused in exercising the powers entrusted to their independent jurisdiction by law.
172. Definition of the state as a subject liable for damages in the cited act leads to the need to identify ministries or other central offices which appear in liability relationships in the name of the state. These offices do not represent the state, but act in its behalf under law, not only if an injured party exercises, before them, his/her claim for compensation of damages under § 14 of the Act, but also in any legal relationships which arise under the Act in matters of compensation of damages.
173. The Act distinguishes liability arising *from decisions on detention, punishment or a protective measure*; it also distinguishes *liability arising from unlawful decisions*, which can be any other decisions in an individual matter, issued on the basis of procedural regulations, and *liability for damages caused by incorrect administrative procedure*. This distinction was chosen because a decision on detention which caused damage need not be unlawful in every case, and also because the two other kinds of decisions in criminal matters also have their unique features.
174. Persons entitled to compensation of damages are defined in the Act on State Liability in various ways, depending on what legal fact resulted in the damage being incurred. In the case of damages caused by a decision on detention and punishment, only the person on whom the detention or punishment was imposed is entitled to compensation. In a case of damage caused by an unlawful decision, parties to the proceedings in which the unlawful decision which caused the damage was issued are entitled to compensation<sup>103</sup>. The Act expressly states that a person who was not treated like a party to the proceedings, although he should have been, also has a right to compensation of damages from an unlawful decision. In this context, a party to proceedings must be understood to mean a person who is identified as a party by the applicable procedural regulations, not someone who was recognised as a party in specific proceedings.
175. In making a claim for compensation of damages caused by an unlawful decision, the first condition is that the unlawful decision must have gone into legal effect. This is because, as a rule, damage can be caused by a decision only after it goes into legal effect, because executability is tied to legal effectiveness. However, the law also considers cases where a

---

<sup>102</sup> Act No. 82/1998 Coll., on Liability for Damages Caused in the Exercise of Public Power by a Decision or Incorrect Official Procedure. This Act replaced the foregoing regulation of Act No. 58/1969 Coll., on Liability for Damages Caused by a Decision by a State Body or by its Incorrect Official Procedure, which ceased to correspond to the changing social situation, as it was based on the principle of a single exclusive bearer of liability for damages, which was the state. This definition contained in Act No. 58/1969 Coll. no longer corresponded to the constitutional or statutory regulation of exercise of public power, which is, under the Constitution of the Czech Republic also entrusted to entities other than the state.

<sup>103</sup> Parties to proceedings under Act No. 82/1998 Coll., on Liability for Damages Caused in the Exercise of Public Power by a Decision or Incorrect Official Procedure, parties under the Criminal Code, parties to proceedings under the Civil Procedure Code or variously defined parties under proceedings on administrative.

decision is executable without regard to legal effectiveness. Reversal or a change of the legally effective decision due to unlawfulness is required; the decision is reversed by the body authorised to do so under procedural regulations (generally based on proceedings on extraordinary appeals or based on proceedings before the Constitutional Court). The unlawfulness of the decision is then not determined until the proceedings on compensation of damages. A claim for compensation of damages caused by a decision which is executable regardless of legal effectiveness may also be made when the decision was reversed or changed based on an ordinary appeal, because such a decision may cause damages even before it goes into legal effect.

176. The provision which permits making a claim for compensation of damages only if the injured party used the opportunity to file, against the decision, such appeals as can be used to appeal a decision which has not gone into legal effect is intended to limit the number of cases of damage which arise. These are appeals which are fully available to the parties to the proceedings, and therefore failure to use them can weigh against these parties<sup>104</sup>. These appeals thus do not include a complaint for violation of the law in criminal proceedings.
177. Compensation of damages also cannot be recognised in connection with decisions on detention, punishment of protective measures, if it was not possible to continue the proceedings because the injured party (under the Criminal Procedure Code) withdrew his/her consent with starting criminal prosecution or did not give consent to continue it (§ 163a of the Criminal Procedure Code). It also cannot be recognised if the criminal prosecution was conditionally stopped and the effects of stopping criminal prosecution arose, if criminal prosecution was stopped in connection with a decision about settlement, or in a case where criminal prosecution was stopped because the punishment which the proceedings could impose is completely meaningless next to a punishment which was already imposed on the defendant for another crime or which he is expected to receive<sup>105</sup>, or because a decision about the defendant's action was already taken by another body, disciplinarily, punitively or by a foreign court or administrative office.
178. In addition to an unlawful decision, damage can also be caused by incorrect administrative procedure. This is not more closely defined in the current laws, only one of the possible varieties is given as an example. Defining an incorrect administrative procedure is very difficult; every such definition carries the danger of being incomplete. This procedure may consist of both action or inaction by the relevant entities exercising public power. It can consist of both violation of the law and in violation of lower legal regulations – internal directives of individual bodies.
179. It is clear from the Act that incorrect administrative procedure also includes violation of an obligation to take an action or issue a decision by a deadline set by law. If a body which is required by law to decide a matter does not observe the deadlines set by law for making a decision, or deadlines for delivering a written copy of the decision, or if it violates general provisions of procedural regulations which require it to handle, on time and without undue delay, matters which are the subject of the proceedings, this can constitute incorrect administrative procedure.
180. The state may shift the effects of compensation of damages to legal entities or their employees who directly injured an individual by an unlawful decision or other incorrect administrative procedure through so-called “regressive” payment. Regressive payment can be required only if compensation of damages was paid to the injured party. The legal

---

<sup>104</sup> In cases worthy of special attention, fulfilment of this condition can be waived.

<sup>105</sup> In isolated cases, complaints appeared that this provision violated the presumption of innocence.

regulation of regressive payment is constructed hierarchically: basically, the person who paid the compensation of damages (the state), can demand regressive payment (with certain exceptions) from those entities which caused the damage, and these entities can demand the payment from their employees.

181. The state is liable for damages caused in the exercise of state power. State power must be understood, in accordance with Article 2 par. 1 of the Constitution, as legislative, executive and judicial power. The Act on Liability for Damages is designed so that only liability for damages caused by the executive and judicial power under conditions specified in the Act can be applied under it. The state is liable, under conditions provided by the Act, for damages caused by facts expressly stated in the Act, i.e. a decision or an incorrect administrative procedure, and the Act does not provide any grounds for exemption<sup>106</sup>. However, under the Act, the state is not liable for damages caused by legislative acts. Damages caused by the legislative power and damages caused by so-called secondary legal regulations cannot be claimed under the Act.
182. Article 37 par. 2 of the Charter also states: *In proceedings before courts, other state bodies, or public administrative authorities, everyone shall have the right to assistance of counsel from the very beginning of such proceedings.* In the narrower sense, legal assistance can be understood as qualified assistance provided by an attorney. Defendants are ensured this right under the Criminal Procedure Code. It may be a problem in criminal proceedings to provide qualified legal assistance for other parties to the proceedings, e.g. the victims, who can obtain legal assistance for exercising their rights either through a legal representative or a representative on the basis of a power of attorney, but are not entitled to free legal assistance.
183. One of the inadequacies which are to be corrected by future legal regulations is the fact that, under the Civil Procedure Code, a court is not authorised to review an administrative body's failure to act or undue delays in decision making. In practice, this complicates the enforceability of the right to have a matter reviewed without undue delay.

---

<sup>106</sup> The legal regulation contained in Act No. 82/1998 Coll., Liability for Damages Caused in the Exercise of Public Power by a Decision or Incorrect Official Procedure applies, however, only to damages which were caused by public law activities of the state; liability relationships for damages caused from violation of duties specified by public law arise, but they are private law relationships, and Act No. 82/1998 Coll. belongs in the system of civil law. The Civil Code applies to relationships under this Act in a subsidiary manner.

## PART B: ARTICLES 6 TO 15 OF THE COVENANT

### ARTICLE 6

*1. The States Parties to the present Covenant recognise the right to work, which includes the right of everyone to the opportunity to gain his living by work which he freely chooses or accepts, and will take appropriate steps to safeguard this right.*

184. The right to work and free choice of occupation in the legal order of the CR is generally guaranteed by Article 26 of the Charter of Fundamental Rights and Freedoms:

- (1) *Everybody has the right to the free choice of his/her profession and to the training for that profession, as well as to engage in commercial and economic activity.*
- (2) *Conditions and limitations may be set by law upon the right to engage in certain professions or activities.*
- (3) *Everybody has the right to acquire the means of his/her livelihood by work. The state shall provide an adequate level of material security to those citizens who are unable, through no fault of their own, to exercise this right; conditions shall be provided for by law.*
- (4) *Different statutory rules may apply to aliens.*

185. The Czech Republic is also a party to international conventions guaranteeing everyone equal access to employment, namely the International Convention on the Elimination of All Forms of Racial Discrimination, the Convention on the Elimination of All Forms of Discrimination Against Women and conventions of the International Labour Organisation<sup>107</sup>.

A further, more detailed definition is contained in the Employment Act<sup>108</sup>. **The right to employment** under § 1 par. 3 of this Act *means the right to employment shall be understood as the right of every citizen willing and able to work and genuinely seeking a job to:*

---

<sup>107</sup> **List of International Labour Organisation conventions**, ratified by the Czech Republic as of 30 August 1999 and important in terms of the Covenant, for which the Czech Republic submitted reports since 1993:

<sup>108</sup> Act No. 1/1991 Coll., on Employment, as subsequently amended.

- a) *assistance in finding suitable employment*
- b) *retraining which is essential for finding employment,*
- c) *financial support prior to entering employment and if employment is lost.*

187. The employment arranged must be suitable for the person under § 1 par. 4 of the Employment Act, i.e. it must correspond to his/her state of health, and must also take into account the persons age, qualifications and abilities, the length of the previous period of employment and housing opportunities.
188. **Arranging placement** in suitable employment is primarily the task of labour offices<sup>109</sup> – public offices that arrange employment, which are established, managed and financed from the budget of the Ministry of Labour and Social Affairs through the employment services administration. The addresses and areas of jurisdiction of labour offices are the same as the addresses and areas of jurisdiction of district offices. Labour offices provide free services to persons seeking employment. In addition to them, as of 31 October 1999 there were in the Czech Republic 170 private employment agencies, whose activities are permitted by the Ministry of Labour and Social Affairs and which provide employment services for a fee, the amount of which is regulated by the Ministry of Labour and Social Affairs under the Employment Act and the Act on Jurisdiction of Bodies of the Czech Republic in the Employment Sector. Wage withholding in connection with arranging employment are forbidden.
189. The guarantees of the **right to free choice of employment** include, before beginning employment, the right to specialised consulting services on employment opportunities, which are provided by schools, usually in co-operation with state bodies in the employment sector, labour offices, through individual and group consultations, lectures, discussion groups, etc.
190. Labour offices include information and consulting centres. These centres provide free information to help with a choice of occupation for graduates from vocational schools, secondary schools and post-secondary schools, but also to students of elementary and special schools and their parents, information on the labour market situation, and opportunities to find work in various fields in practice, information on requalification opportunities, a current list of new jobs in the district and the entire country, and other services.
191. The free choice of occupation is also provided by § 27 of the Labour Code<sup>110</sup>: *an employment relationship is based on contract between an employer and an employee, i.e. by agreement in an expression of will by both sides. This must be made freely, seriously, definitely and understandably. Likewise, other labour law relationships, i.e. relationships established by appointment or election, cannot be created without the person's consent.*
192. Applicants for study at secondary schools and applicants for preparation for manual labour occupations in secondary specialised vocational schools are accepted on the basis of voluntary applications and with consideration of their abilities, knowledge, usually verified in admissions proceedings, interests and state of health.
193. The possibility of **forced work**, in the form of transferring an employee without his/her consent to another kind of work, for a period of 30 workdays in a calendar year, was removed by the amendment of the Labour Code<sup>111</sup> in 1992. The Labour Code provision

---

<sup>109</sup> Act No. 9/1991 Coll., on Employment and Jurisdiction of Bodies of the Czech Republic in the Employment Sector, as subsequently amended.

<sup>110</sup> Act No. 65/1965 Coll., the Labour Code, as subsequently amended

<sup>111</sup> Act No. 231/1992 Coll., Amendment of the Labour Code, in effect as of 29 May 1992.

in question (§ 37 par. 4c) was deleted from the Labour Code, because it was in conflict with Article 9 of the Charter as well as Convention No. 29 of the International Labour Organisation<sup>112</sup> and the European Convention for the Protection of Human Rights and Fundamental Freedoms. Under current legal regulations, transfer of an employee to different work can be done only on the basis of reasons stated in the Code (§ 37 of the Labour Code). The employer and the employee should agree on the change in the agreed content of the employment agreement (§ 36 par. 1 of the Labour Code<sup>113</sup>). However, in exceptional cases provided in the Code, the employer may transfer an employee without his/her consent (during break-downs, due to interruption of work caused by unfavourable weather conditions, when averting natural disasters, during temporary absence of requirements provided by legal regulations for performance of the work, etc.).

194. Article 9 of the Charter provides exceptions which allow requiring performance of work or services. Paragraph 1 Article 9 reads: *No one may be subjected to forced labour or service*. However, the following paragraphs state:

(2) *The provision of paragraph 1 shall not apply to:*

- a) *labour imposed in accordance with law upon persons serving a prison sentence or upon persons serving other penalties that take the place of the penalty of imprisonment,*
- b) *military service or some other service provided for by law in place of compulsory military service,*
- c) *service required on the basis of law in the event of natural disasters, accidents, or other danger threatening human life, health, or property of significant value,*
- d) *conduct imposed by law for the protection of life, health, or the rights of others.*

195. Similar regulations are also contained in several provisions of the Labour Code. In particular, § 90 par. 2d and 2e of that law, governing shortening uninterrupted rest between shifts, § 95 governing work stand-by, §§ 96 to 98 governing overtime work, § 170 and § 171 governing preventing damage and § 175 governing employee liability for failure to fulfil obligations for averting damage.

196. Protection from forced labour is also generally governed by the Criminal Code<sup>114</sup> in § 235 on extortion, § 237 on oppression and in provisions on restriction or deprivation of personal freedom (§ 231 and § 232).

197. Protection of citizens upon termination of employment includes the requirement of proper reasons for one-sided termination of the employment relationship by the employer (a complete list of reasons for notice of dismissal and immediate termination of employment is provided in §§ 46 to 53 of the Labour Code), the requirement to discuss such termination of employment with a union body in the company and the obligation to offer the employee another suitable position before giving notice of dismissal (except in cases of dismissal due to violation of work discipline or for reasons for which an employment relationship may be terminated immediately). A special guarantee is the prohibition of dismissal in certain life situations and special protection of the employment relationships of pregnant women, mothers, and single fathers of small children, disabled people, etc. (§ 48 of the Labour Code). The notice period is 2 months (3 months if the employer gives notice of dismissal due to organisational reasons). Under

<sup>112</sup> International Labour Organisation (ILO)

<sup>113</sup> § 36 par. 1 of the Labour Code: *The terms agreed in an employment contract may be modified only if the employer and the employee agree upon such modification. If the employment contract was concluded in writing, the employer must make any amendment to such contract in writing as well.*

<sup>114</sup> Act No. 140/1961 Coll., the Criminal Code, as subsequently amended.

the Civil Procedure Code, an employee can claim invalidity of termination of the employment relationship before a court no later than three months from the day when the employment relationship was to terminate. The employee can appeal a decision by the court of the first level to a higher court under § 201 of the Civil Procedure Code <sup>115</sup>.

198. Special regulations govern the labour law relationships of customs officials<sup>116</sup>, members of the armed forces<sup>117</sup>, the Security Information Service<sup>118</sup>, the Police of the Czech Republic<sup>119</sup> and members of the fire safety service<sup>120</sup>. These regulations independently govern the creation, content and termination of the **service relationship**, conditions for acceptance, trial period, conditions under which a person in the service relationship can be assigned to different work or transferred without his/her consent, work scheduling, obligations of members, but also special care for them (health, social educational) and other rules by which the service relationship differs from labour law relationships governed by the Labour Code.
199. New laws governing the service relationship and other labour law relationships of members of the armed forces came into effect on 1 December 1999. They are the Act on Professional Soldiers<sup>121</sup>, the Act on Ensuring Defence<sup>122</sup> and the Act on the Armed Forces<sup>123</sup>. In the first quarter of 2000 the Government will discuss a new draft Act on the Police of the Czech Republic, which would go into effect on 1 January 2001.
200. The new Act on Professional Soldiers, in § 47 par. 1, states one of the statutory restricts on conduct of the occupation: *A soldier may, in exceptional cases, perform employment only with the written consent of the service body, if that activity does not affect the performance of his/her service or another important interest of the armed forces.*
201. Basic and free **occupational preparation** in elementary and secondary school is guaranteed to all citizens of the CR and foreigners with permanent residence in the Czech Republic in the Schools Act<sup>124</sup>, as required by Article 13 par.1 of the Covenant. All preparation in these schools must take place, under § 39 of the Schools Act, based on educational documents, which are prepared in accordance with the needs of the relevant occupations, and which are also updated based on the needs of the labour market. More detailed information is in the text to Article 13 of the Covenant.
202. §§ 141 to 144 of the Labour Code<sup>72</sup> impose on employers an obligation to care for the **qualification of employees and its improvement**. These provisions give rise to rights and obligations for both the employer and the employee:
203. § 141a of the Labour Code gives an employee the obligation to *systematically broaden the qualifications he needs for performing the work agreed upon in his/her employment*

<sup>124</sup> Act No. 29/1984 Coll., on the System of Elementary Schools, Secondary Schools and Post-secondary Occupational Schools (the Schools Act), as subsequently amended.

*contract. The employer is entitled to require from his/her employee that he participate in training to broaden his/her qualifications. The employer shall ensure that an employee who enters an employment relationship without qualifications (skills) obtains them through introduction training course or initial training (§ 142 par. 1 of the Labour Code), after which the employer shall issue employee a completion certificate.. The employer is also required, under § 142 par. 2 of the Labour Code, to arrange for an employee to undertake a training course or initial training if such employee transfers to a new workplace, a new type of work or a new method of work, especially when this is necessary due to changes in work organisation or other rationalising measures. Some kinds of improving qualifications are required, others can be done depending on the employer's needs and financial abilities.*

204. Under § 142b of the Labour Code, an employer may provide an employee relief from work and material security (under § 126 of the Labour Code), if the expected increase in qualifications is in accordance with the employer's needs.
205. Additional education through **requalification** is done under the Employment Act and the Decree of the Ministry of Labour and Social Affairs on Conditions for Arranging Requalification of Job Applicants and Employees<sup>125</sup>.
206. In requalification of job applicants, under § 1 of that decree, in addition to existing qualification, consideration is given to the applicants' personal qualities, abilities and health for performance of the work for which they are to requalify. Requalification is conducted using suitable forms of theoretical and practical preparation, particularly in the trade or field of study, with possible preparation for individual specialisation courses and short-term forms of secondary school and post-secondary studies.
207. The labour offices arrange requalification in cases where demand in the labour market does not match supply and requalification of the labour force will permit new or additional placement in suitable employment.
208. Under the above-mentioned decree of the Ministry of Labour and Social Affairs, requalification of job applicants is arranged by educational institutions: vocational schools, secondary vocational schools, academic secondary schools, secondary occupational schools and special schools established by the state, but also employers' educational institutions, private institutions and other natural persons and legal entities. A facility's capacity to perform requalification is verified and approved by the Ministry of Education, Youth and Sports. Educational institutions provide requalification based on an agreement with a labour office or an employer. Teaching is conducted according to educational materials approved by the Ministry of Education, Youth and Sports.
209. A labour office concludes a written agreement with a job seeker who needs requalification for placement in employment and who expresses interest in it. The agreement sets forth conditions under which the requalification is to take place.
210. Under § 4 of the above-mentioned decree, a labour office arranges necessary safety aids and equipment free of charge for a job seeker whom it sends for requalification; it can also reimburse him for expenses for school supplies, up to 1 thousand CZK, travel expenses, and insurance in case of injury.
211. No legal regulations in the Czech Republic contain exceptions or restrictions concerning race, gender, nationality, social origin, etc., which would violate or weaken the

<sup>125</sup> Decree of the Ministry of Labour and Social Affairs No. 21/1991 Coll., on More Detailed Conditions for Arranging the Requalification of Job Applicants and Employees, as subsequently amended.

recognition, enjoyment or exercise of the right to equal opportunity, possibilities and treatment in access to employment and preparation for it.

212. The methods and conditions for **providing material security** before entering employment and in case of loss of employment are governed by §§ 12 to 18 of the Employment Act.
213. Material security is provided to job applicants who meet the condition of having been employed for a total of at least 12 months in the last three years before filing an application for arrangement of employment. Under § 13 par. 2 of the Employment Act the following are included as periods of employment: time in school (preparation for an occupation or for employment), basic military service or civil service, personal care for a child up to three years old or a child up to 18, if the child is severely handicapped and therefore requires extraordinary care, a period when personally caring for a related person who is largely or completely incapacitated and a period when drawing a full invalid pension.
214. If it is not possible to place an employee who is to be made redundant, elsewhere in the company, the employer is required, in co-operation with the labour offices, to help the employee find new suitable employment. If the employee cannot find suitable employment, despite the help of the former employer and the labour office, he is entitled, under § 17 of the Employment Act, to unemployment material security benefits in the amount of 50 percent of his/her previous earnings for a period of 3 months and thereafter in the amount of 40 percent for a period of an additional 3 months. A job seeker who goes through requalification is provided, during the requalification period, material security in the amount of 60 percent of his/her average net monthly earnings in his/her last job. If he does not begin “suitable employment” even after that time, the labour office continues to list him as a job seeker, and offer him available jobs, but the person is materially secured in the social security system until he finds a position in the labour market.
215. The state employment policy includes regulating employment of the foreign labour force. Conditions for **employing foreigners** in the Czech Republic are governed by the Employment Act, under which foreigners or persons without citizenship can be employed in the Czech Republic on the condition that they have been issued an employment permit by the labour office (under the Employment Act and Jurisdiction of CR Authorities in the Employment Sector and a residence permit by the Ministry of the Interior (under the Act on Residence of Foreigners in the Czech Republic<sup>126</sup>). An employment permit is also required if the foreigner is to perform work in the Czech Republic in an employment relationship to a foreign employer who sent him to perform the work based on a business or other agreement concluded with a domestic legal entity or natural person.
216. Labour offices issue a permit to hire a foreigner under § 19 of the Employment Act if an available job cannot be filled otherwise, due to the required qualifications or a temporary lack of available labour.
217. The amendment to the Employment Act<sup>127</sup> in effect as of 1 October 1999 made the conditions for employing foreigners more precise and also tightened them. An important

---

<sup>126</sup> Act No. 123/1992 Coll., on Foreigner’s Stay and Residence in the Czech and Slovak Federal Republic, as subsequently amended.

<sup>127</sup> Act No. 167/1999 Coll., Amending Act No. 1/1991 Coll., on Employment, as subsequently amended, Act No. 9/1991 Coll., on Employment and the Jurisdiction of Bodies of the Czech Republic in the Employment Sector, as subsequently amended, and Act No. 65/1965 Coll., the Labour Code, as subsequently amended.

change is the restriction of the time for which a work permit can be issued to 1 year, with the possibility of issuing the permit repeatedly. After a foreigner has been employed in the country for three years, a new permit can be issued only after 12 months have elapsed, unless an international treaty by which the Czech Republic is bound provides otherwise. This restriction does not apply to foreigners working in border areas who return home at least once a week, or seasonal employees if they do not work in the country for more than six months in a year and at least six months elapse between individual jobs. It also does not apply to foreigners who conduct consistent educational activity in the Czech Republic as pedagogue.

218. In some cases employers may employ foreigners even without a work permit. This applies primarily to foreigners and persons without citizenship who have been issued a permanent residence permit, foreigners who have been granted refugee status or have applied for it, and applicants for asylum<sup>128</sup>. Permits are also not necessary for family members of members of a diplomatic mission, a consular office, or employees of an international government organisation with its offices in the country, if reciprocity is guaranteed by an international treaty concluded in the name of the Government.
219. After the division of the Czechoslovak Federation in 1993, the Governments of the successor states, the Czech Republic and the Slovak Republic, concluded a treaty on reciprocal employment of their citizens<sup>129</sup>. This treaty guarantees the principle of free movement of labour between the two states. An employer is only required to register its employees at the appropriate labour office.
220. If foreigners or persons without citizenship are employed in the state without a permit or registration at the labour office, they can be prosecuted under the Act on Offences<sup>130</sup>, and illegal employees under the Act on the Residence of Foreigners. In these cases the employers can be given a fine for violation of the Employment Act. Inspection is conducted by the labour offices, which also impose fines on employers for failure to observe the applicable legal regulation. Despite these measures, illegal employment is frequent, particularly in the construction industry.
221. Under Article 26 of the Charter everybody has the right to the free choice of his/her occupation and to the training for that occupation, as well as to engage in commercial and economic activity. The conditions for private business are provided by the Trades Licensing Act<sup>131</sup> and the Commercial Code<sup>132</sup>. Performance of employment includes conducting a trade under the Trades Licensing Act, entry in a register under the Act on Private Conduct of Business by Citizens<sup>133</sup> (concerns agricultural production), the position of a statutory body of a company, consistent performance of artistic or other creative work on the basis of authorship law relationships (see the text to Article 15 of the Covenant, on protection of intellectual property), performance of other earning activity based on authorisation under special regulations (the Act on Advocacy<sup>134</sup>, the

<sup>134</sup> Act No. 85/1996 Coll., on Advocacy, as subsequently amended.

Act on Auditors<sup>135</sup> etc.) and the work of a person co-operating in the performance of an independent earning activity.

222. **Discrimination** in employment is forbidden by § 1 par. 1 and 2 of the amendment to the Employment Act, which went into effect on 1 October 1999. It also prohibits discriminatory job offers which interfere with the principle of equal access to employment:

*(1) The right to employment (work) cannot be denied to a citizen because of his/her race, colour, sex, sexual orientation, language, faith or religion, political or other conviction, membership or activity in political parties or political movements, trade union organisations or other associations, nationality, ethnic or social origin, property, family, state of health, age, marital and family status or obligations to his/her family, except where this is stipulated by law or cases where there is a factual ground consisting in the precondition, requirements and nature of the employment (work) which the citizen is to perform and which is necessary for performance of this employment.*

*(2) Participants in legal relationships created under this Act may not be offered employment (work) contrary to provisions of paragraph. (1)*

223. An offer of employment means not only an offer made through the public media (advertising), but also an offer made in an applicant's interview with the employer, in a selection process, etc.

224. Proven discrimination in connection with a job offer can be prosecuted under § 8 and § 9 of the Employment Act and Jurisdiction of Authorities of the CR in the Employment Sector, by a fine of up to 250 thousand CZK, in repeated cases, up to 1 million CZK. Inspection is carried out and fines imposed by the employment inspection bodies: labour offices and the Ministry of Labour and Social Affairs. It is not yet possible to determine whether judicial protection was used in cases of discrimination, because the relevant items were not included in statistical dispute classification and in the criminal statistics list of the Ministry of Justice until 1999.

225. Implementing the right to equal access in employment brings problems in practice. The problems concern not only men and women, but all high-risk population groups: young people without experience, women with small children, the handicapped, people at pre-retirement age, and people with low or no qualifications.

226. Member of the Romani minority have great problems with placement in the labour market. This minority has extremely high unemployment (government estimates are that 70 to 80 percent of the Romani population at a productive age are unemployed<sup>136</sup>), which leads to dependence on welfare benefits and other forms of social deprivation. In addition, most Romani job applicants registered at labour offices also belong to a group of people who are difficult to place in the labour market, characterised by cumulative handicaps.

227. The main cause for the high unemployment among Roma is the low level of education and qualification of most of them. Another cause – closely related to the first – is the demotivating system of welfare benefits in view of the pay level for unqualified manual

---

<sup>135</sup> Act No. 524/1992 Coll., on Auditors and the Chamber of Auditors of the Czech Republic, as subsequently amended.

<sup>136</sup> Report on the Situation of the Romani Community in the Czech Republic and Government Measures Assisting its Integration in the Society, appendix to Resolution of the Government of the Czech Republic of 20 October 1997 No. 686.

work. Preventing employers from direct discrimination has not been successful - they sometimes refuse to employ Roma without any explanation, often justify the failure to employ Roma on grounds of their “inadaptability” to a standard working regime and bad experience with some Roma. However, this kind of discrimination is difficult to prove. Projects aimed at increasing Romani employment are supported by the Ministry of Labour and Social Affairs through state requalification programs<sup>137</sup>, and at the local level by the Ministry of Interior through the National Committee for Crime Prevention<sup>138</sup>.

228. In an attempt to increase the employment of the handicapped, the obligation of employers to employ a certain percentage of disabled employees was transferred from a mere government decree directly into the new Employment Act. Despite this, the statistical data indicate that the unemployment of the handicapped is increasing. In recent years the number of disabled citizens has climbed sharply, although the number of available jobs is still the same, according to the labour offices. As of 31 December 1998, there were 48,951 disabled citizens in the Czech Republic, but there were only 1,242 available jobs (registered at the labour offices) for these citizens.
229. The experience of the last ten years has shown the inadequacies in narrow one-ministry views of addressing questions related to the health of the population and employment. Economic losses related to handicaps arise not only directly, i.e. through the drawing of welfare benefits and pensions, but also indirectly, through the fact that the handicapped do not participate in creating the gross domestic product. Additional losses arise through the inability to make use of education, abilities and experience, through the declining participation in creating GDP of relatives and close persons caring for the handicapped person and the statistically demonstrable increased need for health care for a person where rehabilitation does not work. A prerequisite for effective drawing on financial resources for the handicapped is introducing unified rehabilitation, which is based on handicap evaluation by the criteria recommended by the WHO<sup>139</sup>. In May 1999 the Government, by resolution<sup>140</sup> charged the Minister of Labour and Social Affairs to prepare, by the middle of 2000, a draft “Concept of unified rehabilitation” (to go into effect on 1 January 2001).

---

<sup>137</sup> In 1997 and 1998 there were two requalification courses for social workers in work with the Romani population, in which Romani job seekers took part. However, most of them found places as consultants in district or city offices, in anti-drug and consulting centres and as assistants in schools.

<sup>138</sup> In 1998 the Ministry of Interior provided 2,819 thousand CZK to support ten projects aimed directly at supporting Romani employment through requalification, personal consulting and education of Romani youth.

<sup>139</sup> International Classification of Impairments, Activities and Participation – ICIDH 2

<sup>140</sup> Resolution of the Government of the Czech Republic of 5 May 1999 No. 418, on the National Employment Plan.

## Restrictions for the performance of some positions

230. In connection with efforts to limit the influence of people closely connected with the pre-1989 regime in important public positions and in controlling positions in repressive bodies of state power, two so-called “lustration laws” were passed: the federal Act, which Provides Certain Other Requirements for the Performance of Certain Positions in State Bodies and Organisations<sup>141</sup>, and a supplementing Act of the Czech National Council on Certain Additional Requirements for Performance of Certain Positions Filled by Designation or Appointment of Police Officers and Officers of the Prison Service<sup>142</sup>.
231. Important positions under these laws are positions filled by election, appointment, or designation in state administration bodies, in the army, in the Security Information Service, in the Office of the President of the Republic, in the Office of the Government the Office of the Supreme and Constitutional Court, in the presidium of the Academy of Sciences, in radio and television, in state companies and organisations, and state funds and financial institutions, including the Czech National Bank. The law also applies to judges, prosecutors, and judicial trainees, and it sets conditions of reliability for the conduct of certain licensed trades<sup>143</sup>.
232. A requirement for holding positions under these laws is that, from 25 February 1948 to 17 November 1989, the person was not a member of the State Security Police, was not registered as a conscious collaborator of the State Security police in certain categories, was not a secretary of a body of the Czechoslovak Communist Party at the district level or higher, or a member of the party’s Central Committee, an employee of the political apparatus of these institutions, a member of “purification” commissions or the action committee after 1948 and after 1968, a member of the People’s Militia or a student of a university which educated political workers and State Security Police officers or a student at certain Soviet universities .
233. The lustration law’s defenders said that it was a preventive measure which was necessary to protect the nascent democratic order. Opponents criticised the lustration laws primarily on the grounds that their measures actually functioned as an extra-judicial sentence, which was retroactive and thus unacceptable. They also criticised the fact that the law imposed a blanket punishment on the cited categories of persons, without individual review of guilt<sup>144</sup>. The last effective date of both these regulations is 31 December 2000<sup>145</sup>.

---

<sup>141</sup> Act No. 451/1991 Coll., which Provides Certain Additional Requirements for the Performance of Certain Positions in State Bodies and Organisations of the Czech and Slovak Federal Republic, the Czech Republic and the Slovak Republic, as subsequently amended.

<sup>142</sup> Act No. 279/1992 Coll., on Certain Additional Requirements for Performance of Certain Positions Filled by Designation or Appointment of Officers of the Police of the Czech Republic and Officers of the Prison Service of the Czech Republic, as subsequently amended.

<sup>143</sup> Under § 27 par. 2 of Act No. 455/1991 Coll., on Licensed Trades (the Trades Licensing Act), and Appendix No. 3 to that Act.

<sup>144</sup> This fact was disputed because the former collaborators with the State Security also included persons who signed collaboration agreements under pressure or only formally.

<sup>145</sup> The Constitutional Court of the CSFR decided on 26 November 1992, that ten provisions of this Act were not in compliance with the Charter or the Constitution, and that they were to lost effect as of 15 June 1993. Confidantes and candidates for secret co-operation were thus removed from the punishable categories of secret collaborators with the State Security. In 1995 the effectiveness of the Lustration Act was extended to 2000, over the veto of the president of the republic.

234. The International Labour Organisation's inspection bodies acknowledged the importance of the lustration laws during the period of transition to democracy, but they welcomed their limitation in time. They also criticised the overly wide scope of positions to which the laws applied, particularly in filling positions in state administration. Council of Europe bodies also criticised the law.

***2. The steps to be taken by a State Party to the present Covenant to achieve the full realisation of this right shall include technical and vocational guidance and training programmes, policies and techniques to achieve steady economic, social and cultural development and full and productive employment under conditions safeguarding fundamental political and economic freedoms to the individual.***

235. The CR Government created a system of public employment services (labour offices) in order to prepare, formulate and implement the **employment policy**. The Czech Republic submitted detailed information on legislative and practical measures of the active and passive employment policy and on employment services to the Expert Committee for Application of Conventions and Recommendations of the International Labour Organisation for the implementation of Conventions No. 122 (on employment policy), No. 159 (on vocational rehabilitation and employment of disabled persons) and No. 88 (on employment service). On issues of free conduct of employment, the Czech Republic submitted to the International Labour Organisation a report on implementation of Convention No. 29 on forced labour and Convention No. 105 on abolition of forced labour. With the exception of Convention No. 105, which entered into force for the Czech Republic on 6 August 1997, all these conventions went into effect in the Czech Republic on 1 January 1993.

236. In 1975 the Czech Republic also ratified International Labour Organisation Conventions No. 140 on paid educational leave and No. 142 on human resources development.

237. In addition to requalification, mentioned above, the labour offices, as part of the active employment policy, also ensure creation of new jobs by providing contributions to employers when they employ job applicants. They establish socially useful jobs<sup>146</sup>, organise publicly beneficial work, financially support employers who create jobs for internships for school graduates or qualification of a minor registered with the labour office, provide contributions for protected workshops and protected workplaces for disabled people, provide wage subsidies for companies changing to a new program, with the aim of preventing temporary dismissal of employees.

238. In May 1999 the Government approved a concept document, the National Employment Plan<sup>147</sup> and established the Employment Committee as the co-ordinating and consulting body to the Ministry of Labour and Social Affairs. The main measures in the implementation schedule for the National Employment Plan are:

- a) Beginning with the 2000/2001 school year, to gradually reform management and financing of the school system, primarily secondary and post-secondary occupational

---

<sup>146</sup> Under § 5 of Act No. 9/1991 Coll., on Employment and the Jurisdiction of Bodies of the Czech Republic in the Employment Sector, as subsequently amended, and decree of the Ministry of Labour and Social Affairs of the CR No. 35/1997 Coll., which regulates provision of financial contributions.

<sup>147</sup> Resolution of the Government of the Czech Republic of 5 May 1999 No. 418, on the National Employment Plan.

education, with the aim of creating, through the education system, conditions for balance between the structure of school graduates' qualifications and the needs of the labour market.

- b) Beginning with the 2000/2001 school year, to gradually introduce into the teaching plans of schools, especially elementary schools, the subject "choice of occupation," aimed at shaping student attitudes, and, in co-operation with the labour offices, include information about current and future opportunities in the labour market in the teaching in elementary, and secondary and post-secondary occupational schools.
  - c) To gradually increase the ratio of earned income to welfare income, primarily among persons with expected low income, and provide advantages to people who are economically active over people who are economically inactive. In accordance with this assignment, to increase the minimum wage so that it will reach a level higher than subsistence level of an adult living alone.
  - d) To change and expand the jurisdiction and opportunities, including organisational and financial, of employment services bodies, in accordance with labour market needs. Prepare a new employment act so that it can go into effect as of 1 July 2001. The law should comprehensively and interconnectedly address the employment of foreigners, but also the placement of handicapped persons and their protection in the labour market, and that of persons who are difficult to employ.
  - e) To prepare measure to increase the employment of long-term unemployed job applicants, with consideration for members of the Roma community.
  - f) To support the creation and development of industrial zones and entrepreneurial activities that create new jobs. Simultaneously, to support small and medium sized business, through direct support and decreasing the tax burden.
  - g) To give priority in awarding public contracts with a priority to ensuring employment of job applicants, particularly those difficult to place.
  - h) To create conditions for application of flexible forms of work organisation and organisation of working hours, permitting the needs of employers and employees to be reciprocally adapted, to create conditions for shortening work time and part time work, to create pressure to lower overtime work.
  - i) On an on-going basis to track the level of implementation of the right to employment in groups endangered by discrimination.
  - j) To contribute to eliminating unjustified differences in salary between men and women.
239. The new plan reacted to developments in the labour market since the creation of the Czech Republic and to requirements stated in the economic strategy of the Czech Republic for entry into the European Union: reviving economic growth, increasing competitiveness, qualification of the labour force and increasing employment.
240. Basic **public transportation services**, particularly by public transportation<sup>148</sup> are also related to implementation of the employment policy. Ensuring basic public transportation services in a territorial area – in the Czech Republic primarily a district – means ensuring appropriate transportation to work and schools, but also to courts, basic health care

---

<sup>148</sup> In the 90s the European Commission issued a political document on public passenger transportation, the Green Paper, in which it emphasises the importance of the social element of mobility of person. Accessibility of public passenger transportation is, according to the Green Paper, one of the basic social rights of the European citizen.

facilities, including return transportation, every day of the week. Public transportation is not provided equally in the Czech Republic. The scope of the network and opportunities for bus and passenger rail transportation are affected, among other things, by the financial possibilities of the state and municipalities.

241. **The total employment level** in the first years of transformation was, on average, satisfactory. The service sector especially played an important role in maintaining a high level: in 1998, 53.6 percent of all economically active persons worked in this sector. Agriculture and forestry had only 5.5 percent, and industry 40.9 percent. Although employed decreased sharply in most large industrial companies, many small companies and independent entrepreneurs sprang up, with roughly 780 thousand job opportunities.

242. In addition, the following contributed to the satisfactory employment level up to 1994: a decrease in the number of working persons of retirement age, extension of maternity leave from two to three years, extension of provision of parental subsidy until a child reaches the age of four, and extending vacation by one week. People retiring before reaching full retirement age also contributed to the low level of unemployment.

### Labour market development

Year	Unemployment rate in % (out of the total labour force available)	Registered job applicants (thousand persons)				
		Total	of that			
			women	with reduced capacity to work	school graduates	on unemployment benefits
1993	3.52	185	104	20	24	93
1994	3.19	166	97	22	20	78
1995	2.93	153	88	23	20	68
1996	3.52	186	105	31	27	93
1997	5.23	269	152	40	44	138
1998	7.48	387	205	49	68	190
1999	8.39	435	228	53	66	181

Note: Data as of 31 December each year; data for 1999 as of 30 June. As of 31 December 1999 the unemployment rate was 9.4 percent.

Source: Ministry of Labour and Social Affairs, 2000

243. The privatisation method in the Czech Republic also played a part. Companies were not restructured before privatisation, and this process was shifted to the new owners. Thus, an increase in unemployment is expected in connection with completing privatisation.

244. The unemployment rate did not begin to grow significantly until the last months of 1997. Vulnerable groups are primarily young people without experience, women with small children, people with low or no qualifications and the handicapped. In many cases a

person may have several of these characteristics. People from these groups are most often among the repeatedly or long-term unemployed.

### Numbers of registered job applicants in vulnerable groups (thousand persons)

Indicator	1993	1994	1995	1996	1997	1998	1999
Total registered job applicants	185	166	153	186	269	387	435
Job applicants up to 19	29	22	20	24	33	33	25
20 - 24	28	25	22	28	46	95	107
Job applicants with compulsory education	70	65	62	71	90	117	131
Duration of unemployment:							
up to 3 months	86	67	60	77	100	134	133
over 3 to 6 months	43	37	33	43	68	99	92
over 6 to 9 months	18	17	14	18	30	41	53
over 9 to 12 months	12	11	10	10	18	27	47
over 12 months	27	35	36	38	53	87	110

Note: Indicator values as of 31 December of each year; data for 1999 as of 30 June.

245. There are significant territorial differences in unemployment rates. Two clear types of problem territories have arisen. One type is districts with a high proportion of industry concentrated in only a few manufacturing branches, where production declined or was cancelled (coal mining, iron works, heavy machinery industries, manufacturing of train cars, trucks, etc.), without the decline being balanced out by new job opportunities. These are primarily districts in northern Moravia and northern Bohemia with high urban population density. The second type are economically weak districts with a below-average share of industry and above-average share of agriculture, with low population density (mountain and border districts in northern and southern Moravia, but also in northern, southern and western Bohemia).

### Unemployment rate by region<sup>1)</sup> (as of 31 December 1998)

Indicator	Total	Men	Women
<b>General unemployment rate (ILO)</b>	<b>7.3</b>	<b>5.7</b>	<b>9.3</b>
Prague	3.6	2.9	4.3
Central Bohemia	6.2	4.6	8.3
South Bohemia	5.0	4.0	6.2
West Bohemia	6.5	5.5	7.8
North Bohemia	12.0	9.2	15.6
East Bohemia	6.5	4.8	8.7
South Moravia	6.4	4.9	8.3
North Moravia	10.0	7.9	12.6

Note: 1) Regions by territorial administrative divisions used for purposes of statistical classification until 31 December 1999.

246. Overall the situation in the labour market in the Czech Republic can be described as follows:

- a) As a result of the Czech Republic's lower economic growth in 1997, the method of privatisation, and the unfinished restructuring of companies, labour force supply began to exceed demand. Further unemployment growth can be expected in connection with

completing the transformation of the economy and its recovery. The number of job applicants is increasing, but the number of available jobs is declining.

- b) The structure of the labour force by profession and qualification does not match the structure of demand in the labour market. A connection between the education system and the labour market is lacking. The natural development of private schools and unsolved situation of vocational schools (financing and management), and a decline in student interest in technical fields led to a shortage of graduates trained in certain manual labour occupations and technical fields. On the other hand, there was an increase in graduates who did not find jobs in the labour market (particularly economic fields).
- c) The prerequisites for geographic mobility of the labour force are lacking. Workers with average and below-average income (more than 60% of all employees) do not have the opportunity to move to find work, in view of the undeveloped housing market for these income categories. Transportation services are also decreasing, and expenses for public transportation are increasing. This also worsens the ability to address the situation in areas with critical unemployment rates.
- d) The levels of salaries and welfare benefits are not balanced: the current ratio does not motivate people with low qualifications and low incomes to work. One of the results is the growing number of long-term and repeatedly unemployed. Problems with placing those who are difficult to employ are worsening. In 1997 the average amount of unemployment support paid was 2,533 CZK. In the same period, the average gross monthly salary (i.e. salary before tax and deduction of social and health insurance) in the civil sector of the national economy was 10,696 CZK, and in the worst paid branch (the textile industry) only 6,861 CZK.
- e) Demand for foreign workers is high, primarily for work and occupations which do not require high qualifications, have lower pay, or are conducted in difficult working conditions. Foreign workers squeeze the domestic labour force out of the market; employing them is often advantageous for employers even at the price of breaking the law. They are often highly qualified and willing to work for lower pay.
- f) Until the adoption of the National Employment Plan, employment policy was aimed more at so-called passive policy, i.e. support payments during unemployment. The decreasing amount of budget funds for active employment policy measures in 1993 to 1997 made it possible to include only a limited number of job applicants in these measures. However, the reduced expenditures for active employment policy did not come from the reduced budget funds for this area, but from the loss of effectiveness of previous active policy instruments (in particular, employers lost interest in using this form of support).

## Employment policy expenditures

	State employment policy costs (000 CZK)	Active employment policy (AEP) costs		% of job applicants included in AEP	Monthly financial support for 1 job applicant (CZK)
		000 CZK	% of total costs		
1993	2,174,877	758,208	34.86	28.6	1,654
1994	2,571,843	727,579	28.29	26.3	1,839
1995	2,416,637	634,791	26.27	23.7	2,056
1996	2,664,492	558,086	20.95	19.9	2,306
1997	3,994,750	574,712	14.39	13.8	2,567
1998	5,117,089	923,390	18.05	14.9	2,335

Note: Share of job applicants included in active employment policy out of the average number of job applicants

Source: Ministry of Labour and Social Affairs

247. The national employment plan is directed from passive to active employment policy, to preventing high-risk events and removing systemic inadequacies in the legal regulation of employment. The Act on the State Budget for 1999<sup>149</sup> allocated 7,464,645 thousand CZK for state employment policy in the Czech Republic budget for 1999, including 1,445,936 thousand CZK, for the active employment policy, which is 19.4 percent of total expenses for employment policy.

248. Based on a Government Resolution for urgent measures to address the situation in the labour market<sup>150</sup>, in 1999, the active employment policy budget was increased, compared to the original plan, by a total of 550 million CZK, of which 200 million CZK was intended for investment incentives. Part of this increase, 170 million CZK, was acquired by shifting funds from the passive employment policy. After these adjustments, the state employment policy budget in 1999 is a total of 7,844,645 thousand CZK, including 1,992,936 thousand CZK for active employment policy and 5,851,709 thousand CZK for passive employment policy. The funds allocated for active employment policy are 25.4 percent of total employment policy expenses.

249. An important role in employment policy is played by the Council of the Economic and Social Agreement, which *is a joint, voluntary negotiating and initiative-taking body of the unions, employers, and the Government of the Czech Republic for tripartite negotiation with the aim of reaching agreement on basic issues of economic and social development*<sup>151</sup>. The Council discusses selected problems which are of joint interest, particularly in economic policy, labour law relationships, collective bargaining and employment, social issues, issues of wages and salaries, but also joint interest in the non-manufacturing sphere, work safety and in the process of integrating the Czech Republic into the European Union.

250. In the Czech Republic relatively **few people have second (additional) job**. Generally it is not necessary for a person supporting a family to have more than one job to ensure an adequate standard of living for the family, partly also for the reason that in most Czech families both parents work (note the high ratio of women working in the Czech Republic). In 1996, 197,500 people had a second job, in 1997 it was 169,700 people, and

<sup>149</sup> Act No. 22/1999 Coll., on the State Budget of the Czech Republic for 1999.

<sup>150</sup> Resolution of the Government of the Czech Republic of 31 May 1999 No. 534, on a Proposal for Urgent Measures to Address the Current Situation in the Labour Market.

<sup>151</sup> Statute of the Council of the Economic And Social Agreement of the Czech Republic, Article 1.

in 1998 it was 153,500 people. Concurrent employment relationships and secondary work activities are governed by the Labour Code<sup>72</sup> in §§ 69 to 71. If an employee arranges several employment relationships, the rights and obligations from them are evaluated independently, unless the law provides otherwise.

251. A secondary employment relationship can be arranged only for a shorter time than the designated weekly work hours. A secondary employment relationship cannot be concluded by minor employees, and it has a shorter termination notice period for both employee and employer (15 days). In addition, an employee can, on the basis of a contract or arrangement of another employment relationship, perform so-called “secondary activity” for an employer with whom he has his primary employment relationship. This activity involves work of a different kind than is agreed in the employment contract, and may be performed only outside the designated work hours. A second (additional) job can also be work performed based on a trade license under the Trades Licensing Act.
252. In 1998 the number of people who had more than one job was 3.2 percent in the civilian sector, 3.7 percent among men and only 2.5 percent among women. Second jobs were held primarily by employees, people aged thirty and over (the most represented age group was 45 to 49, 16.2 percent of all people with a second job) and people with completed secondary trade education (more than one third of people with second jobs). Those who had more than one job most frequently were technical, health care and educational workers (24%), scientific and intellectual workers (20%), and another large group of people with second jobs was labourers and repair people (13%). Especially people in Prague (which also has the lowest unemployment rate and the highest level of employee qualification) and in the South Moravian region had more than one job.

### Second job holders in civil sector in 1998

Indicator	Job holders total		Men		Women

253. International co-operation in applying the right under Article 6 of the Covenant is apparent particularly in implementing inter-governmental treaties on reciprocal employment of citizens. In the report period, the Czech Republic was bound by such treaties: with Germany (signed 1991), Poland (signed 1992), Slovakia (signed 1992), Vietnam (signed 1994), the Ukraine (signed 1996), with Switzerland (only concerning exchanges of interns, signed 1997), the Russian Federation (on temporary employment, signed 1998).

## ARTICLE 7

*The States Parties to the present Covenant recognise the right of everyone to the enjoyment of just and favourable conditions of work which ensure, in particular:*

*(a) Remuneration which provides all workers, as a minimum, with:*

*(i) Fair wages and equal remuneration for work of equal value without distinction of any kind, in particular women being guaranteed conditions of work not inferior to those enjoyed by men, with equal pay for equal work;*

*(ii) A decent living for themselves and their families in accordance with the provisions of the present Covenant;*

*(b) Safe and healthy working conditions;*

*(c) Equal opportunity for everyone to be promoted in his employment to an appropriate higher level, subject to no considerations other than those of seniority and competence;*

*(d) Rest, leisure and reasonable limitation of working hours and periodic holidays with pay, as well as remuneration for public holidays.*

254. The Czech Republic is a state party to the following conventions of the International Labour Organisation listed in the instructions for preparing the report on fulfilment of the Covenant:

No. 14 - on Weekly Rest (Industry) (1921)

No. 100 - on Equal Remuneration (1951)

No. 132 - on Holidays with Pay (Revised) (1970)

No. 155 - on Occupational Safety and Health (1981)

In 1998 the Czech Republic submitted reports on the implementation of Conventions No. 100, 132 and 155 to the Committee of Experts on the Application of Conventions and Recommendations of the International Labour Organisation.

255. The Czech Republic is also a state party to the following conventions, which related to Article 7 of the Covenant:

No. 1 - on Hours of Work (Industry) (1919)

No. 13 - on White Lead (Painting) (1921)

No. 26 - on Minimum Wage-Fixing Machinery (Agriculture) (1928)

No. 95 - on Protection of Wages (1949)

No. 99 - on Minimum Wage-Fixing Machinery (Agriculture) (1951)

No. 111 - on Discrimination (Employment and Occupation) (1958)

No. 136 - on Benzene (1971)

No. 139 - on Occupational Cancer (1974)

No. 148 - on Working Environment (Air Pollution, Noise and Vibration) (1977)

No. 167 - on Safety and Health in Construction (1988)

## A. Compensation for work

256. Article 28 of the Charter of Fundamental Rights and freedoms reads: *Employees have the right to fair remuneration for their work and to satisfactory work conditions. Detailed provisions shall be set by law.*

257. Legal regulation of compensating employees in an employment relationship is contained in the following regulations (acts and sub-statutory norms):

- the Labour Code, particularly §§ 119 to 121,
- the Act on Wages, Remuneration for Stand-by and Average Earnings
- the Act on Salaries and Remuneration for Stand-by in Budget and Certain Other Organisations and Bodies
- the Act on Salaries and Certain Other Entitlements - of State Prosecutors<sup>152</sup>,
- the Act on Bankruptcy and Composition<sup>153</sup>,
- the Collective Bargaining Act<sup>154</sup>,
- the Government Decree on Salaries of Employees of State Administration Bodies, Certain Other Bodies and Municipalities<sup>155</sup>,
- the Government Decree on Personal Income Provided to Ministers of Churches and Religious Societies<sup>156</sup>,
- the Government Decree on Setting the Amount of Funds Expended for Salaries and Compensation for Stand-By in Budget and Certain Other Organisations and Bodies<sup>157</sup>,
- the Government Decree on the Minimum Wage<sup>158</sup>,
- the Government Order implementing the Labour Code<sup>159</sup>,
- the Government Decree on Setting Minimum Wage Levels and Wage Benefits for Work in Difficult or Unhealthy Environments and for Night Work<sup>160</sup>,

---

<sup>152</sup> Act No. 201/1997 Coll., on Wages and Certain Other Entitlements of State Attorneys and Amending and Supplementing Act No. 143/1992 Coll., on Wages and Compensation for Stand-By in Budget and Certain Other Organisations and Bodies, as subsequently amended.

<sup>153</sup> Act No. 328/1991 Coll., on Bankruptcy and Composition, as subsequently amended.

<sup>156</sup> Decree of the Government of the Czech Republic No. 86/1993 Coll., on Personal Income Provided to Ministers of Churches and Religious Societies, as amended by Decree of the Government No. 273/1995 Coll. and Decree of the Government No. 322/1998 Coll.

<sup>157</sup> Decree of the Government of the Czech Republic No. 48/1995 Coll., on Setting the Amount of Funds Expended for Wages and Compensation for Work Emergency Availability in Budget and Certain Other Organisations and Bodies, as amended by Decree of the Government No. 144/1995 Coll., Decree of the Government No. 209/1995 Coll., Decree of the Government No. 306/1995 Coll., Decree of the Government No. 137/1997 Coll., Decree of the Government No. 349/1997 Coll., Decree of the Government No. 319/1998 Coll. and Decree of the Government No. 332/1999 Coll.

<sup>158</sup> Decree of the Government of the Czech Republic No. 303/1995 Coll., on the Minimum Wage, as amended by Decree of the Government No. 320/1997 Coll., 317/1998 Coll., 131/1999 Coll. and 313/1999 Coll.

<sup>159</sup> Government Order No. 108/1994 Coll., implementing the Labour Code.

<sup>160</sup> Decree of the Government of the Czech Republic No. 333/1993 Coll., on Setting Minimum Wage Levels and Wage Benefits for Work in Difficult or Unhealthy Work Environments and for Night Work, as amended by Decree of the Government No. 308/1995 Coll., 356/1997 Coll., 318/1998 Coll., 312/1999 Coll. and 132/1999 Coll.

- the Government Decree on Conditions for Providing and the Amount of a Special Supplement for Working in Difficult and Unhealthy Working Conditions<sup>161</sup>,
  - the Government Decree on the Method of Calculating the Basic Part which Cannot Be Withheld from Monthly Wages in Execution of a Decision and on Setting the Part of Wages which Can Be Subject to Withholding without Restriction<sup>162</sup>,
  - the Government Decree on Salaries of Employees of Budget and Certain Other Organisations<sup>163</sup>,
  - the Government Decree on Salaries of Members of the Armed Forces, Security Forces and Services, Customs Administration Bodies, Members of the Fire Safety Corps, and Employees of Certain Other Organisations<sup>164</sup>.
258. All generally binding wage regulations are published in the Collection of Laws, and every employee can familiarise himself with regulations under which his wage is established, at his employer's place of business, at any time.
259. The Labour Code, the Act on Wages and the Act on Salaries establish the right of an employee to wages (salary) for work performed. Wages (salary) means monetary performance provided by the employer for work. Wages also means additional performance of monetary value (in-kind wages) provided by the employer to the employee for work. Performance provided under special regulations in connection with employment are not considered wages (salary), namely, wage replacement, severance pay, travel expense compensation, revenue from capital holdings (shares), bonds and compensation for emergency work availability.
260. In budget and subsidised organisations, the law and implementing regulations set mandatory procedures for providing salaries. The basis for ensuring equal compensation for men and women in these organisations is a system of salary classes (presently with twelve levels, expansion to 16 levels is being prepared to take effect as of 1 January 2002) and catalogues of work, as a binding instrument for classifying employees in salary classes.
261. In the private sphere wages are set primarily in a employment contract or collective agreement, which is the culmination of collective bargaining at the level of a company or entire economic branch. Collective agreements are made on a company or higher level. Collective bargaining covers roughly 40 percent of employees in the private sphere. Procedures in collective bargaining are set by the Collective Bargaining Act.

262. The Labour Code, the Act on Wages and the Act on Salaries provide that wages (salary) may not be lower than the **minimum wage**. This regulation applies equally for all employers in the private and budget spheres. The minimum wage is set by government decree. As of July 1999 the minimum wage was 3,600 CZK for employees who receive a monthly wage, or 20 CZK for each hour worked by the employee within the designated working hours. As of 1 January 2000 the minimum wage is 4 thousand CZK for employees who receive a monthly wage, or 22.30 CZK for each hour worked by the employee within the designated weekly working hours. The minimum wage is expected to increase again as of 1 July 2000, which will contribute to the gradual fulfilment of the aim of the National Employment Plan, i.e. to increase the minimum wage about the subsistence level of an adult living alone<sup>165</sup>.

263. As of 1 January 2000, after withholding social and health insurance and income tax advance payments, an employee who works for the minimum wage gets paid a wage of 99.5 percent of the minimum standard of living of an adult living alone.

<sup>165</sup> Until now, after withholding social and health insurance and advances on income tax of natural persons, an employee who worked for the minimum wage was paid a wage which did not even reach the level of the subsistence level for an individual.

**Minimum wage growth in relation to the average wage and minimum standard of living**

1996	2,500	2,188	7,538	2,718	80.5
1997	2,500	2,188	8,115	2,965	73.8
1998	2,650	2,319	8,820	3,333	69.6
1999	3,425	2,963	9,558	3,430	86.4

Note: 1) Individual subsistence level (ISL) in CZK.

2) Net monthly wage (NMW). Starting with 1997, including wages in small companies with up to 20 employees. Data for 1999 are an estimate of the annual growth of the nominal wage in 1999 + 8,3%.

Source: Ministry of Labour and Social Work

264. The minimum wage for employees aged 18 to 21, who are in their first employment relationship or similar working relationship, is 90 percent, for minor employees it is 80 percent, for employees who draw a partial disability pension, the minimum wage is 75 percent, and for employees who draw a full disability pension and juveniles, who are fully disabled and do not draw a full disability pension, it is 50 percent of the amounts stated in point 262. Individual collective agreements may set a higher minimum wage, and this opportunity is generally used.

265. At present the government places great emphasis on the issue of the minimum wage, and in its program declaration<sup>166</sup> it committed itself to gradually (by 2002 at the latest) increase the minimum wage above the minimum standard of living of an adult living alone. The minimum wage increase is also contained in the National Employment Plan, with the aim of giving advantages to economically active people over economically inactive people, or to increase the ratio of work income to welfare income.

266. In organisations in the private sphere, where a collective agreement has not been concluded or wages are not set in a collective agreement, the Act on Wages, Remuneration for Stand-By and on Average Earnings provides increased protection to employees against disproportionately low wages through minimum wage scales<sup>167</sup>. Minimum wage levels are graduated by complexity, responsibility and difficulty of work in the definitions of individual scale levels. The individual levels are set by government decree, with the minimum wage amount for the first scale level for the simplest work is the same as the minimum wage.

267. The number of people working at minimum wage and the minimum wage level for the first scale level is relatively small. Data from the Ministry of Labour and Social Affairs information system, which covers roughly one million employees, indicate that in the second quarter of 1999 only 0.3 percent of employees drew an hourly wage up to 23 CZK, i.e. a maximum of 4,140 CZK per month. Low wages are more frequent in smaller

<sup>166</sup> Resolution of the Government of the Czech Republic of 5 August 1998 No. 504, on the Program Declaration of the Government.

<sup>167</sup> Under Decree of the Government No. 333/1993 Coll., on Setting Minimum Wage Levels and Wage Advantages for Work in a Difficult Work Environment or a Work Environment Damaging to Health and Work at Night, as subsequently amended.

organisations – according to research conducted in March 1999 by the labour offices, particularly in organisations with up to 50 employees: in those organisations roughly 4.7 percent of employees drew a wage of up to 4 thousand CZK per month.

268. The Czech Republic guarantees the lowest acceptable standard of living for citizens and their families by setting a subsistence level<sup>168</sup>. The subsistence level is a socially recognised minimum income level, under which material neediness begins. It defines the amount of funds essential for temporarily providing the fundamental living needs of individuals and households on a very modest level. For the most common type of household with children – a full four-member household (two adults and two children) – the subsistence level in 1999 was 9,490 to 10,870 CZK per month, depending on the age of dependent children (see text to Article 9 of the Covenant). The average gross wage in the first half of 1999 reached 12,063 CZK per month. The ratio of a family's subsistence level to the average gross wage for the first half of 1999:

- with 1 adult employed: 78.7 to 90.1 percent,
- with 2 adults employed: 39.3 to 45.1 percent.

### Incomes of employee households in 1998

(average CZK/month for a four-member employee household with children)

	Household with 1 economically active person	Household with 2 economically active persons
Gross money income	21,364	29,522
of that, gross employment income	15,937	25,896
Total net income (incl. in-kind)	19,731	25,081
of that, net money income	18,147	23,967

Source: Family Budget Statistics, the Czech Statistical Office

269. The ratio of a family's subsistence level to the family's net money income from employment was:

- in a family with 1 economically active person, 52.3 to 59.9 percent,
- in a family with 2 economically active persons 39.6 to 45.4 percent.

270. Applying the **principle of equal pay for work of equal value**, women have the same status in work as men. On the other hand, neither the Labour Code<sup>72</sup>, nor other regulations governing compensation directly state that men and women are entitled to the same compensation for the same work or work of equal value. This shortcoming is all the more visible as the difference in average (hourly) wage between men and women increases from year to year.

271. Implementation of the principle of equal compensation is anticipated by amendments to the Labour Code, the Act on Wages, Remuneration for Stand-By and on Average Earnings and the amendment to the Act on Salaries and Remuneration for Stand-By in Budget and Certain Other Organisations and Bodies (see also the text to Article 3 of the Covenant)<sup>169</sup>. The amendments to these laws directly state the principle of equal

<sup>168</sup> Act No. 463/1991 Coll., on the Subsistence Level, as subsequently amended. The amounts of the subsistence level were last set by amendment of Act No. 42/1998 Coll., which increases the amounts of the subsistence level. More detail in article 11 of the Covenant.

<sup>169</sup> On 30 November 1999 the Ministry of Labour and Social Affairs submitted the following drafts to the Government for discussion:

a) a draft act amending Act No. 65/1965 Coll., the Labour Code, as subsequently amended, and certain other Acts (passed by the Chamber of Deputies of parliament on 18 April 2000),

compensation for men and women (equal compensation for equal work or work of equal value).

272. All laws and other legal regulations on wages are based on the principle of equal compensation of all workers and the principle of equal compensation for work of equal value. Wage regulations generally speak of the employee as “he”, but they apply equally to both sexes. The work evaluation system, catalogues of work and definitions of wage levels are “neutral by sex and otherwise” and are based on criteria which are non-discriminatory (complexity, responsibility and difficulty of work). The Labour Code provides employees who feel discriminated against in this regard the opportunity to correct the situation in court.
273. Statistical data for evaluating the state of equal compensation are drawn from random sampling surveys by the Ministry of Labour and Social Affairs, which is organised quarterly, and currently contains data about roughly 40 percent of employees. In addition to the Ministry of Labour and Social Affairs research, the Czech Statistical Office also organises annual extraordinary random sampling surveys on wages.
274. According to the latest available data (the first half of 1999) women have hourly wages which are on average 26.3 percent lower than men. The differences in compensation between men and women have a slightly declining trend. (see also the text on Article 3 of the Covenant)
275. The smallest differences between earnings are among men and women performing simple work which does not require higher qualification or the simpler work which requires higher education. The biggest differences in earnings appear between men and women performing qualified trade or medium technical work and also those performing the most complicated work which requires higher education.
276. The lower average wage attained by women is fundamentally influenced by their maternal and family roles, and the resulting gaps in their professional careers on the grounds of maternity (maternity leave, caring for sick children, etc.). These gaps also cause a lower average accumulation of professional and work experience, and affect women’s opportunities to assume work with higher demands on time and responsibility.
277. Legal regulations permit creating working conditions for women which will make it easier for them to work, not only with regard to their physiological requirements, but also, e.g. with regard to their role in maternity, in raising children and caring for them. However, it must be added that many Labour Code provisions which were, in the past, formulated as a prohibition of something in the interests of protecting women, have been placed by amendment of the Code at the level of an opportunity for protection which a woman may, but need not, take advantage of. As a result of harmonising CR law with European Community law (particularly decrees on equal treatment of men and women) women will be provided special protection only where specific conditions require it.
278. The institution of special protection for women in the Czech Republic is no longer completely in harmony with developments in developed European countries. The purposes deserving worthy of special protection are being gradually narrowed, and, as a result of scientific technical development, protection of women generally is ceasing to be

---

b) a draft of Act No. 1/1992 Coll., on Wages, Remuneration for Stand-By and Average Earnings, as subsequently amended,

c) a draft of Act No. 143/1992 Coll., on Wages and Remuneration for Stand-By in Budget and Certain Other Organisations and Bodies, as subsequently amended.

considered justified, but only protection of women who are pregnant, nursing, and mothers shortly after childbirth .

279. The amendment to the Labour Code, in accordance with the principle of equal treatment of men and women in employment, regulates the conditions for entitlements based on caring for children, so that they are accessible to both parents equally (e.g. the institution of additional maternity leave is changed to the institution of parental leave). Apart from the principle of equal treatment, there are still entitlements based on care for children in which the mother cannot be replaced (maternity leave).
280. Concerning this issue, in 1998 the Czech Republic filed a report with the International Labour Organisation on implementation of Convention No. 100 on Equal Remuneration, to which reference is made.
281. In corporate and entrepreneurial practice, there are employers who do not fulfil one of the fundamental obligations toward their employees which are guaranteed by the Charter, the Labour code and other laws, primarily laws on wages (salaries), remuneration for stand-by and average earnings: the obligation to provide wages or salary for work performed. In such cases, employees are not sufficiently protected by legal regulations. The existing legal arrangement, which is to guarantee satisfaction of wage claims for employees whom their employer does not pay, applies only to the scope of the Act on Bankruptcy and Settlement<sup>170</sup>. Of course, this protection is lengthy, difficult, and ineffective for employees, even though they can make their wage claims in bankruptcy proceedings as priority receivables.
282. The inadequate guarantee of the right to wages for work performed was also subject to criticism in the regular report of the European Commission about the Czech Republic for 1999. For those reasons, and in accordance with the government's legislative work plan<sup>171</sup>, in December 1999 the minister of labour and social affairs submitted a draft law **on protection of employees in the event of employer insolvency**. The draft law is also necessary from the perspective of harmonising the domestic legal order with the law of the European Community<sup>172</sup>. Under the proposed law the state is the guaranteeing institution in the Czech Republic in case of employer insolvency.
283. The draft law defines insolvency in accordance with the Act on Bankruptcy and Settlement. However, it transfers jurisdiction for exercising payable wage claims to the labour offices and not to the preliminary bankruptcy trustee. The draft also defines subjects to whom the law will not apply, and the concept of wage claims. In the interest of accelerated satisfaction of a wage claim and limiting the disadvantageous financial situation of the employee and his/her family, the labour office will confirm the claim in undisputed cases and ensure its payment; in other cases it will make a decision based on evidence submitted by the employer or bankruptcy trustee and the employee. The law is expected to go into effect on 1 July 2000.
284. For regulations and measures which guarantee everyone minimum funds necessary to ensure a decent life for them and their families, we refer to the text to Article 9 of the Covenant, on the social security system.

<sup>171</sup> Resolution of the Government of the Czech Republic of 15 November 1999 No. 1209, appendix – Overview of Legislative Proposals By which the Government Will Directly Respond to the European Commission's Regular Report for 1999 on the Czech republic. The Parliament of the CR approved the Act in March 2000.

<sup>172</sup> EC Council Directive No. 80/987/EEC of 20 October 1980 concerns protection of employees in case of employer insolvency.

## B. Safe and healthy working conditions

285. In evaluating observance of Article 7 paragraph (b) of the Covenant, we refer to reports on implementation of International Labour Organisation Convention No. 155.

286. The main regulations governing issues of safety and health protection of employees are:

- the Labour Code<sup>72</sup>,
- the Act on State Specialised Supervision of Work Safety<sup>173</sup>,
- the Act on Public Health<sup>174</sup>,
- the Act on Mining Activity, Explosives, and the State Mining Administration<sup>175</sup>,
- the Decree on Creation and Protection of Healthy Living Conditions<sup>176</sup>,
- the Decree on Record-Keeping and registration of Work Injuries and on Reporting Operating Mishaps (Accidents) and Breakdowns of Technical Equipment<sup>177</sup>,
- the Decree Setting the Extent and Conditions for Providing Personal Protective Working Equipment and Washing, Cleaning and Disinfecting Materials<sup>178</sup>,
- the Decree Setting Basic Requirement for Ensuring Work Safety and Safety of Technical Equipment<sup>179</sup>.

287. In addition to these regulations, safety of workers at work is also ensured by many other legal regulations and technical standards. These regulations are cited in the Czech Republic's reports on implementation of International Labour Organisation Conventions No. 155 and No. 148.

288. The right to healthy working conditions arises from:

- a) the right to protection of health under Article 31 of the Charter: *Everyone has the right to the protection of his/her health. Citizens shall have the right, on the basis of public insurance, to free medical care and to medical aids under conditions provided for by law.*
- b) the right to satisfactory working conditions under the above-mentioned Article 28 of the Charter;
- c) Article 29 of the Charter, which guarantees increased protection of women, juveniles, and persons with health problems:
  - (1) *Women, juveniles, and persons with health problems have the right to increased protection of their health at work and to special work conditions.*
  - (2) *Juveniles and persons with health problems have the right to special protection in labour relations and to assistance in vocational training.*

---

<sup>173</sup> Act No. 174/1968 Coll., on State Specialised Supervision of Work Safety, as subsequently amended, in particular as amended by Act No. 47/1994 Coll.

<sup>174</sup> Act No. 20/1966 Coll., on Public Health, as subsequently amended.

<sup>175</sup> Act No. 61/1988 Coll., on Mining Activity, Explosives and on the State Mining Administration, as subsequently amended.

<sup>176</sup> Decree of the Ministry of Health No. 45/1966 Coll., on the Creation and Protection of Healthy Living Conditions, as subsequently amended.

<sup>177</sup> Decree of the Czech Office of Work Safety and the Czech Mining Office No. 110/1975 Coll., on a Register and Registration of Work Injuries and on Reporting Operating Accidents and Break-downs of Technical Facilities, as subsequently amended.

<sup>178</sup> Decree of the Ministry of Labour and Social Affairs of the CR No. 204/1994 Coll., which Sets the Scope and More Detailed Conditions for Providing Personal Work Safety Equipment and Washing, Cleaning and Disinfecting Materials, as amended by Decree No. 279/1998 Coll.

<sup>179</sup> Decree of the Czech Work Safety Office No. 48/1982 Coll., which Sets Basic Requirements for Ensuring Safety of Work and Technical Facilities, as subsequently amended.

289. The employer is liable for damage caused to an employee by a work injury while performing work assignments or in direct connection with them. Employees are required to observe regulations for ensuring safety and protection of health at work (§ 73 par. 1c of the Labour Code) and supervisory employees are required to ensure this safety and protection (§ 74 of the Labour Code). Knowledge of regulations for ensuring safety and protection of health at work is an inseparable and permanent component of qualification prerequisites. §§ 133 to 136 of the Labour Code set detailed rights and obligations of employers and employees.
290. The expression “regulations for ensuring safety and protection of health at work” must be understood to mean all regulations for protection of life and health, hygiene and anti-epidemic regulations, regulations on the safety of technical equipment and technical standards, transportation regulations, regulations on fire safety and regulations on handling flammable and explosive materials, weapons, radioactive materials, poisons and other materials harmful to health, provided they regulate issues concerning protection of life and health. These include regulations on safety and protection of health at work issued by central bodies or employers in agreement with the relevant bodies of state supervisory authority over safety of work and technical equipment and the relevant union body (§ 273 of the Labour Code).
291. State supervision of work safety and protection of health at work are performed by:
- The Ministry of Labour and Social Affairs of the CR and its subordinate Czech Office of Work Safety – through the work safety inspection,
  - the Czech Mining Office through mining offices,
  - trade union bodies (§ 136 of the Labour Code),
  - bodies of the state health inspection (under the Act on Public Health).
292. Detailed information on legal regulations and practice concerning questions governed by instruments of the International Labour Organisation on work inspection (Convention No. 81 and Recommendation No. 81 on Labour Inspection, Convention No. 129 and Recommendation No. 133 on Labour Inspection in Agriculture) were contained in reports submitted in the past to inspection bodies of the International Labour Organisation under Article 19 of the Constitution of the ILO on non-ratified conventions.

### **Work injuries in the Czech Republic**

	<b>1993</b>	<b>1995</b>	<b>1998</b>
Number of newly reported work injuries	109,908	106,275	107,175
Number of work injuries per 100 employees	2.33	2.26	2.24

Note: In 1993 there were 368 fatal work injuries, in 1995 there were 257 fatal injuries and in 1998 there were 267 fatal work injuries. Roughly 10 percent of fatal work injuries were to women.

293. Regulations on safety and protection of health at work apply to workers in all branches of the national economy. All workplaces are subject to review by the appropriate inspection bodies. In practice, however, the level of observance of work safety regulations is sometimes low, particularly in smaller companies. In modernising the legal regulation of labour law relationships and working conditions according to the requirements of European Community law requirements, the Ministry for Labour and Social Affairs faces two important goals in the coming period: building a functioning, integrated work inspection body and creating a new system of work injury insurance. Fulfilment of these tasks is related to the ministry’s assignment to rebuild the existing system of labour offices, work safety inspections, and health inspection bodies, because the existing legal

regulations and their institutional securing still carry the signs of directive management, and to prepare a proposal for comprehensive legal regulation of ensuring safety and protection of health at work. An important task is to change the current system of work injury insurance so that the new system will provide positive incentives to prevent work injuries and other injuries to health at work. The current legal regulations do not make it possible to develop sufficiently effective economic pressure so that businesses will devote due attention to questions of safety and protection of health at work and so that they will take work injury trends into account in providing working conditions.

### **C. Equal opportunity for promotion**

294. Article 3 of the Charter states, that these rights and freedoms are guaranteed to everyone without differentiation. This principle also applies to promotion in employment. Promotion to higher jobs is based primarily on demonstrated ability, education and experience. Promotion is done based on work evaluation of employees (under § 74 of the Labour Code, employers are required to evaluate the work results of subordinate employees).
295. The employer is required to discuss evaluation of work results with an employee and, at his/her request, give him a copy. If the employee does not agree with the job results evaluation, he/she can turn to a court to have the evaluation adjusted (§ 60 of the Labour Code).
296. However, Article 26 of the Charter states that: *Conditions and limitations may be set by law upon the right to engage in certain professions or activities.* In 1991, on the basis of this provision, Act No. 451/1991 Coll., was passed, which sets forth certain other prerequisites for the performance of certain positions in state bodies and organisations of the Czech and Slovak Federal Republic, the Czech Republic and the Slovak Republic. In further evaluation of this “lustration law” we refer to the opinions submitted to the inspection bodies of the International Labour Organisation in connection with the complaint of the Union Association of Bohemia, Moravia and Silesia about violation of International Labour Organisation Convention No. 111, and also the text to Article 6 of the Covenant.
297. An important legal instrument (with direct effect in the CR) for support of equal opportunity in promotion in employment is International Labour Organisation Convention No. 111, which sets forth in Article 2 the obligation of the state to ensure equal opportunities and equal treatment in issues of employment and occupations without any discrimination. Occupation and employment also means access to specialised training, access to employment, and to various occupations and conditions of employment. Any differentiation, exclusion or preference based on qualifications required for a certain occupation is not considered discrimination.
298. A citizen (worker) can seek to enforce equal opportunity for promotion in the courts, relying on Article 3 of the Charter or directly on International Labour Organisation Convention No. 111 and Article 7 of the Covenant.

#### **D. Rest, free time, limited working hours, paid vacation, paid public holidays**

299. These categories are governed by provisions of the following legal regulations:

- the Labour Code, particularly § 83, § 96 and § 100<sup>180</sup>,
- the Decree on Principles for Shortening Weekly Work time and Introduction of Operating and Working Regimes with a Five-day Work Week<sup>181</sup>,
- Government Decree No. 108/1994 Coll., which implements the Labour Code,
- the Act on State Holidays, non-work days and memorial and significant days<sup>182</sup>,
- the Act on Wages<sup>183</sup>
- the Act on Salaries<sup>184</sup>.

The right to rest is ensured by the legal regulation of the maximum weekly working hours and paid vacation.

300. Concerning uninterrupted rest between two shifts, an employer is required under of the Labour Code to schedule work time so that a worker has at least 12 hours of such rest between the end of one shift and the beginning of the following shift. This rest may be shortened to 8 hours for a worker over 18:

- a) in non-stop operations and in rotating shifts,
- b) in agriculture,
- c) in public dining facilities and in cultural facilities
- d) for urgent repair work in cases of preventing danger to life or health of workers,
- e) in natural disasters and other similar extraordinary events (§ 90 of the Labour Code).

#### **Uninterrupted rest during the week**

301. Each employee is entitled once a week to uninterrupted rest of at least 32 hours. If operation of the business permits, the uninterrupted rest in the week is set for all workers on the same day, and so as to include Sunday. If it not possible due to operating reasons to provide a worker with such uninterrupted rest, the employer may schedule the work time so that this period of rest is at least 24 hours:

- a) in seasonal and campaign work,
- b) in work in transportation, communications, in cultural facilities, in non-stop operations, provided that individual workers are allocated uninterrupted rest of at least 32 hours at least once every three weeks.

302. With work for which the work time is irregularly scheduled throughout the calendar year, and in agriculture, the employer can, based on guidelines from a central state administration body, schedule the working hours so that the uninterrupted rest lasting at least 32 hours is allocated to individual workers once every two weeks.

---

<sup>180</sup> In the amendment of the Labour Code being prepared, work time and vacation are governed in accordance with the EC Council Directive on certain aspects of setting work time (93/104/EC).

<sup>181</sup> Decree of the Ministry of Labour and Social Affairs No. 63/1968 Coll., on Principles for Shortening the Work Week and for Introducing Operating and Working Regimes with a Five Day Work Week, as amended by Decree No. 200/1968 Coll. and other amendments and supplements.

<sup>182</sup> Act No. 93/1951 Coll., on State Holidays, on Non-work Days, and on Memorial and Significant Days, as subsequently amended.

<sup>183</sup> Act No. 1/1992 Coll., on Wages, Remuneration for Stand-By and on Average Earnings, as subsequently amended.

<sup>184</sup> Act No. 143/1992 Coll., on Wages and Remuneration for Stand-By in Budget and Certain Other Organisations and Bodies, as subsequently amended.

303. In communications the uninterrupted rest during the week can be shortened at the post offices without turn-taking operation of delivering printed materials and for drivers of charter (of a course) tours to 18 hours.
304. Work on non-work days (i.e. on days to which a worker's uninterrupted rest is allocated during the week and on holidays) can be ordered only exceptionally . This involves work which cannot be performed on work days, e.g.:
- work for preventing an imminent danger to life or health or in natural disasters an other similar extraordinary cases;
  - work necessary with regarding to satisfying the living, health care and cultural needs of the population (see § 91 of the Labour Code).

### **Specified working hours**

305. In 1968, based on the Decree of the Ministry of Labour and Social Affairs on Principles for Shortening the Weekly Working Hours and Introduction of Operating and Working Regimes With a Five-day Work Week, the weekly work week was shortened to 40 from 42.5 hours per week. There is a five-day work week, and Saturday and Sunday are non-work days. § 83 par. 1 of the Labour Code provides that work time are a maximum of 43 hours per week. Workers younger than 16 have working hours of a maximum of 33 hours per week.
306. An employer decides on the scheduling of the weekly work time after discussion with the union body in the company. Weekly work time is scheduled so that in equal scheduling of working hours they do not exceed 9.5 hours in one day (§ 84 of the Labour Code). If the nature of the work or operating conditions do not permit working hours to be distributed equally in individual weeks, the employer may distribute working hours differently (§ 85 of the Labour Code); provided that in a certain period, usually four days, the average working hours may not exceed the limit specified for weekly working hours.
307. Overtime work is work performed at the instruction of the employer or with his consent over the weekly work time arising from the previously set distribution of work time, and over the scheduled work shifts. An employer may order overtime work for an employee only in exceptional cases, if there is an urgent social need. A worker's overtime work may not be more than 8 hours in a week (this restriction does not apply to seasonal or campaign work, transportation, communications, extraordinary operations, work related to supplying the population, etc.). A worker may be assigned overtime work of no more than 150 hours in a calendar year. The labour offices may, after discussion with a union body, for certain activities and in a specified extent, permit additional overtime work, with the provision that the employer must agree on the additional overtime work with employee representatives (i.e. with the union body in the company) over the limit provided by law. Pregnant women and women caring for a child younger than one year and juveniles (under the age of 18) may not be given overtime work (§ 156 par. 3 and § 166 par. 1 of the Labour Code).

### **Paid vacation**

308. The basic vacation is three weeks in a calendar year. An employee who reaches at least 15 years of an employment relationship after the age of eighteen by the end of a calendar year is entitled to vacation of four weeks. A collective agreement or internal regulations can extend vacation by additional weeks over the above-mentioned time for employees

of employers who conduct entrepreneurial activity. With employers who do not conduct entrepreneurial activity, employees can be provided vacation one week longer (public services, state administration). An employee who has worked at least 60 days in a calendar year in an uninterrupted employment relationship with the same employer is entitled to vacation. The prepared amendment to the Labour Code sets basic vacation at four weeks.

### **Paid public holidays**

309. § 91 of the Labour Code<sup>72</sup> provides that holidays are non-work days, on which work can be ordered only exceptionally, and the only kinds of work which can be ordered are work which can be ordered in uninterrupted rest days during the week, work in non-stop operation, and work necessary to guarding the employer's facilities. For each hour worked on a holiday an employee is entitled to a surcharge on wages in the amount of his average earnings per hour.
310. Monthly pay is not reduced for time off on a public holiday; wage compensation in the amount of average earnings is allocated for days when the worker did not work because a holiday fell on his/her usual work day.
311. Further, we refer to the first report on Convention No. 132 on Holidays with Pay (revised), submitted in 1998 to the Committee of Experts of the International Labour Organisation.

## ARTICLE 8

**1. The States Parties to the present Covenant undertake to ensure:**

- (a) The right of everyone to form trade unions and join the trade union of his choice, subject only to the rules of the organisation concerned, for the promotion and protection of his economic and social interests. No restrictions may be placed on the exercise of this right other than those prescribed by law and which are necessary in a democratic society in the interests of national security or public order or for the protection of the rights and freedoms of others;**
- (b) The right of trade unions to establish national federations or confederations and the right of the latter to form or join international trade-union organisations;**
- (c) The right of trade unions to function freely subject to no limitations other than those prescribed by law and which are necessary in a democratic society in the interests of national security or public order or for the protection of the rights and freedoms of others;**
- (d) The right to strike, provided that it is exercised in conformity with the laws of the particular country.**

**2. This article shall not prevent the imposition of lawful restrictions on the exercise of these rights by members of the armed forces or of the police or of the administration of the State.**

**3. Nothing in this article shall authorise States Parties to the International Labour Organisation Convention of 1948 concerning Freedom of Association and Protection of the Right to Organise to take legislative measures which would prejudice, or apply the law in such a manner as would prejudice, the guarantees provided for in that Convention.**

312. The general principle for legal regulation of the right to associate in trade unions is contained in the Charter of Fundamental Rights and Freedoms. Article 27 of the Charter reads:

- (1) Everyone has the right to associate freely with others for the protection of his/her economic and social interests.*
- (2) Trade unions shall be established independently of the state. No limits may be placed upon the number of trade union organisations, nor may any of them be given preferential treatment in a particular enterprise or sector of industry.*
- (3) The activities of trade unions and the formation and activities of similar associations for the protection of economic and social interests may be limited by law in the case of measures necessary in a democratic society for the protection of the security of the state, public order, or the rights and freedoms of others.*
- (4) The right to strike is guaranteed under the conditions provided for by law; this right does not appertain to judges, prosecutors, or members of the armed forces or security corps.*

313. The establishment and activities of unions are governed by the Act on Association of Citizens<sup>185</sup>. The introductory provision of this Act (§ 1 par. 1 and 2) reads: *(1) Citizens have the right to associate freely. (2) Permission from a state body is not necessary to exercise this right.* This Act does not apply to association of citizens in political parties

<sup>185</sup> Act No. 83/1990 Coll., on Association of Citizens, as subsequently amended, in particular Act No. 300/1990 Coll., Act No. 513/1991 Coll. and Act No. 68/1993 Coll.

and political movements, association for employment or arranging the conduct of certain occupations or to association in churches and religious societies.

314. Under this Act a trade union is one of the forms of association (§ 2 par. 1): *Legal entities may also be members of an association.* The particular method of creation of an association for protection of economic and social interests is addressed in § 9a of the Act: *A trade union organisation or an employers organisation becomes a legal entity on the day after the application for its registration was delivered to the appropriate ministry.* Under § 3 of this Act no one may be forced to associate, to become a member of associations or to participate in their activities. Everyone is free to leave an association.
315. The so-called registration principle applies to unions and employers' organisations. Under the Act on Association of Citizens, permission from a state body is not necessary for union activities (see § 1 par. 2), and the Ministry of Interior only registers unions. An application for registration of a union can be submitted by at least three citizens, of whom at least one is over 18. As of 31 December 1999 approximately 650 trade unions of employers were registered.
316. Under § 2 par. 4 of the Act on Association of Citizens *soldiers on active duty may not form unions and associate in them. The scope of authorisation of unions associating members of the National Security Corps (Police Force) and Prison Service in exercising and protecting their social interests is provided by a special act.* Another provision of the Act on Association (§ 4 lt. c) provides that *armed associations or associations with armed units are not permitted; associations whose members hold or use firearms for sporting purposes or for conduct of hunting rights are not considered to be such associations.*

### **The right to strike**

317. Legal regulation of strikes is contained in the Collective Bargaining Act. This Act governs a strike by a union organisation in a dispute over concluding a collective agreement or a collective agreement on a higher level and a solidarity strike, which is meant to support those who are striking over concluding a collective agreement.
318. On the basis of the cited provision of the Charter and the Collective Bargaining Act, the right to strike as such is denied to the following professions: judges, state prosecutors, members of the armed forces and other armed services.

### **Central organisations and the membership base of trade unions**

319. **The Czech-Moravian Confederation of Trade Unions** The largest central union organisation in the CSFR was the Czechoslovak Confederation of Unions (CSKOS); After the division of the CSFR it changed its name to the Czech-Moravian Confederation of Trade Unions (CMKOS). This confederation currently brings together 30 unions. In 1999 the unions associated in ČMKOS had a total of more than 1.3 million members.
- a) The biggest member union is the Kovo union, which had over 410 thousand members in 1999. The Czech-Moravian union of educational workers has over 130 thousand members. Unions with high membership numbers also include the Union of Workers in Mining, Geology and the Oil Industry (90 thousand members), the STAVBA CR Union (almost 80 thousand members), the Union of Health Care and Social Care of the CR and the Union of State Bodies and Organisations (both over 65 thousand members) and the Union of Workers in Wood Processing Branches and Forest and Water Management (almost 65 thousand members). In contrast, the smallest member base is still in the

Union of Company Employees of the CR (around 400 members), the Sailors Union (around 550 members) and other unions whose membership base is under two thousand members: the Union of Aviation Employees, the Radiocommunication Workers Union, the Union of Employees of Manufacturing and Special Purpose Organisations in Culture and the Projekt Union.

### 320. Other Central Trade Unions

- a) The Confederation of Arts and Culture: this central union brings together unions from the theatre, cinematography, library science, music and creative arts. According to the latest reports, it includes a total of about 120 thousand members.
  - b) The Union Association of Bohemia, Moravia and Silesia: In 1996, according to internal data, there were 80 thousand members. One third of members are registered directly with the Central Representative Body as individual members who are not associated in the component organisations. At present, 60 thousand members are reported.
  - c) The Association of Independent Unions brings together a total of 220 thousand members. Members of this central organisation are: the Union of Agriculture and Nutrition Workers (approximately 95 thousand members), the Union of Railway Workers (72 thousand active members), the Czech Union of North-western Power Engineers, the Union of Private Employees, the Flat Glass Union.
  - d) The Christian Union Coalition: This central organisation has roughly 10.5 thousand members, primarily from Moravia; it associates members without regard to branch or type of economic organisation, retired people and handicapped people. At present there are transportation, education, state administration and local administration, machine engineering and women's sections.
321. Some professional union associations are independent and not affiliate with any central union organisation, e.g. the Physicians Union Club, the Justice Union and the Justice Employees Union, and others. However, these union groups do not publish their membership base, and so it is not possible to determine exactly how many people they represent.
322. In the CR, it is considerably problematic to determine the exact percentage of union organisation in relation to the total population capable of working, because independent union organisations do not publish data about their total membership numbers.
323. The number of the labour force in the CR includes all persons over 15. The following distinctions are made: total labour force – those employed in the national economy and the unemployed, and the civilian labour force – those employed in the civilian sector and the unemployed. The employed include the self-employed.
324. In 1998 the total labour force was 5,201 thousand people. Despite the cited difficulties in determining the exact membership base, we can state that, according to available data, approximately 33% of the total labour force in the Czech Republic is organised in unions.
325. The Czech Republic is a state party to International Labour Organisation Convention No. 87 on Freedom of Association and Protection of the Right to Organise<sup>186</sup> of 1948 and

---

<sup>186</sup> Notification of the Federal Ministry of Foreign Affairs No. 489/1990 Coll., Convention on the Freedom of Association and Protection of the Right to Organise.

Convention No. 98 on the Right to Organise and Collective Bargaining<sup>187</sup> of 1949. The Government submits regular reports on fulfilment of these conventions. The Czech Republic is also a state party to the International Covenant on Civil and Political Rights (see the introductory part of this report).

## ARTICLE 9

***The States Parties to the present Covenant recognise the right of everyone to social security, including social insurance.***

326. Article 30 of the Charter says:

- (1) Citizens have the right to adequate material security in old age and during periods of work incapacity, as well as in the case of the loss of their provider.*
- (2) Everyone who suffers from material need has the right to such assistance as is necessary to ensure his/her a basic living standard.*
- (3) Detailed provisions shall be set by law.*

327. Social security system in the Czech Republic is governed by a set of legal norms and financial and organisational measures the purpose of which is to ensure the basic social rights of everyone in a difficult financial and social situation. Social security is implemented by payment of social insurance benefits or provision of social services.

328. The system is governed by the Social Security Act<sup>188</sup>, the State Social Care Support Act<sup>189</sup>, the Act on Social Neediness<sup>190</sup>, the Pension Insurance Act<sup>191</sup>, the Act on Employee Sickness Insurance<sup>192</sup>, the Act on Organisation and Implementation of Social Insurance<sup>193</sup>, the Social Security and State Employment Policy Premiums Act<sup>194</sup>, the State-Contributory Supplementary Pension Insurance Act<sup>195</sup> and others. The entire social security system rests on three basic pillars, each of which has its own particular importance. They are:

- a) social insurance (pension and sickness),
- b) state social support,
- c) social care.

329. The Charter authorises the law to regulate details of the right to social security. The Social Security Act, under § 1, guarantees this right to all citizens. Social security benefits are provided by the state and are not subject to tax. Income and expenses of social insurance are a component of the state budget.

---

<sup>188</sup> Act No. 100/1988 Coll., on Social Security, as subsequently amended.

<sup>189</sup> Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>190</sup> Act No. 482/1991 Coll., on Social Neediness, as subsequently amended.

<sup>191</sup> Act No. 155/1995 Coll., on Pension Insurance, as subsequently amended.

<sup>192</sup> Act No. 54/1956 Coll., on Employee Sickness Insurance, as subsequently amended.

<sup>193</sup> Act No. 582/1991 Coll., on Organisation and Implementation of Social Security, as subsequently amended.

<sup>194</sup> Act No. 589/1992 Coll., on Social Security and State Employment Policy Premiums Act, as subsequently amended.

<sup>195</sup> Act No. 42/1994 Coll., on State-Contributory Supplementary Pension Insurance and amending Certain Acts Related to its Implementation, as subsequently amended.

330. The Czech Republic is bound by International Labour Organisation Convention No. 102 on Social Security (Minimum Standards) (ratified complete without the parts on payments for work injuries and in unemployment) and Convention No. 128 on Invalidity, Old-Age and Survivors' Benefits (only the part on old-age pensions was ratified). In 1999 the Czech Republic submitted a detailed report on the fulfilment of both conventions to the Expert Committee of the International Labour Organisation.

### Expenditures on Social Security

### Proportion of social security expenditures to gross domestic product (in %)

	1990	1993	1994	1995	1996	1997	1998
Gross domestic product in bn CZK current prices	626.2	1020.3	1182.8	1381.1	1572.3	1680.0	1820.7
Total social transfers from the state budget	-	11.6	11.6	11.3	9.8	12.3	12.2
Sickness insurance benefits <sup>1)</sup>	3.4	2.6	2.9	2.6	1.4	1.2	1.0
State social support benefits	-	-	-	-	1.7	1.7	1.6
Pensions security benefits	7.3	7.2	7.1	7.7	8.0	8.6	8.8

Note: 1) The system of sickness insurance benefits consists of: sickness benefit, family member care benefit, maternity benefit, and pregnancy and maternity compensation benefit. These benefits are fully provided to employees, members of producer co-operatives and co-operative farmers. Self-employed persons are not insured with the family member care benefit or pregnancy and maternity compensation benefit. Job applicants receive neither the family member care benefit, pregnancy and maternity compensation benefit, nor the sickness benefit. The decline in the share of these payments from 1995 reflects the amendment of the law described in note 2) to the previous table.

## A. Social insurance

331. Organisations and individuals pay so-called social security insurance (i.e. premiums for pension and sickness insurance) and a contribution to the state employment policy (including material security for job applicants).

### **Pension insurance**

332. Pension insurance of individuals is based on a basic system of mandatory and state guaranteed insurance, which has a long tradition in the Czech Republic, and also on voluntary individual supplemental insurance, built on a civic and not an employee, i.e. a corporative principle. The Pension Insurance Act governs insurance for old age, disability and death of a provider.

333. The compulsory insurance system is a joining of solidarity with individual merit. The premiums paid by employed persons for social security is used to cover expenses for payment of old age, disability (full and partial), survivors' (widow, widower and orphan) pensions, as well as sickness insurance benefits and unemployment benefits, with the state guaranteeing sufficient funds in the system on an on-going basis. The amounts of pensions paid are constructed so as to observe both the insurance principle (i.e. the payment amount depending on the premiums which were paid to the benefit of the beneficiary), and justified solidarity toward beneficiaries with low incomes.

334. The Pension Insurance Act governs the conditions for a claim to a pension and its amount (calculation) for all kinds of pensions. Under § 4 of the Pension Insurance Act<sup>191</sup> the following pensions are provided:

- a) old-age
- b) full disability
- c) partial disability
- d) widow and widower
- e) orphan.

335. The basic pillar of the pension system is compulsory for all natural persons who are employed in the Czech Republic. This is one of the forms of social security, whose purpose is to prevent poverty in life situations which are covered in the system, and it is a basic element of the civic solidarity principle. The pension insurance system is financed from on-going contributions paid by employers, employees, and self-employed persons.

336. The retirement age is being gradually increased, in the period from 1 January 1996 to 31 December 2006, to a level which is usual in the pension systems of western European countries, to 62 for men and 57 to 61 for women, as of 1 January 2007<sup>196</sup>. Women who raised children receive an advantage: for each child raised the retirement age is decreased by one year, but no lower than 57. In comparison with the previous legal regulation, where the age was 60 for men and 53 to 57 for women (depending on the number of children) it is obvious that the relevant difference in setting the retirement age is being decreased by gradual increase of the retirement age for women.

337. Basic pension insurance provides every citizen of retirement age or with a long term incapacity for employment an entitlement to a pension. The state valorises pensions from time to time according to the growth in consumer prices and to a certain extent also according to the growth of real wages.

---

<sup>196</sup> Until 1995 the age was 60 for men and 53 to 57 for women (depending on the number of children raised).

338. Voluntary individual supplemental pension insurance has been offered by private pension funds since 1994. This system is also financially supported by the state, which provides a contribution to people taking part in this supplemental insurance. The entire system was established by the Act on Supplemental Pension Insurance with a State Contribution<sup>197</sup>. In this way the state supports citizens in taking personal responsibility for ensuring adequate funds for their old age. As of 1 January 2000, an amendment to the Act on Supplemental Pension Insurance goes into effect which changes the conditions for insurance, particularly in terms of strengthening the importance of long-term savings (as opposed to short term capital deposits) and tightening the rules for management of individual funds and state supervision of them. As of 1 January 2000 contributions for supplemental pension insurance are, under certain conditions, deductible from the tax base for individual income tax. However, funds which citizens deposit with these funds are not insured by law.
339. Under § 67 of the Pension Insurance Act, the government, by decree, will raise *pensions paid whenever the aggregate consumer price index grows by at least 5 percent from the calendar month immediately preceding the month when these pensions were last raised; however, the government shall, by decree, increase pensions paid whenever the aggregate consumer price index grows by at least 10 percent from the calendar month stated in the part of the sentence before the semicolon*. If pensions are not raised during a calendar year, they shall be raised in the first increase after that year not only according to the growth in the consumer price index, but also taking into account the growth of real wages. Under § 107 of the same Act, the Government shall also set by decree the level of the general assessment base for pensions in the calendar year and the proportion of the general assessment for all types of pensions.
340. Since the beginning of 1996, when the Pension Insurance Act went into effect, pensions were raised four times<sup>198</sup>, and a general assessment base was set for 1995, 1996, 1997 and 1998. The general calculation base for 1998 will be in effect as of 1 January 2000. Under § 67 of the Pension Insurance Act, pension increases will be set so that with the average old age pension it will correspond to at least 70 percent of the growth in the consumer price index.

---

<sup>197</sup> Act No. 42/1994 Coll., on State-Contributory Supplementary Pension Insurance and Amending Certain Acts Related to its Implementation, as subsequently amended.

<sup>198</sup> Twice in 1996, then in 1997 and 1998. They were last increased by Decree of the Government of the Czech Republic No. 104/1998 Coll., on Increasing Pensions in 1998, in July 1998.

## Pensions paid (as of 31 December of each year)

Pension	Number of pensions paid (thousand)						Average pension amount (CZK)					
	1993	1994	1995	1996	1997	1998	1993	1994	1995	1996	1997	1998

Source: The Czech Statistical Office, 1999

## Sickness insurance

341. The sickness insurance system, like the pension insurance system, is financially supported from income flowing to the state budget from premiums for social security, with the difference that this income for social security is not recorded separately in a separate account in the state budget. A special law provides who and to what extent is required to pay premiums for sickness insurance as a component of premiums for social security<sup>199</sup>. Health care is paid from public health insurance payments. They are described in the text to Article 12 of the Covenant, the chapter Basic Health Care and its Financing.

342. In terms of social security for families and households, certain important benefits are paid from the sickness insurance system (under the Act on Sickness Insurance):

- a) **Sickness benefit** are due to an employee who is, under a special regulation<sup>200</sup>, acknowledged to be temporarily incapable of performing his/her current employment, (during so-called incapacity for work) because of illness or injury, pregnancy or maternity. Sickness payments are due to a woman who is acknowledged to be unable to work in connection with pregnancy and childbirth on if she is not entitled to financial assistance in maternity. Insured persons are provided for with financial payments. Sickness benefits are provided under § 15 of the Act on Sickness Insurance from the first calendar day of incapacity for work until its termination or until acknowledgement of partial or full disability, usually no longer than one year. Sickness payments are also due to an employee during a quarantine period ordered under regulations on measures against contagious diseases. Setting the amount of sickness insurance benefits is done on the basis of aggregate non-taxed income, usually in the calendar quarter preceding the start of the entitlement to a payment. The amount of sickness benefit per calendar day is 69 percent of the daily assessment base of income, but the first three days are only 50 percent of that base. If the daily assessment base exceeds 360 CZK, this part is counted in full, 60 percent of the amount from 360 to 540 CZK is counted, and higher amounts are not taken into

<sup>199</sup> Act No. 589/1992 Coll., on Social Security and State Employment Policy Premiums Act, as subsequently amended. Participation is compulsory for all employees conducting employment non-entrepreneurial activity, with the exception of employees who perform this activity in a small extent or occasionally. Pupils and students preparing for a future occupation are also subject to it (they are entitled to only financial assistance in maternity). Self-employed persons have sickness insurance if they themselves register for this kind of social insurance (and then they are provided only sickness benefits and financial assistance in maternity).

<sup>200</sup> Under § 2 of Decree of the Ministry of Labour and Social Affairs of the CR No. 31/1993 Coll., on Assessment of Temporary Incapacity for Work for Purposes of Social Security, as subsequently amended.

account<sup>201</sup>. As of 1 January 2000 the determining amounts are increased to 400, and 400 to 590 CZK, respectively. As of the same date, monetary payments of sickness benefits will be increased annually by government decree according to growth in average wages.

- b) **Family member care benefit** is due to employees who are caring for a sick child under the age of 10, are caring for a child younger than ten if the children's educational institution which the child attends has been closed, the child has been ordered quarantined or the person who otherwise cares for the child has fallen ill or is in quarantine. It is also due to everyone who is caring for another family member if his/her state of health necessarily requires care by another person. "Family member" in these cases means that the sick person lives in the same household with the employee. This restriction does not apply for parents of children under the age of ten. Support is provided for no longer than nine days, if the need for care continues to exist during them, or 16 days for single parents. The amount of support is calculated like sickness payments.
- c) **Pregnancy and maternity compensation benefit** is provided when transferring a pregnant worker or mother of a small child to different, lower paid work for health reasons or for reasons of caring for a small child.
- d) **Financial assistance in maternity** (maternity benefit) is provided during an employee's pregnancy and maternity for 28 weeks of maternity leave, beginning six to eight weeks before the anticipated birth date, or for 37 weeks to single women. Financial assistance is also due to a male employee if he fulfils the statutory conditions, e.g. if he is caring for a child, whose mother has died. Financial assistance in maternity is calculated like sickness pay, with the provision that the daily assessment base is determined as of the day maternity leave begins and the amount of financial assistance in maternity per calendar day is 69 percent of the daily assessment base for the entire period of the entitlement.

343. Reference is further made to detailed reports on implementation of International Labour Organisation conventions:

- Convention No. 130 – Medical care and Sickness Benefits,
- Convention No. 12 – Workmen's Compensation (Agriculture) (1921),
- Convention No. 17 – Workmen's Compensation (Accidents) (1925),
- Convention No. 42 – Workmen's Compensation (Occupational Diseases) (1934).

344. **Unemployment benefits** serve for material security of job applicants and are provided under the Employment Act<sup>202</sup>. The amount and conditions for providing support in unemployment are described in more detail in the text to Article 6 of the Covenant. We also refer to reports on implementation of ILO Convention No. 122 on Employment Policy.

---

<sup>201</sup> This amount was set by an amendment to Act No. 61/1999 Coll., on Sickness Insurance, in effect as of 1 October 1999. Until then, sickness benefits were calculated from a maximum amount of 270 CZK.

<sup>202</sup> Act No. 1/1991 Coll., on Employment, as subsequently amended, §§ 12 to 18.

## **B. State Social Support**

345. State social support consists of financial transfers from the state budget based on the principle of solidarity of childless families with families caring for dependent children and the principle of support for low income families with high income ones.
346. The purposes of the system of state welfare benefits is strengthening the income of applicants, especially families with children, in situations which they are unable to solve on their own, or which the state has an interest in encouraging. The payments serve to strengthen income in these previously defined situations, in which the income of families decline relatively or their expenses increase.
347. Unlike social security, state welfare support is not tied to withholding of contributions from working income. Expenses for state welfare support are paid by the state.
348. With state welfare support the state shares in covering expenses for sustenance and other basic needs of children and families and also provides it in certain other disadvantageous situations. In specified cases support is provided depending on income level.
349. Under the State Social Care Support Act<sup>203</sup> (§ 2), the following state welfare support payments are provided:
- a) benefits provided depending on income level: children's allowance, social extra-benefit, housing contribution, transport contribution,
  - b) other benefits: parental benefit, providing-for benefit, foster care benefits (benefits to cover a foster child's needs, foster parent's compensation, child take-over grant and a contribution for purchase of a motor vehicle), child-birth grant and death grant.

Apart from benefits payments which are paid under the State Social Care Support Act, as of 1 July 1997, two other welfare contributions are allocated for a limited time period and depending on income level; a contribution for balancing the increase in heating prices (at most until 30 June 2000) and a contribution for balancing the housing rent increase (at most until 31 December 2000). More detail on these contributions is found in paragraph 435.

350. The text of the cited Act conditions the entitlement to state social care support benefits on, among other things, registration for permanent residence of the entitled person and jointly evaluated persons. § 3 par. 1 of the State Social Care Support Act (the range of entitled persons) reads: *State welfare support payments are due, upon fulfilment of conditions provided below, only to a natural person (the "person") if the person and persons evaluated jointly with him are registered for permanent residence in the Czech Republic<sup>204</sup> under special regulations<sup>205</sup>*. However, the condition of registration for

---

<sup>203</sup> Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>204</sup> Permanent residence under this Act also means long-term residence granted to foreigners under special Acts: § 6 of Act No. 123/1992 Coll., on Foreigners' Stay and Residence in the Czech and Slovak Federal Republic, as subsequently amended, § 4 of Act No. 135/1982 Coll., on reporting and registration of the residence of citizens, § 7 and § 19 par. 3 of Act No. 123/1992 Coll., on Foreigners' Stay and Residence in the Czech and Slovak Federal Republic, as subsequently amended. Under Act No. 498/1990 Coll., on Refugees, as subsequently amended, a person who has been granted refugee status is also considered a person with permitted long term residence, and meets the condition for state welfare support benefits.

<sup>205</sup> Therefore, at first glance § 3 par. 1 of the Act is not entirely in accordance with the obligation arising from article 2 par. 1 and article 3 par. 1 and 2 of the Convention on the Rights of the Child. Art. 2 par. 1 of the Convention on the Rights of the Child: *States Parties shall respect and ensure the rights set forth in the present Convention to each child within their jurisdiction without discrimination of any kind, irrespective of the child's*

permanent residence or long-term residence for creation of the entitlement to a payment is not required under par. 2 of the same provision for minor children entrusted to substitute parental care or institutional care in the Czech Republic.

351. However, under § 3 par. 3 of the cited Act, as of 1998<sup>206</sup>, in justified cases *the district office with jurisdiction according to the person's place of residence shall waive the condition of permanent residence to a person who applied for permanent residence in the Czech Republic, if the person's sustenance or the sustenance of his/her children would be endangered*. In addition, § 74 par. 5 of the Act<sup>207</sup> states that *the Ministry of Labour and Social Affairs may waive the condition of permanent residence in justified cases*. Waiver of the condition also applies to jointly evaluated persons.
352. However, as a result of the wording of § 3 par. 1 of the cited Act, in the report period (particularly before the Act was amended in 1996 and 1998) there were rigid steps in cases where the entitled person fulfilled the condition of registration for permanent residence under special regulations, but a person evaluated jointly did not fulfil the condition. Many rejected applicants for state welfare benefits did not know about the possibility of waiving this condition under the above-mentioned procedure. In connection with this, the Ministry of Labour and Social Affairs is preparing a substantive outline of an amendment to the State Social Care Support Act. The condition for entitlement to payments will be not permanent residence, but a permanent dwelling of all jointly evaluated persons. The amendment is expected to go into effect in 2002<sup>208</sup>.
353. Entitlement to and the amount of state welfare benefits are derived from amounts of the so-called subsistence level, set by the Act on the minimum standard of living<sup>209</sup> in § 3. For more detail on the subsistence level see part C. Social care.

---

*or his or her parent's or legal guardian's race, colour, sex, language, religion, political or other opinion, national, ethnic or social origin, property, disability, birth or other status.*

Art. 3 par. 1: *In all actions concerning children, whether undertaken by public or private social welfare institutions, courts of law, administrative authorities or legislative bodies, the best interests of the child shall be a primary consideration.* Article 3 par. 2: *States Parties undertake to ensure the child such protection and care as is necessary for his or her well-being, taking into account the rights and duties of his or her parents ... and, to this end, shall take all appropriate legislative and administrative measures.*

<sup>206</sup> Amendment No. 158/1998 Coll., to Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>207</sup> Amendment No. 137/1996 Coll., to Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>208</sup> As of 1 January 2000, an amendment is in effect to the legal regulations of the stay of foreigners in the Czech Republic, and as of 1 April 2000 this amendment will also be reflected in the legal regulation of state welfare support. From that date, entitlements for state welfare support for persons with permanent residence, children entrusted to alternative family care and asylum recipients (previously refugees) will be assessed the same way as before, i.e. before 1 April 2000. In other cases of temporary residence in the Czech Republic (which also include long term residence under the legal regulation of stays of foreigners in effect before 1 January 2000) entitlements to state welfare support will be tied to a stay in the Czech Republic of 365 days, which basically corresponds to the previous long term residence, which was generally permitted for a period of one year. In this way provision of entitlements from welfare support, when it is justified with regard to the length of the stay, from cases where foreigners remain in the Czech Republic only for a short time, e.g. as tourists. However, the provision remains in effect which permit a district office or the Ministry of Labour and Social Affairs to waive the condition of permanent residence, and thus restrict possible harshness in applying the Act.

<sup>209</sup> Act No. 463/1991 Coll., on the Subsistence Level, as subsequently amended.

**State social support benefits** (in million CZK)

	1995 <sup>2)</sup>	1996	1997	1998
Total	1,195	26,692	29,237	29,637
Of that: child-birth grant	75	483	525	563
death grant	62	347	331	519
children's allowance	-	11,124	12,495	11,493
foster care benefits	20	144	153	233
providing-for benefit	5	33	25	23
parental benefit	1,033	7,354	7,612	7,780
social extra-benefit	-	5,691	6,224	6,273
housing contribution	-	677	813	1,367
transport contribution	-	839	938	946
separate benefits (contributions for heating and rent) <sup>1)</sup>	-	-	116	440

Note: 1) On 1 July 1997 so-called separate benefits began to be paid under Act No. 75/1997 Coll., on the Welfare Contribution for Balancing the Increase in Heating Prices, as amended by later regulations, i.e. a contribution for equalising the increased heating prices and a contribution for rent, which are construed similarly as state welfare benefits. The entitlement to the contribution was regulated by a separate law because it has the specific character of price balancing and will be paid only for a transitional period of three years.

2) Paid from 1 October 1995, when the State Social Care Support Act went into effect.

Source: Statistical Yearbook of the CR, 1999

354. In terms of social security, the most important payments made through the state welfare system are **payments for families with children**:

- a) *Children's allowance*: Paid since 1 January 1996 as part of state welfare support as a payment for families with children, helping cover the expenses related to raising and feeding a family. A child living in a family with an income lower than three times the family minimum standard of living is entitled to a contribution. The amount of the contribution depends on the child's age and on the level of total income in the family, and is derived from the amounts of the minimum standard of living necessary to ensure sustenance and other basic needs of the child.
- b) *Parental benefit*: The contribution helps to cover the expenses of a parent (mother or father), who stays in the home in order to personally care for a small child until the child is 4, or 7, in the case of a child with a long-term handicap. The amount of the contribution is set as 1.1 times the minimum standard of living for personal living needs of the care providing parent. When drawing the contribution, the parent may be employed to a limited extent, in order not to interrupt full-day care for the child.
- c) *Extra-social benefit*: The social contribution is a payment to assist families with low incomes as a contribution for expenses related to providing for the needs of their children. The entitlement to payments arises if a parent is caring for a child and the family's income does not exceed 1.6 times the family subsistence level.

### C. Social care

355. Social care is aimed at people in material or social neediness. Under the Act on Social Neediness<sup>210</sup>, § 1: *A citizen is considered socially needy if his/her income does not reach the amounts of the subsistence level set by a special law<sup>211</sup> and he cannot increase the income because of his age, state of health or other serious reasons by his/her own actions, particularly his/her own work.*
356. Under the law, the **subsistence level** is a socially recognised minimum income level under which a person is materially needy. Under § 2 par. 2 of the Act on the Subsistence Level: *Citizens whose income does not reach the subsistence level and who cannot increase that income due to their age, state of health or other serious reasons by their own actions, particularly their own work, are provided assistance; the method and form of providing assistance, other conditions and the level of the help are set forth by special regulations.* The subsistence level is a criterion whose main function is evaluating income inadequacy for purposes of social protection of a citizen or family. Assistance is provided in the form of social care benefits based on the Act on Social Neediness, which supplement the inadequate income of the citizen and his/her family, generally to the amount of the subsistence level. However, it can also be provided above the subsistence level, if, upon individual evaluation of the social and economic situation of a household it is acknowledged to have justifiably higher basic living needs, related to, e.g., a medically recommended diet, higher expenses for housing, etc.
357. The subsistence level of a citizen or citizens whose income is evaluated jointly<sup>212</sup> consists of the sum of all incomes set forth by the Act on the Subsistence Level<sup>213</sup> for securing food and other fundamental personal needs and for ensuring necessary expenses for the household. The subsistence level in the Czech Republic has two parts. The first part applies to basic personal needs of individual jointly evaluated persons in the household. Personal needs include primarily food, clothing, shoes, other industrial products for short term use, services and personal development. The subsistence level amounts specified for ensuring personal needs are differentiated by age in the case of dependent children and also individually for adults. The second part of the subsistence level is the need for funds necessary to pay common expenses for the household (i.e. primarily expenses for housing and related services) and differs by the number of persons in the household. The total subsistence level is the sum of all the parts for personal needs of individual members of the household and one part for joint needs.
358. The subsistence level is irregularly adjusted by government regulations with regard to growth of living expenses, as soon as the combined index of consumer prices grows by at least five percent from the previous setting. The Government made the last adjustment by

---

<sup>210</sup> Act No. 482/1991 Coll., on Social Neediness, as subsequently amended.

<sup>211</sup> Act No. 463/1991 Coll., on the Subsistence Level, as subsequently amended.

<sup>212</sup> Jointly evaluated persons are, under § 4 of the Act on the Subsistence Level, primarily dependent children and their parents, spouses, a male or female partner and other persons who live together permanently and jointly pay the expenses for their needs.

<sup>213</sup> Under § 6 of the Act on the Subsistence Level, this income means income which is subject to individual income tax, financial benefits of sickness insurance and pension insurance, material security of job seekers, support payments, state welfare benefits and social care benefits, with the exception of one-time benefits, and other repeating or regular income.

its regulation increasing the amount of the subsistence level as of 1 April 1998<sup>214</sup>. Since the first setting of the subsistence level in 1991, it has been adjusted seven times.

359. In the Czech Republic the subsistence level is not used only as a criterion for evaluating inadequate income. Since passage of the State Social Care Support Act in 1996, it is used not only as the official poverty level, but also as a technical instrument for measuring the total income level (particularly of families with children), which is used to determine the creation of an entitlement and the level of basic welfare benefits for households. Welfare benefits related to the subsistence level are demotivating in relation to income from employment, particularly in larger households. Expenses for state welfare support in 1998 were 29.6 billion CZK (1.63% of GDP), which was 6.4 times more than expenses for social care benefits – the third pillar in social security (4.65 billion CZK, which is 0.25% GDP) – directly intended for protection from material need (which was the immediate purpose of establishing the institution of the subsistence level as a component of the social protection system).

#### Ratio of household subsistence level to average wages (gross nominal)

Household	Subsistence level in CZK/month		Ratio of subsistence level to average nominal wages in %	
	1997	1998	1997	1998
individual	2,965	3,333	27.7	28.5
2 adults	5,240	5,813	49.0	49.7
1 adults and 1 child (aged 5)	4,715	5,250	44.1	44.9
2 adults and 1 child (aged 5)	6,995	7,740	65.4	66.2
2 adults and 2 children (aged 8 and 12)	9,045	9,930	84.6	84.9
2 adults and 3 children (aged 5, 8 and 12)	10,695	11,718	100.0	100.2

Note The average gross nominal wage in 1997 was 10,691 CZK, and in 1998 11,693 CZK. The calculation of the average subsistence level takes into account adjustment of its components during the year.

360. Regardless of the facts stated, comparison of the extent of poverty by household income distribution, prepared according to OECD methods shows that the Czech Republic has a relatively low extent of poverty. The ratio of poor households with income up to 50 percent of the median of the income distribution, in calculation from the 1999 micro-census was only 3.61 percent. An important role in this is played by the systems of pension insurance and state welfare support, which contain important provisions that de facto increase the income of most pensioners and families with children above the level generally recognised in Europe.

361. In 1996 in the Czech Republic 2.1 percent of households had incomes up to 40 percent of average income, 5.4 percent of households had incomes up to 50 percent of average income and 11.6 percent of households had incomes up to 60 percent of average income. In relation to the subsistence level in the same year, 2.1 percent of households had incomes below the subsistence level, and 18 percent of households had incomes below 1.6 times the subsistence level. A total of 70.6 percent of households were under a three times multiple of the subsistence level, and only 29.4 percent of households had incomes higher than three times the subsistence level. Poor households are characterised primarily

<sup>214</sup> Government Regulation No. 42/1998 Coll., which Increases the Amounts of the Subsistence Level. After fulfilment of the increase condition in January 2000 the subsistence level will be increased with effect as of 1 April 2000 (Government Regulation, which the government approved by resolution of 8 March 2000 No. 243).

by a larger number of members who are not economically active, as well as households headed by a person with elementary education or only trade education.

362. The purpose of social care benefits is primarily to address a difficult life situation. This can be a heavy medical handicap, long-term unemployment of a family member and a markedly declining living standard, natural disasters, and other things. Under § 4 of the Act on Social Neediness: *A citizen who is considered socially needy under this Act is provided one-time or monthly repeating financial or material benefits to ensure food and other basic household expenses, or increased expenses as the result of an unexpected situation. Consideration is given to whether the citizen, for purposes of ensuring his/her living needs (living needs of dependent children) exercised his/her entitlement to sickness insurance (care) or pension insurance or to state welfare support benefits, with the exception of benefits provided on a one-time basis, or for food and contributions for food under the Act on the Family.*
363. A citizen whose income is evaluated jointly with others (e.g. within a household), is provided one-time or monthly repeating benefits to supplement the income of all jointly evaluated persons. Basic benefits under the Act on Social Neediness are:
- a) child maintenance benefit (§ 5 of the Act on Social Neediness – a monthly benefit, to a maximum of the subsistence level, particularly when an obligated person does not fulfil the maintenance duty toward the child, so-called maintenance advancing),
  - b) social care benefits in extraordinary cases (§ 8a of the cited Act),
  - c) other financial benefits, intended particularly for handicapped people<sup>215</sup>.
364. The following benefits and services are provided as part of **social care** under § 73 of the Social Security Act: financial benefits, material benefits, educational and consulting care, social law protection, employment rehabilitation, institutional social care, care in other social care facilities, home care services, meals, cultural and recreational care, extraordinary advantages for certain groups of severely handicapped citizens and interest-free loans. There is no legal entitlement to social care services. The entitlement to benefits and services is usually subject to a review of the applicant's or family's social neediness (social neediness is reviewed for purposes of payment for home care services).
365. Social services can be provided by non-governmental organisations and citizens, in addition to the state. The state can provide them with contributions for the expenses of these services.
366. Social care benefits intended for one-time extraordinary expenses are provided optionally as one-time financial or material benefits. One-time benefits can be provided in an amount up to 15 thousand CZK. Material benefits can be provided in an amount up to 8 thousand CZK, in exceptional cases up to 15 thousand CZK. In addition, the following benefits are provided: contribution for obtaining basic accessories for a child, contribution upon marriage of a child which lived in foster care, a financial contribution

---

<sup>215</sup> § 2 of the Act on Social Neediness: (1) *If a citizen's state of health requires, according to the recommendation of the appropriate specialised doctor, increased expenses for diet, the amount necessary to provide food and other basic personal needs of the citizen provided by a special act (§ 3 par. 2 of Act No. 463/1991 Coll.), when evaluating social neediness, is increased by 600 CZK per month . (2) The amount necessary to ensure necessary household expenses set by a special act (§ 3 par. 3 of Act No. 463/1991 Coll.), when evaluating social neediness of citizens who were allocated special advantages at level III (ID card ZTP/P), is increased by 600 CZK per month. For jointly evaluated persons, the increase under the previous sentence is calculated at most twice, even if extraordinary advantages of level III (ID card ZTP/P) were granted to several persons living in the household (§ 115 of Act No. 40/1964 Coll., the Civil Code, as subsequently amended).*

for payment for use an apartment of an orphaned dependent child and a contribution for recreation for children of a pensioner. Families with children can also take advantage of the opportunity to take out an interest-free loan. However, they are not automatically entitled to the interest-free loan; it is provided by the district office depending on its financial possibilities and on whether the family will be able to repay the loan.

### Expenditures on social care services (in millions of CZK)

	1991	1995	1996	1997	1998
<b>Total</b>	1,351	4,112	4,171	5,188	6,644

for persons not socially adapted	14	8	10	14	9
<b>Home (community) care services</b>	186	640	761	733	783
<b>Institutional social care</b>	1,852	4,703	5,252	5,479	5,998

Source: Ministry of Labour and Social Affairs; Statistical Yearbook of the CR, 1999

367. The existing system of social care<sup>216</sup> is divided into social care benefits and social care services and addresses the situation of citizens who have found themselves in material need for various reasons, primarily of those who meet the conditions set by the Act on Social Neediness. In situations where citizens do not meet these conditions, they can, under § 8a of the Act on Social Neediness, be provided benefits and services in the necessary extent, if they are in danger of serious injury to health. A minor who does not have permanent residence in the Czech Republic may be provided benefits and services not only in case of danger of serious injury to health, but also in situations when his/her proper upbringing is endangered.

368. The social care system needs to be transformed. In addressing material need, changes in the system should better differentiate the level and form of assistance according to the recipient's efforts to resolve his/her situation by his/her own actions, including use of assets. They should also introduce clear and enforceable requirements for the citizen to actively attempt to solve his/her social situation and co-operate with the appropriate office, but also simultaneously provided more advantageous conditions for a period when the recipient is provided for from other social protection systems (e.g. sickness insurance, unemployment support), but the benefits from these systems are not able to secure his/her living needs and the needs of his/her family on at least the subsistence level; it is also necessary to differentiate help according to the duration of the material need. In the case of social services it is necessary to develop a new type of services together with the decline of certain traditionally supported services. We consider de-institutionalisation both in the education of children and in social care provided to the handicapped to be very important. Support of individuals' and families' own abilities should be a basic principle.

<sup>216</sup> The social care system is governed by Act No. 100/1988 Coll., on Social Security, as subsequently amended, Act No. 482/1991 Coll., on Social Neediness, as subsequently amended, Decree of the Ministry of Labour and Social Affairs No. 182/1991 Coll., which implements the Social Security Act and the Act of the Czech National Council on Jurisdiction of Bodies of the Czech Republic in Social Security, as subsequently amended, and other legal regulations.

## ARTICLE 10

*The States Parties to the present Covenant recognise that:*

***1. The widest possible protection and assistance should be accorded to the family, which is the natural and fundamental group unit of society, particularly for its establishment and while it is responsible for the care and education of dependent children. Marriage must be entered into with the free consent of the intending spouses.***

369. The foundation of protection and assistance for the family is Article 32 of the Charter:

- (1) Parenthood and the family are under the protection of the law. Special protection is guaranteed to children and juveniles.*
- (2) Pregnant women are guaranteed special care, protection in labour relations, and suitable work conditions.*
- (3) Children, whether born in or out of wedlock, enjoy equal rights.*
- (4) It is the parents' right to care for and raise their children; children have the right to upbringing and care from their parents. Parental rights may be limited and minor children may be removed from their parents' custody against the latter's will only by the decision of a court on the basis of the law.*
- (5) Parents who are raising children have the right to assistance from the state.*
- (6) Detailed provisions shall be set by law.*

370. In the Czech Republic the **family** is understood as a pair consisting of a woman and a man (usually married) and their children. Thus, family relationships mean parental and sibling relationships. However, some legal regulations (particularly concerning social security) use the concept of a household instead of the basic unit of a nuclear family (man, woman and children). A household is a group of people who live in one apartment and manage their home life together (a residential and economic unit). In the Czech Republic, a household is most often a nuclear family, but it can also include other people.

371. Protection of the family, and the rights and obligations of its members are governed by the **Family Act** and related regulations. The Family Act governs the formation of a marriage, relationships between spouses, divorce, relationships between parents and children, social-legal protection of children, determination of parenthood, adoption, trusteeship and guardianship and the maintenance duty. It guarantees that the choice of a life partner is a private matter, and that marriage, whose main purpose is to establish a family and properly raise children, is concluded by fiancés on the basis of the voluntary decision of both to create a harmonious, firm and permanent living unit. Polygamy is not permitted. Under the Family Act, fiancés may conclude a civil or church marriage.

372. The Family Act provides that marriage cannot be entered into by a minor, i.e. a person under the age of 18. Exceptionally, if it is in accordance with the social purpose of marriage, a court may, for serious reasons, permit a minor over 16 to marry. Without this permission the marriage is invalid. Marriage also cannot be entered into by a person deprived of legal capacity.

373. The equal legal status of spouses is expressed by, among other things, the institution of common property of spouses<sup>217</sup>. This property includes everything which was acquired by one of the spouses during the marriage, except things acquired by inheritance or gift and things which, by their nature, serve the personal needs or performance of the occupation of one of the spouses.
374. Spouses have equal rights and obligations within the marriage. Both spouses are required to care for meeting the family's needs, according to their abilities and opportunities. They decide jointly about the family's matters. The Act on the Family also establishes a joint support duty. The extent of the support duty is set so that the material and cultural level of both spouses will be basic equal.
375. Parents play a determining role in raising children, and both parents have parental rights and obligations. Parents are entitled and required to represent their minor children and manage their affairs. However, if the interest of the child requires, a court may entrust a child to be raised by a person other than the parents.
376. The newly passed amendment to the Family Act of 1998, represents considerable changes to the previous situation. The amendment concerned particularly the legal regulation of relationships between spouses and divorce proceedings (§§ 24 to 29 of the Act). The concept of parental responsibility was also expanded, and the legal regulation of adoption and guardianship was increased.
377. The amended Act newly governs divorce by mutual agreement of both spouses. The Act also states that a court may dissolve a marriage if the union is so deeply and permanently broken down that a renewal of spousal coexistence cannot be expected, taking into account the causes of the breakdown. The previous objective principle of divorce remains preserved in the general regulation of divorce, and there are only changes in formulation. Breakdown is defined as a deep and permanent incompatibility, when renewal of marital coexistence cannot be expected. The court is required to determine the objective situation, i.e. whether the breakdown really is deep and permanent<sup>218</sup>.
378. If the spouses have minor children, the marriage cannot be dissolved if this would be in conflict with interests of the children caused by special reasons. In contrast to the original wording of the Act, this increases the protection of minor children and preserves the continuity of joint decision making about a child. The new regulation also permits the court, in cases whether there are grounds and conditions to do so, and when it is also in the interest of the child, to decide that the child will be raised alternately or jointly by both parents.
379. If a marriage lasted at least one year, the spouses have not lived together for at least six months and the second spouse joins in the divorce filing, the conditions for divorce are deemed to have been met. In that case the court does not determine the cause of the breakdown, and dissolves the marriage, if written agreements are presented which regulate the post-divorce settlement of property relationships, rights and obligations of joint housing and any support duty and a legally effective court decision approving an agreement on the care for minor children after the divorce. A new element, compared to the original Act, is the opportunity given to the spouses to comprehensively regulate the dissolution of the marriage and their future relationships by agreement, and thus limit the

---

<sup>217</sup> Under § 105 of Act No. 94/1963 Coll., on the Family, as amended by Act No. 91/1998 Coll., which Amends the Act on the Family and Amends and Supplements Other Acts. The institution of common property replaces the previous institution of undivided ownership.

<sup>218</sup> Holub M., Nová, H. (1998): The Act on the Family and Related Regulations. Linde Praha a.s., pp. 36 - 61.

conflict situation between divorcing spouses as much as possible, particularly if they are also the parents of a minor child.

380. A marriage will not be dissolved if the other spouse does not agree to the divorce and did not contribute to the breakdown of the marriage by violating marital duties or if the divorce would cause him serious detriment, provided that extraordinary circumstances testify in favour of the marriage. Extraordinary circumstances include age, economic dependence or state of health. This regulation does not mean introducing the principle of fault, but it stands on the side of the spouse for whom dissolution of the marriage in the particular case would mean perceptible detriment

381. There has not been time for the consequences of the amendment to the Family Act in connection with the divorce rate to appear fully in practice yet. The number of divorces is more or less stable, as is the fact that it is more often the woman who files for divorce. The proportion of divorces in marriages with under-age children is decreasing.

### Divorces

Year	Number of claims	Divorces approved (in %)	Claimant		Divorced marriages with under-age children	
			Man	Woman	Total	% of total divorces
1994	38,614	80.1	12,321	26,267	22,289	72.0
1995	38,766	80.3	12,400	26,362	22,108	71.0
1996	40,451	81.9	13,201	27,249	23,438	70.8
1997	39,592	82.0	12,450	27,141	22,603	69.6
1998	39,616	81.7	12,405	27,211	21,636	66.9

382. The amendment to the Family Act also newly regulates the adoption of children. Adoption requires the consent of the biological parents. Consent is not necessary if the parents consistently did not show real interest in the child for a period of six months or did not show interest in the child for two months after its birth, although no serious obstacle prevented them from showing interest.

383. Care for families with children is also governed by regulations on social security, particularly the Social Security Act<sup>219</sup> and the Act on Jurisdiction of Authorities in the CR in Social Security<sup>220</sup>. Under § 74 of the Social Security Act, the appropriate state bodies provide social care benefits and services to secure the living needs of dependent children, their parents, single mothers (fathers), women during pregnancy and other citizens. These bodies, in co-operation with other organisations, prepare children and youth through consulting and education activity for marriage and responsible parenthood, help create favourable relationships in families in danger of breakdown, and contribute to overcoming the consequences of such breakdowns.

<sup>219</sup> Act No. 100/1988 Coll., on Social Security, as subsequently amended.

<sup>220</sup> Act No. 114/1988 Coll., on the Jurisdiction of Authorities of the CR in Social Security, as subsequently amended.

## Welfare assistance to families with children (in millions of CZK)

Social supplementary benefit <sup>8)</sup>	2,340	6,029	6,243	6,224	6,273

Note: 1) Including parental benefit for pensioners. Until 1995, provided for all children of parents with sickness or pension insurance from birth until completing qualification for an occupation; the amount varied according to the child's age. As of 1 January 1996 the amount of the supplemental benefit depends on the age of the child and the family's income. Supplemental benefits are provided for children who live in families with an income lower than three times the subsistence level.

2) Until 1 October 1995, contribution upon the birth of a child. A contribution to cover extraordinary expenses related to the birth of a child (four times the subsistence level for the personal needs of the child; the family's income is not reviewed).

3) This benefit is an entitlement of a soldier's child, his wife, or another person to whom the soldier has, during the term of his basic (substitute) compulsory military service, civil service, or military training, an obligation to make support payments, regardless of the person's income. For a wife the entitlement is conditioned on her caring for a child up to the age of 4 (or a handicapped child up to the age of 7) or her handicapped status or another serious reason why she cannot work.

4) Provided only to children for whom a maintenance duty is ruled by a court (so-called deposits for maintenance) in an extent corresponding to social neediness.

5) Contribution to pay for the needs of the child, bonus for a foster parent, contribution when receiving a child into foster care, and a contribution for buying a motor vehicle.

6) Paid if they find themselves below the border of the subsistence level in income and cannot increase their income by their own activity.

7) Provided to one of the parents when caring for a sick child, usually for a period of 9 calendar days.

8) Paid to families with low incomes as a contribution for expenses related to securing the needs of their children. The amount depends on the child's age and the family's income. A parent is entitled to a supplemental welfare benefit, if he is caring for a child and the family's income is not over 1,6 the subsistence level. Until 1996 the supplemental welfare benefit did not exist, but there was a variously modified state equalising contribution.

Other forms of financial assistance to families with children set forth in the table are described in more detail in the text of the report, particularly to Article 9 of the Covenant.

Source: Statistical Yearbook of the CR, 1999

**2. Special protection should be accorded to mothers during a reasonable period before and after childbirth. During such period working mothers should be accorded paid leave or leave with adequate social security benefits.**

384. **Labour law protection** of pregnant women and mothers is contained in §§ 153 to 161 of the Labour Code:

- a) Under § 153 *if a pregnant women performs such type of work which pregnant women are prohibited from doing or which , according to a medical opinion, poses a hazard to her pregnancy<sup>221</sup>, the employer is obliged to reassign her temporarily to other work which is suitable for her and in which she will be able to attain the same level of earnings as she had when doing her former work. If a pregnant woman who works at night requests an assignment to day work, the employer is obliged to comply with her request.* This provision also applies for mothers until the end of the ninth month after giving birth. If a woman has lower earnings in a job to which she was transferred otherwise than by her fault than in her original job, she is provided a contribution to balance out this difference under regulations on sickness insurance<sup>222</sup>.
- b) Under § 155 of the Labour Code, Pregnant women and mothers caring for a child under the age of three enjoy increased protection from termination by notice from an employer.
- c) Under § 156 of the Code, an employer is required, when assigning employees to shifts, to take into account the needs of women caring for children. He is required to grant their requests for a shorter work time or otherwise appropriately adjust the set weekly work time, if serious operating reasons do not prevent it. The employer also may not employ pregnant women and women caring for children under the age of one in overtime work.

385. The current legal regulations contain certain elements of inequality in the status of male and female employees; this condition is to be corrected in the amendment being prepared to the Labour Code, under which an employee caring for children will be protected without regard to gender. In connection with the harmonisation of the Czech Republic's legal system with Community law, the Czech Republic is incorporating in its labour law regulations EC Council Directive No. 96/34/EEC concerning the framework agreement concluded between UNICEF<sup>223</sup>, CEEP<sup>224</sup> and ETUC<sup>225</sup> on parental leave and EC Council Directive No. 92/85/EEC on implementation of measures to improve the provisions for and protection of health at work of pregnant women, women after childbirth, and breast-feeding women.

386. **Social protection** of pregnant women and mothers is also contained in regulations on sickness insurance, social security and state welfare support. The extent and degree of

---

<sup>221</sup> Protection of women's health at work has been newly defined by the generally binding legal regulation, which is a procedural Decree of the Ministry of Health amending the Labour Code, No. 261/1997 Coll., that Determines Work Assignments and Workplaces Prohibited to All Women, Pregnant Women and Mothers until the Ninth Month after Delivery and to Juveniles. The extensive provisions of Articles 1 to 3 of the Decree also define these types of work and workplaces.

<sup>222</sup> Act No. 88/1968 Coll., on Extending Maternity Leave, on Benefits in Maternity and on Benefits for Children from Sickness Insurance, as subsequently amended.

<sup>223</sup> United Nations Children's Fund (UNICEF)

<sup>224</sup> Centre Européen d'Etudes sur les Polyphosphates (CEEP)

<sup>225</sup> European Trade Union Conference (ETUC)

measures for protection of pregnant women and mothers have been stable for a long time and no changes to them are being considered.

387. Under § 157 par. 1 of the Labour Code *a woman is entitled to 28 weeks of maternity leave in connection with childbirth and the care of her child who is already born; if a woman gives birth to two or more children at one time, or if a single woman is concerned, she is entitled to 37 weeks of maternity leave.* In order to improve maternal care, under par. 2 of that section, the employer is obliged to grant a woman additional maternity leave, until her child reaches three years of age, if she asks for it. This leave shall be granted for the period of time requested by the mother.
388. During maternity leave and additional maternity leave, an employee is not entitled to wages. Material security during this period is governed by regulations on employee sickness insurance, which also provides in which cases, under what conditions, and for what period one is entitled material security during additional maternity leave (see also the text to Article 9 of the Covenant).
389. A woman generally begins maternity leave at the beginning of the sixth week before the expected delivery date. Maternity leave in connection with birth may never be shorter than 14 weeks and may not, under any circumstances, end or be interrupted before the end of six weeks from the delivery date (§ 159 of the Labour Code).
390. The last benefit increase of 1995, under the State Welfare Support Act<sup>226</sup>, concerned the state contribution intended for the parent who personally, full-time cares for a small child (parental benefit) up to the age of 4 (or up to the age of 7, in the case of a child with a long-term disability or **long-term illness**) regardless of the parent's gender. The period during which this contribution can be provided, originally limited to the child's reaching the age of three, was extended by one year. This was a one-time measure, and its purpose was to maintain or support the existing population trend and lower tension in the labour market<sup>227</sup>.
391. The amount of the contribution is determined by § 7 of the Parental Benefit Act<sup>228</sup>. The contribution is always provided for a calendar month, is not subject to tax, and is not paid abroad. The original amount of the monthly contribution in 1990 was 900 CZK, and it was gradually increased by amendments to the parental benefit Act to 1200 CZK in 1992, 1,360 CZK in 1993 and 1,500 CZK as of 1994; as of 1995 the monthly contribution amount is 1,740 CZK. However, the parental benefit is relatively low in comparison with wages; its fixed amount is a maximum of 1.1 times the amount of the subsistence level for personal needs of the parent caring for the child (roughly half of the average wage). If the entitled person is entitled to the contribution for only part of a calendar month, the amount per calendar day is 58 CZK (increased from the original 30 CZK in 1990). In addition to full-time care, the entitlement to the contribution is also conditioned on permanent residence in the Czech Republic and the requirement that the parent, during the period of caring for the child, not be entitled to wages, salary or work remuneration or other income from employment, and not draw material security benefits of for job applicants. A parent is entitled to the contribution even if he is employed, if he is employed for a maximum of two hours a day or his/her net income from employment

---

<sup>226</sup> Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>227</sup> The importance of this measure, as well as all other welfare benefits has been gradually declining in recent years, which can be documented by the fact that, while expenses for these welfare benefits are increasing, their percentage of total volume of gross domestic product is declining long term.

<sup>228</sup> Act No. 382/1990 Coll., on the Parental Benefit, as subsequently amended.

does not exceed the monthly subsistence level amount for the parent's personal needs. The income may be higher in the case of a single parent.

392. Universal access to **health care** in the Czech Republic is completely equal. However, within comprehensive health and social care for the family, children and women, increased attention is paid to women and children. Health care connected with pregnancy and childbirth and in the post-natal period is fully covered by public health insurance.
393. The right to freely decide on the number and timing of children is affected by Abortion Act<sup>229</sup>, which is very liberal in terms of its accessibility. The fears of its opponents, that it would lead to a radical growth in the number of induced abortions, have not been confirmed in practice (see also the tables to Article 12 par. 2a of the Covenant).
394. At present, roughly 25 percent of pregnant women are hospitalised for at least one week before giving birth, 43 percent of pregnancies are listed as high-risk by health care facilities, and 11 percent of women have caesarian sections. Deaths in childbirth have dropped below 10 per 100 thousand live births, and their values meet the World Health Organisation recommendations for the most developed countries (fewer than 15 women dying per 100 thousand children born).
395. As part of the HIV/AIDS program, physicians advise all pregnant women to have an HIV antibody test, on a voluntary basis and with protection of anonymity. In 1996, 85 percent of all pregnant women took this opportunity. The HIV incidence rate is low, roughly 0.002 percent. All HIV positive mothers receive preventive AZT treatment. This care is fully paid from public health insurance funds.

***3. Special measures of protection and assistance should be taken on behalf of all children and young persons without any discrimination for reasons of parentage or other conditions. Children and young persons should be protected from economic and social exploitation. Their employment in work harmful to their morals or health or dangerous to life or likely to hamper their normal development should be punishable by law. States should also set age limits below which the paid employment of child labour should be prohibited and punishable by law.***

396. Fulfilment of this article is described in detail in the Czech Republic's report on the International Convention on the Rights of the Child<sup>230</sup>. This convention entered into force in 1991. The Czech Republic assumed the obligations arising from it, and under Article 44 of cited convention presented an initial report on fulfilment of the convention for the period 1993 to 1994 to the Committee for the Rights of the Child in 1996. The report was supplemented in 1997 by answers to supplemental questions from the committee. On 10 October 1997, at its 16<sup>th</sup> session, the committee conducted final evaluation of the Czech Republic's Report.
397. At the beginning of 2000, the Czech Republic submitted a periodic report on fulfilment of the Convention on the Rights of the Child for the years 1995 to 1999, for the period of the full five years. The period of 1995 to August 1997 is included in the report because information about that period, provided to the Committee in 1997, was merely responses to the Committee's questions, and therefore incomplete.

<sup>229</sup> Act No. 66/1986 Coll., on Abortion.

<sup>230</sup> Notification of the Federal Ministry of Foreign Affairs No. 104/1991 Coll., on the Convention on the Rights of the Child.

398. The Government of the Czech Republic, following the results of the world summit devoted to children which took place in 1990<sup>231</sup>, and following the conference held in 1995, whose participants committed to forming in each country an “Action Program for Young People to 2000 and Onwards,” in 1999 approved an important document on the Czech Republic’s policy in relation to young people, the “Outline of State Policy on the Young Generation in the Czech Republic to the Year 2002”<sup>232</sup>. In this document, the Government took responsibility for the healthy development of the young generation and the creation of conditions for it to have the widest possible participation in the social, political and economic life of the Czech Republic. The Government charged the ministers of the relevant ministries and the minister without portfolio to ensure fulfilment of tasks under the concept, prepare ministry programs related to the support and protection of children and young people and to allocate funds in their budget chapters for implementation of these programs.
399. On the basis of the Outline, the Government established a National Committee for Issues Concerning Children, Young People and the Family<sup>233</sup>. The Committee is responsible for preparing an outline of state policy on the young generation after 2002. Protection of the rights of the child is presently in the jurisdiction of the Commissioner for Human Rights.
400. In the meaning of provisions of the Convention on the Rights of the Child, other international documents and the Charter, in July 1999 the Government discussed a draft Act on Social Legal Protection of Children<sup>234</sup>. The Act was passed and goes into effect on 1 April 2000. The purpose of this Act is to strengthen protection of the rights of the child and its status in relation to principles drawn by international documents, particularly the Convention on the Rights of the Child, and to respond to new social threats to children through various negative influences such as expressions of violence against children, but also various causes of addiction, (alcoholism, drug addiction, gambling addiction, , pornography, commercial sexual abuse)<sup>235</sup>.
401. The Act defines the range of children to whom social legal protection bodies need to give special attention, and defines the tools by which the children are protected. The guiding principle is prevention, and one of the tools which will have an important role in it is preventive and consulting activities. These activities are performed primarily by social departments, which are a component of district, city and Prague district offices. In the field of general prevention of socially pathological elements, this work is also done by social assistants in the field (streetworkers)<sup>236</sup>. The Ministry of Labour and Social Affairs provides funds to co-operating non-government non-profit organisations for these workers’ wages.
402. The Act governs mutual co-operation not only by bodies for social-legal protection of children, but also other entities which work in the field of care for children, such as schools, school and health care facilities and other similar facilities.

---

<sup>231</sup> Participants of the world summit adopted the document “World Declaration on Survival, Protection and Development of Children.”

<sup>232</sup> Resolution of the Government of the Czech Republic of 6 January 1999 No. 1, on the Outline of State Policy in Relation to the Young Generation in the Czech Republic until 2002.

<sup>233</sup> Resolution of the Government of the Czech Republic of 7 July 1999 No. 696, which approved the Committee’s statute.

<sup>234</sup> Act No. 359/1999 Coll., on Social Legal Protection of Children.

<sup>235</sup> However, even before the new Act went into effect, protection of children from social pathologies, and preventive and consulting activity was part of the work of social affairs departments in district or city offices and non-government non-profit organisations, supported by subsidies from the state budget.

<sup>236</sup> Resolution of the Government of the Czech Republic of 15 June 1994 No. 341, on the Program of Social Prevention and Crime Prevention – Current Situation and Starting Points until 1996.

403. Clear rules have been defined for arranging adoption and foster care (organisation, procedures, co-operation of various entities, consulting for alternative family care). The monitoring of development of children in institutional care has been revised. The Act also governs assistance to children who do not have permanent or long-term residence in the Czech Republic and unaccompanied children present in a foreign country, within the meaning of European Union Council Resolution of 26 June 1997 on unaccompanied juveniles who are citizens of third countries.
404. The Act also governs establishment of social legal protection – facilities for specialised child care consulting, social educational facilities, facilities for children needing immediate assistance, education recreational camps, and facilities for foster care. The Act permits non-state entities to perform a limited extent of social legal protection, subject to meeting certain conditions. However, activities which involve fundamental intervention into the status of a child or persons responsible for it remain reserved to state bodies.
405. The Act also amends other legal regulations, the most important of which is the amendment of the Offences Act<sup>237</sup>, which introduces new elements of offences, which should give children greater protection against cruelty, neglect and misuse for physical labour.

### **Employment of children and juveniles**

406. The Labour Code<sup>238</sup> states in § 11 that the capacity of a natural person to have rights and obligations in labour law relationships and the capacity to acquire these rights and assume obligations through one's own actions arises on the day when a natural person attains 15 years of age. An employer may not negotiate a start date for work which would precede the day when such a person completes compulsory education. Compulsory education is set by law in a duration of nine years. The capacity of a person who completes compulsory education in a remedial school before reaching the age of 15 is also set forth. However, the capacity to acquire rights and assume obligations in labour law relationships through one's own acts arises on the day of completing compulsory education, but no earlier than upon attaining 15 years of age.
407. The Labour Code governs conditions for employing juveniles (i.e. persons aged 15 to 18) in part three, in §§ 163 to 168. The Labour Code also states that an employer is required to request the opinion of a minor employee's legal representative. An employer may not give juveniles overtime work or work at night. Exceptionally, juveniles over 16 can perform work at night for no more than one hour, if necessary for their occupational training. Juveniles may not be employed for work underground in minerals mining or digging tunnels and shafts. Juveniles also may not be employed for work which, with regard to their anatomical, physiological and psychological characteristics at that age, are disproportionate, dangerous, or damaging to their health.
408. The age restriction of 18 years also applies for negotiating a subsidiary employment relationship: under the Labour Code<sup>72</sup>, this kind of employment relationship may not be entered into with a minor employee. The employee's age must also be taken into account in concluding agreements on work performed outside an employment relationship. These agreements can be concluded with juveniles only if they do not endanger their healthy development or occupational training.

---

<sup>237</sup> Act No. 200/1990 Coll., on Offences, as subsequently amended.

<sup>238</sup> Act No. 65/1965 Coll., the Labour Code, as subsequently amended.

409. Under § 150 par. 2 of the Labour Code and in agreement with the Ministry of Education, Youth and Sports, the Ministry of Health issued an implementing decree<sup>239</sup> to the Labour Code, which, under § 167 par. 2, sets forth work and workplaces which are forbidden to all women, pregnant women, mothers for nine months after giving birth and juveniles, and also sets forth conditions under which juveniles may, exceptionally, perform these kinds of work for reasons of occupation preparation.

### **Protection of moral development**

410. The Act on Radio and Television Broadcasting<sup>240</sup>, in § 5, charges all broadcasters not to schedule, between 6 a.m. and 10 p.m., programs which could endanger the psychological or moral development of children and juveniles. In addition, § 6 charges broadcasters to see to it that advertising does not include advertisements aimed at children or in which children appear, if they promote behaviour which endangers their health or psychological or moral development. Access to appropriate information is also ensured by the Act on Certain Conditions for Production, Dissemination and Archiving of Audio-visual Works<sup>241</sup>. Under § 4 of the cited Act, access to audio-visual works whose content could endanger the moral development of juveniles is restricted to those who have reached the age of 15 or 18.

411. The Act on Regulation of Advertising<sup>242</sup>, in § 2, prohibits advertisements aimed at persons under the age of 15 or in which persons under the age of 15 appear, if they encourage behaviour which endangers their health or psychological or moral development. Under § 3 of that Act, advertising tobacco products in television broadcasting is prohibited, and in radio broadcasting it may not be scheduled between 6 a.m. and 10 p.m., i.e. at a time when children and juveniles can be expected to listen. In addition, under the same section, tobacco products advertising may not be aimed at juveniles, particularly through the use of elements, means or events which are primarily aimed at such persons, and they may not use juveniles. They also may not exhort people to smoke. § 4 prohibits similar advertising for alcoholic beverages.

412. The Criminal Code<sup>243</sup> protects children from pornography. § 205 par. 2 of the Code (endangering morals) states that a person who:

- a) offers, lends or makes available written, audio, video, or pictorial pornographic works to someone else under the age of eighteen years, or
- b) displays written, audio, video, or pictorial pornographic works at a place which is publicly accessible to persons under the age of eighteen years, shall be punished by a term of imprisonment of up to one year, by a pecuniary penalty or forfeiture of a thing.

413. In practice these statutory provisions are circumvented. For example, pornographic magazines and publications are displayed for sale in street stands. This is pointed out particularly by teachers and social and health care workers, but inspection bodies have not yet paid appropriate attention to it.

<sup>239</sup> Decree of the Minister of Health No. 261/1997 Coll., Setting Work and Workplaces which Are Forbidden to all Women, Pregnant Women, Mothers until the End of the 9<sup>th</sup> month After Childbirth and Juveniles, and Conditions under Which Juveniles May Exceptionally Perform this Work for Reasons of Training for Occupations, as subsequently amended.

<sup>240</sup> Act No. 468/1991 Coll., on Radio and Television Broadcasting, as subsequently amended.

<sup>241</sup> Act No. 273/1993 Coll., on Certain Conditions for the Production, Dissemination and Archiving of Audio-visual Works, and Amending and supplementing Certain Acts and Certain other Regulations.

<sup>242</sup> Act No. 40/1995 Coll., on Regulation of Advertising, as subsequently amended.

<sup>243</sup> Act No. 140/1991 Coll., the Criminal Code, as subsequently amended.

## ARTICLE 11

*1. The States Parties to the present Covenant recognise the right of everyone to an adequate standard of living for himself and his family, including adequate food, clothing and housing, and to the continuous improvement of living conditions. The States Parties will take appropriate steps to ensure the realisation of this right, recognising to this effect the essential importance of international co-operation based on free consent. General comment on its implementation.*

414. Chapter four of the Charter, which is devoted to economic, social and cultural rights, does not contain in any of its articles the right to an adequate standard of living, adequate food, clothing, housing and improvement of living conditions. The Charter indirectly guarantees the following rights:

- a) Article 26 par. 2: *Everybody has the right to acquire the means of his/her livelihood by work. The state shall provide an adequate level of material security to those citizens who are unable, through no fault of their own, to exercise this right; conditions shall be provided for by law.*
- b) Article 30 par. 1 and 2: *Citizens have the right to adequate material security in old age and during periods of work incapacity, as well as in the case of the loss of their provider. Citizens have the right to adequate material security in old age and during periods of work incapacity, as well as in the case of the loss of their provider.*
- c) Article 31: *Everyone has the right to the protection of his/her health.*
- d) Article 35: *Everyone has the right to a favourable environment.*

### **The right to an adequate standard of living**

415. Emphasis is laid on everyone's personal responsibility for him/her and his/her family's standard of living, with the provision that the state is required to create adequate conditions for the opportunity to exercise this personal responsibility. If even these conditions are not enough to ensure an adequate standard of living usual in the country, the state assists an individual and his/her family through the social security system (see also the text to Articles 9 and 10 of the Covenant).

416. The minimal, legally recognised limit of a citizen's income for ensuring sustenance, basic personal needs and necessary expenses for the household is the subsistence level (see also paragraphs 356 to 361 of this report), which is considered the official poverty level. Information on households and their income and expenses is provided only by sample surveys in **family budget statistics**. These also contain data for so called "households with minimum income," which are households whose income did not exceed 1.4 times the subsistence level in families with children and 1.5 times the subsistence level in families of pensioners. These data can be used to determine the structure of expenses in poor households, but not the proportion of such households out of the total number of households in the Czech Republic (paragraph 361 of the report provides the proportion of households whose net financial income is lower than 40 percent of average working **income** per person; in 1996 this was 2.1 percent of total households).

417. In terms of the changes in basic income parameters of households, 1998 was the worst year since the creation of the independent Czech Republic. Low income growth, which lagged behind the growth of inflation, the growth of essential expenses (which cannot be influenced), and uncertainty from further social economic development and preferences for creating financial reserves, increasing unemployment and restriction of social transfers considerably reduced household demand and played a role in the decline in productivity of the national economy. In 1999 the situation began to improve, but the recorded real growth of total household income was definitively influenced by the increased purchasing power of their social incomes (valorised subsistence level, pensions, increase in sickness benefits, increase in material security for job applicants, etc.), which is not a positive sign in terms of further economic growth. Low inflation also had a positive effect on the increase in real incomes.

**Growth of consumer price indices for goods and services** (average in 1990 = 100)

Year	Households				
	Total	Employees		Pensioners	
		Total	Low-income <sup>1)</sup>	total	Low-income <sup>2)</sup>
1994	231.3	227.1	228.5	227.9	232.8
1995	252.5	247.5	250.9	251.6	257.2

419. The overall living standard of the population of the Czech Republic can be described as satisfactory, particularly in comparison with other countries which have been undergoing transformation since 1990, after political changes. The Czech Republic does not calculate an index of the physical quality of life, and is not presently constructing one.

## The right to appropriate sustenance

420. The problem of hunger does not exist in the Czech Republic, rather the opposite, and positive changes in the structure of food consumption by the population of the CR need to be maintained.

421. Food consumption in the Czech Republic corresponds in amount and structure to the basic food groups of most European Union countries. Compared to the EU, there is overall high consumption of grains and above average consumption of eggs and pork. In contrast, the Czech Republic does not reach the European average in consumption of fresh fruit from the temperate zones, citrus fruit, vegetables, cheeses, and poultry.

### Consumption of selected kinds of foods

Kind of food	Unit	1992	1997	Index 97/92
Meat, total	kg	86.6	81.5	94.1
Fish, total	kg	4.6	5.5	119.6
Milk and milk products (except butter)	litres	208.0	189.5	91.1
Eggs	pieces	328.0	311.0	94.8
Fats, total	kg	26.4	25.5	96.6
of that, edible vegetable fats and oils	kg	13.8	16.2	117.4
Refined sugar	kg	39.5	39.1	99.0
Grains, including rice	kg	117.2	107.9	92.1
Potatoes	kg	84.1	76.0	90.4
Vegetables	kg	69.7	81.1	116.4
Fruit, total	kg	69.5	71.5	102.9
of that, southern	kg	22.5	30.7	136.4
Alcoholic beverages, in pure alcohol value	litres	9.4	9.8	104.3
Non-alcoholic beverages	litres	11.3	147.0	132.1

Source: The Czech Statistical Office, 1999

422. The results of a brief evaluation of the most important quantitative and qualitative changes in food consumption which have an important influence on the nutritional level of food consumed, comparing 1989 and 1997 are as follows:

- a) Consumption of southern food increased by 80 percent, but consumption of food from the temperate zone decreased; consumption of poultry increased by 12 percent, edible fats and oils by 30 percent, vegetables by 17 percent and legumes by 50 percent.
- b) Consumption of butter declined by 55 percent, milk products by 25 percent, beef by 45 percent; there were mild declines in consumption of sugar, grains, potatoes, fish, eggs and pork.

423. Through research institutes, the Ministry of Agriculture conducts framework evaluation of the extent to which recommended nutritional amounts are met, which confirms a positive change in the consumption of food and a change in the nutritional level of the CR population's food consumption. Compared to 1989, the total calorie value provided by food declined, as did intake of animal fats and proteins, intake of vegetables fats, proteins and vitamin C increased, although intake of it has not yet reached the recommended level. Inadequacies continue in the somewhat lower intake of certain B-group vitamins and presently in calcium (decreased consumption of milk and milk

products). Despite the positive changes, recommended amounts in the intake of calories, fats and animal proceeds are exceeded.

424. Evaluating qualitative changes in nutrition in relation to quantitative changes in consumption of food is in the jurisdiction of the Ministry of Health, including education and recommendations for observing trends in healthy nutrition and proposals for measure to solve any deficits. For this evaluation, the Ministry of Health set recommended nutritional amounts per person per year. The Ministry of Health considers the stated changes in food consumption to be positive, as they correspond to its recommendations (particularly lower consumption of animal fats, increased consumption of fruit, vegetables, etc.).
425. On the basis of the Government's National Health Program<sup>244</sup>, since 1993 the Ministry of Health has announced an annual tender for projects to support health. A financial contribution is made for implementation of selected projects. The thematic focus comes from the priorities of the Covenant and consists of 13 thematic areas.
426. One of the thematic areas is healthier eating. The Ministry supports projects aimed at promoting the main principles of healthy eating, a varied and balanced diet, and changes in eating habits. Prevention and intervention also include more intensive nutritional education, not only for the general public, but particularly for high-risk groups (pre-school and school-age children, juvenile youth, pregnant women and breast-feeding mothers, etc.). From 1993 until 1996 43 projects addressed this theme; the Ministry of Health spent almost nine million crowns from its funds for them. In 1997, 16 projects received a total of 1,798 thousand CZK. In 1998 the Ministry of Health accepted 16 projects for healthier eating, five projects for improving reproductive health and ten projects to support health in schools. In 1999 the Ministry distributed 2,511 thousand CZK among 15 accepted projects.

### **The right to appropriate housing**

427. In the Census of 1991, 3,705,681 permanently occupied dwellings and 4,051,583 census households were found in the Czech Republic. This indicates that in 1991 ca. 343 thousand households shared an apartment with another household (most often the parents' household); so-called "wanted cohabitation" represent roughly 1/3 of them. The Ministry for local development estimates that, of those households, roughly 300 thousand would prefer independent living.
428. The concept of adequate or appropriate housing is not precisely defined in the Czech legal system; however, we can say that inappropriate housing, which does not meet current cultural and social requirements, is housing in an apartment without basic amenities (WC, bathroom) and with unsuitable heating. This includes apartments in category III and IV, set forth in the Decree of the Ministry of Finance on Rent from a Dwelling and Payment for Services Provided with Use of a Dwelling<sup>245</sup>. From that perspective, the condition of the housing fund in the CR is good – the situation is on a level which corresponds to the developed European countries. Census data show that in 1991 only 6% of the population in the CR lived in apartments of category III and IV, i.e. in apartments lacking suitable heating or basic amenities.

<sup>244</sup> Resolution of the Government of the Czech Republic of 15 April 1992 No. 273, on the National Health Program.

<sup>245</sup> Decree of the Ministry of Finance No. 176/1993 Coll., on Rent from Dwellings and Payment for Services Provided with Use of an Dwelling, as subsequently amended.

## Overview of apartment equipment

Apartment equipment	Share of apartments thus equipped (%)	Share in cities over 100 thousand inhabitants (%)
Gas from network	50.0	80.3
Plumbing in apartment	96.9	99.2
Flush toilet in apartment	91.5	96.0
Bathroom or shower	93.2	95.1
Central heating	59.0	65.1
Single apartment central heating	18.6	11.2
Stove for fossil fuels	12.9	5.5
Connection to public sewer system	68.1	92.4

Source: Census of people, houses and apartments 1991

429. Squatter colonies of buildings illegally used for housing appear rarely in the Czech Republic and their number is not known. Disputes with people who illegally occupy certain residential or non-residential buildings, long-term abandoned buildings, or with those who use apartments without a proper agreement for use are resolved as civil law relationships between the owner of the building or apartment and the illegal user.
430. According to estimates by non-government organisations, approximately 100 thousand **homeless people** live in the Czech Republic. They include people who left social care institutions, and those expelled from their families, but also people who abandoned their residences by their own decision. A large number of the homeless are dependent on the assistance of charitable organisations which establish asylum houses for them. This solution is inadequate in the long term, but so far there are few measures at the level of state administration which make it possible to help these population groups (see also paragraphs 433 and 434 of this report).
431. The institution of so-called **welfare housing** is not governed by the law in the Czech Republic. Housing is provided to socially weak citizens by municipalities, who are guided by regulations which they pass in the jurisdiction of their own bodies. Municipalities accept applications from citizens who are waiting for an apartment, i.e. applications to conclude a lease agreement for an apartment provided primarily for welfare reasons (with regulated rent). Applications are generally evaluated by special “housing” commissions in the municipal authorities, established for this purpose. The waiting period differs according to the place whether the applicant has applied for an apartment and the urgency of individual cases. The number of applications for an apartment with low, controlled rent has always exceeded municipalities’ abilities to satisfy them. Exceptionally, in urgent cases, municipalities also provide, under the amendment to the Civil Code of 1992<sup>246</sup>, assistance in arranging replacement apartments in cases where a landlord terminated an apartment lease with the consent of a court and the court determined that the tenant is entitled to a replacement apartment or housing.
432. Problems related to housing include the small number of “halfway houses” and insufficient facilities for **social asylum care**. The clients of asylum houses are primarily people who do not have sufficient financial reserves or abilities to overcome serious life changes on their own – losing employment, tense relations in the family, e.g. during or after a divorce, etc. - and do not have an opportunity to respond to these situations in

<sup>246</sup> Act No. 102/1992 Coll., which Amends Certain Questions Related to Promulgation of Act No. 509/1991 Coll., which Amends, Supplements and Adjusts the Civil Code, as subsequently amended.

time by changing their housing. Asylum houses serve not only as temporary replacement housing, but also provide comprehensive social services, legal consulting, and support in handling demanding and complicated personal situations. However, placing a client in an asylum house often only postpones solving his/her problem, because asylum care can only rarely be followed by housing of a more permanent nature.

433. Asylum houses are established by non-government non-profit organisations, churches and municipalities. Funds for operating asylum houses usually come from several sources (domestic and foreign): from the budget of the Ministry of Labour and Social Affairs, district offices and municipalities, foundations, and people's own resources (e.g. fees from clients). In 1992 the Association of Representatives of Asylum House Operators was created. This civic association connects various kinds of asylum houses into a network, permits the exchange of information and experience, creates prerequisites for co-ordination and for dealing with state and legislative bodies at the central and local level and other institutions. It thus builds information connections which permit on-going monitoring of not only the bed capacity of individual facilities and their occupancy rate, but also client turnover. In mid 1999, 59 asylum houses were members of the association. The asylum houses mostly house men (39 of them), 14 accept women, 23 asylum houses provide shelter for mothers with children, and one can also house complete families (the number of asylum houses according to client structure is greater than 59, because some serve for both sexes, and some jointly for women and mothers with children).
434. **“Halfway houses”** are a special type of social service (so-called residential type services for vulnerable groups). They serve clients who for various reasons, not only due to the impossibility of finding affordable housing, need to live for a certain time in protected conditions, and therefore also provide more long-term assistance with housing than the asylum houses are able to provide. “Halfway” houses are intended, for example, for young adults released from education facilities for institutional upbringing or protective custody after reaching the age of majority (18). At the end of the report period there were 13 such facilities in the Czech Republic and another four were of a similar nature with similar activities; several others are to be completed and opened in 2000. The Ministry of Labour and Social Affairs financially supports their establishment and operation; social intervention services are among the Ministry's subsidy priorities.
435. The number of people whose housing expenses are higher than a limit set by the Government based on ability to pay these expenses in relation to income cannot be stated, as the proportion of housing expenses to household income which should not be exceeded is not set in the CR. Given the on-going transformation process, it is still assumed that housing expenses disproportionately burden households with income under 1,6 times the subsistence level, so they are provided a housing contribution by law<sup>247</sup>. In addition, households with incomes up to 1,6 the subsistence level are entitled to two other directed, individual welfare benefits: a contribution for equalising an increase in rent<sup>248</sup>, which, however, is intended only for those who live in rented apartments with controlled rent, and a contribution for equalising a price increase in heating energy<sup>249</sup>, which is given to households living in apartments with off-site heating. The maximum supportable proportion of housing expenses (or net rent) in relation to income will be set in the near future for purposes of a new directed, individual welfare benefit for this

purpose, which will be introduced with the transfer to a new system of setting and adjusting rent<sup>250</sup>.

### Housing fund structure – basic sectors

Housing sector	Share of housing market (%)
private ownership	46.2
rental	30.9
co-operative	19.0
other	3.9
total	100.0

Source: Estimates of the Ministry for Local Development of the CR, 1999

436. According to an estimate by the Ministry for Local Development, the distribution of households by housing type is virtually identical with the proportion of individual housing types in the housing market, i.e. with the structure of the housing fund shown in the table:

- a) The ownership sector consists primarily of family houses where the owners live; only a small part of the ownership sector (ca. 5%), growing in the process of privatisation of the housing fund, consists of individual apartments owned by the residents.
- b) Three quarters of the rental sector is the municipal housing fund, i.e. the former state housing fund. One quarter are rental apartment buildings owned by natural persons (primarily those who received them in restitution) and legal entities. However, due to the incomplete deregulation of rent and non-standard relationship of rights and obligations, to the detriment of house and apartment owners, the operation of individual parts of the rental sector is still distorted and does not correspond to standard operation of the so-called private and public rental sector.
- c) The co-operative sector consists primarily of apartments in building apartment co-operatives, created from 1960 to 1990; the sector is expanding with building tenant co-operatives newly established for purposes of buying a building from a municipality.

### Legal regulation of the right to housing

437. With the exception of Article 11 of the Covenant, the right to housing is not explicitly defined in the Czech legal system, not even in the Charter. The Czech Republic understands the right to housing as a declaratory, non-entitlement right, expressing the commitment of the state to strive to ensure equal access for all people to a safe and certain place to live – a dwelling; not the right of everyone to require the state to provide the dwelling. The Government of the Czech Republic strives, through its housing policy, to improve the situation in the housing market and to attain a state of affairs in which everyone can arrange appropriate housing.

438. Article 12 of the Charter guarantees protection of privacy and inviolability of the home:

*(1) A person's dwelling is inviolable. It may not be entered without the permission of the person living there.*

---

<sup>250</sup> Source of information: Draft concept of housing policy, the part „Principles of a New Welfare Contribution for Rent”. See Resolution of the Government of the Czech Republic of 18 October 1999 No. 1088, on the Outline of Housing Policy.

- (2) *A dwelling may be searched only for the purposes of a criminal proceeding on the basis of a search warrant issued by a judge in writing and giving the reasons therefor. The manner in which a dwelling may be searched shall be set down in a law.*
- (3) *Other encroachments upon the inviolability of a dwelling may be permitted by law only if such is necessary in a democratic society for the protection of the life or health of individuals, for the protection of the rights and freedoms of others, or in order to avert a serious threat to public security and order. If a dwelling is also used for a business enterprise or for carrying on other economic activities, the law may also permit such an encroachment if it is necessary to fulfil the duties of public administration.*

439. The main legal regulations and their provisions applying to housing are:

- a) particularly §§ 685 to 719 of the Civil Code<sup>253</sup>,
- b) the Act which amends, supplements and adjusts the Civil Code<sup>251</sup>,
- c) the Act which Regulates Certain Co-ownership Rights to Buildings and Certain Ownership Rights to Dwellings and Non-residential Premises and Supplements Certain Acts (the Act on Dwelling Ownership)<sup>252</sup>,
- d) particularly § 2 of the Act on Prices<sup>253</sup>,
- e) particularly §§ 13 to 20 of the Act on Municipalities<sup>254</sup>,
- f) particularly §§ 17 to 20 of the Act on the Capital City of Prague<sup>255</sup>,
- g) the Decree of the Ministry of Finance on Rent From an Dwelling and Consideration for Services Provided with Use of a Dwelling (see par. 428 of the Report),
- h) the Decree of the Ministry of Finance on Rent from Dwellings Established in Co-operative Houses and Consideration for Services Provided with Use of These Dwellings<sup>256</sup>,
- i) particularly § 249a (Unauthorised violation of another's right to a house, dwelling or non-residential premises) and § 257 (Damaging another person's thing) of the Criminal Code<sup>257</sup>.

440. These regulations also ensure protection of the citizen from eviction by force, from discrimination in access to housing, etc., whereby they also fulfil those parts of the right to housing which are of an enforceable nature. The CR thus fulfils the declaratory basis of the right to housing, and it does not consider it necessary or suitable to create in this matter obligations in the nature of an entitlement, fulfilment of which is problematic.

441. The legal regulation of use, distribution, allocation, division, maximum prices and expropriation of land, including provisions on compensation, and legal regulation of zoning planning, including proceedings with public participation, are contained in the following legal regulations:

- a) §§ 108 to 116 of the Act on Zoning Planning and the Building Code (the Building Act) and related and implementing regulations<sup>258</sup>,

<sup>251</sup> Act No. 102/1992 Coll., which Amends Certain Questions Related to Promulgation of Act No. 509/1991 Coll., which Amends, Supplements and Adjusts the Civil Code.

<sup>252</sup> Act No. 72/1994 Coll., which Regulates Certain Co-ownership Rights to Buildings and Certain Ownership Rights to Dwellings and Non-residential Premises and Supplements Certain Acts (the Act on Dwelling Ownership), as amended by Act No. 273/1994 Coll.

<sup>253</sup> Act No. 526/1990 Coll., on Prices, as subsequently amended.

<sup>254</sup> Act No. 367/1990 Coll., on Municipalities, as subsequently amended.

<sup>255</sup> Act No. 418/1990 Coll., on the Capital City of Prague, as subsequently amended.

<sup>256</sup> Decree of the Ministry of Finance No. 85/1997 Coll., on Rent from Dwellings Established in Co-operative Houses and Consideration for Services Provided with Use of These Dwellings.

<sup>257</sup> Act No. 140/1961 Coll., the Criminal Code, as subsequently amended.

- b) the Act on Registration of Ownership and Other Substantive Rights to Real Estate and the implementing Decree to the Act<sup>259</sup>,
- c) the Act on the Real Estate Register (the Real Estate Register Act)<sup>260</sup>,
- d) the Act on Transfers of State Ownership to Certain Things to Other Legal Entities or Natural Persons<sup>261</sup>,
- e) the Act Regulating Ownership of Land and other Agricultural Property<sup>262</sup>,
- f) the Act on Conditions for Transfer of State Property to Other Persons<sup>263</sup>,
- g) the Act on the Transfer of Certain Things from the Ownership of the Czech Republic to the Ownership of Municipalities<sup>264</sup>,
- h) the Act Regulating Ownership Relations and Settling Property Entitlements in Co-operatives<sup>265</sup>,
- i) the Act on Property Assessment<sup>266</sup>.

442. The relationship between the owner of a house or apartment and the tenant, which is regulated in the Civil Code, provides the tenant with basic protection of his/her rights. A tenant can be evicted from his/her apartment only on the basis of a legally effective court decision. Under § 711 par. 2 of the Civil Code<sup>23</sup> if the court approves the notice terminating the lease of an apartment (for reasons stated in § 711 par. 1 of the Code<sup>267</sup>), *it shall determine at the same time the date on which the lease relationship is to be terminated, taking into consideration the notice period. .At the same time the court shall*

<sup>265</sup> Act No. 42/1992 Coll., Act Regulating Ownership Relations and Settling Property Entitlements in Co-operatives, as subsequently amended.

<sup>266</sup> Act No. 151/1997 Coll., on Property Assessment and Amending Certain Acts.

<sup>267</sup> The landlord may give notice terminating the lease of an apartment only with the consent of the (appropriate) court and only for the following reasons:

- a) if he needs the apartment for himself, his spouse, his children, grandchildren, son-in-law or daughter-in-law, his parents or siblings;
- b) if the tenant has ceased to perform the work for the landlord and the landlord needs the apartment for another tenant who will work for him;
- c) if the tenant or those who live with him, despite a written warning, grossly breach proper morals in the building;
- d) if the tenant grossly breaches his obligations arising from lease of the apartment, particularly by not paying rent or fees for services related to use of the apartment for a period longer than three months;
- e) if it is necessary, for reasons of the public interest, to dispose of the apartment or building so that it cannot be used, or if the apartment or building needs repairs during which it cannot be used for a longer period of time;
- f) if the apartment is structurally connected to premises designated for operating a store or some other business activity and the tenant or owner of these non-residential premises wants to use the apartment;
- g) if the tenant has two or more apartments, unless he cannot justly be required to use only one apartment;
- h) if the tenant fails, without serious reasons, to use the apartment, or if he uses the flat, without serious reasons, only occasionally;
- i) if the apartment has a special designation or is in a building with special designation and the tenant is not a handicapped person.

*also decide that the lessee is obliged to remove his/her things from the apartment no later than 15 days following expiry of the notice period. If the lessee is entitled to a substitute apartment (or substitute accommodation), the court shall decide that the lessee is obliged to remove his/her things from the apartment within 15 days of provision of his/her substitute apartment and, should the provision of substitute accommodation be sufficient, within 15 days of provision of substitute accommodation.*

443. The court must decide not only on eviction for reasons stated in § 711 of the Civil Code<sup>263</sup> and provision of replacement housing, if applicable, but then also on the manner of eviction – it must issue an execution order. The manner of eviction or clearing out an apartment is regulated in the Civil Court Procedure Code.
444. The number of judicially evicted persons in 1993 to 1999 is not known. It can be said that this number is very low, in view of the complexity of the entire process connected to the act of eviction or clearing out an apartment, and in view of the expenses which the entitled person, the apartment owner, must generally pay. In practice the process of legal eviction is used only in exceptional cases. If someone occupies an apartment illegally, he can be evicted without replacement housing, as he is not a tenant under the law.
445. The financial affordability of housing is assisted by certain measures contained in legal regulations governing the provision of various support and benefits, both in demand and supply. The most important ones are:
- a) the State Social Care Support Act: housing contribution (§§ 24 to 26)<sup>268</sup>;
  - b) the Act on a Welfare Contribution for Equalising Rent Increases and on Amendment of the State Social Care Support Act: social contribution for equalising rent increases (§§ 1 to 16)<sup>248</sup>;
  - c) the Act on a Welfare Contribution for Equalising Increases in the Price of Heating Energy<sup>249</sup>;
  - d) the Act on Income Taxes: decreasing the tax bases by interest paid in the tax period on a loan from building savings or on a mortgage loan, provided and used to finance housing needs (§ 15 par. 10)<sup>269</sup>;
  - e) the Act on Building Savings and State Support of Building Savings<sup>270</sup>;
  - f) the Government Decree which Sets Conditions for State Financial Support for Mortgage Loans for House Building<sup>271</sup>;
  - g) the Government Decree on Providing Interest-free Loans for House Building<sup>272</sup>.
446. Regulation of the area of construction, from zoning plans and expropriation of land to regulation of construction processes corresponds to conditions in European Union countries. The basic legal regulation in this area is the Act on Zoning Planning and the Building Code (the Building Act)<sup>273</sup>.
447. So far, no law in the Czech Republic directly restricts speculation with apartments or real estates. In the fight against speculation, only those means can be used which are given by

---

<sup>268</sup> Act No. 117/1995 Coll., on State Social Care Support, as subsequently amended.

<sup>269</sup> Act No. 586/1992 Coll., on Income Taxes, as subsequently amended.

<sup>270</sup> Act No. 96/1993 Coll., on Building Savings and State Support of Building Savings and Supplementing Act No. 586/1992 Coll., on Income Taxes, as amended by Act No. 83/1995 Coll.

<sup>271</sup> Government Decree No. 244/1995 Coll., which Sets Conditions for State Financial Support for Mortgage Loans for house building, as subsequently amended, Government Decree No. 149/1997 Coll., which Sets Conditions for Providing Additional Financial Support for Mortgages for House Building.

<sup>272</sup> Government Decree No. 148/1997 Coll., on Providing Interest-free Loans for House Building, as subsequently amended.

<sup>273</sup> Act No. 50/1976 Coll., on Zoning Planning and the Building Code (the Building Act), as subsequently amended.

existing legal regulations. Insofar as speculation occurs, it is related to the transforming economy and inadequate legal regulation of the housing market.

448. Measures concerning environmental and health planning in housing construction and construction of housing estates are contained primarily in the Building Act and related decrees (on bases for zoning and zoning documentation<sup>274</sup>, on general technical requirements for construction<sup>275</sup>). In connection with this, the Government, or the Ministry for Local Development, which has jurisdiction over housing, is preparing programs whose purpose is to repair pre-fabricated apartment buildings on housing estates and humanisation of large housing estates. In order to start construction, an investor must, under the Act on Evaluating Effects on the Environment<sup>276</sup> obtain a positive statement in the specified manner from the body for environmental protection on the effects of the construction on the environment.
449. Non-government non-profit organisations can also build apartments and provide services related to housing. The support provided to these organisations by the state is not an entitlement; supporting funds of an investment and non-investment nature are provided in the form of grants for selected projects. In this manner, the state supports particularly housing for the handicapped and the elderly, i.e. housing connected to social services. In addition, the state also provides direct investment subsidies for construction of rental apartments and apartments with assisted living services intended for people with decreased self-sufficiency, especially elderly people; these subsidies are provided to municipalities, because the current legal system does not permit providing them to, for example, non-state organisations. The Ministry for Local Development is currently preparing an Act on Housing Societies, which will also permit providing such subsidies to non-state entities which work on the non-profit principle.

C. In non-residential buildings	57	144	132	407
In converted non-residential premises	336	445	853	938

Source: Statistical Yearbook of the CR, 1999

450. Since 1995 a program to support building of municipal (communal) rental dwellings has been in effect; the program provides investment subsidies of a maximum of 320 thousand CZK per apartment and 50 thousand CZK for technical infrastructure to a dwelling. The subsidy is given to a municipality, which may associate with other investors on the construction. Apartments built this way are operated on a non-profit basis, i.e. they have regulated or expense-based rent. Since the beginning of the 90s, investment subsidies have also been provided for construction of buildings with assisted living services (the program to support construction of buildings with assisted living services - community care service homes). Investment subsidies are a maximum of 750 thousand CZK per apartment unit, and are provided to municipalities; with the aid of these subsidies, municipalities build small apartments for elderly people and other people with decreased self-sufficiency. The apartments are used on the basis of a lease agreement, have regulated, i.e. expense-based rent, and living in them is related to the provision of certain social services. These subsidy programs will be adjusted under the government housing policy outline so that the subsidies can be given not only to municipalities, but also non-government non-profit organisations (see also above – preparation of the Act on Apartment Societies); it is also expected that the circle of subsidised buildings intended for disadvantaged groups will be expanded; the aim is investment support for constructing protected buildings, replacement housing for households which were evicted for non-payment of rent, or “halfway” houses<sup>277</sup> (residence in them is for a limited time).

451. The Czech Republic has a category of special purpose dwellings, which are primarily barrier-free apartments accessible to people with limited mobility. Legal regulation of these apartments is found in § 9 of the Act, which, in 1992, supplemented and adjusted the Civil Code<sup>278</sup>: ... *dwellings are specially adapted to house handicapped persons. If a specially designated dwelling was established from state funds or the state contributed to it, a lease contract can be concluded only at the recommendation of the district office,*

<sup>277</sup> Halfway houses are social facilities; houses or apartment units in which housing and social services are offered, e.g. to young people released from school facilities for institutional education or protective custody after reaching the age of majority, persons released from serving prison sentences or from treatment centres for people addicted to narcotics, etc.

<sup>278</sup> Act No. 102/1992 Coll., which Amends Certain Questions Related to Promulgation of Act No. 509/1991 Coll., which Amends, Supplements and Adjusts the Civil Code, as subsequently amended.

*which shall request a statement from the Government Committee for the Handicapped before issuing a recommendation.*

452. Dwellings in special purpose buildings are, under § 10 of the same Act, apartments in buildings with assisted living services and in buildings with comprehensive facilities for the handicapped. Lease agreements for these apartments are condition on the recommendation of the district office, if the state contributed to their construction.

453. Measures for making available unused, little used and unsuitably used land parcels in the Czech Republic are a component of the Act on Conditions for Transfer of Agricultural and Forest Lands from State Ownership to Other Persons<sup>279</sup>, and the Act on Inheritance, Gift, and Real Estate Transfer Tax<sup>280</sup>.

454. In the Czech Republic, housing is one of the areas which receive international aid funds. The aim of using international support is primarily development of urban areas and housing under local conditions, and housing support for vulnerable groups. Foreign support aimed at development of housing, or revival of cities, is used by individual municipalities, according to their circumstances and needs. If support is aimed at disadvantaged groups, it is used primarily for construction of protected housing for the mentally handicapped and people with combined disabilities, for housing for seniors and

<sup>279</sup> Act No. 95/1999 Coll., on Conditions for Transfer of Agricultural and Forest Lands from State Ownership to Other Persons and Amending Act No. 569/1991 Coll., on the Land Fund of the CR, as subsequently amended.

<sup>280</sup> Act No. 357/1992 Coll., on Inheritance, Gift and Real Estate Transfer Tax, as subsequently amended.

other people with reduced self-sufficiency, for construction of housing for Roma, asylum housing and “halfway” houses.

455. The on-going social and economic transformation has also affect housing and the development of the housing market. The main reasons why it is still not possible in practice for everyone to find a place commensurate to his/her abilities and expended effort in the labour and housing markets are legal, economic and psychological.
456. A complete legal framework does not yet exist which would permit efficient operation of the housing market. The relative advantage of the apartment tenant over the owner continues, and enforceability of rights and the slow work of courts are problematic. From an economic viewpoint the problem lies particularly in across the board, non-systematic, and in many cases unjustified rent<sup>281</sup>, applied in the majority of rental apartments (i.e. apartments owned by municipalities, the state and private owners), which reinforces certain undesirable inequities in this housing sector (both in terms of rights to management and use, and in terms of housing expenses). The desirable operation of the housing market is also inhibited by the psychological heritage apparent in the attempt of many individuals and households to rely in arranging housing more on the state than on their own powers and the unwillingness to restructure household expenses to the benefit of housing at the expense of other needs. This includes the necessity of consciously separating expenses for housing (obtaining, maintenance, rent), for services for housing and for other products, particularly energy. Thus the owners of real estate – residential houses with rent controlled apartments, complain, particularly with reference to Article 11 par. 4 of the Charter<sup>282</sup> and the Civil Code<sup>23</sup> that their ownership rights are violated on a long-term basis, above all their right of use, right to enjoy the products and profits, and the right to dispose of their property (§ 123 of the Civil Code).
457. In October 1999 the Government adopted a new outline of housing policy<sup>283</sup> and sent it for discussion in the Chamber of Deputies of the Parliament of the CR. The policy is primarily in response to the fact that measures taken in previous years, which were to help balance out the legal, economic and social deformation in housing, were not sufficiently interconnected, the supporting system did not work efficiently. In contrast to previous interventions, this outline is also based on the fact that it is necessary to strengthen the social aspect of housing policy, and that the housing market needs to be understood as a market which is structurally and spatially differentiated, where across the board measures do not bring the desired results.
458. The outline formulates the basic aim of the housing policy, which is an increase of overall accessibility of housing, primarily affordability, in two ways: strengthening the authority of the state (including improving legal, economic and other tools) with the simultaneous development of market principles and emphasis on people’s individual responsibility for their housing through targeted weakening of the deeply-rooted paternalism. The newly-formulated aims of housing policy are: stronger support for care

---

<sup>281</sup> Regulation concerns particularly lease contracts concluded before 1993, regardless of the tenant’s actual social situation, and contracts concluded on the basis of transfer of a lease or exchange of apartments in cases where rent was regulated under the original lease contracts. In 1999 this type of regulation applied to 95.3 percent of all rental apartments and 29.4 percent of the total housing fund. Fewer than 5 percent of rental dwellings have freely negotiated – market – rent or rent regulated as expenses (particularly state subsidised new municipal housing). Thus, rent is regulated across the board, including in apartments where the tenant’s social situation does not require rent regulation.

<sup>282</sup> Article 11 par. 4 of the Charter: *Expropriation or some other mandatory limitation upon property rights is permitted in the public interest, on the basis of law, and for compensation.*

<sup>283</sup> Resolution of the Government of the Czech Republic of 18 October 1999 No. 1088, on an Outline of Housing Policy.

for the existing housing fund and support for selected population groups, who are disadvantaged in access to housing. They also include decentralisation of housing policy and a regional approach to handling specific problems. The Government's declaration of intent to adopt measures to strengthen development of rental housing and development of housing on the non-profit principle is significant.

**Proportion of household financial expenditures from net financial income in 4th quarter 1998 in %** (respondent sample of family budget statistics)

	Estimate for average household			Households with minimum incomes	
	total	employees	farmers	Families with children	Pensioners

Total, %	98.4	95.5	102.8	106.5	107.3

Note: Average household expenditures are 98.4 % of average net incomes. Data above or below 100% indicate the difference between beginning and ending cash, between deposits and deposits withdrawn and between in-kind income and expenses.

Source: The Czech Statistical Office, 1999

459. The possibilities for housing development, especially its affordability, are limited by the on-going deregulation of energy prices, which is a significant burden on family budgets. Energy accessibility in terms of production capacity and the distribution network is not a problem in the Czech Republic, but the situation with prices is quite different. Removing regulation and balancing prices for households and industrial companies is being done gradually, in view of the social situation of households.

460. In 1997 there were a total of 353,870 fully electrified residential subscribers in the Czech Republic, whose consumption reached 24.4% of all consumption from the grids.

461. The Czech Republic has only minimal sources of natural gas (about 1% of annual consumption) and is forced to buy it from abroad. The price for subscribing households is also still regulated, and does not correspond to expenses for obtaining, transport, storage and distribution of gas. Correction of these deformed prices is a component of energy policy.

462. In 1999 the Ministry of Industry and Trade prepared for Government discussion an amendment of the Energy Act<sup>284</sup>, which will newly regulate the electric energy and gas industries in relation to European Union directives; the ministry is also completing an outline for privatisation of distribution companies and brown coal mining companies. Both should lead to a decrease in prices as a result of competition, and thus ensure energy price stability in the long run.

***2. The States Parties to the present Covenant, recognising the fundamental right of everyone to be free from hunger, shall take, individually and through international co-operation, the measures, including specific programmes, which are needed:***

***a) To improve methods of production, conservation and distribution of food by making full use of technical and scientific knowledge, by disseminating knowledge of the principles of nutrition and by developing or reforming agrarian systems in such a way as to achieve the most efficient development and utilisation of natural resources;***

463. In accordance with the jurisdiction of the Ministry of Agriculture, the outline of agricultural policy<sup>285</sup> set the basic dimensions of agricultural production with the aim of ensuring maximum self-sufficiency in production of agricultural raw materials and production of foods and ensuring the necessary quality of supplying the population.

464. Every year since 1995, the Ministry of Agriculture has prepared, for the Government and the public, a report on the state of Czech agriculture (the so-called Green Report), in which it publishes the results of analysis of food consumption patterns, evaluates circumstance which influences consumption, and provides a prognosis for food consumption patterns and thus also society-wide demand in relation to agricultural original production and the processing industry.

### **The status of ecological farming in the Czech Republic**

465. The foundation for healthier eating by the population is improving the quality of food. This is also served by the development of agricultural production respects natural processes and limits the amount of harmful materials contained in foods (from fertilisers, genetic modification, feed for farm animals, etc.). In the Czech Republic, ecological agriculture dates from 1990, when the foundations for the entire system were laid with the co-operation of the Ministry of Agriculture and the non-profit non-government associations Libera and the Pro-Bio association (bringing together ecological farmers).

<sup>284</sup> Act No. 222/1994 Coll., on Conditions for Conducting Business and State Administration in the Energy Sectors and on the State Energy Inspection, as subsequently amended.

<sup>285</sup> Resolution of the Government of the Czech Republic of 9 March 1994 No. 122, on Fundamental Principles of Agriculture Policy until 1995 and for Later Periods.

## Ecological farming

Year	Number of ecological farmers	Agricultural land in hectares	Proportion of land from total agricultural land in the CR in %
1990	3	480	-
1991	132	17,507	0.41
1992	135	15,371	0.36
1993	141	15,667	0.37
1994	187	15,818	0.37
1995	181	14,982	0.35
1996	182	17,022	0.40
1997	211	20,238	0.47
1998	340	71,620	1.67

Source: Ministry of Agriculture of the CR

466. In 1998 ecologically farmed land had the following structure: arable land 100,473 ha, permanent grasslands 60,924 ha, orchards 356 ha, vineyards 25 ha, ponds 24 ha and other 245 ha.

467. In the same year, 326 monitored entities conducted ecological farming in the Czech Republic. In 239 cases they were private farmers, then 20 agricultural co-operatives, 4 school entities, and 59 other companies (corporations, limited liability companies or general partnerships). In connection with this production, there were 12 processors, 2 trade entities, and 2 manufacturers of auxiliary materials.

468. The Pro-Bio association union brought together 360 members in 1998, including 270 producers with a certified area of 52,505 ha. The Libera association had 38 entities with a certified area of 19 thousand ha. These associations provide eco-farmers education and consulting, both in starting their activities and in arranging distribution and sales of bio-products, and they promote the interests of eco-farmers in contacts with state organisations.

469. The state supports ecological farming through Ministry of Agriculture programs. In 1998 and 1999, under government decrees, programs of non-production agricultural functions were started<sup>286</sup> to, among other things, support ecological farming, in the form of a financial contribution to balance out losses arising as a result of farming in an ecological manner. These decrees set forth support of ecological farms in areas with an average land price of 4.01 CZK per 1 m<sup>2</sup> and higher, and in areas which are less favourable for farming.

470. On the basis of these support programs, the state provides financial support to natural persons and legal entities who manage (farm):

- a) agricultural land with a minimum size of 5 ha ,
- b) specially protected areas with a minimum size of 2 ha,

<sup>286</sup> Regulation of the Government of the Czech Republic No. 341/1997 Coll., which Provides Support Programs to Support Non-production Roles of Agriculture, to Support Activities Contributing to Preserving the Countryside and Assistance Programs to Support Less Favourable Areas, and Government regulation No. 24/1999 Coll., Which Provides Support Programs to Support Non-production Roles of Agriculture, to Support Activities Contributing to Preserving the Countryside and Assistance Programs to Support Less Favourable Areas for 1999.

- c) ecologically, on arable land, hops farms, vineyards, gardens and fruit orchards of at least 1 ha.
471. The criterion for providing support for an applicant who farms ecologically on arable land with an average price of 4.01 CZK per 1 m<sup>2</sup> and higher and in less favourable areas are general requirements for all the programs, and also a requirement that:
- a) the applicant maintains the entire agricultural land in proper condition under special legal regulations,
  - b) the applicant is not on a list prepared by the appropriate district office which lists applicants who have unfulfilled obligations in the environmental field,
  - c) the applicant did not apply for other support for the same purpose and the same land in the same year. In addition, for ecological farmers, there is a requirement that:
  - d) the applicant is on a list of farmers who farm in a particularly conservationist manner and take care of protection of all elements of the environment.
472. The criteria for providing support for an applicant who farms ecologically on arable land with an average price of 4.01 CZK per 1 m<sup>2</sup> and higher and in less favourable areas on permanent grasslands are:
- a) ecological breeding of farm animals with an average intensity for the whole year, at least 0.1 of a large animal unit,
  - b) the applicant must be on a list of farmers who farm in a particularly conservationist manner and take care of protection of all elements of the environment.
473. Ecological farmers at present farm under principles contained in the Method instruction for ecological farming, an internal regulation of the Ministry of Agriculture, which reflects the main principles contained in EEC Council Directive No. 2092/91, on ecological farming and corresponding methods of identifying agricultural products and foods, which has been in effect for European Community countries since 1991 and is conceived as a framework law for ecological farming. It is also in accordance with IFOAM principles.
474. The Ministry of Agriculture is currently preparing an Act on Ecological Farming which is to go into effect in 2000. This act will comprehensively set conditions for ecological farming.
475. A farmer registered in the ecological farming system is inspected by an authorised inspection organisation (authorised by the Ministry of Agriculture) as to whether he follows the principles of ecological farming, and receives a certificate upon positive inspection results. All such certified farmers are included each year in a list of producers, processors and traders of natural products in the Czech Republic, which is important when filing an application for financial support for ecological farming and for public information.

***b) Taking into account the problems of both food-importing and food-exporting countries, to ensure an equitable distribution of world food supplies in relation to need.***

476. The Czech Republic is a food importing country. It emphasises the problem of ensuring fair distribution of world food supplies in multilateral negotiations on trade liberalisation in the World Trade Organisation<sup>287</sup> and also in negotiating bilateral trade policy regimes with other countries. In addition, in relationships with the least developed and developing countries, it unilaterally provides these countries appropriate treatment within the framework of the **General Preference System**.

477. Assistance to areas endangered by lack of food is also given through financial aid, bilateral and multilateral (through voluntary contributions to the UN and the International Monetary Fund). The CR approved developmental aid for 1998 of 326 million CZK and humanitarian aid of 30 million CZK from the state budget<sup>288</sup>, which was used for purposes determined ad hoc according to urgency and in accordance with the Principles for Providing Foreign Aid<sup>289</sup>.

478. In terms of the Czech Republic's aid for ensuring fair distribution of world food supplies, in the future the CR's membership in the European Union and participation in Union aid programs will be important. Preparations have started to assume a trade regime with developing countries. The Czech Republic will take part in financing the European development Fund as soon as it enters the Union.

479. In 1997 Act on Food and Tobacco Products<sup>290</sup> went into effect; this Act provided the obligations of businesses in producing foods and tobacco products, placing them in circulation, labelling foods and their composition, packaging and transportation. The Act also governed state supervision of observance of the obligations under the Act and sanctions for violations. Implementing regulations were issued to the Act, divided by food groups. The Ministry of Health simultaneously issued the appropriate related decrees. The purpose of the Act and the implementing decrees is for the consumer to receive non-harmful foods which meet the specified quality parameters. The Act and individual implementing decrees are harmonised to the maximum extent with European Union regulations in the technical area, particularly in setting chemical and physical quality parameters.

<sup>289</sup> Under Government Resolution of 15 March 1995 No. 153, on the Principles for Providing Foreign Aid, as amended by Government Resolution of 19 June 1996 No. 342, on the foreign aid plan for 1997 and amending Government Resolution of 15 March 1995 No. 153.

<sup>290</sup> Act No. 110/1997 Coll., on Food and Tobacco Products, as subsequently amended.

## ARTICLE 12

### ***1. The States Parties to the present Covenant recognise the right of everyone to the enjoyment of the highest attainable standard of physical and mental health.***

480. Article 31 of the Charter reads: *Everyone has the right to the protection of his/her health. Citizens have the right, on the basis of public insurance, to free medical care and to medical aids under conditions provided for by law.*

481. The state of health of the population of the Czech Republic is considerably influenced by age structure. Natural population growth is negative, and the population is ageing. The total standardised death rate has been declining since 1990, more among men than women (see also the text and table to paragraph 10 of the report). At present, the number of deaths per thousand inhabitants is 10.6: for men, 12.5, and for women 7.4 deaths per thousand people of each sex. Infant deaths are also declining. The life expectancy at birth is rising, but it is still lower than the lowest value in European Union countries - in Portugal. 85 percent of deaths are ascribed to diseases of the circulatory system, tumours, injuries and poisoning. While mortality in diseases of the circulatory system is declining, especially among men, the mortality for neoplasm is stable to increasing.

482. Despite the decline in deaths from cardiovascular disease, these diseases remain the main cause of death (56.2%). The second most frequent cause of death is neoplasm (24.8%). Despite stabilisation of death numbers, their incidence is increasing (by roughly 2% annually) and so is the prevalence of these illnesses in the population (in 1997, 52,304 new cases of malignant neoplasm were reported to the National Oncology register of the Czech Republic). The third most frequent cause of death are injuries and other external causes, which are about 8 percent of total deaths, are not yet declining. The increase of diabetes remains a serious problem. The increase in 1997 was 3 percent over the previous year.

483. Statistics on incapacity to work show a mild decline since 1990, but the average duration of incapacity to work is extending, to 25.5 days for men and 27.2 days for in 1997 (calendar, not business days). Socio-economic influences have a significant effect on the duration and frequency of incapacity to work.

### **Incapacity to work due to disease and injury**

	<b>1990</b>	<b>1995</b>	<b>1996</b>	<b>1997</b>	<b>1998</b>
New cases of incapacity to work per 100 health insured	95.3	91.9	85.8	86.7	79.2
Average duration of one case of incapacity to work (calendar days)	18.4	24.4	25.8	26.3	26.8
Average percentage of incapacity to work per year	4.8	6.2	6.0	6.3	5.8

Source: Statistical Yearbook of the CR, 1999

484. The health of the population also results from nutrition – excessive calorie intake, a predominance of animal fats, simple sugars, salt, insufficient consumption of roughage, vegetables and fruit, even though in recent years the structure of food consumption is changing positively. Nonetheless, the population's body mass, defined by the body mass index, reflects numbers which indicate overweight to obesity in men aged 45 to 64 let and women aged 55 to 74. This fact is also related to the low level of physical activity. Women

regularly engage in sports less than men, 60 percent of men and 80 percent of women do not devote even one day a week to physical activity. The intensity of physical activity is indirectly proportional to education level.

485. Alcohol consumption per capita in litres of pure alcohol is increasing. Men consume more alcohol (18.2 litres in 1995 per male person), 70 percent of them can be classified as regular alcohol consumers. Excessive consumption (264 g and more for men and 180 g and more for women per week according World Health Organisation criteria) was found in 16 percent of men and 2 percent of women. The alcohol consumption level in men is indirectly proportional to their education; this relationship is not apparent among women. The Czech Republic also saw unfavourable developments in the consumption of non-alcoholic drugs, particularly among young people reaching maturity. In 1996, young people up to the age of 19 were more than one third of patients treated in ambulatory treatment facilities for disorders caused by use of these substances.

**Growth in alcohol consumption per capita** (in litres of pure ethanol - 100%)

	1990	1994	1995	1996	1997
Alcoholic beverages total	8.9	9.4	9.4	9.5	9.8
Spirits (40%)	7.2	7.9	7.9	8.0	8.3
Beer	155.2	156.7	156.9	157.3	161.4
Wine	14.8	15.4	15.4	15.8	15.9

486. Smoking is considerably widespread in the population. Surveys conducted by the Institute of Health Information and Statistics in 1993 determined 32.3 percent regular smokers among men and 21.3 percent among women, with the highest rates in the 35 to 44 age category in both sexes. The situation is better than in the 80s, but it is not satisfactory, as smoking is a significant cause of premature illness and death. There are more smokers among people with lower education and in lower status social groups.

487. One of the factors which increase the risk of chronic disease is stress. The intensity and extent of causes of stress rose sharply after 1990.

488. The controlling factors in the **health of the population** in the Czech Republic thus are:

- a) Lifestyle: Important elements of lifestyle which are harmful to health are smoking, disproportionate by energy value and improperly structured nutrition, low physical activity, excessive mental burdens, damaging use of and dependence on alcohol and non-alcoholic drugs, and unsuitable sexual behaviour. These elements affect health up to 60 percent. While the situation is improving in nutrition, the level of risk is not declining in the other items.
- b) Degradation of the living and working environment influences health by roughly 20 percent. The quality of the environment is slowly improving in the Czech Republic, but the incidence of long-term consequences of pollution is not declining yet, particularly the incidence of acute and chronic respiratory illnesses and allergies and certain kinds of tumours.
- c) The level of health care affects the health of the Czech Republic's population by roughly 20 percent.

489. While the health of the rural and urban population in the Czech Republic does not fundamentally differ, the Romani population has a differing incidence and prevalence of disease. This group is not tracked separately in statistical research on the health of the

population; the foregoing statement is based on selected findings and the experience of physicians and health inspectors. The health of the Romani population, particularly the higher level of child illness and a lower life expectancy, is related to the different lifestyle, including eating habits, and often unsatisfactory material conditions in which some Roma and their families live.

490. The Action Plan for Health and the Environment of the Czech Republic<sup>291</sup> and the National Health Program<sup>292</sup> are the **foundation of health policy** in the Czech Republic, and ensure specialised guidance for healthy living conditions and protection and support of health. The previous document, the National program of Renewal and Support of Health, was approved by the Government of the Czech Republic as early as 1991<sup>293</sup>. In 1992 it was followed by the Project for Medium term Strategy for Renewal and Support of Health<sup>294</sup>, which set the aims of health policy for the next three years and the task of preparing a long-term strategy: the National Health Program. This project is a national variation on the regional strategy of the World Health Organisation,<sup>295</sup> Health for Everyone by 2000.

491. The main task of the **National Health Program** is support for implementation of health support projects:

- a) to systematically and fully inform all citizens about the influence of their actions and behaviour on health,
- b) to educate the population for an active approach to its own health and to support responsibility for it,
- c) to improve the structure of food consumption,
- d) to decrease alcohol consumption,
- e) to increase the level of physical activity in the population,
- f) to decrease the incidence of smoking, particularly among young people,
- g) to decrease demand for drugs and the numbers of addicts,
- h) to limit situations which create stress and to teach stress management,
- i) to expand planning parenthood and use of suitable forms of contraception.

492. The Czech Republic is a party to the Convention on the Elaboration of a European Pharmacopoeia (Council of Europe), as amended by the Protocol to it. Since 1998, the Czech Republic is also a party to the **Convention on Human Rights and Biomedicine** together with the Additional Protocol to the Convention on the Protection of Human Rights and Dignity of the Human Being with Regard to the Application of Biology and Medicine – on the Prohibition of Cloning human beings. In connection with this, it is necessary to harmonise domestic legal regulations with the protocol. Since its creation, the Czech Republic, as a successor state of the CSFR, is a member of the World Health Organisation, and regularly contributes to its budget, on the basis of two year agreement on co-operation. In 1999, projects of the EUROHEALTH 98/99 program were completed, and

work began on projects under the umbrella of the new World Health Organisation Program, “Health 21 - 21 aims for the 21<sup>st</sup> century”.

### **Basic health care and its financing**

493. Basic health care and its material and financial provision is governed by the Act on Public Health<sup>296</sup>. In the first quarter of 2000, under the plan of the Government’s legislative tasks, the Minister of Health will submit a new, comprehensive Act on Health Care, which is to go into effect in January 2001.
494. Health care is paid primarily through health insurance companies. The insurance companies pay for the care provided on the basis of agreements concluded with health care operators in the necessary extent and structure. In case of necessary and urgent care, health care facilities must provide care to everyone. There are ten health insurance companies in the Czech Republic. The largest of them, General Health Insurance Company (Všeobecná zdravotní pojišťovna) insures roughly 75 percent of all insured persons.
495. Health care benefits are benefits provided to insured persons, defined, under § 2 of the Act on Public Health Insurance<sup>297</sup> as persons with permanent residence in the Czech Republic or employed by an organisation with its registered address in the Czech Republic, in an extent specified by the Act.
496. Health care (as a benefit) is not paid from the funds of the Ministry of Health chapter of the state budget. The ministry pays from its budget certain activities to which health insurance does not apply, and certain other activities which create conditions for providing health care (administrative and service activities), but primarily supports investment construction for health care facilities where the state is the founder, both at the central and local level. Expenses for health care provided to foreigners from countries with which the Czech Republic has concluded an agreement on cost-free provision of health care are also paid from the state budget, through the Ministry of Health. The percentage of these expenses of total expenses in health care in 1998 was 5.9 percent.
497. The source of payments for health care are payments for general health insurance in an amount specified by the Act on Premiums for General Health Care<sup>298</sup>. Payers of health care premiums are the insured persons (employees, self-employed persons, and persons with permanent residence in the Czech Republic, for whom the state is not the premium payer), employers (for their employees) and the state. The assessment base for premium amounts, under the cited Act (§ 3, §§ 3a to 3c), is:
- a) the sum of income, with the exception of non-included income, for an employee in an employment relationship, the minimum calculation base is the minimum wage (defined on the basis of a month);
  - b) 35 percent of income from business or other independent self-employment, after deduction of expenses incurred to attain, secure and maintain it, for a person independently self-employed, the minimum calculation base is the minimum wage (or twelve times that for annual accounting) and the maximum calculation base is 486 thousand CZK (in a calendar year);
  - c) 2,900 CZK for a person for whom the premium payer is the state;

---

<sup>296</sup> Act No. 20/1966 Coll., on Public Health, as subsequently amended.

<sup>297</sup> Act No. 48/1997 Coll., on Public Health Insurance, as subsequently amended.

<sup>298</sup> Act No. 592/1992 Coll., on Premiums for General Health Insurance, as subsequently amended.

d) the minimum wage for a person who does not have income from employment or from independent self-employment and for whom the state is not the premium payer.

In addition, an employer remits to the health insurance company account, the part of the premium which it is required to pay for its employees. In practice, the manner of calculating the premium amount and the difference in the defined calculation bases leads to the fact that employees remit higher amounts (including the premiums paid by their employers) higher amounts on average than self-employed persons, even though employees have, on average, lower real personal income and a lower standard of living.

498. The state is the payer of health insurance from the state budget under § 7 of the Act on Public Health Insurance for dependent children, persons drawing pensions from pension insurance, recipients of parental benefits, women on maternity and additional maternity leave, job applicants, persons drawing welfare benefits for reasons of social neediness, persons completely or predominantly incapacitated and persons caring for them, persons performing basic service in the military forces, persons in detention or serving a prison sentence and juveniles placed in school facilities for institutional upbringing or protective custody. This is the most important interconnection of state expenses with the general health insurance system. After redistribution of selected insurance premiums, individual health insurance companies (which are public law institutions) pay health facilities for the care provided to their insured parties, in the extent and under conditions specified by the Act on Public Health Insurance.
499. Public health insurance is compulsory for all persons defined in the Act on Public Health Insurance. Under § 2 par. 5 of this Act, health insurance *does not cover those persons who do not have permanent residence in the Czech Republic, and work in the Czech Republic for employers who enjoy diplomatic advantages and immunities, or for employers in an labour law relationship concluded under foreign legal regulations or for employers who do not have their registered address in the Czech Republic and persons who reside long-term abroad and do not pay insurance premiums* (in accordance with conditions specified by the Act). Persons who do not meet the conditions of participation in public health insurance specified by the Act, but have long-term or permanent residence in the Czech Republic and want to have health insurance, may conclude a health insurance agreement with a selected health insurance company.
500. For purposes of preventing occupation illness, work injuries and illnesses caused and worsened by the influence of work and working conditions, all employers are required to ensure company preventive care for their employees, an integral component of which are preventive examinations with the purpose of evaluating capacity for work. The Labour Code<sup>72</sup> and the Act on Public Health provide that employers are responsible for seeing to it that work is performed only by employees who are medically capable of doing it.
501. Provision of health care is based on the principle of equality, which means that no measures or legislative provisions disadvantage elderly citizens or other population groups in the provision of health care. Health care for pensioners is paid from the state budget. One of the problems for this population group is increasing co-payments for medicines (however, the principle is still observed that at least one of basic, absolutely necessary medical preparations for particular symptoms is fully paid by the health insurance company).

## Expenditure on health service

	1993	1994	1995	1996	1997	1998
Public expenditures, total (bn CZK)	69.3	81.1	93.3	102.4	108.9	113.6
Ratio of public expenditures to GDP (%)	6.9	7.1	6.9	6.7	6.7	6.6

## Protection of mental health in radio and television broadcasting and in advertising

502. The Act on Radio and Television Broadcasting<sup>299</sup>, in § 5, charges all broadcasters not to schedule, between 6 a.m. and 10 p.m., programs which could endanger the psychological or moral development of children and juveniles. § 4 of the Act charges broadcasters to provide objective and balanced information necessary for the free formation of opinions. § 5 imposes on broadcasters the duty to ensure that broadcast programs do not contain subliminal messages. §§ 6 to 8 of the Act regulate obligations in broadcasting advertising and sponsored programs:

- a) Requires a broadcaster to see to it that broadcasting of advertisements does not include advertisements that support behaviour which endangers morals, consumer interests or interests of protecting health, mental or moral. Advertisements intended for children, or in which children appear, if they support behaviour that endangers health, mental or moral development.
- b) Advertisements must be distinguishable and clearly separated from other programs.
- c) Broadcasters are required to ensure that a party ordering an advertisement may not in any way exercise influence on the contents of programs in the broadcasting or on its program service structure. The duration of advertisements and their placement in programs are precisely defined by the Act.

503. The Advertising Regulation Act<sup>300</sup> forbids advertising based on subliminal human perception, advertising for medications and health care equipment, which are not registered or approved in the CR or which require a doctor's prescription, or medications

<sup>299</sup> Act No. 468/1991 Coll., on Radio and Television Broadcasting, as subsequently amended.

<sup>300</sup> Act No. 40/1995 Coll., on Regulating Advertising, as subsequently amended.

containing narcotic, psychotropic and other addictive substances; advertising also may not contain data leading to an erroneous evaluation of one's own state of health, etc.

504. The Advertising Regulation Act separately regulates advertising for tobacco products. Under § 3 of this Act, advertising for tobacco products may not be aimed at juveniles and may not exhort anyone to smoke. In addition, an advertisement must contain clear text which warns against the health consequences of smoking. Tobacco products advertising may not be scheduled in television and radio broadcasting between 6 a.m. and 10 p.m. § 4 of the Advertising Regulation Act also restricts advertising for alcoholic beverages: it may not be aimed at under-aged persons and may not exhort anyone to immoderate or otherwise harmful use of alcoholic beverages.

**2. The steps to be taken by the States Parties to the present Covenant to achieve the full realisation of this right shall include those necessary for:**

**a) The provision for the reduction of the stillbirth-rate and of infant mortality and for the healthy development of the child;**

505. A negative demographic trend in the Czech Republic is apparent in the declining birth rate (live births). In 1996 the number of deaths exceeded the number of births, and the natural decline in population is not being balanced by immigration. A positive change is that infant and neonatal mortality is declining: in 1998 it fell to half of mortality in 1992. Another positive element is the continuing decline of induced abortion of pregnancy, even though it can be assumed to be related to the decline in the birth rate and in recorded pregnancies (see below).

### **Births**

Year	Births	Births		Births	
	total	Live	Still	Legitimate	Illegitimate
1994	106,915	106,579	336	91,345	15,570
1995	96,397	96,097	300	81,384	15,013
1996	90,763	90,446	317	75,396	15,367
1997	90,930	90,657	273	74,736	16,194
1998	90,829	90,535	294	73,545	17,284

Source: The Czech Statistical Office, 1999

506. The second sentence of Article 6 par. 1 of the Charter reads: *Human life is worthy of protection even before birth*. This sentence expresses a moral, not a legal quality. It does not solve the problem of prohibiting induced abortions, i.e. the problem of whether there is a legitimate right to decide on the part of the doctor, the state, the mother, the father, both potential parents, or no one. Conditions under which induced abortion of pregnancy is possible are provided in Abortion Act and the related decree of the Ministry of Health, which implements the Act<sup>301</sup>.

507. Under § 4 of Abortion Act *a woman's pregnancy is aborted if she so requests in writing, if the pregnancy has not passed twelve weeks, and if other health reasons do not prevent*

<sup>301</sup> Act No. 66/1986 Coll., on Abortion.

Decree of the Ministry of Health No. 75/1986 Coll., Implementing Act No. 66/1986 Coll., on Abortion.

*it. Under § 5 of the Act, it is also permissible to abort a pregnancy for health reasons, with her consent or at her instigation, if her life or health or the healthy development of the foetus are endangered, or if the foetus has a genetic defect. Pregnancy may be aborted for a woman who has not reached the age of sixteen only with the consent of her legal representative; if pregnancy is interrupted for a woman between sixteen and eighteen years of age, the health facility shall inform her legal representative.*

508. The decline in the number of induced abortions has also been made possible by availability of modern, effective and safe means of contraception. In 1992 to 1997 the ratio of registered women of fertile age using some sort of contraception under the supervision of a doctor rose from 21.1 percent to 37.8 percent, including 29.1 percent using hormonal contraceptives. The annual growth of the proportion of women using contraceptives from 1996 to 1997 was 2.8 percentage points. However, contraception is not yet free, and only a small part of it is paid by health insurance.

## Abortions

Year	Abortions <sup>1)</sup>	including		
		Induced abortions	Spontaneous abortions	Other abortions
1994	67,434	54,836	11,109	11
1995	61,590	49,531	10,571	12
1996	59,962	48,086	10,296	20
1997	56,973	45,022	10,392	7
1998	55,654	42,959	11,128	12

1) Including ectopic pregnancies

Source: The Czech Statistical Office, 1999

509. Support for planning parenthood is one of the areas of the National Health Program<sup>294</sup>, which the Ministry of Health fulfils on an on-going basis. It also includes related issues : contraceptive use, education on the risks of induced abortion (emphasis is placed primarily on performing it early enough – so-called mini-abortion, i.e. within eight weeks after conception), influence on women in problem social groups and ethnic minorities, with emphasis on postponing a first pregnancy until one reaches the age of legal maturity.

510. The non-government organisation **the Society for Family Planning and Sex Education** also works with family issues. Since 1997 this association has had the status of full membership in the International Planned Parenthood Federation<sup>302</sup>, promoting the rights guaranteed by its Charter of Sexual and Reproductive Rights. The Charter connects to international documents on human rights which are important for sexual and reproductive health, including programs of the International Conference on Population and Development (ICPD, 1994), The platform for action of the Fourth World Conference on Women (FWCW, 1995) and other UN documents. The association operates a telephone consulting service for planned parenthood, mainly on reliable contraception, and offers assistance in handling urgent and crisis situations. The Ministry of Health provides financial support to the project as part of implementing the National Health Program.

511. According to the Association for Family Planning, there is a problem in the legal regulation of voluntary sterilisation in the present Act on Public Health<sup>303</sup>, and in the

<sup>302</sup> International Planned Parenthood Federation - IPPF

<sup>303</sup> Act No. 20/1996 Coll., on Public Health, as subsequently amended.

1972 decree of the Ministry of Health. Women may undergo voluntary sterilisation, at their own request, only for health reasons. These also include a requirement of having four living children or three children and the woman being at least 35 years old. An application is evaluated by an expert commission. This condition is discriminatory according to the Association<sup>304</sup>.

512. The Ministry of Health arranges two programs concerning protection of the health of women and girls. They are: The Healthy Sexual Life Program and the National Perinatalogical Program, which include care for a woman before planned conception, and care for a pregnant woman and the developing foetus, including care during childbirth and care for the newborns in the first days after birth.

513. The basic indicator of child health care is **infant mortality**, where the Czech Republic achieved a reduction under 10 per mill in 1992, to 9.9 per mill. In 1997, infant mortality was 5.9 per mill, which corresponds to the level of the European Union countries. Infant mortality is affected by low birth weight. The proportion of newborns with weight up to 2,500 g out of the total number of live births is about 6 percent, but the proportion of the total number of infant deaths is around 60 percent.

514. The most frequent cause of infant mortality are certain conditions which arise in the perinatal period and which cause over half of infant deaths. The second most frequent cause of infant death are congenital malformations, deformations, and chromosomal abnormalities. In 1997, 2,680 children were reported with a congenital malformation discovered before the child reached one year of age, which is an increase of 18 percent over 1996. In comparing defects in girls and boys, it can be said that more defects are found in boys. The most frequent are congenital heart malformations. Thanks to the improving level of prenatal diagnostics, the incidence of certain genetic defects in newborns is declining. These are **nervous system fissures**, stomach wall defects, certain serious heart defects, defects of the urogenital system and chromosomal abnormalities (primarily Down's syndrome). Despite the success achieved, congenital defects are a 25 percent share of the total number of infant deaths.

#### Infant deaths in the Czech Republic by age

Age at death	Number <sup>1)</sup>				Per 1000 live births			
	1990	1996	1997	1998	1990	1996	1997	1998

Up to 7 days	753	224	186	175	5.8	2.5	2.1	1.9
Up to 28 days	1,003	347	326	289	7.7	3.8	3.6	3.2
Up to 1 year	1,410	547	534	472	10.8	6.0	5.9	5.2

Note: 1) cumulative numbers

Source: The Czech Statistical Office, 1999

515. In the prenatal period, a woman has ten examinations in a normal pregnancy, and more, as necessary, in a high-risk or pathological pregnancy ultrasound testing is done twice during pregnancy (in the 20<sup>th</sup> and 32<sup>nd</sup> week), more frequently in high-risk and pathological pregnancies. The number and scope of examinations in the prenatal period is set by a Decree on Dispensary Care<sup>305</sup>. This care is paid from general health insurance.

<sup>304</sup> The Charter of Sexual and Reproductive Rights of the IPPF (1997), p. 6. The Society for Family Planning, Prague.

<sup>305</sup> Decree of the Ministry of Health No. 60/1997 Coll., on Dispensary Care.

516. The health of the child population in the Czech Republic is not improving considerably, despite the good level of health care for this population group. No decline of sickness rates of children and juveniles is apparent, and the number of those treated is not declining (the number of congenital developmental defects and allergic illnesses, including bronchial asthma, is climbing, the increase of nervous system diseases, mental retardation and serious behavioural disorders is continuing). We consider the most serious causes of this to be the polluted environment, particularly in industrial urban areas and unhealthy way of life; the number of serious injuries to children is also increasing relatively.
517. Since 1990, the percentage of juveniles, and children, who have **experiences with drugs**, or are already addicted to them, has been increasing. Nicotine addiction and alcoholism are also increasing among young people. Young people aged 15 to 19 are in the high-risk population which most frequently experiments with illegal drugs. Epidemiological studies show that approximately one third of secondary school students already have experience (even if only once) with a non-alcohol drug. The average age of new problem users at the time of their first visit is 20.6, but of newly registered users, 12.7 percent confirmed that they had their first experience with a drug before reaching the age of 15; in the group aged up to 19 it was 74 percent<sup>306</sup>.
518. Co-ordination of access to treating the drug problem at the central government level is arranged by the Inter-Ministerial Drug Commission of the Government of the Czech Republic, headed by the prime minister, with members being the ministers of the Interior, Justice, Health, Education, Youth and Sport, and the Minister of Labour and Social Affairs. In February 1998 the Government approved an Outline and Program for Anti-drug Policy for 1998 to 2000<sup>307</sup>, which sets tasks for the individual ministries and local government and self-government bodies. Emphasis is laid not only on the methods and means of punishment, but also – especially among children and juveniles – on prevention. The anti-drug policy is financed through the appropriate ministries and their subsidy programs, and also from the budget chapter **General** Treasury Management through district and city offices, in special purpose subsidies. At the end of 1998, the database of treatment/contact centres registered a total of 237 facilities which reported contact with drug users as part of their activities. The total number of newly registered clients (without age differentiation) in 1998 was 3,858; in 1997 it was 726 fewer.
519. Statistics about hospitalisation and dispensary treatment tell the story of **rates of serious childhood and adolescent illness**. The proportion of child patients of the total number of hospitalisations in 1997 was 16.5 percent. 345 thousand hospitalisations were recorded (including newborns) from 0 to 14, which is 19 cases per 100 children. In the age group from 15 to 19, there were 90 thousand hospitalisation cases in 1997 (11 adolescents per 100 inhabitants).
520. The most frequent cause of hospitalisation among children aged 0 to 1 year are conditions which arose in the prenatal period (15% of hospitalisations in that age group), then respiratory tract illnesses (8%). In the groups aged 1 to 4 and 5 to 9 respiratory tract diseases are clearly the most frequent cause of hospitalisation (roughly 40% of hospitalisation), followed by injuries and poisonings (12%). Among children aged 10 to 14 injuries and poisonings are in first place (almost 20%). Diseases of the digestive tract are in

---

<sup>306</sup> Report on the situation and developments in drug matters in the Czech Republic for 1998, prepared by the Inter-ministerial Drug Commission on the basis of materials from the relevant ministries.

<sup>307</sup> Resolution of the Government of the Czech Republic of 23 February 1998 No. 111, on the Outline and Program of Anti-drug Policy for 1998 – 2000.

third place among all children. In adolescence the most frequent cause of hospitalisation is injuries.

521. Another source of information about sickness rates is dispensary treatment. Children are most frequently treated for diseases of the nervous system and sensory organs, primarily for visual disorders to blindness, followed by respiratory tract illnesses (primarily bronchial asthma), and diseases of the skin and subcutaneous tissue (primarily eczema). In third place among juveniles are illnesses of the muscular and skeletal system.
522. Development of diagnostic methods in the Czech Republic continues (for example, magnetic resonance imaging for child patients was started). Highly specialised centres are being created for treatment of children in cardiology, neurology, traumatology, perinatology and oncology. Considerable success was achieved in childhood transplants – transplants are being done of kidneys, the heart, even in small children, lungs and liver. The introduction of new treatments in oncology has led to a gradual decrease in deaths from malignant neoplasm in recent years. While in 1991 12 boys and 6 girls died (out of 100 thousand boys and girls), in 1996 it was 6 boys and 4 girls.
523. Health care for children and adolescents is paid from general public insurance in the extent specified by the Act on Public Health Insurance<sup>308</sup>. The state pays public health insurance for children and adolescents. In special children's facilities (infant institutions and orphanages up to three years of age) health care is paid out of the founder's budget.
524. Operations which cannot be performed domestically are, in exceptional cases, partially paid from the budget of the Ministry of Health. These are primarily transplants of organs and bone marrow in children and juveniles. In 1998 and 1999 over 19 million CZK was spent from the budget of the Ministry of Health for these purposes. Funds are also obtained for these operations by public collections of financial donations from natural persons and legal entities.
525. Certain **inoculations** are also paid from the budget. The extent and rules for compulsory inoculation are specified by a Decree on Inoculation against Contagious Diseases<sup>309</sup>. Payment of inoculation is done under the Act on Health Insurance.
526. The decree includes **compulsory regular inoculation** of children with a triple vaccine against diphtheria, tetanus and whooping cough, a triple vaccine against measles, rubella and mumps and a vaccine against contagious childhood polio and tuberculosis. The decree also distinguishes special inoculation, which is done for people who are exposed to higher risk of infection in their profession. This includes inoculation of health care workers against TB and viral hepatitis type B. The decree also distinguished extraordinary inoculations (e.g. against flu for medically vulnerable persons), inoculation with injuries (against tetanus), inoculation against rabies and inoculation before trips abroad (against malaria). The safety of inoculation materials used is given by the Act on Medicines<sup>310</sup>.
527. As of 30 June 1999 there was a total of 411 cases **of HIV** registered in the Czech Republic. In 124 of them fully-blown aids had been diagnosed as of that date, with 77 patients with AIDS the disease had already ended in death. As of the same date in the Czech Republic, there were 35 HIV positive cases among pregnant women, who gave birth to 25 children (in 1 case twins, in 9 cases the pregnancy was artificially terminated at the mother's request, in one case there was a spontaneous miscarriage). 19 children have already been

<sup>308</sup> Act No. 48/1997 Coll., on Public Health Insurance, as subsequently amended.

<sup>309</sup> Decree of the Ministry of Health CR No. 48/1991 Coll., on Inoculation against Contagious Diseases, as subsequently amended.

<sup>310</sup> Act No. 79/1997 Coll., on Medicines and Amending and Supplementing Certain Related Acts.

diagnosed HIV negative, another 5 had not yet, at that date, reached the age of two, when it is possible to determine the child's HIV status definitively, one child was found to be HIV positive.

528. In 1991 the Government approved the **National AIDS Prevention Program**<sup>311</sup>, which was also the basis for the medium term plan for handling the HIV/AIDS problem in the CR, prepared for 1993 to 1997. Within the plan it was possible to achieve, among other things, arranging anonymous, free and easily available testing for HIV antidiodes in a wide network of sampling and testing locations, creating many local and one national AIDS help line and several AIDS advice bureaux. The proportion of non-state non-profit organisations in the program was increased, and health care education programs using contemporaries were started ("peer programs"), particularly for young people. The problem of prevention of sexually transmitted diseases and AIDS was included in educational outlines in effect. Programs of pre-graduate and post-graduate education of teacher on the HIV/AIDS program and sex education were also started in co-operation with the Ministry of Health, Education and Sport and non-government non-profit organisations.
529. At present the National Program for the Problem of HIV/AIDS in the Czech Republic in 1998 to 2002 is in effect. The main tasks of this program include:
- support of safer sex,
  - providing information on perinatal transmission of HIV,
  - arranging consulting for HIV positive women,
  - providing consulting about HIV prevention to all pregnant women, including offering an anti-HIV test,
  - a media campaign on the national and regional level, aimed at the general public, with the aim of achieving increased knowledge about the importance of safe sexual contact in HIV/AIDS prevention and a change in sexual behaviour, through the use of expert articles, discussions, educational events, television, and radio programs, etc.
530. **Protection of children against use of addictive substances.** Under § 218 of the Criminal Code<sup>17</sup> serving alcoholic beverages to persons under the age of 18 is punishable. § 4 par. 1 of the Act on Protection from Alcoholism and Other Toxin Addictions<sup>312</sup>, forbids selling or serving alcoholic beverages or otherwise making their consumption possible to persons under 18. It also forbids selling tobacco products to persons under the age of 16. Under § 4 par. 3 of this Act, territorial state government authorities may, in their territorial districts, restrict or forbid the sale in store of addictive substances or products containing them to persons under the age of 18. Under § 5 of the Act, everyone who sells or serve alcoholic beverages is required to refuse to sell them to a person about whom there may be doubt that he meets the age requirement, unless that person proves it with an official document. Legal representatives of juveniles are also required to see to it that all these prohibitions are observed.

---

<sup>311</sup> Resolution of the Government of the Czech Republic of 20 February 1991 No. 47, the National AIDS Prevention Program.

<sup>312</sup> Act No. 37/1989 Coll., on Protection from Alcoholism and Other Toxin Addictions, as subsequently amended.

***b) The improvement of all aspects of environmental and industrial hygiene;***

531. Living conditions include primarily the state of the environment, which is defined by the quality or cleanness of those components of the environment which are fundamentally important for an individual's life: air and water, nature and the countryside. The right to a favourable environment is guaranteed by Article 35 of the Charter:

*(1) Everyone has the right to a favourable environment.*

*(2) Everyone has the right to timely and complete information about the state of the environment and natural resources.*

*(3) No one may, in exercising his/her rights, endanger or cause damage to the environment, natural resources, the wealth of natural species, or cultural monuments beyond the extent designated by law.*

532. The right to information about the environment is regulated in detail by the Act of the same name<sup>313</sup>, which also charges the Ministry of the Environment and the Ministry of Education, Youth and Sports to co-operate in information, education and training for protection of the environment. Therefore, in December 1999 the ministries concluded a bilateral agreement which governs the division of jurisdiction in this area<sup>314</sup>. The Ministry of the Environment co-ordinates work in preparation of the "State Program of Environmental Information, Education and Training the Czech Republic", which it will submit to the Government by the end of 2000. The document will be connected to the "State Environmental Policy"<sup>315</sup> and the "Combined Ministry Outline for Information, Education and Informing the Public about Environmental Matters", with the important appendix, "Overview of Ensuring Environmental Information, Education and Training in European Union countries and in Certain Other Countries"<sup>316</sup>.

533. **Water protection** is ensured by the Water Act<sup>317</sup>. In particular, this means the provisions of part three of the Act, *Water Protection*, which regulate territorial protection of water using areas of natural water accumulation, protective zones of water sources and **waterways used for drinking water** and their **river basins**. This part also regulates the quality of surface and underground waters and supplying the population with drinking water. A new Water Act is now being prepared; a draft is to be submitted to the Government in the first quarter of 2000. In 1999 the Government adopted a new Decree No. 82/1999 Coll., to implement the Water Act, which sets indicators and values of allowable levels of water pollution.

<sup>313</sup> Act No. 123/1998 Coll., on the Right to Information about the Environment.

<sup>314</sup> Inter-ministerial Agreement on Co-operation in Environmental Information, Education and Training between the Ministry of Education, Youth and Sports and the Ministry of the Environment, signed by the ministers on 8 December 1999.

<sup>315</sup> Government Resolution of 14 April 1999 No. 323, on State Environmental Policy.

<sup>316</sup> These documents are available in full text versions on the web page of the Ministry of the Environment.

<sup>317</sup> Act No. 138/1973 Coll., on Waters (the Water Act), as subsequently amended.

## Public water supply systems and public sewerage systems (data in %)

	1990	1994	1995	1996	1997	1998
Percentage of population supplied with drinking water from public water-supply systems	83.2	85.5	85.8	86.0	86.0	86.2
Percentage of population living in buildings connected to public sewerage systems	72.6	73.0	73.2	73.3	73.5	74.4
Percentage of waste water treated	72.6	82.2	89.5	90.3	90.9	91.3

Source: Statistical Yearbook of the CR, 1999

534. **Protection of the air** is ensured primarily by the Air Act<sup>318</sup> and the Act on Protection of the Earth's Ozone Layer<sup>319</sup>. In terms of protecting the population from disproportionately polluted air, particularly important provisions are those setting the allowable level of pollution through immission, emission and deposit limits under § 14 of the Air Act, special protection of the air through areas requiring special protection of the air under § 15 of the Air Act and measures on addressing a smog situation under § 16 of the Act. These provisions of the Act are implemented by the following regulations:

- a) the Decree of the Ministry of the Environment, which Defines Areas Requiring Special Protection of the Air and Sets Principles for Creating and Operating Smog Regulation Systems and Certain Other Measures for Air Protection<sup>320</sup>;
- b) the Measure of the Federal Committee for the Environment on the Act on Protection of the Air from Polluting Substances<sup>321</sup>.

535. The Ministry of the Environment is preparing a new Act on Protection of the Air and the Earth's Ozone Layer. It will submit a draft substantive outline to the Government in the first quarter of 2000, the Act is to be submitted to the Government and go into effect during the second half of 2001.

536. The prepared Act on Integrated Prevention and Limitation of Pollution, which will be in accordance with European Community law, will also be important for air protection. Together with the prepared Act on Protection of the Air and the Earth's Ozone Layer, it will newly address the issue of air pollution by large industrial companies. The Minister of the Environment will submit a draft substantive outline to the Government in the second quarter of 2000.

537. **Protection of nature and the countryside**, i.e. protection of the gene fund of animals living in the wild and wild plants, as well as the ecological balance of the countryside as a natural whole are ensured by the Act on Protection of Nature and the Countryside and the implementing decree to this Act<sup>322</sup>. These legal regulations are now being evaluated in terms of their compatibility with European Union law, and the Ministry of the

<sup>318</sup> Act No. 389/1991 Coll., on Protection of the Air from Pollutants (the Air Act), as subsequently amended.

<sup>319</sup> Act No. 86/1995 Coll., on protection of the Earth's Ozone Layer.

<sup>320</sup> Decree of the Ministry of the Environment No. 41/1992 Coll., which Defines Areas Requiring Special Protection of the Air and Sets Principles for the Creation and Operation of Smog Regulation Systems and Certain Other Measures for Air Protection, as subsequently amended.

<sup>321</sup> Measure of the Federal Committee for the Environment No. 33/1991 Coll., concerning Act No. 309/1991 Coll., on Protection of the Air from Pollutants, as subsequently amended.

<sup>322</sup> Act No. 114/1992 Coll., on Protection of Nature and the Countryside, as subsequently amended, and implementing Decree of the Ministry of the Environment of the Czech Republic No. 395/1992 Coll., implementing certain provisions of Act No. 114/1992 Coll., on Protection of Nature and the Countryside, as subsequently amended.

Environment is preparing related amendments to them, as was also provided by the State Program for Protection of Nature and the Countryside in the Czech Republic<sup>323</sup>.

538. The document “Transportation Policy of the Czech Republic”<sup>324</sup> sets a primary goal of ensuring stabilisation and gradually decreasing the negative effects of transportation and traffic on the environment. This will lead to increased protection of the population and ecosystems, to minimising use of natural resources and fossil fuels, together with meeting demands for safety and higher mobility of people. Development of transportation environmentally friendly transportation systems will also be supported (those decreasing energy consumption, limiting production of air polluting emissions and the noise level, with lower requirements for use of land and with lower risks of contaminating water and soil). This means supporting public and integrated transportation, mass and combined freight transportation, environmentally friendly transportation systems, modernisation of automobiles, tightening emission standards, developing transportation infrastructure – particularly by-pass roads around cities and municipalities, improving fuel quality, etc..
539. Preparation of an Act on Treatment of Genetically modified Organisms and Products, which will regulate a problem not as yet addressed by the Czech legal system, is also important for protection of human health. The Minister of the Environment submitted a draft to the Government of the Czech Republic in November 1999.
540. Significant elements affect the quality of the environment are **waste treatment methods** and methods for liquidating them and pollution protection, particularly by large industrial facilities.
541. Limiting the production of wastes and their treatment methods are addressed by the Act on Wastes<sup>325</sup>. The Act also addresses the issue of dangerous wastes and for now also the issue of wrappers and waste from wrappers. Everyone’s basic duties, under § 3 of this Act, include preventing the creation of waste and limiting its amount and dangerous qualities. The Act sets forth rules under which waste can be handled (used, rendered harmless, treated, stored, transported, sorted, etc.). In 1999 the Government issued an implementing decree to this Act which sets forth a list of products and wrappers to which a duty of return applies, and details of handling the wrappers, wrapping materials and waste from used products and wrappers<sup>326</sup>. Enforcing producer’s duties to sort produced waste is still problematic.
542. The Ministry of the Environment is preparing a new Act on Waste, which it will submit to the Government, under the legislative work plan, in the second quarter of 2000; it is also preparing an Act on Wrappers and Wrapper Waste, which will be submitted to the Government in 2001. Both Acts are expected to go into effect as of 2002.
543. In terms of limiting the negative effects of certain activities (large industrial facilities, etc.) on the environment, the **Act on Evaluation of Effects on the Environment**<sup>327</sup> is fundamentally important. The new Act on Evaluation of Environmental Impact, which

---

<sup>323</sup> Government Resolution of 17 June 1998 No. 415, the State Program for Protection of Nature and the Countryside in the Czech Republic.

<sup>324</sup> Approved by Government Resolution of 17 June 1998 No. 413, on the Transportation Policy of the Czech Republic.

<sup>325</sup> Act No. 125/1997 Coll., on Wastes, as amended by Act No. 167/1998 Coll.

<sup>326</sup> Government Decree No. 31/1999 Coll., which Sets Forth a List of Products and Wrappers to which a Duty of Return Applies, and Details of Handling Wrappers, Wrapping Materials and Wastes from Used Products and Wrappers.

<sup>327</sup> Act No. 244/1992 Coll., on Evaluation of Environmental Impact.

the Minister of the Environment submitted to the Government for discussion at the end of 1999, will probably go into effect in mid 2000. This Act should be fully in accordance with European Community law, as well as the **Convention on Access to Information, on Public Participation in Decision Making and on Legal Protection in Environmental Matters** (known as the Aarhus Convention), which the Czech Republic is preparing to ratify in 2000.

544. In terms of effects on the environment, it will undoubtedly be important to monitor the actual results of a specific project (e.g. a large industrial facility) on the environment, which is expected by the draft of the new Act. The Ministry of the Environment is also preparing a draft of a new Act on Integrated Prevention and Limiting Pollution, the purpose of which is to limit pollution caused by manufacturing activities and which will be fundamentally important in bring into operation and inspection the operation of various manufacturing facilities (industrial and agricultural). An operating permit, issued for a definite period of time, should be based primarily on the best available technology and observance of set emissions limits.
545. All subsystems of the countryside in question are also significantly affected **during mining**. These negative effects are being fought by the organisation of mining industry on the basis of the Mining Act<sup>328</sup>, and clean-up and recultivation programs. Land harmed by the results of mining activities is thus being returned and reincorporated into the countryside.
546. Entire territories devastated by mining are thus systematically transformed through recultivation into new fields, fruit orchards, forest growth and parks, new waterways and reservoirs and recreational areas. In addition to the mining companies' own funds (which are spent for clean-up and recultivation by law), the state participates in this technically, time and financially demanding activity through non-investment subsidies from the state budget . From 1994 to 1996 the state provided 2,585 million CZK from its budget for liquidation of older impairment of the landscape; in the same period mining companies spent 1,560 million CZK on clean-up and recultivation.
547. In the course of preparation for acceptance into the European Union the Czech Republic must considerably change existing legal regulations in the area of the environment and adapt the current system of protection to the Union's requirements. Investments for making these changes are estimated at 250 billion CZK. For these reasons, the Czech Republic will probably request, in seven environmental cases, several transitional periods, postponements for fulfilling European Union membership obligations, including after the expected date of acceptance as a member in 2003: in protection of water, handling of waste, industrial pollution and protection of nature<sup>329</sup>.
548. The European commission sees an important shortcoming in the still missing new Act on Waste, on Protection of Water and Evaluation of the Environmental Effects of Construction. The Ministry of the Environment is still preparing the first two laws (it should submit them to the Government in 2000), the Draft Act on evaluating

---

<sup>328</sup> Act No. 44/1988 Coll., on Use of Mineral Wealth (the Mining Act), as subsequently amended.

<sup>329</sup> The European Commission Report of 1999 on the Czech Republic's progress in accepting ecological standards states that, despite deviations in detail, the laws on the environment and industrial hygiene in the country qualitatively match European Community standards. On the other hand, the European Commission criticises the slow acceptance of other necessary norms, and particularly slowness in creating institutions which promote observance of the laws and appropriate penalise violation of the laws. The report also states that correction of this situation will be very demanding financially, primarily in terms of public funds. Harmonising legislation and creating the necessary institutional framework is to be completed by the date of the expected entry into the European Union, i.e. as of 1 January 2003.

environmental effects is being discussed by the Chamber of Deputies of Parliament and it should go into effect in the second half of 2000.

549. Therefore, requests for postponement of fulfilling membership obligations will concern the fact that:

- a) not all municipalities with over two thousand residents will have a wastewater cleaning facility,
- b) the country will not recycle a sufficient amount of waste,
- c) water running from agricultural areas will have too many nitrates,
- d) the country will not have time to re-register the European network of protected territories according to Union criteria,
- e) companies will not meet the requirement of using available technology which is the most protective of the environment ,
- f) companies will not meet limits for release of pollutants (e.g. heavy metals) into rivers,
- g) in some cases the stricter limits for consumer drinking water will not be observed for two chemicals (lead, 1,2-dichlorethan).

#### **Expenditures for the environment from public sources** (in bn CZK, current prices)

550. The Czech Republic made progress in 1997 by passing the Act **on peaceful use of atomic energy** and ionising radiation (the Atomic Act)<sup>330</sup>. This Act is the legislative framework for safe operation of nuclear facilities and sets an administrative body responsible for safe handling of radioactive wastes – the Administration of Radioactive Waste Storage Sites. The state, through the Ministry of Industry and Trade, financially arranges the collection, liquidation and storage of radioactive wastes from health care facilities, scientific institutions and industrial companies ( institutional radioactive wastes). To increase the safety of nuclear power plants, the state also, through the Ministry of Industry and Trade, finances research tasks, and finances work in state emergency preparation in the event of a nuclear accident. The largest proportion of state financial participation is in removing ecological damage after uranium mining. Subsidies are provided to the state company Diamo. Ensuring nuclear safety and radiation protection of nuclear facilities when they are made operational and during their operation is regulated by Decree of the State Office for Nuclear Safety, No. 106/1998 Coll.

551. The Ministry of Health, in the Internal Grant Agency, supports research aimed at living conditions, epidemic diseases, and health systems which address creating optimum conditions for ensuring medical assistance and care. From analysis of results of completed projects in 1993 to 1996, eight projects on the environment were implemented and 736 thousand CZK spent. However, projects on the theme of the environment, often also reach into other priority areas, particularly the project “Healthy Cities” (13 projects in 1998). These comprehensive programs address the environment and health, usually together with the themes of exercise, stress, healthy schools and disease prevention.

<sup>330</sup> Act No. 18/1997 Coll. on Peaceful Use of Atomic Energy and Ionising Radiation (the Atomic Act).

552. The Ministry of Health, in co-operation with other ministries, particularly the Ministry of the Environment and the Ministry of Agriculture, prepared the document “**Action Plan for Health and the Environment of the CR**”, which the Government approved in December 1998<sup>331</sup>. This document expresses the agreement of the ministries in addressing problems of health and the environment, and is considered a component of health policy in expert guidance of care for a healthy environment and the health of the population. It is closely related to other documents approved by the Government, particularly the State Policy for the Environment and the National Health Program.

553. In April 1999 the Government established the Council for Health and the Environment<sup>332</sup>, in which all the materially relevant ministries are represented, and which provides substantive assistance in creating conditions for improving the environment and the health of the population.

554. The Ministry of Health also arranges monitoring of the health of the population in relation to the environment, through the long-term program “System for Monitoring the Health of the Population in Relation to the Environment”<sup>333</sup>. The purpose of the program is to obtain information on an on-going basis for creating a state health policy and protection of the environment at all levels of state administration, creating prerequisites for the appropriate legislative measures and for setting purposeful corrections of limits for substances which pollute the environment.

555. In 30 selected cities, the following are regularly evaluated (not all subsystems are evaluated in all 30 cities):

- health consequences and risks of polluted air, polluted drinking water, and the disturbing effects of noise,
- health consequences of burdens on the human organism from non-digestible substances from the food changes (dietary exposure),
- health consequences of exposing the human organism to toxic substances from the external environment (biological monitoring),
- the health of the population and selected indicators of demographic and health statistics.

Results of the monitoring are published annual, both in a summary report and in detailed specialised reports.

---

<sup>331</sup> Resolution of the Government of the Czech Republic of 9 December 1998 No. 810, on the Action plan for Health and the Environment.

<sup>332</sup> Resolution of the Government of the Czech Republic of 7 April 1999 No. 296, on the Council for Health and the Environment (statute, composition and activity plan).

<sup>333</sup> The program was approved by Resolution of the Government of the Czech Republic of 2 October 1991 No. 369, on the draft System for Monitoring the Health of the Population in Relation to the Environment.

***c) The prevention, treatment and control of epidemic, endemic, occupational and other diseases;***

556. The right to protection of health is generally guaranteed by the already cited Article 31 of the Charter. This right is also ensured by the Act on Public Health<sup>334</sup> in connection to other regulations, particularly the Act on Public Health Insurance. Basic requirements for protection from occupational illness are contained in the Decree on Creation and Protection of Health Living Conditions<sup>335</sup>. Protection of health in work where factors are present which could cause diseases by occupation (e.g. noise, vibration, dust, chemical substances, carcinogens, ionising and non-ionising radiation, excessive heat) are governed by a number of special regulations. A compulsory component of measures for protection from occupational illness are preventive medical examinations of employees who perform work with a risk of occupation illness. A list of diseases recognised as occupational illnesses was set by Government regulation<sup>336</sup> in 1995. This list has 83 items.
557. Prevention of contagious diseases is ensured primarily by the Decree on Inoculation against Contagious Diseases<sup>337</sup> and the Decree on Measures Concerning Contagious Diseases<sup>338</sup>.
558. The epidemiological situation in the Czech Republic is monitored by the health service, which is established by the Ministry of Health. An obligation to report infectious illness is set by the above-mentioned Decree on Measures against Contagious Diseases. The health service orders certain appropriate anti-epidemic measures according to the seriousness of the situation. The State Health Care Institute monitors the number of incidences.
559. The incidence of infections against which compulsory inoculation paid by the state is performed is based on the inoculation level, which is over 98 percent. Thanks to inoculation childhood polio and diphtheria have been practically eliminated in the Czech Republic and whooping cough, tetanus, measles, mumps and rubella have been considerably reduced to isolated cases, which are generally cured.
560. General inoculation of the population also improved the situation with infectious diseases, although infection remains a potential risk. In 1997, 1,834 cases of TB were reported in the TB register. Therefore, in that year, compulsory inoculation of newborns against TB was renewed. In the 90s a new increase of salmonella was recorded; in the large majority of cases it appeared due to breached hygiene regulations during food preparation. The AIDS reference laboratories registered 402 HIV positive persons as of 30 April 1999. AIDS was proven in 123 person, 79 of whom died.

***d) The creation of conditions which would assure to all medical service and medical attention in the event of sickness.***

561. After 1990, unlike most post-communist countries and despite the incomplete transformation process of the health care system, the main statistical indicators of health have been changing positively. As stated above, the life expectancy at birth is increasing, total mortality is decreasing, particularly mortality from cardiovascular illness. These positive trends are sufficiently distinctive, that if they continued, it would be possible within roughly 15 to 20 years to reach the average values of European Union countries in these fundamental health parameters. The value of infant mortality of 5.9 per mill, achieved in 1997, is already comparable to the values of developed Union countries.

### Accessibility of medical care

562. The Constitution the Czech Republic and other legal regulations establish the citizen's right to health care. Access to health care is ensured by a network of health care facilities. State administration authorities are required to ensure accessibility of care in urgent cases within 15 minutes. In addition, the Act on Health Care indicates the obligation of health care workers to provide first aid and also the fact that in cases where a health care facility provides urgent care to an insured person, the health insurance company will pay for it even if the health care facility does not have an agreement with the health insurance company.

563. The network of health care facilities currently consists of hospitals, expert treatment institutes, spa treatment centres, sanatoriums and recuperation centres, polyclinics and associated ambulatory facilities, health care centres, independent doctor's offices, independent laboratories, infant institutions and children's homes, children's centres and

day clinics, nursery schools, pharmacy care facilities, the health services and other health care facilities.

564. Health care facilities in the CR are divided into state facilities, which are established by the Ministry of Health, certain ministries (Defence, the Interior, Transport and Justice) or district offices, and non-state, which include municipal or city health care facilities, private facilities, church facilities, and facilities established by non-government organisations. The total number of health care facilities in 1998 was roughly 24,500, of which approximately 20 thousand were non-state, comprising predominantly the practice of ambulatory physicians.

**A. Government health establishments** (number as of 31 December of each year)

physicians (in thousands)	18,049	20,831	21,823	22,207	22,566

Source: Statistical Yearbook of the CR, 1999

565. Bed care was provided in the Czech Republic in 1998 by a total of 216 hospitals with 69,900 beds, 167 specialised treatment institutions with a total of 22 thousand beds and 53 spa treatment centres with a total of 19,950 beds. Compared to 1994 bed capacity

declined by 14 percent. In aggregate, there were 109 beds per 10 thousand people. There were 10 beds per 1 physician in all in-patient facilities.

566. Specialised ambulatory care consists of two networks of health care facilities. The first network consists of 4,910 independent, mostly private doctor's offices, with almost 6 thousand specialised ambulatory physicians and over 13 thousand nurses. The second network consists of the ambulatory departments of 215 hospitals, with 5,600 physicians and over 26,300 nurses and intermediate health care personnel.
567. The system of primary care consists of a network of general practitioners physicians for adults, general practitioners for children and juveniles, ambulatory gynaecologists and dentists. In 1998 there were 4,800 general practitioners for adults registered in the Czech Republic, thus one for every 1,800 people over the age of fifteen. 95 percent of general practitioners for adults worked in the non-state sector. As of the same date, a total of 2 200 general practitioners for children and juveniles were registered (96% in the non-government sector), one for every 1,100 to 1,200 children. There were a total of 1,060 ambulatory physicians – gynaecologists in mid 1998 (97% in the non-state sector), with 5,100 to 5,200 women per physician. There were 4,840 dentists (98% in the non-state sector), which represented 1,800 people per one dentist.
568. In 1997 there were a total of 3.5 physicians, including dentists, per thousand people. In comparison with some European Union countries, the Czech Republic has relatively high values of this quantitative indicator. The number of beds roughly corresponds to European Union indicators, but their structure is different. In the Czech Republic there are relatively more general purpose beds and fewer beds for recovery and chronic conditions. The total number of beds in all health care facilities is 12.1 per thousand inhabitants. The data on acute beds is around 6.9 beds per thousand people. Germany has 6.9 beds and France 4.7 beds; on the other hand Great Britain has only 2.0 and Norway 3.1 beds per thousand people. However, a typical feature of health care in the Czech Republic is a longer hospitalisation period, and a high number of contacts with patients in primary and specialised ambulatory care.
569. Citizens' access to health and security services is made easier by free phone calls (including from public pay phones) to shortened emergency numbers from anywhere in the Czech Republic. To make communication of the handicapped with their surroundings easier, there is a special lower telephone rate. So far, however, the problem of adjusting telephone rate advantages in the on-going and expected price increases for telecommunication services has not been resolved. Also, providing telecommunications access for population groups with special social needs (single elderly people, the long-term unemployed, etc.) has also not yet been resolved.

### **Health policy aims for improving the existing level of health care**

570. To improve health care for the population and its accessibility, it is necessary to:
- a) solve the financial deficit of Czech health care, reflected in the activities of health care facilities, insurance companies, and the pay of health care workers,
  - b) create a network of health care facilities, particularly with regard to the creation of higher territorial administrative units and the volume of financial resources used (accessibility and connect through the levels of health care, balance between fields and the number of contracted physicians in relation to normative numbers, stabilisation of the network of ambulatory and specialised health care facilities in accordance with

concepts of individual medical fields, standardisation of equipment for various kinds of health care facilities, etc.),

- c) harmonise health care legislation concerning the health of citizens, with European Union law (including citizens' right to view and make copies of the health care documentation which physicians keep about them)
- d) Shift the focus of care to prevention and primary care, while simultaneously strengthening the efficiency of the entire health care system,
- e) improve solve communication between the Government, representative bodies, the ministry, associations of patient representatives and the citizen, and between various interest and professional groups of health care workers and citizens/patients,
- f) complete resolution of the structure of jurisdiction in bodies of state administration and local administration in relation to higher territorial administrative units,
- g) introduce a system for monitoring and evaluation the quality of care,
- h) prepare and introduce a system of accreditation for health care facilities,
- i) create a corresponding information system,
- j) decrease neglect of buildings and balance out the level of technical equipment of facilities in the network, including construction, including meeting requirements of the Atomic Act in the conditions of health care facilities.

### ARTICLE 13

***1. The States Parties to the present Covenant recognise the right of everyone to education. They agree that education shall be directed to the full development of the human personality and the sense of its dignity, and shall strengthen the respect for human rights and fundamental freedoms. They further agree that education shall enable all persons to participate effectively in a free society, promote understanding, tolerance and friendship among all nations and all racial, ethnic or religious groups, and further the activities of the United Nations for the maintenance of peace.***

571. Everyone's right to an education is guaranteed by Article 33 of the Charter: *Everyone has the right to education. School attendance shall be obligatory for the period specified by law. Citizens have the right to free elementary and secondary school education, and, depending on particular citizens' ability and the capability of society, also to university-level education. Private schools may be established and instruction provided there only under conditions set by law; education may be provided at such schools in exchange for tuition. The conditions under which citizens have the right to assistance from the state during their studies shall be set by law.*

572. Upbringing and education provided by elementary and secondary schools is also governed by the Schools Act<sup>339</sup> (the right to education and schools to which this right applies are set forth in §§ 1 to 4 of the Act) and related decrees<sup>339</sup>. Components of the upbringing and education system are elementary schools, secondary schools, special schools and higher vocational schools, if included in the schools network.

<sup>339</sup> E.g Decree of the Ministry of Education, Youth and Sports No. 291/1991 Coll., on Elementary School, and Decree No. 354/1993 Coll., on Secondary Schools, as subsequently amended.

## Kindergartens

573. Kindergartens serve as a supplement to family upbringing, and ensure pre-school upbringing of children generally between the ages of three and six. Attendance is not compulsory, and is decided by a child's parents. Kindergartens help considerably to balance out the differences between children caused by different cultural and social foundations in families.

574. Children generally attend kindergartens between the ages of three and six. In justified cases, younger children can be accepted to kindergartens. Older children whose compulsory school attendance has been postponed also remain in them; postponing compulsory school attendance is increasingly frequent; in 1993 to 1999 the proportion of children who enter elementary schools as seven year olds was around 20 percent. Kindergarten attendance is not compulsory, although from time to time consideration is given to introducing compulsory pre-school education for children in the last year before compulsory education. Nonetheless, attendance at kindergartens is high, particularly among children aged 5 and higher. Pre-school attendance eases their transition to elementary schools.

### Number of kindergartens and children placed in them (in thousands)

	89/90	90/91	91/92	92/93	93/94	94/95	95/96	96/97	97/98
School	7,328	7,335	6,972	6,827	6,599	6,526	6,474	6,344	6,152
Children	395.2	352.1	323.3	325.7	331.5	338.1	333.4	317.2	307.5

Source: Institution for Information in Education

575. Declining numbers of children in kindergartens is marked primarily in the period until 1991, when a changed attitude to kindergarten appeared, related to extended maternity leave and the gradually changing model of the family, where the mother stays at home even after maternity leave and continues to raise her children herself. The declining demographic trend also played a role, and is the main cause of the decline number of children in kindergartens in the recent period. Compared to 1989 there was a 22 percent decline in children in kindergartens. However, despite the declining number of children in maternity schools, they are still attended by 88 percent of all pre-school age children, and the role of kindergartens in raising children is irreplaceable. The number of nursery schools declined from the 1989/90 school year to the 99/2000 year by 1,176, or 16 percent.

576. Since 1990/91, handicapped children have also been accepted into kindergartens. These children can be integrated among healthy children, or special and specialised classes can be chosen<sup>340</sup>. In 1997/98 the number of thus integrated children exceeded 7.2 thousand, three thousand of whom were integrated directly into regular classes. The most frequent handicaps were speech defects and combinations of several handicaps.

### **Elementary schools**

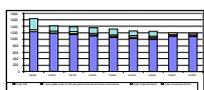

577. Elementary schools provide education to children usually aged six to fifteen. Nine years of school are compulsory by law. Talented pupils can go from the lower grades of elementary schools to multi-year grammar schools<sup>341</sup> and to dance conservatories, and finish the last four years of compulsory education there.

---

<sup>340</sup> Special classes are for hearing, visually, physically or mentally disabled children, for children with speech defects and with multiple disabilities. Specialised classes are for children with specific, behavioural and learning development disorders, (see Decree of the Ministry of Education, Youth and Sports No. 127/1997 Coll., on Special Schools and Special Kindergartens).

<sup>341</sup> After fifth grade of elementary school to an eight-year grammar school and after seventh grade to a six-year grammar school.

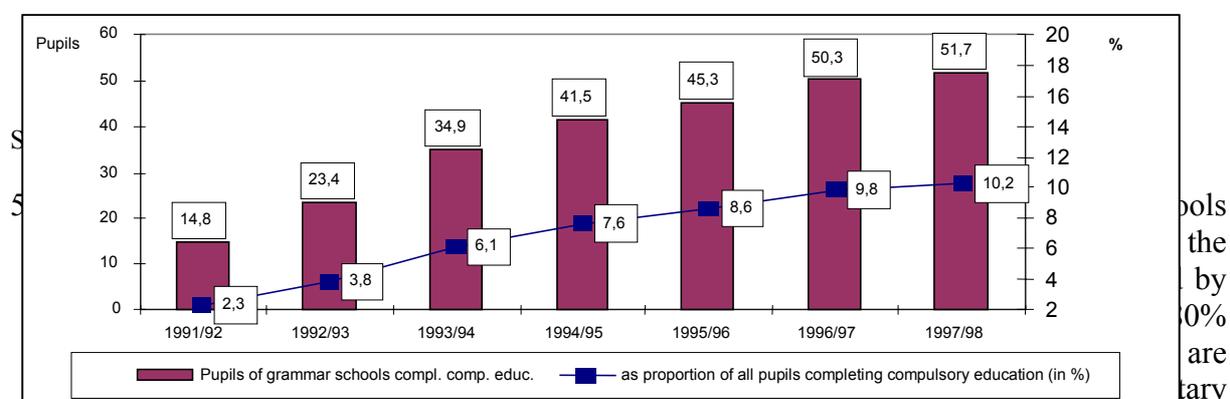

**Number of pupils aged 6-15, who are completing compulsory education at elementary, secondary, and special schools (in thousands)**

Source: Institution for Information in Education

578. The relatively rapid decline in the total number of pupils in elementary schools is a reflection of demographic development. An important factor in the decline in the 2<sup>nd</sup> level of elementary education (grades 6 to 9) is, in addition to demographic developments, increasing interest in studies at multi-year grammar schools.

**Number of students completing compulsory education in multi-year grammar schools (in thousands) and their percentage in total number of pupils completing compulsory education**

school pupils. These schools facilitate school attendance of children in small and remote municipalities, and help renew the tradition of schools as one of the natural centres of municipal life. Opinions about the quality of teaching at incompletely organised schools vary; more than elsewhere, it depends on the abilities of the teacher.

**Number of elementary schools in 1989/90-1997/98**

	89/90	90/91	91/92	92/93	93/94	94/95	95/96	96/97	97/98
<b>Elementary schools total</b>	3,904	3,958	4,064	4,142	4,199	4,216	4,212	4,166	4,132
Of that :									
with only the 1 <sup>st</sup> level	1,455	1,496	1,560	1,647	1,677	1,710	1,712	1,672	1,638
with only the 2 <sup>nd</sup> level	3	5	7	5	9	8	9	4	5
with both levels	2,446	2,497	2,497	2,490	2,513	2,498	2,491	2,490	2,489
Of that, with few grades	1,118	1,118	1,242	1,378	1,300	1,349	1,399	1,463	1,482

Source: Institution for Information in Education

580. The percentage of non-government schools, i.e. private and parochial schools, is relatively low at the elementary school level. In the 1997/98 school year there were only 32 private and 19 parochial schools in the elementary school network, which is 1.2 % of

<sup>342</sup> Schools with few grades are schools where several classes are taught in one classroom. Incompletely organised schools do not have all grades, but each of them has its own classroom. Usually schools with only the first level are created, schools with only the second level are rare.

all elementary schools; This ratio has been stable for several years. The percentage of students in non-government schools to the number of all elementary school students is also stable – under 0.5 %. The dense network of public elementary schools and their tradition is the most significant limiting factor for the development of non-government elementary schools. In addition, the decline in the population and the drain of students to multi-year grammar schools also narrows the space for non-government organisers of schools. They devote themselves primarily to areas which are unique in a certain way: for example, to children disabled with light brain dysfunction, children from an environment different from the standard family type, or children who, for psychological or social reasons are not able to adapt to conditions in standard elementary schools. An example is the Přemysl Pitter Parochial Elementary School in Ostrava, which focuses on Romani children.

581. Students who completed compulsory education in elementary school at a lower level than ninth grade or did not complete ninth grade successfully can receive expert preparation for an occupation at a trade school, which provides training in manual skills in non-demanding fields. Preparation in them ends by completing a closing exam. Supplementing uncompleted elementary education (including special education) is theoretically possible through courses which one school in a district is always authorised to offer. The opportunity to attend these courses is, however, subject to successfully completing an application process (see also par. 632 to 636 of the report). Persons who do not complete elementary education continue to be disadvantage both in the opportunity to complete re-qualification courses and in the labour market generally.

## Secondary schools

582. Most of those who complete compulsory education continue their education at a secondary school; going directly into the labour force tends to be an exception. Groups of young people with a low education level are exposed to the greatest risks in the labour market. Secondary schools provide knowledge and skills necessary for application in a selected profession or further studies. Secondary education generally begins at the age of fifteen and continues, depending on the type of study, two to six years. Secondary schools are divided into secondary vocational schools, grammar schools and secondary occupational schools.

583. Secondary vocational schools prepare students for manual labour occupations and specialised activities. Studies are completed with a closing exam. A grammar school is a universal education school, which prepares students primarily for study at post-secondary occupation schools or universities. Studies last four, six or eight years, and are usually completed with a graduation certificate (usually at the age of 19). Secondary occupational school prepares students for specialised activities, day studies last at most four years, and are completed with a certificate. A conservatory is a special kind of secondary occupational school which prepares students for the fields of singing, dance, music or the dramatic arts. It lasts six to eight years and is completed with a certificate.

### Number of secondary schools in 1993 to 1998 and the number of students in them (in thousands)

	1993/94		1994/95		1995/96		1996/97		1997/98	
	Sch.	Stu.								
Grammar schools <sup>1)</sup>	324	122	349	128	361	133	367	126	364	126
Secondary occupational	821	219	800	222	832	230	809	179	756	174

(technical) schools										
Integrated secondary schools	x	x	x	x	201	107	202	87	177	73

Note: 1) Including the eight and six year cycles  
Sch. - number of schools, Stu. - number of students

584. In the 1997/98 school year there were 499 secondary vocational schools in the Czech Republic, and 122 thousand students prepared for occupations in them. In the 1998/99 school year there were 614 secondary vocational schools with 150 thousand students. Approximately 40 percent of them were girls.

### Post-secondary occupational schools

585. Post-secondary occupational schools provide focused in-depth post-secondary occupational education and preparation. Studies last at least two, at most 3.5 years, and ends with a graduation certificate. Education at these schools can be provided for a fee, the amount and payment of which the Government sets by decree, if the school is established by the state, or a municipality by a generally binding directive, if the school is established by the municipality.

586. In 1996/97 there were 158 post-secondary occupational schools with almost 15 thousand students, a year later there were almost 24 thousand students studying at 154 schools. In the 1998/99 school year there were 166 post-secondary occupational schools with almost 30 thousand students in the Czech Republic. Approximately two thirds of students in the entire report period were girls.

### Universities

587. Universities offer the opportunity to acquire a university education and an academic title. University studies take place under an accredited study program – according to a study plan and a prescribed form of study. Studies are usually divided into two parts of three and two years. An additional at least three years are necessary to complete post-gradual studies. The number of universities - 23 – did not change from 1993 to 1998. However, the number of schools within universities increased from 105 in 1993/94 to 112 in 1998/99.

588. At the beginning of the report period, a total of 127 thousand students studied at Czech universities, and at the end of it over 174 thousand students (including foreign students). In the 1998/1999 school year, approximately 46 thousand students were accepted into the first years of universities (without post-gradual study programs), and about 12.5 thousand students into post-secondary occupational schools. Compared to the number of 18 year olds (150,644) this is 30.5 percent and 8.3 percent. This means that a total of 38.8 percent of 18 year olds were accepted. As in past years, roughly one half of applicants were accepted.

### Universities

School year	Univer- sities	Schools	Students total	Of that, in study programs			
				Day			Studying while working
				Czech citizens		Other <sup>1)</sup> citizenship	
				Total	Women		
90/91	24	82	118,194	96,379	42,850	3,122	18,693

93/94	23	105	127,137	109,471	48,137	3,614	14,052
94/95	23	106	129,453	115,888	50,840	2,871	10,694
95/96	23	110	139,774	123,460	54,670	2,885	13,429
96/97	23	111	155,868	136,763	60,555	3,266	15,839
97/98	23	112	165,754	145,097	64,794	3,381	17,276
98/99	23	112	174,229	151,719	69,200	3,693	18,817

Note: 1) Including those studying while working

589. In the second half of 1998 the new Act on Universities<sup>343</sup> went into effect. It responds to changes which Czech universities have undergone and which reflect world-wide developments. The primary one is extensive development of university education, evoked by increased interest in university studies. The basic problem lies in how to meet high demand and yet maintain the desirable quality of education. This requirements is met through adequate diversification of university education, i.e., in addition to five year study programs, creating a selection of professionally oriented, universally three-year study programs. Diversification of the university system is balanced by the institution of accreditation of all study programs, accreditation of universities' authority to conduct professorial appointment proceedings in a given field (for 2 levels: "docent" and professor). The institution of accreditation has been newly introduced in order to ensure quality in university education. The basic unit of university education is a study program: bachelor, master or post-gradual. The bachelor study program is aimed particularly at preparation for occupations which directly used the information and methods learned. Master study programs are aimed at acquiring deeper theoretical information, and a post-gradual study program is aimed at scholarly research and independent creative work.

<sup>343</sup> Act No. 111/1998 Coll., on Universities.

### Universities by subject groups in 1998/99 (only students with Czech citizenship)

Subject group	Students total	Of that, women	Graduates from previous school year	Of that, women
Universities total	170,536	79,699	25,960	12,934
Natural sciences	11,602	4,040	1,464	538
Technical sciences and disciplines	48,043	9,484	5,729	1,210
Agricultural-forestry and veterinary sciences and disciplines	9,700	5,005	1,416	597
Health care, medical and pharmaceutical sciences and disciplines	10,773	7,204	1,650	1,075
Social sciences, disciplines and services	86,401	51,787	15,033	9,114
Sciences and disciplines of arts	4,017	2,179	668	345

590. In 1998 the Act on Universities<sup>344</sup> created legislative conditions for the creation and operation of **private universities**. Under § 39 of this Act, a legal entity with its registered address in the Czech Republic is authorised to function as a private university if the Ministry of Education, Youth and Sports gives it government consent. Together with government consent, the ministry also awards accreditation to study programs.

591. Since January 1999 nine entities applied to the Ministry of Education, Youth and Sports for government consent to a private university, but only four of them met the specified requirements. These four private universities are of a non-university type, which means that they acquired the right to conduct post-secondary education in bachelor study programs and give their graduates the academic title of “bachelor”.

592. Private universities offer post-secondary education in bachelor study programs of primarily economic character (two of these schools offer studies in finance and management, one in hotel services). In their first year of operation, the private universities expect to admit roughly 550 to 600 applicants.

593. The access to education which private universities provide is based on the same principles as in public universities, and students in private universities have the same status as students in state universities (e.g. an entitlement to social support, health insurance, application in the job market). Tuition is from 26,400 to 66 thousand CZK per academic year.

594. One of the main aims of the education policy of the Government of the Czech Republic is to ensure, by 2005, an opportunity for half of the generation of 19 year olds a chance to enter some form of post-secondary education. This aim is connected to the decision to enable, in the same time, two thirds to three fourths of young people to obtain a certificate in secondary universal or occupational education.

<sup>344</sup> Act No. 111/1998 Coll., on Universities and Amending and Supplementing Other Acts (the Act on Universities).

## Schools for minority students

595. Minority students are guaranteed the right to education in their native language by § 3 of the Schools Act<sup>53</sup>. Minority education can be created up to the level of secondary schools. There are now schools with Polish as the language of instruction and one with Slovak as the language of instruction .
596. The Schools Act enables schools or classes to be formed to teach children of nationalities other than Czech in their native language, if their parents are citizens of the Czech Republic. However, the establishment and activities of these schools or classes generally always depend on the interest of the parents, who express this interest in a suitable way, generally through their civic associations. § 3 par 2 of the Schools Act<sup>53</sup> states: *Minority students are provided a right to education in their native language in an extent commensurate with their national development.* In the state education system, members of minorities have a right to free education in their native language.
597. In practice this right is met within the standard state school system (schools with the language of instruction of a given minority, schools which teach the minority language as an elective subject, separate classes with the language of instruction of a minority) or in bilingual schools.
598. At present, the Human Rights department of the Office of the Government is preparing a draft of a substantive outline of an Act on Minorities, which is to be submitted to the Government by the end of March 2000. This Act, based on existing constitutional guarantees of minority rights, will be in accordance with the **European Framework Convention on Protection of the Rights of National Minorities**, which the Czech Republic has already adopted, and with the **European Charter of Minority and Regional Languages**, for which the Czech government bodies have begun the ratification process. The new Schools Act is to set a limit of students, lower than that in schools with Czech as the language of instruction, at which the state will be required to establish a minority class, or at which it can dissolve such a class. The new Act on Protection of Minority Rights will govern the rights of members of minorities to use their language, development of their culture and to autonomy, with the help of which they will decide, or jointly decide on issues concerning minority culture, language and education.
599. In the Czech Republic, only in the case of the Polish minority, which is concentrated in the districts of Karviná and Frýdek-Místek, is education with Polish as the language of instruction fully developed. Method management, textbook publication and methodical aids for Polish schools are arranged by the Polish Pedagogical Centre in Český Těšín, established by the Ministry of Education, Youth and Sports.

## Schools and classes with Polish as the language of instruction in the 1998/99 school year

Type of school	Number of schools	Number of classes	Number of students
Kindergartens	-	38	590
Elementary schools	29	152	2,642
Secondary schools: in that	-	-	-
Grammar school	1	11	271
Business academy	-	-	91
Secondary technical school	-	-	73
Secondary health care school	-	-	51
Secondary agricultural school	-	-	16

600. In view of its high degree of assimilation and dispersed residence the Slovak minority does not have a clearly formulated educational program. From the past, there is only one elementary school in Karviná (attended by only about 50 students). In Prague the Ministry of Education, Youth and Sports created the conditions for opening a Slovak academic high school and to start teaching in the 1997/1998 school year. However, the program fell through due to lack of interest from the students or their parents. So far there is only one private Romani secondary social school in Kolín. Its aim is professional preparation of social workers from among the Roma, specialised in work with the Romani community; however, the language of instruction is Czech.

### Special schools

601. Physically and mentally handicapped students have an opportunity to receive education in elementary and secondary special schools. Under § 28 of the Schools Act<sup>53</sup> special schools *provide upbringing and education, through special upbringing and educational methods, means and forms, to students who have mental, sensory or physical handicaps, students with speech defects, students with multiple defects, students who are difficult to bring up and students who are ill and weakened, placed in health care facilities; they prepare these students to be included in the working process and the life of the society. Education in these schools is equal to education acquired in elementary schools and in other secondary schools.*

### Number of special schools in 1991/92-1997/98

	1993/94	1994/95	1995/96	1996/97	1997/98
<b>Number of institutions</b>	<b>979</b>	<b>975</b>	<b>1,027</b>	<b>1,002</b>	<b>986</b>
Kindergartens	235	240	253	263	259
Elementary and special schools, total	700	679	693	678	667
in that, special elementary schools	-	215	218	216	210
Special schools	-	464	475	462	457
Supplementary schools	118	127	93	151	153
Grammar schools and secondary occupational schools	70	89	106	122	139
Secondary vocational schools and vocational schools	127	111	148	156	158

Note: The number of institutions does not correspond to the sum of schools at individual levels, because special schools of various levels can operate within one institutions. Until the 1993/1994 school year elementary and special schools were not tracked separately.

602. Under the Schools Act<sup>53</sup> the **deaf and blind are ensured the right to an education in their language, using sign language or Braille.** Under the Act on Sign Language<sup>345</sup> the deaf have a right to use of sign language, education using sign language, and teaching of sign language. Non-hearing students of secondary and post-secondary schools, who were for reason of complete or virtually complete deafness given extraordinary benefits for the handicapped are provided interpreting services for free. Integration of these students into regular classes has been tested on an experimental basis since the 1990/91 school year at some elementary schools, but it always depends on the type and extent of the student's handicap and the schools opportunities to meet his/her particular needs<sup>346</sup>.

<sup>345</sup> Act No. 155/1998 Coll., on Sign Language and Amending Other Acts.

<sup>346</sup> Statistical monitored from the 1993/94 school year.

603. Integrating handicapped children among healthy children is very important for socialisation. However, integrating handicapped children is financially and technically demanding, and requires an individual approach by the teacher; hence integration of children is supported by amendments to financing rules. The number of children integrated into regular classes is increasing, and the number of children in special and specialised classes established in elementary schools is stagnating. Teachers and parents accepted integration of handicapped children into education in elementary schools; in addition, it had a positive effect on the work of special schools, who have more space left for care for children with more serious handicaps and more complicated defects.

**Number of children integrated into regular, special and specialised classes** (in thousands)

	1993/94	1994/95	1995/96	1996/97	1997/98
Integrated children, total	40.1	16.6	41.3	51.2	54.4
Integrated children in regular classes	30.4	5.5	30.4	38.8	42.2
Children in special and specialised classes	9.7	11.1	10.9	12.4	12.1

Source: Institution for Information in Education

604. On 1 September 1998 the Ministry of Education, Youth and Sports began, for a period of five school years, under § 58 of the Schools Act<sup>53</sup> experimental testing of different organisational forms of elementary education, so-called home education. In the 1998/99 school year the experiment was conducted in two elementary schools, and in three in 1999/2000. About 120 students currently make use of this education option. The ministry established conditions for the experimental testing in approval proceedings in 1998.

605. **Principles of education for mutual understanding**, tolerance and friendship between all nations and all racial, ethnic and religious groups, as well as support of peace efforts, are a component of educational materials in accordance with § 5 and § 7 of the Schools Act<sup>53</sup>.

606. Education for tolerance is also supported by the Act on Radio and Television Broadcasting<sup>347</sup>, which, in § 5, imposes on broadcasters the obligation to ensure that broadcast programs will not promote war or depict cruel or other inhuman behaviour in a manner which makes light of them, excuses or approves them. §§ 6 to 8 of the Act govern obligations in broadcasting advertising and sponsored programs: advertisements must be distinguishable and clearly separated from other programs, and broadcasters are required to ensure that the party ordering the advertisement can not in any way influence the contents of programs or the composition of the program service.

607. Evaluating the role of education in development of religious tolerance and understanding is the particular ministerial task of the appropriate state administration body, in the given case the Ministry of Education, Youth and Sports. The Ministry of Culture, as the body with substantively jurisdiction body for church matters does not monitor this area regularly.

608. A problem case was publication of the Handbook of Church History<sup>348</sup>, which was recommended by the Ministry of Education, Youth and Sports and evoked a negative reaction from part of the public, particularly Jewish communities and evangelists. As a result of this negative reaction, and re-evaluation of the publication's contents, in March

<sup>347</sup> Act No. 468/1991 Coll. on Radio and Television Broadcasting, as subsequently amended.

<sup>348</sup> Author: Karel Mráček, Publishing house Krystal O.P. Prague, 1995.

1995 the Ministry of Education, Youth and Sports withdrew the recommendation of the publication.

609. In 1999 the executive committee of the **Fraternal Unit of Baptists** informed the Ministry of Culture about the incorrect characterisation of members of this state-recognised and world-wide positive accepted church in the elementary school textbook Civic Education for the 9<sup>th</sup> Grade<sup>349</sup>. The contents of the textbook passage in question was in conflict with Article 13 of the Covenant – requirements for education which is to assist mutual understanding. According to a statement from the Minister of Education, Youth and Sports, the publisher, in co-operation with the author, will arrange amendment of the unsuitable text, and before the next edition of the textbook the re-worked text will be sent for evaluation to the Ecumenical Council of Churches, and then amended if necessary.
610. The Schools Act gives state elementary and secondary schools the obligation to allow religious education. The same regulation gives state-registered churches and religious societies the ability to establish parochial elementary and secondary schools subsidised by the state<sup>350</sup>. In the Czech Republic there is no known case of really serious systemic conflict between the rules of compulsory education and church and religious regulations.
611. The Government of the Czech Republic pays increased attention to the co-existence of various ethnic groups in the society. This is evidenced by measures for improving protection of human rights in the Czech Republic<sup>351</sup>, measures related to the Romani minority<sup>352</sup>, the outline of government policy toward members of the Romani community, assisting their integration into society<sup>353</sup>, measures against movements aimed at suppressing the rights and freedoms of citizens<sup>354</sup>, preparation of a campaign against racism<sup>355</sup>, etc.
612. Special cyclical education programs exist for elementary and secondary school teachers, the so-called summer schools of tolerance, at which teachers are, among others things, acquainted with the history of minorities living in the Czech Republic. Since 1992 the Ministry of Education and the Post-secondary Schools Council have jointly established a subsidy program, the Post-secondary School Development Fund, whose thematic areas include education of teachers. This also includes issues of educating members of minorities and protection of human rights.
613. The Government of the Czech Republic formulated the principles of minority policy after the division of the Czechoslovak Federation on 1 January 1993 in the political document the Outline of the Government Approach to Minority Issues in the Czech Republic<sup>356</sup>. This document contains the basic political foundations of the state's minority policy, including principles of the status of minorities and protection of their rights.

**2. The States Parties to the present Covenant recognise that, with a view to achieving the full realisation of this right:**

**a) Primary education shall be compulsory and available free to all;**

614. Under § 34 of the Schools Act, elementary education is compulsory. Compulsory education begins at the beginning of the school year which follows the day when the child reaches six years of age, and lasts nine years. In justified cases the beginning of compulsory education can be postponed (e.g. if the child is insufficiently mature mentally or physically). Under § 36 of the Schools Act, the child's legal representative is required to register a child of compulsory school age in school and see to it that the child goes to school regularly and on time. He is also required to state an opinion on the child's registration for secondary school.
615. Educating children of foreigners who are citizens of the CR, except citizens of the SR, whose education is governed by the Agreement between the Government of the Czech Republic and the Government of the Slovak Republic on Co-operation in Education of 29 October 1992, is governed by instruction of the Ministry of Education, Youth and Sports on education of foreigners in elementary and secondary schools and higher occupational schools, including special schools<sup>357</sup>. The instruction states that the following categories of foreigners will be educated in elementary and secondary schools under the same conditions as citizens of the Czech Republic: foreigners with permanent or long-term residence permits, foreigners who were granted temporary refuge and foreigners who are applying for or have been granted refugee status in the Czech Republic.
616. Minor and juvenile applicants for refugee status who have not completed elementary school are provided free education during the time of completing compulsory education, including education during institutional upbringing and protective custody. Children's centres are established in all refugee camps for children of pre-school age. The centres are equipped similarly to kindergartens. Here children can actively spend their free time, improve skills appropriate to their age and develop their language abilities. Before entering elementary school, children in refugee camps complete a course in the Czech language lasting one to three weeks.
617. Juveniles do not have access to secondary education during asylum proceedings. In the refugee camps these applicants for refugee status have an opportunity to attend a course in the Czech language.
618. Under § 3 par. 6 of a Decree of the Ministry of Education, Youth and sports on Elementary Schools<sup>358</sup>, a school principal assigns children of foreigners into the appropriate grade after determining the level of their previous education and knowledge of the language of instruction.

**b) Secondary education in its different forms, including technical and vocational secondary education, shall be made generally available and accessible to all by every appropriate means,**

<sup>357</sup> See ref. No. 18062/96-21, Bulletin of the Ministry of Education, Youth and Sports No. 7, year 1996.

<sup>358</sup> Decree of the Ministry of Education, Youth and Sports No. 291/1991 Coll., on Elementary Schools.

***and in particular by the progressive introduction of free education;***

619. Secondary education is accessible free of cost in all forms at schools established by the state, as indicated by the above-cited Article 33 of the Charter and § 4 of the Schools Act<sup>353</sup>. In private and parochial secondary schools, education is available for a fee in accordance with these provisions.

***c) Higher education shall be made equally accessible to all, on the basis of capacity, by every appropriate means, and in particular by the progressive introduction of free education;***

620. Availability of higher professional education arises from § 27a of the Schools Act<sup>353</sup>. A student in a higher professional school partially pays education expenses through tuition<sup>359</sup>.

<sup>359</sup> Under Government Decree No. 153/1996 Coll., which Sets Fees for Education in Post-secondary Occupational Schools Established By the State and the Manner of Their Payment.

***d) Fundamental education shall be encouraged or intensified as far as possible for those persons who have not received or completed the whole period of their primary education;***

621. A system of schools – specialised and special – set forth in § 17 and §§ 28 to 33 of the Schools Act<sup>360</sup> is established for persons who are not capable of attaining elementary education in elementary schools or did not complete education in them.

---

<sup>360</sup> Act No. 29/1984 on the System of Elementary, Secondary and Post-secondary Occupational Schools (the Schools Act), as subsequently amended, part four - **Special schools**:

§ 28: (1) *Specialised schools, through special training and educational methods, means and forms, provide upbringing and education to pupils with mental, sensory or physical handicaps, pupils with speech defects, pupils with multiple disabilities, pupils difficult to raise and pupils who are ill and weakened, placed in health care facilities; they prepare these pupils for integration in the work process and the life of the society.*

(2) *Specialised schools include elementary specialised schools and secondary specialised schools; education acquired in these schools is equivalent to education acquired in elementary school and other secondary schools.*

(3) *Unless this Act provides otherwise, provisions which apply to elementary or secondary schools apply to specialised schools.*

(4) *Specialised schools also include special schools, vocational schools, practical schools and remedial schools.*

(5) *The Ministry shall set by decree the method of classifying pupils in special elementary schools, specialised schools and remedial schools, and conditions for accepting pupils to vocational schools and practical schools.*

§ 29: *Specialised elementary schools*

(1) *Specialised elementary schools provide upbringing and education to pupils under § 5 and 6 in a manner commensurate with their disability; they are established as schools for hearing disabled pupils, for visually disabled pupils, for pupils with speech defects, for pupils, for pupils with physical disabilities, for students with multiple disabilities, for pupils who are difficult to bring up and for pupils who are ill and weakened, placed in health care facilities.*

(2) *Specialised elementary schools have nine grades. The Ministry shall specify by decree which schools have ten grades.*

§ 30: *Specialised secondary schools*

(1) *Specialised secondary schools provide upbringing and education to pupils under § 7 and 8 in a manner commensurate to their disability; special secondary schools educate pupils with sensory or physical disabilities and pupils who are difficult to bring up, if they cannot be educated together with pupils of other secondary schools.*

(2) *Specialised secondary schools are divided into these kinds: secondary vocational schools, grammar schools and secondary occupational schools.*

(3) *After discussion with the Ministry of Health, the Ministry may, by generally binding legal regulation, extend the length of study in special secondary schools by up to two years.*

§ 31: *Special schools*

(1) *Special schools educate pupils with intelligence shortcomings such that they cannot be successfully educated in elementary or specialised elementary schools.*

(2) *Special schools have nine grades. The Ministry shall specify by decree which schools have ten grades.*

§ 32: *Vocational schools*

(1) *Vocational schools provide occupational training in trades with regulated teaching plans.*

(2) *Vocational schools prepare pupils for performance of a trade corresponding to the field taught. Preparation lasts two to three years. Preparation at a vocational schools is completed by passing a final examination.*

(3) *A trade school can also provide preparation for performance of simple activities by pupils who are able to work independently but whose work and social placement must be guided by other persons.*

(4) *Vocational schools accept pupils who have successfully completed the ninth grade of a special school.*

(5) *Vocational schools are established under § 10 and is subject to § 9 par. 3 and 4, § 10a, § 11, 11a, 12, § 20 par. 2, § 22 to 24 and § 25 par. 1 to 4 and par. 6 to 8.*

§ 32a: *Practical schools*

(1) *Practical schools prepare pupils for performance of simple activities. Preparation lasts one to three years.*

622. While specialised elementary schools provide education equal to that of elementary schools (see par. 601 of the report), graduates of special schools (§ 31 of the Schools Act) can obtain only “lower elementary education,” enabling them to continue education only at vocational schools or practical schools, which are intended only for graduates of these schools. At the end of the report period there were almost 500 such vocational schools and schools in the Czech Republic, offering over seventy occupations in non-demanding manual labour occupations. Graduates receive a certain qualification in their chosen field.

### Number of students in special schools

School year	Pupils in thousands		% of girls	Proportion of students in special schools	
	Total	of that, girls		of students of compulsory education age, in %	
				Boys	Girls
1995/96	34,732	14,009	40.3	3.8	2.8
1996/97	35,020	14,142	40.4	3.6	2.5
1998/99	32,721	13,205	40.4	3.3	2.4

623. At present, other pupils with special educational needs, whose IQ exceeds the given intelligence group, are also placed in special schools. These are, for example, pupils afflicted with multiple simultaneous defects, pupils medically diagnosed as autistic or with features of autism, pupils with heavier forms of light brain disorders, pupils with severe health disability (e.g. epilepsy, diabetes, allergies, etc.), pupils with learning disabilities and behavioural disorders, students from socio-culturally disadvantaged environments. It often happens that special schools are attended primarily by pupils who are not able to handle elementary school material in the usual time limit.

624. The above-mentioned situation is apparent in the high number of Romani children who attend special schools and the high proportion of these children in special schools<sup>361</sup>, because a regular elementary school is not able to adapt its teaching methods to the specific needs of children from a different socio-cultural environment or with a language barrier. Romani children are transferred to special schools based on a standard procedure, i.e. after psychological examination and with the parents’ consent. However, there is a

(2) Priority in acceptance to practical schools is given to pupils who successfully completed special school and pupils who completed compulsory education in a grade lower than the ninth grade of a special school or elementary school. In justified cases, pupils who failed to complete the ninth grade of elementary school can also be accepted. Practical schools with one year and two year courses accept pupils who completed compulsory education at a special (§ 31) or remedial school (§ 33).

(3) Three-year preparation in practical school is completed by passing a final examination, or, in a one-year or two-year preparation course, by a final report card.

#### § 33: Remedial schools

(1) Remedial schools bring up and educate pupils who are difficult to bring up, with such shortcomings in intelligence that they cannot be educated even in a special school, but are capable of acquiring at least some elements of education. The content of teaching is aimed at developing habits of self-care, personal hygiene, and at developing commensurate knowledge and working ability with objects of daily use.

(2) Remedial schools have ten grades.

(3) Before entering remedial schools and before being released from compulsory education under § 37 par. 2, children with severe mental disability are given an opportunity for preparatory education of one to three years.

<sup>361</sup> According to an estimate from the office of the Czech Republic Government Inter-ministerial Commission for Roma Community Affairs, over half the pupils of special schools are Roma, and roughly 70 percent of all Romani children attend special schools.

problem, not only in the tests used and the validity of their results<sup>362</sup>, but also in the fact that Romani parents do not consider special schools a disqualification, as they themselves are often graduates of them, and are not sufficiently informed about the consequences of their consent for the further opportunities for education and professional placement of children after completing special schools.

625. On 10 October 1997 the Committee for the Rights of the Child expressed dissatisfaction with the inadequate measures in the Czech Republic in prevention and the fight against all forms of discrimination aimed against children from minorities, including Romani children, and recommended to the Czech Republic that it make a greater effort aimed at lowering discriminatory practices against the Romani population. The Committee for Elimination of Racial Discrimination (“CERD”) also stated an opinion on the matter of Czech special schools on 19 March 1998 in the closing evaluation of the initial and second periodic report of the Czech Republic on fulfilment of the International Convention on the Elimination of All Forms of Racial Discrimination. CERD stated with dissatisfaction the marginalisation of the Romani community in education. The fact that a large number of Romani children is placed in special schools, which leads to de facto racial segregation, and that the Roma have a considerably lower proportion in secondary and higher education, are grounds for doubts about the full implementation of Article 5 of the Convention on the Rights of the Child, the CERD wrote in its closing evaluation.
626. The European Roma Rights Centre in Budapest also pointed out the disparity between practice and the rights guaranteed by the Czech constitutional order and the European Convention for the Protection of Human Rights and Fundamental Freedoms. It convinced the parents of twelve Romani children from Ostrava, to file a complaint against the placement of their children in special schools to the Constitutional Court of the Czech Republic (filed on 15 June 1999). The complaint was also based on the fact that the parents were not adequately warned about the consequences of completing special schools instead of elementary schools in connection with further education and placement in the labour market. On 8 November 1999 the Constitutional Court rejected the complaint, saying that it did not have jurisdiction over part of the complaint; it considered part of the complaint, against specific decisions of principals of special schools to be clearly unsubstantiated. The Constitutional Court recommended those parts of the complaint which it did not have jurisdiction to address as complaints which the appropriate administrative bodies of the Czech Republic should handle.
627. In connection with this, at the end of 1999 the Parliament of the Czech Republic approved an amendment to the Schools Act<sup>363</sup>, which went into effect on 18 February 2000. The amendment increases the ability to cross over within the school system, and permits all those who have completed compulsory education a free choice of their further education and a free choice of occupation. After passage of this amendment, secondary schools will no longer accept for study only those applicants who have successfully completed elementary schools, but all applicants who, in the application process, meet the conditions

---

<sup>362</sup> Resolution of the Government of the Czech Republic of 29 October 1997 No. 686, on the Report on the Situation of the Roma Community in the Czech Republic and on the current situation in the Roma community charged the Minister of Education to prepare new materials for testing children when assigning them to special schools and to consider the more idiosyncratic preconditions of Roma children, and thereby to limit the previous practice of frequent assignment of Roma children to special schools without documented reasons evidencing their intellectual or educational prerequisites. Preparation of the new methods for testing children (not only Roma children) was not completed in the report period.

<sup>363</sup> Act No. 19/2000 Coll., which Amends Act No. 29/1984 Coll., on the System of Elementary, Secondary and Post-secondary Occupational Schools (the Schools Act), as subsequently amended.

required for acceptance to the chosen trade field or secondary school. Thus, graduates of special schools<sup>364</sup> will also be able to be accepted to secondary schools. In connection with this, the Ministry of Education, Youth and Sports sent information to all schools offices information about the procedures in accepting to secondary schools students and other applicants who have completed compulsory education but have not completed elementary education.

628. With the aim of **preventing failure** in elementary school by children from socio-culturally disadvantaged environments (especially Romani children), children with a different native language, but also other children, e.g. with compulsory education postponed, since 1992, under § 58a of the Schools Act **preparatory classes in elementary schools and special schools**<sup>365</sup> have been established on an experimental basis, **exceptionally also in kindergartens**<sup>366</sup>. The aim of preparatory classes is to systematically prepare children for problem-free inclusion into the education process in the first grade of elementary school. Teaching in the preparatory classes is aimed primarily at overcoming a language handicap, e.g. of Romani pupils, and it is adapted to children's individual needs. Attending preparatory classes is thus meant to remove the handicap of children who are not sufficiently prepared in the family for entering first grade, who then fail in elementary education, and are often unnecessarily reclassified into special schools.

629. Preparatory classes are opened particularly in places with a large Romani population<sup>367</sup>. A high proportion of preparatory class graduates are successful at the beginning of their attendance in elementary school. In the 1998 to 1999 school year there were 100 preparatory classes with 1,237 pupils in the Czech Republic. Of the total of 100 classes, 50 classes are established in elementary schools, 4 classes in elementary special schools, 37 classes in special schools and 9 classes in kindergartens.

630. For children in preparatory classes and further education to more easily overcome communication, adaptation and other barriers, as of 1997<sup>368</sup> the position of a Romani pedagogical assistant can be established in a school. The assistant's work is aimed at:

- helping children in social education, in communication with Romani children, in individualising teaching and removing social and academic educational problems,
- assistance in activities outside the classroom and outside the school,
- co-operation with parents,
- co-operation with the local Romani community.

631. An assistant must be over 18, may not have an entry in the criminal register, and must complete a ten-day course of basic teaching skills training. An application for the creation

---

<sup>364</sup> The original wording of § 19 of the Schools Act: *Secondary schools.... accept pupils and other applicants who have successfully completed elementary school.* The new wording of § 19: *Secondary schools ... accept pupils and other applicants who have completed compulsory education and who, in the application process, met the conditions for acceptance by demonstrating suitable abilities, knowledge, interests and health capacity required for the chosen education field.*

<sup>365</sup> Establishing preparatory classes in special schools is subject to criticism, as they do not introduce children in to the natural environment of standard elementary schools or kindergartens .

<sup>366</sup> Under statute of the Ministry of Education, Youth and Sports ref. No. 12748/97-20 and its subsequent amendment ref. No. 14169/98-22 (for kindergartens).

<sup>367</sup> The government, in Resolution of 29 October 1997 No. 686, to the Report on the Situation of the Roma Community in the Czech Republic, charged the Minister of Education, Youth and Sports to *expand the network of preparatory classes in the elementary education system for pupils from a linguistically and socio-culturally disadvantaged environment.*

<sup>368</sup> Under statute of the Ministry of Education, Youth and Sports for Experimental Testing of Preparatory Classes ref. No. 12748/97-20.

of an assistant position is submitted by a school principal; the Schools Office approves an application and recommends it for approval to the Ministry of Education with an application for provision of funds. The Statute of experimental testing of preparatory classes (ref. No. 14 169/98-22) repeals the requirement for a Romani pedagogical assistant to have completed secondary education. As of 1 September 1999 there were 146 Romani assistants in schools; their wages are refunded by the Ministry of Education, Youth and Sports. The wage level of an assistant is proposed by the school principal.

632. Placement of handicapped or socially disadvantaged children in kindergartens before beginning school is very important. Institutional pre-school education primarily helps the children to adapt socially and develops knowledge and skills necessary to successfully absolve entry to elementary school. Under the substantive outline of the new Schools Act, children, or their parents, if they express an interest, will have the right to place all children in pre-school education in the year before beginning compulsory education.

### Number of students, who completed compulsory education

School year	Grades 1 - 10 <sup>5)</sup>	Students who completed compulsory education and left school in <sup>2)4)</sup>			Transfers to spec. schools	
		Grades 1 to 7	Grade 8	Grade 9 to 10 <sup>5)</sup>		
1996/97	Total <sup>2)4)5)</sup>	136,777	15,703	4,654	116,420	3,649

Source: Institution for Information in Education

Note: 1) Facilities for institutional upbringing and protective custody.

2) Without remedial schools or a preparatory class.

3) Standard and specialised classes.

4) Data for the 96/97 school year include transfers to special schools.

5) Special schools include grade 10 for the hearing and visually disabled

633. On the basis of § 60 of the Schools Act<sup>53</sup> an elementary school or secondary school can organise **courses for obtaining elementary education** for people who did not obtain or did not complete elementary education. These courses are intended for everyone who completed compulsory education in a grade lower than grade nine (they repeated a grade) or did not successfully complete grade nine. The courses may, in accordance with the method instruction of the Ministry of Education, also be attended by graduates of special schools<sup>369</sup>. Courses for acquiring (supplementing) elementary education provided by special schools<sup>370</sup> also contributed to increasing education.

<sup>369</sup> In accordance with the Method instruction for Supplementing Education Provided By Elementary Schools for Graduates of Special Schools, issued by the Ministry of Education, Youth and Sports under ref. No. 17 908/95-24.

<sup>370</sup> On the basis of § 4 par. 10 of Decree of the Ministry of Education, Youth and Sports No. 127/1997 Coll., on Special Schools and Special Kindergartens, and Intended for Citizens Who Have Completed Compulsory Education in a Lower Grade of a Special School.

Source: Institution for Information in Education

Note: 1) Education provided by elementary or special school. From the 1999/2000 school year, remedial schools will also be able to provide supplemental education.

2) Courses for supplementing elementary education provided by an elementary school can also be taken at a special school, secondary occupational school, integrated secondary school, secondary trade school and a trade school.

634. Supplementing education provided by elementary school (for children from special schools) and supplementing education provided by a special school (for pupils from practical schools and for those who completed compulsory education in a grade lower than ninth grade of elementary of special school or did not successfully complete ninth grade) is governed by method instructions from the Ministry of Education, Youth and Sports<sup>371</sup>. A condition for accepting an applicant into a course is completion of compulsory education and a recommendation from the area pedagogical-psychological consulting office. Before the beginning of a course, the school verifies the applicant's extent of knowledge and level of ability, in order to evaluate whether his/her full participation in the course is desirable or whether he/she can acquire the knowledge necessary for final examinations by independent study. Courses for supplementing elementary education last one school year. Financial expenses for organisation of the courses are paid, under the Act on State Administration and Local Administration in Education<sup>54</sup>, by the authorised Schools Office with jurisdiction for elementary and special schools.

635. The school system also sees to the creation of the best possible conditions for **educating children with severe medical disabilities**. Amendments to the Schools Acts of 1995 reacted, among other things, to one of the most difficult tasks from the government document the National Plan for Measures to Decrease Negative Consequences of Medical Disability<sup>372</sup>: *For especially severely disabled children whom the Schools Act permits to be released from compulsory education, to arrange education, in the wider sense of the word, so that these children too can exercise their right to an education.*

636. The previous provisions of § 37 of the Schools Act governing release from compulsory education with the formulation: *the national committee shall release from compulsory education a child which, due to its mental condition, is not capable of education*, was replaced in the draft new Schools Act with a new text, under which *the director of the*

<sup>371</sup> Method instruction of the Ministry of Education, Youth and Sports ref. No. 17908/95-24, on Supplementing Education Provided By an Elementary School for Graduates of Special Schools, and Method instruction of the Ministry of Education, Youth and Sports ref. No. 18371/96-24, on Supplementing Education Provided By a Special School.

<sup>372</sup> Resolution of the Government of the Czech Republic of 8 September 1993 No. 493, approving the document the "National plan of measures to reduce the negative results of medical disabilities".

*Schools Office may release a severely medically handicapped child from compulsory education for a definite period on the basis of expert evaluation and consent of the child's legal representatives. He shall simultaneously specify a form of education which corresponds to the child's mental and physical abilities.*

637. In 1995, the amendment to the Schools Act enabled children with severe mental disability, before entering remedial schools or before their release from compulsory education, to receive preparation for education of one to three years (the so-called preparatory level of remedial schools). Special classes for autistic pupils and special classes for the deaf and blind were also established this way.

638. In 1998 the Ministry of Education, Youth and Sports expanded, by decision of the Deputy Minister<sup>373</sup> the opportunity to supplement elementary education at the level of elementary school<sup>374</sup> or special school<sup>375</sup> for people with more severe medical disability. Remedial and special schools implement this decision primarily through courses for acquiring education provided by a special, or remedial school as an experiment under § 58a of the Schools Act.

*e) The development of a system of schools at all levels shall be actively pursued, an adequate fellowship system shall be established, and the material conditions of teaching staff shall be continuously improved.*

639. An important **international co-operation program**<sup>376</sup>, aimed at supporting development of quality, innovation and a European dimension in the system and practice of occupational education through national educational projects, is the Leonardo da Vinci program. Projects are judged and evaluated by the European Commission. The condition of international co-operation by partners is always important – the applicant must find two partners for implementation of its project, including at least one from European Union countries. In addition to educational institutions, companies, labour offices, social partners (i.e. trade unions and employers' organisations) and non-profit non-government organisations can also apply for support from the program. The Czech Republic has participated in the program since the end of 1997.

640. In the report period, participation in the Tempus PHARE program was important for Czech post-secondary schools; this program paid study stays of students, teachers and young scientific workers at foreign universities. During 1999 this co-operation with most European partners was transferred to the Socrates program.

641. In 1994, with the support of the European PHARE program, the Minister of Labour and Social Affairs established the **National Education Fund**, which was transformed in 1999 into a generally beneficial company. Its task is to support the transformation of the society and the economy and to support the process of European integration by

<sup>373</sup> Decision of the Deputy Minister of Education ref. No. 19096/97-24, on Supplementing the Education Provided By a Remedial School.

<sup>374</sup> Method instruction of the Ministry of Education, Youth and Sports ref. No. 17908/95-24.

<sup>375</sup> Method instruction of the Ministry of Education, Youth and Sports ref. No. 18371/96-24.

<sup>376</sup> The Council of Ministers of the EU announced the Leonardo da Vinci program on 6 December 1994 for the period of 1995 to 1999. The Czech Republic was able to participate first in a preparatory period, and since 1 October 1997 the CR is a full member. It participates in the program equally with institutions of European Union countries and the European Free Trade Area.

development of human resources in the Czech Republic, and also to contribute to development of life-long education by supporting all forms of further education.

642. **The operation and development of the school system** is the responsibility of the Ministry of Education, Youth and Sports, which is, in accordance with § 7 of the so-called Competence Act<sup>377</sup>, the central body of state administration for pre-school facilities, school facilities, elementary schools, secondary schools and post-secondary schools and also for science policy, research and development, including international co-operation in that area.
643. Responsibility for the creation and development of the school system is ensured by individual levels of proceedings under the Act on State Administration and Local Administration in Education<sup>54</sup>, which, in § 3, defines the duties of school principles, in §§ 5 to 11, the duties of the Schools Office and in §§ 12 to 13c, the duties of the Ministry of Education, in § 14 and § 15, the duties of the municipality. Through designated bodies of state administration in education, a founder of a school submits, in accordance with § 13a par. 2 of the Act, as part of an application for classification or change in classification of a school in the network of schools pre-school facilities and school facilities, on the basis of § 13b par. 1 lt. i) of the Act, an educational outline of the school to the Ministry of Education, Youth and Sports for approval. Ensuring development of the school system is also elaborated in § 11 of the Schools Act by designating certain tasks for the founders of secondary vocational schools, related to their responsibility for the training of young people for occupations, duty to create positive conditions for developing students' abilities and initiative and tasks involved in dissolving, dividing or merging these schools.
644. **Financial and material security of secondary school students**, which also includes scholarships for students at academic grammar schools and secondary occupational schools, is addressed by the Schools Act<sup>53</sup>. Under § 24 par. 2 students at academic grammar schools and secondary occupational schools can be provided a scholarship and material security, taking into account their social situation and success. Material security includes, in particular, food and housing. A scholarship and material security can be provided from state budget funds or from the funds of organisations. Security can also be provided during vacation periods.
645. **Creation of material conditions for teachers** is implemented through financial resources allocated by the Ministry of Education for schools it establishes in accordance with § 12 of the Act on State Administration and Local Administration in Education<sup>54</sup>, or in accordance with § 12 of the Schools Act. Wages of teachers and school workers in state schools are governed by the Act on Wages and Compensation for Work Emergency Availability in Budget and Certain Other Organisations and Bodies.
646. Wages of education workers are lower than the average wage of public sector employees (see text and table to Article 7 of the Covenant), which is contrary to their average education level (a condition for working as a teacher at all levels is completed post-secondary education). This fact is often cited as the reason for feminisation in education and the reason why many graduates of schools of pedagogy leave to work outside the education field. Neither advantages in the relative shorter work time and longer vacation sufficiently compensate for the lower wage level. However, the relatively low wage level is not a problem only in education, but also other branches of the public sector (health care, culture, state administration, especially at the local level, etc.).

---

<sup>377</sup> Act No. 2 /1969 Coll., on Establishment of Ministries and Other Central State Administration Bodies of the Czech Republic, as subsequently amended.

647. The care given to schools also includes a system of allocating subsidies, in accordance with a Government regulation<sup>378</sup>, which sets conditions and levels of provision of subsidies to private schools, pre-school and school facilities.

**Expenditures on education, share of GDP and of state budget expenditures (in bn CZK)**

2) New methods of calculating GDP as of 1994.

<sup>378</sup> Government Regulation No. 324 /1996 Coll., which Sets Conditions and Amounts of Providing Subsidies to Private Schools and Pre-school and School Facilities.

***3. The States Parties to the present Covenant undertake to have respect for the liberty of parents and, when applicable, legal guardians to choose for their children schools, other than those established by the public authorities, which conform to such minimum educational standards as may be laid down or approved by the State and to ensure the religious and moral education of their children in conformity with their own convictions.***

***4. No part of this article shall be construed so as to interfere with the liberty of individuals and bodies to establish and direct educational institutions, subject always to the observance of the principles set forth in paragraph 1 of this article and to the requirement that the education given in such institutions shall conform to such minimum standards as may be laid down by the State.***

648. The school system of the Czech Republic also includes schools other than those established by the state – parochial and private schools, which pupils or their parents are free to choose. If the legal representatives of pupils intend to choose schools other than schools established by public bodies, they are able to do so under § 57a and § 57b of the Schools Act. § 57c of the Act guarantees the equality of education at all these schools regardless of who established them. The above-mentioned provisions also create a certain degree of independence for these schools, while preserving state inspection of the level of education provided, so that this education is in compliance with the state requirements for the education level of the population.

649. Equality of education is also guaranteed by the general aims of upbringing and education, which are declared by the substantive outline of the new Schools Act. The basic aim is development of an individual's personality, commensurate with his age, by teaching appropriate knowledge and skills for personal and civic life, presentation of culture and values which were achieved in development of the society, education for respect for European cultural traditions and values, such as tolerance, freedom and responsibility, through education for recognising principles of democracy and the value of human rights. These general educational aims are applied to education and upbringing in our schools at all levels, i.e. elementary, secondary and post-secondary occupational schools, or other school facilities, and equally to schools established by any party.

650. The aims of education and upbringing are part of the educational programs of individual levels and types of schools. In the substantive outline of the new Schools Act and the statute text being prepared, there are special passages concerning protection of the rights of children, students, or their legal representatives, while respecting all provisions of supranational documents by which the Czech Republic is bound: the Convention on the Rights of the Child, the European Convention for the Protection of Human Rights and Fundamental Freedoms, the Convention on the Elimination of All Forms of Discrimination Against Women, etc. The draft act also governs the rights and obligations of schools and school facilities, and students or their legal representatives, guarantees the right to free education in elementary and secondary schools established by the state, the right to religious education in an extent and under conditions set forth by the Act, guarantees equal rights to all without regard to gender, religion, race, etc. The draft act also contains a prohibition on all forms of any kind of discrimination and on protection and observance of the rights and obligations of every child/pupil/student regardless of gender. Related implementing regulations and decrees will be prepared or amended in the same spirit.

651. Non-state schools are included in the network of schools of the Ministry of Education, if they meet the requirements specified in § 13b of the Act on State Administration and Local Administration in Education<sup>54</sup>. Conditions for their inclusion in the network and the resulting entitlement to financial support from the state include approval of teaching plans and teaching outlines, or educational aims, by the Ministry, which guarantees compliance with state requirements.
652. In this connection, however, it must be pointed out that the conditions set by law for registering churches (10 thousand members) do not permit church schools to be established and, within compulsory education, claims to be made for observance of the internal norms of an unregistered church or religious society<sup>379</sup>. Church and religious societies may, however, to fulfil their missions, teach religion and establish their own schools under conditions set forth by generally binding legal regulations. The right of individuals or other legal entities to establish private schools under the Schools Act is not affected in any way by the conditions set for registering church and religious societies.
653. Under the Government regulation which sets conditions and levels for providing subsidies to private schools and facilities<sup>380</sup>, these schools are entitled to state subsidy if they are included in the network of schools and conclude at the end of November each year an agreement with the Schools Office on provision of a subsidy for the next school year. The state provides a subsidy for financing non-investment expenditures related to upbringing and education and with regular operation of schools. The amount of a subsidy is set according to the actual number of students by a percentage from a normative amount per pupil in schools established by the state. It is increased if the school is attended by pupils with medical disabilities, the school received a good evaluation from the Czech Schools Inspection<sup>381</sup> and in other cases set forth in the decree. For elementary private and parochial schools the basic subsidy is 60 percent of the normative amount, for central schools 40 percent of the normative amount for a state school pupil.
654. The quality of education in all types of elementary and secondary schools without regard to who established them, is evaluated and inspected by the Czech Schools Inspection.

---

<sup>379</sup> Legal regulation of issues of churches and religious societies is within the substantive jurisdiction of the Ministry of Culture:

Act No. 218/1949 Coll., on Economic Support of Churches and Religious Societies by the State, as subsequently amended and the government implementing regulation to it,

### ARTICLE 14

*Each State Party to the present Covenant which, at the time of becoming a Party, has not been able to secure in its metropolitan territory or other territories under its jurisdiction compulsory primary education, free of charge, undertakes, within two years, to work out and adopt a detailed plan of action for the progressive implementation, within a reasonable number of years, to be fixed in the plan, of the principle of compulsory education free of charge for all.*

655. This article does not apply to the Czech Republic, as it does ensure compulsory, elementary education free of charge. This right arises from the above-mentioned Article 13 of the Charter and § 4 par. 1 of the Act on the System of Elementary Schools, Secondary Schools and Post-secondary Occupational Schools (the Schools Act)<sup>53</sup>. Free compulsory education is implemented in the Czech Republic in accordance with Article 33 of the Charter and § 4 par. 1 of the Schools Act.

## ARTICLE 15

### ***1. The States Parties to the present Covenant recognise the right of everyone:***

- (a) To take part in cultural life;***
- (b) To enjoy the benefits of scientific progress and its applications;***
- (c) To benefit from the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.***

656. The basic instrument for protection of the rights named in Article 15 of the Covenant is the Charter of Fundamental Rights and Freedoms.

657. Article 15 of the Charter reads:

- (1) The freedom of thought, conscience, and religious conviction is guaranteed. Everyone has the right to change his/her religion or faith or to be non-denominational.*
- (2) The freedom of scholarly research and of artistic creation is guaranteed.*
- (3) No one may be compelled to perform military service if such is contrary to his/her conscience or religious conviction. Detailed provisions shall be laid down in a law.*

658. Article 17 of the Charter:

- (1) The freedom of expression and the right to information are guaranteed.*
- (2) Everyone has the right to express his/her views in speech, in writing, in the press, in pictures, or in any other form, as well as freely to seek, receive, and disseminate ideas and information irrespective of the frontiers of the state.*
- (3) Censorship is not permitted.*
- (4) The freedom of expression and the right to seek and disseminate information may be limited by law in the case of measures that are necessary in a democratic society for protecting the rights and freedoms of others, the security of the state, public security, public health, or morals.*
- (5) State bodies and territorial self-governing bodies are obliged, in an appropriate manner, to provide information with respect to their activities. Conditions therefor and the implementation thereof shall be provided for by law.*

659. Article 25 of the Charter:

- (1) Citizens who constitute a national or ethnic minority are guaranteed all-round development, in particular, the right to develop, together with other members of the minority, their own culture, the right to disseminate and receive information in their native language, and the right to associate in national associations. Detailed provisions shall be set down by law.*
- (2) Citizens belonging to national and ethnic minority groups are also guaranteed, under the conditions set down by law:*
  - a) the right to education in their own language,*
  - b) the right to use their own language when dealing with officials,*
  - c) the right to participate in the resolution of affairs that concern national and ethnic minorities.*

660. Article 34 of the Charter:

- (1) The rights to the fruits of one's creative intellectual work shall be protected by law.*

(2) *The right of access to the nation's cultural wealth is guaranteed under the conditions set by law.*

661. The concept of cultural wealth is not defined further. It is understood that cultural wealth is, on the one hand, so-called cultural heritage, i.e. cultural values which were created in the past, and on the other hand cultural values, e.g. artistic works and performances which are created in the present.

### **A. The right to take part in cultural life (art. 15a)**

#### **Legal framework**

662. The Czech Republic is a state party to the following international conventions about culture:

the Convention for the Protection of the World Cultural and Natural Heritage<sup>382</sup>,  
the Convention on Measures to Prohibit and Limit Unauthorised Import, Export and Transfer of Ownership to Cultural Assets<sup>383</sup>,  
the Convention for the Protection of Cultural Assets during Armed Conflict and the Protocol to it<sup>384</sup>,  
the Convention and Exchange of Official Publications and Government Documents Between States and the Convention on International Exchange of Publications<sup>385</sup>,  
the Treaty on Import of Educational, Scientific and Cultural Materials and the Protocol to it<sup>386</sup>.

663. Individual areas of cultural creative work and life are also regulated by a number laws, which can be grouped by their focus on instruments protection cultural heritage<sup>387</sup> and living culture<sup>388</sup>.

Act No. 483/1991 Coll., on the Czech Television, as subsequently amended.

Act No. 484/1991 Coll., on the Czech Radio, as subsequently amended.

## State government and local self-government in culture

664. In the Czech Republic's state administration system, matters concerning culture are, under the Act on Establishing Ministries, in the jurisdiction of the Ministry of Culture<sup>389</sup>. The Ministry of culture is the state central administration body for art, cultural educational activity, cultural monuments, for matters of churches and religious societies, for press matters, including publication of non-periodical printed matter and other information media, for radio and television broadcasting, unless a special act provides otherwise, also for implementing the copyright law and for production and trade in the field of culture. Under this Act, the Ministry of Culture is also responsible, commensurately with its substantive jurisdiction, for obligations arising from international treaties to which the Czech Republic is a party, and from membership in international organisations. The activity of the Ministry of Culture grows out of a basic document, the outline of cultural policy in the Czech Republic, the "Strategy for More Effective State Support for Culture"<sup>390</sup>.
665. The Ministry of Culture is the founder of 81 large subsidised organisations (as of 31 December 1999), which serve citizens right to access to cultural wealth, e.g. museums and galleries, specialised organisations for state historic preservation, libraries, the National Film Archive, The National Literature Monument (national literary archive), the Czech Philharmonic, the National Theatre, the Institute of Folk Culture, the Theatre Institute, the Information and Consulting Centre for Local Culture, and other institutions.
666. The Ministry of Culture, in accordance with the "Strategy for More Effective State Support for Culture," selectively – through grants and programs – financially supports cultural and cultural education projects of natural person and legal entities, e.g. civic associations, churches and religious societies, cultural institutions, of which it is not the founder, and in exceptional cases also business entities. It also plays the role of a central state administration body in matters of state historical preservation and participates in financing scientific and research activity in the field of culture and cultural wealth.
667. District Offices, the basic territorial unit of state administration in the Czech Republic, also have a certain jurisdiction in the field of culture, established by the Act on District Offices<sup>391</sup>. District Offices are the founders of other cultural facilities (e.g. district

<sup>390</sup> Government Resolution of 28 April 1999 No. 401, on the Strategy for More Effective State Support for Culture.

<sup>391</sup> Act No. 425/1990 Coll., on District Offices, as subsequently amended.

museums and galleries and public libraries). They play an irreplaceable role in the protection of historical monuments, both real estate and objects.

668. An important role in care for culture falls to municipalities, which, within their independent jurisdiction, may establish (and dissolve) cultural institutions and finance them, or contribute to cultural projects of other legal entities, e.g. civic associations. The Act on Municipalities<sup>392</sup> states that the independent jurisdiction of municipalities includes tasks in the field of culture, with the exception of performance of state administration. Municipalities can also financially participate in the renovation of cultural monuments and sets of them, located in their territories, including those which they do not themselves own, and they have certain powers in zoning and protection of cultural monuments and sets of them.

## Financing

669. The basic legal instrument in the field of public budgets, which also applies to financing culture, is the State Budget Rules<sup>393</sup>. Other laws also include the Act on the State Budget, which is approved annually by Parliament, and certain sub-statutory regulations of the Ministry of Finance of the Czech Republic.

670. State expenditures for culture are included in the budget chapter “The Ministry of Culture”. This chapter finances the activities of subsidised organisations founded by the Ministry of Culture, and also provides contributions to owners of cultural monuments for their renovation and to municipalities and cities for renovation of those parts of them which were declared city (village) historical reservations or zones under valid regulations. A smaller part of funds in the chapter goes for financial support allocated on the basis of grant proceedings and designated for implementation of non-profit cultural projects, submitted by natural persons and legal entities not founded by the Ministry of Culture. In addition, funds from this budget chapter also provide contributions to churches and religious societies, subsidies for science and research and certain other special activities aimed at supporting culture.

671. Expenditures for culture also come from funds from public resources, which are included in a separate national budget chapter “Culture in the Jurisdiction of Territorial Bodies”. These are funds which are expended for culture by lower levels of state administration (district offices) and self-government authorities (municipalities and cities).

### Expenditures for culture from the state budget (in thousands of CZK)

Year	Chapter “Ministry of Culture”	Chapter “Culture in the Jurisdiction of Territorial Bodies”
1993	2,405,635	3,955,984
1994	2,971,808	5,187,325
1995	3,320,429	6,400,000
1996	3,529,776	7,500,000
1997	3,776,307	7,648,087
1998	4,397,464	8,018,090

Source: The Ministry of Culture

<sup>392</sup> Act No. 367/1990 Coll., on Municipalities (Municipality Establishment), as subsequently amended.

<sup>393</sup> Act No. 676/1990 Coll., on Rules for Managing Budget Funds of the Czech Republic and Municipalities in the Czech Republic (the State Budget Rules), as subsequently amended.

672. Funds to support culture are also provided by the private business sector as part of its sponsorship and donation activities, but statistical data are not yet available. There are statutory advantages to support these activities, both for natural persons and legal entities, within the tax regulations<sup>394</sup>. The Ministry of Culture estimates that gifts from sponsors to cultural institutions founded by public administration bodies are less than 2 percent of the total expenses for their activities.
673. Of the over 5 thousand foundations operating in the Czech Republic until 1998, roughly 250 engaged in cultural activities. However, most of them did not have their own assets, from the income of which it could support cultural activities, and so concentrated on acquiring funds for their own projects from other sources, including public ones. In view of this fact, in 1997 a new Act on Foundations and Foundations Funds was passed<sup>395</sup>, which governed the creation of funds, and in 1998 secured the transformation of the existing ones, to the effect that a necessary condition for the creation of a foundation is that it have its own registered capital, in a minimum amount set by the Act and from the income of which cultural activities and projects are supported. This Act also enabled the creation of foundation funds, which do not have to have any assets, and operate as fund-raising foundations. Many foundations active in the cultural field were transformed to foundation funds. The obligations which the new Act imposes on foundations and foundation funds also ensure greater transparency of their financing and activities.

## **Institutional structure**

### **Museums, monuments and galleries (museums of visual arts)**

674. The activities of museums and galleries are governed by a special Act on Museums and Galleries and the Act on the National Gallery in Prague<sup>396</sup>.
675. The Ministry of Culture is the founder of 44 museums and galleries, central bodies in other ministries are founders of an additional 12 museums and galleries. Lower territorial state administration bodies (district offices) have founded another 81 museums, galleries and monuments<sup>397</sup>, often with permanent local branches. In addition, another 175 museums, galleries and monuments are founded by cities and municipalities. All these galleries are open to the public.
676. In addition to the above-mentioned museums and galleries there are also museums founded by business entities (35), churches and religious societies, or civic associations (20), and private individuals (13).
677. In 1998 the Ministry of Culture spent 442,280 thousand CZK on the operations and activities of museums and monuments it established, and 368,073 thousand CZK on galleries (art museums). Most museums are regional (this is also true of museums established by cities and municipalities, especially in cities with over 50 thousand inhabitants) and their collections are multi-disciplinary.

---

<sup>394</sup> Act No. 586/1992 Coll., on Income Tax, as subsequently amended, permits natural persons and legal entities with residence in the Czech Republic to deduct, up to a certain limit, the value of gifts provided for, among other things, financing culture.

<sup>395</sup> Act No. 277/1997 Coll., on Foundations and Foundation Funds.

<sup>396</sup> Act No. 54/1959 Coll., on Museums and Galleries, as subsequently amended, and Act No. 148/1949 Coll., on the National Gallery in Prague.

<sup>397</sup> A monument is a museum whose exhibitions are dedicated to a single event or person, and its time and context. An exception is the National Literature Monument, which is a publicly-accessible, narrowly specialised collection of literature (a de facto national literary archive).

678. The Czech Republic has a museum specialised on the Roma minority – the Museum of Romani Culture in Brno, and a museum of the history and culture of the Polish minority – Těšín Region Museum.

### **Public Libraries**

679. The activities of public libraries are governed by the Act on a Unified Library System (the Library Act)<sup>398</sup>.

680. Their founder is the Ministry of Culture; libraries are also founded by district offices, cities and municipalities. The founders of large public expert libraries also include other central state administration bodies, primarily the Ministry of Education, Youth and sports, the Ministry of Agriculture and the Ministry of Health. The libraries of universities and research and scientific institutions are also very important; they are, of course, specialised for the needs of students, schoolmasters and scientists, and cannot be considered fully public libraries.

681. In 1998 the Czech Republic had a total of 7,319 public libraries (including their branches).

682. The Ministry of Culture establishes and finances, in addition to the National Library of the Czech Republic (the central elements in the national library system) and Knihovny a tiskárny pro nevidomé K. E. Macana (Libraries and Printers for the Blind of K.E. Macan), another nine state scientific libraries. It is indirectly the founder of other large public libraries which operate in subsidised organisations which it established (e.g. the National Museum library, the National Museum library, the National Gallery library, the Museum of Decorative Arts library, the National Literature Monument library, etc.).

683. National Library of the Czech Republic has a special position in the public library system. With the size of its holdings (ca. 6 million book units) it is the largest, as well as one of the oldest libraries in the Czech Republic. The value of its holdings classifies it among the most important European and world libraries, and it is part of the UNESCO “World Memory” program, aimed at saving and making widely accessible the most valuable parts of written heritage through digitalisation.

684. State scientific libraries are the central libraries at the regional level, and they are located in the natural regional centres. Therefore, in addition to their usual functions, i.e. educational, informational and cultural, they also play a consultation role for smaller public libraries in their areas.

685. All large public libraries are connected to research and development programs, both central and single ministry. Public libraries also organised many informational and training events, over 40 thousand annually (lectures, short-term exhibitions, etc.).

686. The National Library of the Czech Republic, the Moravian Land Library and the State Scientific Library in Olomouc are statutory recipients of so-called compulsory copies of each non-periodical publication published in the Czech Republic; the remaining state scientific libraries are recipients of required copies of non-period publications if they were published in their territorial area. Until 31 December 1992 the National Library and all state libraries were recipients of required copies of period press published anywhere in the Czech Republic.

687. Expenses for purchases of library holdings in 1998 totalled 181,856 thousand CZK.

---

<sup>398</sup> Act No. 53/1959 Coll., on a Unified Library System (the Library Act), as subsequently amended, and implementing regulations to it.

688. Public libraries also have the task of securing citizens' right to information and equalising the state of Czech information science and public libraries with that in the developed countries. Since 1995 the Ministry of Culture has announced an annual special subsidy program for public libraries, which has two aims:

a) to support the connection of libraries in the network (e.g. Internet connection and improving the existing connection) and

b) to support the creation and accessibility of data in the network (e.g. projects aimed at production and presentation of primary and secondary information sources in electronic form). The total subsidy for the Program for Development of Library Information Networks (RISK) in 1998 was 34 million CZK.

## **Cinematography**

689. Development of cinematography is governed by two laws: the Act on the State Fund of the Czech Republic for Support and Development of Czech Cinematography<sup>399</sup> and the Act on Certain Conditions for Production, Dissemination and Archiving Audio-Visual Works<sup>400</sup>.

690. The Act on the State Fund of the Czech Republic for Support and Development of Czech Cinematography sets basic conditions for creation of funds from which contributions can be made for selected Czech film production projects, and also sets binding rules for the financing. The main source for this fund is income from a surcharge on cinema admissions and income from commercial use of Czech film works created in 1965 to 1991, i.e. in a period when film production was still fully financed from the state budget. Funds from these films can therefore be considered a state contribution for the benefit of the fund.

691. The public station Czech Television plays an important role in the creation of contemporary original Czech film works; it co-produces roughly ten feature-length films a year. However, its financial resources are independent of the state budget (they consist of concession fees, advertising income, etc.), so in this case we can not speak of state subsidy of film production.

692. The Act on Certain Conditions for Production, Dissemination and Archiving Audio-visual Works governs conditions for the development of Czech cinematography in a market environment. Under this Act a specialised institution of the Ministry of Culture for film heritage was created – the National Film Archive. Its mission is gathering, protecting, studying and using audio-visual archive materials, particularly those which are part of the national cultural heritage and document the creation and development of the film industry. The producer of a Czech audio-visual work is required to offer for sale, in writing, to the Archive two new undamaged copies of a Czech audio-visual work, within 60 days of its first publication.

693. In 1998 the Czech Republic had more than 700 permanent cinemas, 36 cinema-cafes and 110 stable summer cinemas and 50 travelling cinemas operating seasonally. A total of 150 feature-length acted films premiere, including 14 Czech produced films.

---

<sup>399</sup> Act No. 241/1992 Coll., on the State Fund of the Czech Republic for Support and Development of Czech Cinematography, as subsequently amended.

<sup>400</sup> Act No. 273/1993 Coll., on Certain Conditions for Production, Dissemination and Archiving Audio-visual Works, and Supplementing Certain Acts and Certain Other Regulations.

694. Every year Karlovy Vary International Film Festival is held in the Czech Republic; it is partially supported by the Ministry of Culture and Karlovy Vary. Its presenter and organizer is an independent entity. In addition, other, smaller international festivals are held in the Czech Republic, which are specialised in, for example, films for children and young people (Zlín), films on the theme of environmental protection and protection of cultural monuments (the Ekofilm festival in Český Krumlov) etc..

## **Theatre**

695. Theatres include:

- theatres established by central state administration bodies – the Ministry of Culture establishes repertory theatres with their own acting companies (three, but only two are subsidised by the ministry; the third – Laterna Magika – is a financially self-sufficient theatre);
- theatres at universities with an arts focus, which prepare young professionals (three public stages); they are financed from the state budget within entitlement subsidies for arts schools;
- theatres established and financed by other public administration bodies, i.e. cities and municipalities, which are repertory theatres and have their own acting companies – a total of 40 – and theatres established and financed by cities, but without their own acting companies, (so-called “stagions”);
- theatres established and financed by district offices – repertory theatres with their own acting companies – a total of three;
- independent theatrical companies and groups, existing on the basis of grants and other support from various sources (the state, a city, city district, sponsors, foundations);
- theatre productions and groups not supported from public funds (private theatres, musical productions, etc.),

696. The Ministry of Culture is a founder of a special professional institution – the Theatre Institute, a scientific and expert centre for theatre studies and for publishing specialised periodicals and theatre literature, maintaining special databases, organising unique international review of set design – the Quadrennial – in Prague, etc.,

697. The most important theatre festivals in the Czech Republic with international participants include the “Theatre on the Border” festival, which is annually devoted to Czech, Polish and Slovak theatre work and is held in a region with a concentrated Polish and Slovak minority. This kind of event also includes the “Theatre of European Regions” festival in Hradec Králové and “Festival 98”. Specialised festivals include the “Tanec Praha” (Dance Prague) festival, focused on contemporary ballet and movement theatre, and Festival “Spectaculo Interesse” for professional puppet theatres.

## **Music**

698. The Czech Republic has 16 professional permanent symphonic orchestras, of which two are established and financed directly by the Ministry of Culture, three are established by private law entities on a business basis (two with considerable state support), one is part of Czech Radio and eleven are established by cities.

699. In addition, the Czech Republic has a number of symphonic chamber orchestras without direct state or public support which are, however, indirectly supported through subsidies to concert and music festival organisers. Until 31 December 1999 the Ministry of Culture was also the founder of a subsidised organisation, the “International Prague Spring Music Festival”, which organised the international music festival of the same name.

### **Equal Access to Culture**

700. There is no discrimination in entry to cultural institutions in the Czech Republic. On the contrary, certain population groups are supported by discounts, e.g. children and young people, students, seniors, families with children, etc.

701. Traditionally the Czech Republic has a good environment for non-professional artistic activities, as these activities have not only a general culturally educational and developmental role, but also lead to better understanding of professional art (they make educated audiences). At the same time, these activities are an important instrument for integrating people into local societies, are a meaningful leisure time activity, and are an important preventive factor for socially pathological behaviour, particularly among young people and children.

702. Non-professional activities are supported primarily through competitions announced by self-government bodies of cities and municipalities or through permanent cultural institutions which these bodies have founded (e.g. local cultural buildings and centres, city libraries, elementary arts schools, etc.).

703. The Ministry of Culture’s budget supports primarily national review and competitions of non-professional artistic groups and individuals, in a grant competition announced annual to support event organisers. In 1997 the ministry spent 5,347 thousand CZK for these events (including reviews and folklore festivals), in 1998 it was 5,638 thousand CZK<sup>401</sup>.

704. In addition, the Ministry of Culture is the founder of a special subsidised organisation – the Information and Consulting Centre for Local Culture. This centre provides method and organisation assistance to cultural events organisers, and also provides financial assistance to some of them.

---

<sup>401</sup> This data does not include support from the Ministry of Culture for activities of the handicapped people and members of national minorities.

## Culture of national minorities

705. Development of minority cultures is guaranteed by the Charter (see par. 659 of the report) and the **Framework Convention on the Protection of the Rights of Minorities**. Other domestic legal regulations do not address the development of minority culture. Support for the development of minority culture is provided primarily by the Ministry of Culture and individual cities and municipalities. The support is concentrated primarily on public libraries, publication of books and other non-periodic publications, theatre and support for non-professional (amateur) artistic events, including folklore. The Ministry of Culture primarily supports national minority organisations (civic associations).

706. For these purposes, the Ministry of Culture has, since 1993, announced an annual competition for cultural projects of these organisations, in which the chosen projects are allocated a subsidy from the CR state budget. Evaluation and selection is done by a special consulting group, which is composed of representatives of minorities. Roughly 60

projects a year are evaluated this way. In 1997 the Ministry of Culture spent 9,111 thousand CZK to support these projects, and in 1998 it was 10,056 thousand CZK<sup>402</sup>.

707. Cities have a similar process: they announce regular competitions for support of projects in non-professional cultural activities and projects, i.e. including projects submitted by national minority civic associations.

708. Periodicals of national minorities are supported by the Ministry of Finance on the basis of discussion and approval in the Czech Republic Government Council for National Minorities.

### **The Handicapped**

709. The Czech Republic has exceptional interest in developing the cultural activities of handicapped citizens, as their inclusion is also an important instrument for overcoming their social isolation. At the same time, these activities are an important component of therapy. The handicapped are approximately 10 percent of the population.

710. For this purpose, the Government approved a National Plan for Equalising Opportunities for Handicapped Citizens. In the framework of the plan the Ministry of Culture concentrates on two basic areas of assistance, assistance in making cultural institutions accessible to immobile persons through technical means and support of handicapped people's own cultural activities.

711. In 1997 the Ministry of Culture spent 5,670 thousand CZK for approximately 80 projects, in 1998 it was 4,814 thousand CZK for a similar number of projects. Funds which come from the budget of the Ministry of Culture this way are a supplement to funds which cities and municipalities and private sponsors donate for these purposes.

### **Cultural Heritage**

712. Cultural heritage is a part of cultural wealth. In practice the Czech Republic distinguishes between protection of objects and real estate or buildings of cultural wealth and between protection of cultural monuments, items with cultural value and documents.

713. Protection of cultural monuments, which are the most valuable part of cultural heritage, is ensured by special laws (see par. 663 of the report). They also set the level of state administration authority in care for this part of the cultural heritage, and ensure that renovation, repairs, maintenance or reconstruction of cultural monuments and sets of them do not lead to a lessening of the value for which they were declared to be cultural monuments<sup>403</sup>. For these purposes the state administration has a network of expert (scientific) workplaces established by the Ministry of Culture (historical preservation institutes), which give the relevant state administration bodies their expert recommendations and opinions on giving permission for conservation, repairs or reconstruction being prepared for monuments or sets of them. These expert organisations also give their opinions and recommendations to investors, free of charge. The Ministry

---

<sup>402</sup> This data must be evaluated in relation to the total amount allocated for all other projects belonging to the field of non-professional (amateur) art and folklore, submitted to the Ministry of Culture by other civic associations and organisers not established on a minority basis. For example, overall the amount spent to support non-professional artistic activities submitted by national minority organisations to the Ministry of Culture is roughly a third higher than the amount which the ministry spends for projects of non-professional art submitted by other civic associations and other non-profit entities without a minority base.

<sup>403</sup> See also Government Regulation No. 127/1995 Coll., on Declaring Areas of Unified Parts of Selected Cities and Municipalities with Preserved Sets of Folklore Architecture as Historical Preservation Areas.

of Culture has established eight of these organisations, which have territorially limited jurisdiction.

714. The historical preservation institutes are also the operating managers of certain buildings which have been declared cultural monuments and are publicly accessible. They manage and operate 70 buildings, including castles and palaces, and the collections and furnishings stored in them. In addition, the Ministry of Culture is the founder of three other independent management of castles and palaces, which manage and operate other buildings.
715. In addition to the above-mentioned organisations, the ministry is also the founder of three institutes for archaeological monument preservation and the State Historical Preservation Institute, which is the central expert organisation that directs all the other (regional) historical preservation institutes and archaeological institutes. It is also authorised by the ministry to maintain a Central Monument List, and it prepares specialised planning materials for the ministry.
716. There are certain other expert organisations in the cultural heritage field which are not established by the Ministry of Culture. Primarily, there is the Archaeology Institute of the Academy of Sciences of the Czech Republic, which conducts basic archaeological research (archaeological institutes established by the Ministry of Culture conduct primarily so-called “rescue” research, i.e. research in areas where investment activity has been started).
717. In terms of finance, care for preservation of cultural monuments is primarily the responsibility of the owner. However, the state can contribute toward increased expenses for renovation of cultural monuments, generally up to 50 percent, and in cases of national cultural monuments (the category of the most important monuments, which are declared national monuments directly by a special resolution of the Government of the Czech Republic) up to 100 percent.
718. For this financial assistance, the Ministry of Culture has several programs, based on the principle of multiple source financing. However, contributions from them are not an entitlement. They are, for example:
- the Program for Rescuing the Architectural Heritage (intended for assistance in renovation and reconstruction of individual buildings),
  - the Program for Renovation of Church Cultural Monuments (intended for partial compensation of expenses for renovation of church cultural monuments, real estate as well as objects, owned by registered churches and religious societies),
  - the Program of Regeneration of Urban Historical Preservation Areas and Zones (intended to give priority assistance to cities in rescuing and renovating areas which were declared historically protected),
  - the Program for Support of Rescue Archaeological Research,
  - the Program for Restoration of Cultural Monument Objects, and certain other programs.
719. The concept of objects with cultural value is relatively new, and was not legally defined until 1994, in the Act on Sale and Export of Objects of Cultural Value<sup>404</sup> aimed, under the pressure of criminal activity, at cultural objects which are not declared to be cultural monuments, but have cultural value. This Act enumerates the kinds of objects to which it applies, which are subject to a special regime for permanent export abroad. Objects

---

<sup>404</sup> Act No. 71/1994 Coll., on Sale and Export of Objects of Cultural Value.

which have been declared cultural monuments by the Ministry of Culture cannot be exported permanently abroad at all. However, they can be taken abroad for a definite period, with the express consent of the Ministry of Culture.

720. Above the framework of this Act, regulating the export of valuable cultural objects abroad, public administration bodies have no other means of control of these objects, with the exception of objects which are a component of state collections in museums, monuments and galleries, or libraries (valuable manuscripts, incunabula, etc.) or archives. They are then subject to a preservation regime which is provided by special legal regulations governing the activities of museums and galleries, public libraries and archives.
721. The third area of objects which are part of the cultural heritage, are documents. Their protection is provided by a special Act on Archives. Most publicly important documents are stored in state archives, which fall under the jurisdiction of the Ministry of the Interior, with the exception of special archives such as the National Film Archive, whose founder is the Ministry of Culture, or the national literary archive (the National Literature Monument), which cares for and makes accessible to the public (among other things) a collection of literary manuscripts, correspondence, and written materials left by Czech literary figures.
722. The so-called non-material cultural heritage, which includes primarily elements of traditional folk culture, such as folk literature, songs, dances, technical procedures of folk trades, etc., is not protected in the Czech Republic by any special legal regulation. However, laws concerning protection of intellectual property rights can be applied commensurately to these works.

### **B. The right to enjoy the benefits of scientific progress (art. 15b)**

723. An important method of disseminating information and exercising the right to the benefits of scientific progress is period inclusion of new information in **school teaching plans**. The Ministry of Education, Youth and Sports, on the basis of its power to direct schools in matters of social and academic education (set forth in § 12 of the Act on State Government and Self-government in Education<sup>54</sup>) and on the basis of § 39 of the Schools Act<sup>53</sup>, approves teaching plans and teaching outlines used for teaching in elementary, secondary and post-secondary occupation schools. In connection with this the Ministry of Education sees to it that the outlines of individual subjects in the teaching plan reflect the newest results of scientific progress and that they are presented to children.
724. The aims and content of education, which must be a component of teaching plans and teaching outlines or other teaching documents as core material, are contained in the standards for individual levels and kinds of schools. They are:
- a) the standard for elementary education,
  - b) the standard for education in a four-year academic secondary school,
  - c) the standard for secondary occupational education<sup>405</sup>.

---

<sup>405</sup> *The Standard for Elementary Education*, approved by the Ministry of Education, Youth and Sports on 22 August 1995 under ref. No. 20819/95-26.

The educational program "Elementary school", approved by the Ministry of Education, Youth and Sports under ref. No. 16847/96-2 as of 1 September 1996, amendments and supplements approved by the Ministry of Education, Youth and Sports on 25 August 1998 under ref. No. 25018/98-22 with effect as of 1 September 1998.

725. Documents for elementary education are also used in the lower grades of multi-year academic secondary schools (an eight year or six year study period), in which students complete compulsory education and receive elementary education. The compliance of textbooks and teaching materials with this requirement is indicated in approval statements for individual textbooks (particularly for elementary and secondary education), which are issued by the Ministry of Education, based on expert evaluation.

726. **Public television broadcasting**, also plays a significant role in informing the public about scientific progress, particularly news, current affairs, documentary, educational and informational programs.

#### Structure of public television broadcasting (in %)

	1993	1994	1995	1996	1997	1998

Other	8.2	15.0	22.0	9.1	19.5	14.8

Source: The Czech Statistical Office, 1999

727. Roughly 10 thousand non-periodic specialised publications, publicly available in bookstores or public libraries (especially scientific) are published in the Czech Republic each year. In 1998 over a thousand specialised magazines were published (for comparison: in 1993 it was only 36 specialised titles, in 1994 only 397 titles, but in 1995 the number of specialised titles grew to 1,011). Specialised magazines are also publicly accessible. Scientific progress is also regularly reported on by periodic publications – dailies and magazines – intended for a general audience.

728. The right to enjoy the benefits of scientific progress is also governed by the Act on State Support for Science and Research<sup>406</sup>, which sets conditions for the creation and use of central records of science and research projects. These records include all projects supported by funds from the state budget. The database is accessible in electronic form

---

The Educational Program "Basic School", approved by the Ministry of Education, Youth and Sports under ref. No. 12035/97-20.

The Educational Program "National School", approved by the Ministry of Education, Youth and Sports on 17 March 1997 under ref. No. 15724/97-20 with effect as of 1 September 1997 as an educational program for grades 1 - 9 of elementary education.

*The Standard for Education in a Four-year Grammar School*, approved by the Ministry of Education, Youth and Sports on 12 February 1996 under ref. No. 27532/95-2.

*The Standard for Secondary Occupational Education*, approved by the Ministry of Education, Youth and Sports on 18 November 1997 under ref. No. 34221/97-23 with effect as of 1 January 1998.

For fields of study of secondary occupational schools and secondary vocational schools the relevant topics are handled in teaching outlines approved by the Ministry of Education, Youth and sports of the CR on 21 July 1998 under ref. No. 23212/98-23/230 with effect as of 1 September 1998.

<sup>406</sup> Act No. 300/1992 Coll., on State Support for Science and Research, as subsequently amended.

on the web page for **Research and Development** Council of the Government of the CR. In addition to the accessibility of information on scientific and research projects, the Act designates the results of projects as the property of the institution in which they are performed and enables tax advantages for use of the results of projects as intangible property.

729. The right to use the benefits of scientific research is also guaranteed by practical use of the results of applied research, both from the scientific institutes of the **Academy of the Sciences of the Czech Republic**, and from research institutes established by individual ministries. Access to scientific and research activity is governed primarily by the Act on Universities<sup>407</sup>.

730. An important role in fulfilment of the right to enjoy the benefits of scientific research and providing information about it is played by the **Office of Industrial Property**<sup>408</sup>, which provides services to the public through the patent library, the information centre (for inventions, industrial designs and utility models and trademarks) and the Institute of Industrial Legal Education. In 1998 the patent library made accessible over 26 million patent documents in classic form and patent bulletins from 53 countries and international organisations (e.g. the European patent office, WIPO-PCT etc.). The public can also use patent information stored in foreign database centres (STN, Questel, Dialog, Epidos). Each year around 8 thousand people use the public reading room. The Office also publishes a Bulletin, in which it publishes announcements of awarding patents, trademarks, etc., and books on issues of industrial and intellectual property. The Institute of Industrial Legal Education begins a two-year specialised course each year, and it publishes the magazine *Průmyslové vlastnictví* (Industrial Property).

**Aggregate indicators of the research and development** (as of 31 December of each year)

<sup>407</sup> Act No. 111/1998 Coll., on Universities.

<sup>408</sup> Since 1993 the Office of Industrial Property is (under the Act No. 166/1993 Coll., which amended and supplemented Act No. 2/1969 Coll.) a central state administration body under the Act No. 2/1969 Coll., on the Establishment of Ministries and Other Central State Administration Bodies of the Czech Republic, as subsequently amended, § 2 par. 1 of the Act.

### **C. The right to enjoy protection of moral and material interest which arise from scientific, literary or artistic creative work (art. 15c)**

731. Protection of intellectual property rights arising from scientific, technical and other specialised creative work is ensured in the Czech Republic primarily by fulfilment of obligations arising from international treaties, to which the Czech Republic acceded and by which it is bound, and from the Czech Republic's membership in international organisations for intellectual rights protection. The system for protection of intellectual property rights includes protection of copyrights and related rights as well as protection of industrial rights.

732. International obligations are primarily:

- a) the **World Trade Organisation Treaty**<sup>409</sup>, which was signed in the name of the Czech Republic on 15 April 1994 in Marrakesh. An integral and binding part of it is also the Treaty on Trade Related Aspects of Intellectual Property Rights - TRIPS/WTO<sup>410</sup>,
- b) the **Convention Establishing the World Intellectual Property Organisation**<sup>411</sup>,
- c) also, the Paris Convention<sup>412</sup>, the Madrid Treaty<sup>413</sup>, the Protocol to the Madrid Treaty<sup>414</sup>, the Nice Agreement<sup>415</sup>, the Lisbon Agreement<sup>416</sup>, the Locarno Agreement<sup>417</sup>, the Strasbourg Agreement<sup>418</sup>, the Budapest Agreement<sup>419</sup>, the Hague Agreement, the **Agreement on Trademark Law**<sup>420</sup>, the **Agreement on Patent Co-operation**<sup>421</sup>, the Berne Convention (Convention on Protection of Literary and Artistic

Works)<sup>422</sup>, the Rome Convention (International Convention on Protection of Performing Artists, Creators of Recordings and Broadcasting Organisations)<sup>423</sup>.

These rights are also set forth in and protected by general regulations of civil and criminal law, as well as by special legal regulations.

733. **Regulation of copyrights and rights related to copyright** is contained in the Act on Literary, Scientific and Artistic Works (the Copyright Act)<sup>424</sup>. This Act has been amended five times since 1989. Protection of copyrights has also come closer to standard in developed countries which are, like the Czech Republic, states parties of multilateral copyright conventions.
734. The Copyright Act of the Czech Republic protects personal and property rights of authors of literary, scientific and artistic works, particularly verbal, theatrical, musical and creative works, including architectural creative works and works from “applied” art – film, photography and cartography works, during the author’s life and 50 years after his/her death. Since 1990, computer programs are also protected like literary works, if they meet the defining characteristics of a work of authorship. The Act also grants protection to works which are created through the creative processing of the work of another, and to translations of works, in such a way as not to affect the protection of the original author’s work. As yet the period for protection of works of authorship has not yet been harmonised from 50 years after the author’s death to the 70 years in effect in the European Union legislation. Performing artists also enjoy rights similar to those guaranteed to authors by the Act. Their rights are regulated in the framework of related rights, as are the rights of producers of audio recordings and radio and television organisations.
735. Amendments to the Copyright Act during 1990 to 1996 affected the areas where the greatest violation of intellectual property rights occurs. Computer programs are newly protected as literary works, and may not be copied, even for personal use. Commercial renting and lending of CDs is permitted only with the consent of authors, performing artists, and producers of audio recordings (at present there is a prohibition on public rental of CDs, imposed by organisations representing performing artists and producers of audio recordings). There are new legislative prerequisites for prosecuting the manufacturer, putting into circulation and use of aids intended to eliminate technical devices which protects works from unauthorised use. These amendments also brought further strengthening of customs officials’ authority over unauthorised dissemination of goods.
736. **Collective administration of copyrights and related rights by special organisations** is governed by a special regulation on collective administration of copyrights and rights related to copyright<sup>425</sup>. This Act enables organisations which have been authorised for collective administration by decision of the Ministry of Culture to collect fees and compensation for rights holders (authors) in areas where the rights holder can not appropriately exercise copyrights himself (e.g. copying works for private use, rental, lending or other methods of making copies of works publicly accessible).

---

<sup>422</sup> Convention No. 401/1921 Coll., the Bern Convention on Protection of literary and Artistic Works (of 1886), revised in Berlin in 1908; for current wording of the Convention see Decree of the Minister of Foreign Affairs No. 133/1980 Coll.

<sup>423</sup> Decree of the Ministry of Foreign Affairs No. 192/1964 Coll., on the International Convention on Protection of Performing Artists, Creators of Audio Recordings and Broadcasting Organisations.

<sup>424</sup> Act No. 35/1965 Coll., on Literary, Scientific and Artistic Works, as subsequently amended.

<sup>425</sup> Act No. 237/1995 Coll., on Collective Administration of Copyrights and Rights Related to Copyrights, as subsequently amended.

737. In May 1998 the Government of the Czech Republic approved a substantive outline of a new Copyright Act<sup>426</sup>, and in accordance with that, in 1999 the Minister of Culture prepared a draft Act, which the Government sent for discussion to the Parliament of the Czech Republic in November 1999. If its final version is passed, this Act will go into effect in 2000. It contains comprehensive regulation of copyrights, which will be fully in accordance with EC regulations and international copyright conventions. The draft of the new Act extends the previous period of protection of literary and artistic works from 50 to 70 years after the author's death and also anticipates revival (renewal) of the period of protection of rights of authors, performing artists, producers of audio recordings and producers of films.
738. The new Copyright Act will newly regulate the rights of a producer of an audio-visual recording, the rights of a publisher, and special rights of a database creator. Authors, performing artists, producers of audio recordings and film producers will also have the right to commensurate compensation for copying of works, audio and audio-visual recordings for private use, from non-recording media, playback equipment and equipment used for copying, as well as towards those who provide copying services on the basis of a trade license.
739. The new legal framework will also include new substantive law means for protection and enforcement of rights. Rights holders will be able to apply the same means as in cases of violation of rights against those who produce, place in circulation or provide services related to technological means of interfering with technical protection of works (decoders). The new Copyright Act also introduces protection of electronic information on rights administration.
740. The draft Copyright Act also contains regulation of collective administration of rights. Collective administrators will be provided additional legal means, their rights and obligations will also be regulated with a view to the nascent information society, areas and fields will be specified in which collective administration will be compulsory, the status of these organisations in terms of their procedural jurisdiction will be strengthened, a process will be provided for setting the compensation paid by users of works and performances to these organisations, etc..
741. **Protection of moral and material interests arising from scientific, technical and expert creative work** are governed by the relevant provisions of the following laws: the Act on Inventions, Industrial Models and Rationalisation Proposals<sup>427</sup>, the Act on Utility Models<sup>428</sup>, the Act on Trademarks<sup>429</sup>, the Act on Protection of Economic Competition<sup>430</sup> and the Commercial Code<sup>431</sup>. The regulation applied particularly to agreements on transfer of rights or provision of licenses for inventions, industrial models, trademarks, trade names, topography of semi-conductor products, utility models and protected mutations of plants.
742. The system of public law protection for items of industrial property was fundamentally changed by passage of the Act on Trademarks. A trademark owner can seek court enforcement of prohibiting everyone from using his/her trademark or a mark

---

<sup>426</sup> Resolution of the Government of the Czech Republic of 27 May 1998 No. 355, on the Draft Substantive Outline of the Copyright Act.

<sup>427</sup> Act No. 527/1990 Coll., on Inventions, Industrial Designs and Rationalisation Proposals, as subsequently amended.

<sup>428</sup> Act No. 478/1992 Coll., on Utility Models.

<sup>429</sup> Act No. 137/1995 Coll., on Trademarks.

<sup>430</sup> Act No. 63/1991 Coll., on Protection of Economic Competition, as subsequently amended.

<sup>431</sup> Act No. 142/1996 Coll., the Commercial Code, as subsequently amended.

interchangeable with it and having items labelled in a way which violates his/her rights taken off the market. The trademark owner can request that customs authorities not permit domestic circulation of products whose labelling violates his/her rights under the Act on Trademarks. If damages were caused by the interference with trademark rights, the injured party has a right to compensation. In the event of non-property detriment the injured party has a right to commensurate satisfaction, which may consist of financial payment.

743. In general legal regulations, specific protection, observance and enforcement of rights to intellectual property are found in §§ 150 to 152 of the Criminal Code<sup>17</sup>:

§ 150 – Infringement of rights relating to trademarks, commercial names and protected designations of origin,

§ 151 – Infringement of industrial rights,

§ 152 – Infringement of copyright.

745. The central state administration body whose responsibilities cover creating conditions for registering items of industrial property for protection, and ensuring proper proceedings about them is the Office of Industrial Property<sup>432</sup>.

746. Administrative and judicial bodies, as well as bodies active in criminal proceedings thus have at their disposal the necessary means and procedures for exercising intellectual property rights. For example, the courts have the power to order preliminary measures to prevent violation of these rights, and they can prohibit violation of the rights. The injured owner has a right to compensation of damages. Intentional violation of these rights is considered a crime, with a possible punishment in the form of a prison sentence or a fine. The police have the power, in connection with proceedings about offences, to take a thing from someone, if they have ground to believe that it may be pronounced forfeit or confiscated in court proceedings.

747. As part of its membership in the TRIPS Agreement, the Czech Republic subjected itself to review of the compatibility of its legal system with the Agreement in the area of copyrights and related rights, trademarks, geographic markings and industrial models, topography of integrated circuits, protection of confidential information, patents, and the field of enforcement of these rights. Within these reviews, the Czech Republic demonstrated the developed status of its legal system in all the monitored areas.

748. The need to transform the TRIPS Agreement into the Czech legal system together with the need to harmonise with the legal regulations of the European Union is reflected in the preparation of additional amendments of laws governing this area. On 1 December 1999 the Act on Measures Concerning the Import, Export and Re-export of Goods Violating Certain Intellectual Property Rights went into effect; this Act permits customs authorities to take measures against counterfeits or unauthorised imitations, including confiscation and destruction of these goods.

749. § 5 of the Act on Radio and Television Broadcasting<sup>240</sup> charges broadcasters, in terms of copyright protection, to conclude agreements with organisations for collective administration of copyrights and rights related to copyrights. Similar provisions are contained in the European Convention on Transfrontier Television, which the Czech Republic signed on 7 May 1999.

---

<sup>432</sup> One of the key activities of the Office of Industrial Property is, under the Act No. 14/1993 Coll., on Measures for Protection of Industrial Property, deciding about provision of protection to inventions, industrial models, applied models, topography of semi-conductor products, trademarks and designations of origin of products.

750. The existing legal regulations in the Czech Republic of obligations under the Covenant concerning broadcasting are adequate; likewise monitoring of observance of the regulations, including their enforceability. Observance of provisions of the Acts on Czech Television and Czech Radio is not enforceable directly from the law, monitoring of their fulfilment is, after mutual agreement, left to the broadcasting regulatory bodies, i.e. the Czech Television Council and the Czech Radio Council.

751. At the end of 1999 the Government submitted to the Parliament of the Czech Republic a draft act which significantly supplements and amends the provisions of the existing Broadcasting Act to bring it fully into compliance with the *acquis communautaire* of the European Union and with the recommendations of the Council of Europe in the given field.

***2. The steps to be taken by the States Parties to the present Covenant to achieve the full realisation of this right shall include those necessary for the conservation, the development and the diffusion of science and culture.***

### **Support for science, research and development**

752. There is still no basic concept document defining Czech state policy on research and development, which has a negative effect in many branches of the national economy, from education to competitiveness of products and technologies in domestic and international markets. On the substantive side, the content of the needed policy is defined by the Principles of Science Policy of the Czech Republic at the Transition to the 21<sup>st</sup> Century, which the Government adopted in 1998<sup>433</sup>. In the same year the Government also approved detailed procedures for preparation of state policy for research and development<sup>434</sup>, so that an outline would be submitted by 31 December 1999<sup>435</sup>.

753. Analysis of previous development and the status of research and development in the Czech Republic, and comparison of them with other countries<sup>436</sup> showed that the Czech Republic lags significantly behind developed countries in numerous indicators of research and development and their outputs. However, the analysis also cites examples showing that, in international comparison, the Czech Republic fares better in research and development than in comparison of economic level, competitiveness, credibility and other indicators.

754. The Czech Republic lags behind developed countries (e.g. the USA, France, the United Kingdom) and especially behind countries which have traditionally emphasised the quality of scientific publications (e.g. Switzerland, the Netherlands, Belgium, Denmark and Scandinavian countries) in production of publications and their citation. In using derived indicators (e.g. bibliometric productivity), which reflect the lower expenditures

---

<sup>433</sup> Resolution of the Government of the Czech Republic of 10 June 1998 No. 397, on Principles of Science Policy of the Czech Republic at the Transition to the 21<sup>st</sup> Century.

<sup>434</sup> Resolution of the Government of the Czech Republic of 9 December 1998 No. 811, on Preparation of the National Policy for Research and Development of the Czech Republic and on Activities of the CR Government Council for Research and Development. The national policy for research and development was approved on 5 January 2000 by Resolution of the Government of the Czech Republic No. 16 (with corrections in Resolution of the Government of the Czech Republic of 2 February 2000 No. 145).

<sup>435</sup> The national policy for research and development of the Czech Republic was approved by Resolution of the Government of the Czech Republic No. 16 of 5 January 2000.

<sup>436</sup> The analysis was prepared for the Government by the CR Government Council for Research and Development. The Government adopted it on 9 July 1999 by resolution No. 563.

for research and development and lower numbers of research workers, the Czech Republic approaches the average EU level and has most other bibliometric indicators comparable with Hungary, Poland, Slovenia and the less developed EU countries.

755. The situation with the quality of published work, measured by the level of citation, is worse. Works from the Czech Republic are cited roughly one half less than works published in European Union countries, although the level of citation has been growing steadily since 1993.

756. The greatest amounts of funds for civilian research and development are spent by the Academy of Sciences of the Czech Republic, the Ministry of Education, Youth and Sports, the Grant Agency of the CR and the Ministry of Industry and Trade. The shares of the other ministries are lower.

757. The number of applications to register inventions from entities residing in the Czech Republic has, since 1995, remained at a clearly lower level than the average in European Union countries. The Czech Republic lags behind more marked in fields which are developing dynamically and are demanding in terms of research and development, but it is on approximately the same level as Poland and Hungary.

#### **Invention applications in 1993 to 1998**

Applicant	1993	1994	1995	1996	1997	1998
Domestic	880	756	627	617	585	626
Foreign	2,053	2,593	2,892	3,241	3,652	3,761
PCT (Designations) <sup>1)</sup>	5,558	11,695	18,104	23,624	28,875	37,447
<b>Total</b>	<b>8,491</b>	<b>15,044</b>	<b>21,623</b>	<b>27,482</b>	<b>33,112</b>	<b>41,834</b>

Note: 1) International applications, in which the Czech Republic is a designated state under the Patent Co-operation Treaty.

#### **Granted patents, registered utility models and industrial designs in 1993 to 1998**

	1993	1994	1995	1996	1997	1998
Granted patents	860	725	1,299	1,290	1,447	1,451
Registered utility models	1,177	1,637	1,470	1,152	1,499	1,185
Registered industrial designs	627	566	424	803	868	1,017

758. Developed countries spend 2 to 3 percent of GDP on science and research, in the interest of maintaining competitiveness. However, some less developed OECD member countries spend less than 1 percent GDP. In European Union countries, unlike the Czech Republic, indirect support of science and research also plays an important role (tax breaks, etc.).

**Trend of Total R&D Expenditures in the Czech Republic**  
(total expenditures on research and development as per cent of GDP)

Source: OECD - Main Science and Technology Indicators 1998/2.

Note: The numbers in the graph give the percentage of GDP of total expenditures for research and development in the first and last year of the monitored period. Incomplete columns for some countries indicate missing data in the source material.

759. After 1989 there was a sharp decline in the former Czechoslovakia in expenditures for science and research (in 1991 expenditures for the CR were 2.03 percent of GDP). This decline after the creation of the independent Czech Republic continued more mildly until 1995, and expenditures for science and research then began to grow slowly.

### **Total R&D expenditures and GDP - 1997 data**

(dependence of total R&D expenditures on GDP - both indicators at purchasing power parity per inhabitant)

Source of data: OECD in Figures (statistics on the member countries, 1998 Edition).

Note: Total expenditures for research and development: abbreviation GERD.

760. Developed and wealthier countries provide more funds for research and development not only absolutely (commensurately higher GDP per person), but also relatively (larger percentage of GDP per person). This naturally contributes to further growth in GDP.
761. As a rule, economic development is preceded by technical progress which is based on innovation. Virtually the exclusive source of innovation is development which uses knowledge gained from research. Support of science and research thus leads to economic growth, and the graph above can be interpreted this way. The relationships between development of science and research and other activities such as transfer of the results of science and research to the business sphere, necessary investment construction, marketing, trade and service activities are very complicated. Thus, the graph can also be interpreted in reverse – wealthier states can afford to provide more funds for science and research.
762. State support for research and development in 2000 to 2002, in accordance with short-term budget prospects, expects gradual growth in state expenditures for research and development, up to a goal level of 0.7 percent of GDP<sup>437</sup>. Two concepts meet here – the previous approach, based on proportional division of resources between 20 budget chapters with tens of small programs, and a new approach, which – as in the developed countries – concentrates a significant part of funds on solving basic questions. A detailed proposal for further development of science and research and their financing is being prepared for the Government by the Council for **Research and Development** in accordance with the Act on State Support for Research<sup>438</sup>.
763. The present connection of research and development to the concept of development in the jurisdiction of individual central bodies is inadequate. Individual ministries do not have a specific, long-term picture of the future development in a given area, caused by several years of ignoring concept work; connections between the individual concepts are also weak. Both are negatively reflected in the national policy for research and development<sup>439</sup>, which, in developed countries, is based not only on expectations and offers from scientists, but primarily on the requirements of the society, **formulated in concepts in areas of public interest**.
764. In preparing the policy for research and development it is necessary to address primarily the problems of basic and applied research and transfer of their results, financing, international co-operation, infrastructure, and moral and ethical aspects of research and development.

---

<sup>437</sup> Resolution of the Government of the Czech Republic of 22 March 1999 No. 249, on State Support for Research and Development in 2000 to 2002.

<sup>438</sup> Act No. 300/1992 Coll., on State Support for Science and Research, as subsequently amended.

<sup>439</sup> Resolution of the Government of the Czech Republic of 5 January 2000 No. 16, on the National Policy of Research and Development of the Czech Republic, in point III.3 charges all administrators of budget chapters which support research and development to prepare a plan for development of research and development in the field of their jurisdiction and reflect it in the draft state budget for 2001.

765. In connection with the national policy of science and research, the Government, under its legislative work plan and Government Resolution No. 16 of 5 January 2000 will prepare a new Act on Research and Development by 31 October 2000.
766. One of the systems of purposeful financing of research and development from public funds is the grant system<sup>440</sup>. The agenda related with providing special purpose financial resources from an independent chapter of the state budget for support of research and development is entrusted to the Grant Agency of the Czech Republic. The rules of the grant system come from the statute of the Grant Agency of the CR<sup>441</sup>, the rules for providing special purpose financial resources from the state budget for support of research and development<sup>442</sup>, and from the Government Resolution on government principles for research and development<sup>443</sup>.
767. The Grant Agency provides special purpose funds, on the basis of results of a public competition, from an independent chapter of the state budget of the Czech Republic and from other sources, for research and development projects proposed by individuals or legal entities which meet the Grant Agency programs.
768. The Grant Agency supports basic research, scientific programs and projects which strengthen research potential and applied research and development. The results of grant projects must be published in a form appropriate to the character of the scientific or technical field.
769. The activities of the Grant Agency do not affect the jurisdiction and responsibility of central state administration bodies in support for research and development for the state budget of the CR in institutional or special purpose form. Financing research and development from the special purpose funds of the Grant Agency selectively supplements institutional financing from the state budget and financing from company, ministry of private sources.

### **International co-operation**

770. Workers in research and development, scientific workers and university teachers in the Czech Republic are connected to international co-operation, scientific programs and international exchanges. Many of them are members of international scientific societies and contribute to foreign scientific magazines. The problem they encounter is insufficient funds from institutional sources for workers in scientific and research institutions to participate in foreign conferences and long-term studies abroad. Apart from special purpose funds for science and research (from grants) they use funds from foreign institutions, including foundations and funds supporting research.
771. The Office of Industrial Property ensures fulfilment of obligations arising for the Czech Republic from international treaties administered by the WIPO, to which the country is a party; in co-operation with the Ministry of Industry and Trade, it also ensures fulfilment of obligations arising from the TRIPS Agreement. The Office thus plays an important

---

<sup>440</sup> This system is governed by Act No. 1/1995 Coll., on State Support for **Research and Development**, which amends and supplements Act No. 300/1992 Coll. (the full text was promulgated under No. 2/1995 Coll.)

<sup>441</sup> The Government approved the statute of the Grant Agency of the CR by resolution of 22 February 1995 No. 111.

<sup>442</sup> Resolution of the Government of the Czech Republic of 3 January 1996 No. 27, on rules for providing special-purpose financial resources from the state budget for support of research and development.

<sup>443</sup> Resolution of the Government of the Czech Republic of 23 April 1997 No. 247, on Government Principles for Research and Development. This resolution was repealed by Resolution of the Government of the Czech Republic of 5 January 2000 No. 16.

role in preparation for the Czech Republic's accession to the European Union, and its representatives take part in meetings of the European Patent Organisation's administrative council. Primarily for these reasons, employees of the Office take part in expert seminars (e.g. RIPP) and studies abroad, and the Office also organises international meetings with foreign experts.

### **Dissemination of information about science and culture**

772. § 10 of the Act on Radio and Television Broadcasting<sup>240</sup>, governing conditions for issuing a broadcasting license, in par. 4 charges the regulatory body to consider, when evaluating an application, the securing of conditions for plurality and balance in the program selection, particularly local programs, equal accessibility of cultural values, information and opinions, as well as ensuring development of the cultures of nations, national groups and ethnic groups in the CR, as well as the applicant's preparedness to furnish a certain percentage of programs with hidden or visible subtitles for the hearing impaired. Under par. 6 of that section, when evaluating applications from companies with foreign capital participation, the body also considers the applicant's contribution to development of original domestic creative work. The regulatory body may (under § 12 of the Act) also decide that data concerning the program structure provided by the applicant in the license application will be partly or fully binding.

773. The Act on the Czech Television<sup>388</sup>, in § 2, and the Act on the Czech Radio<sup>388</sup>, virtually identically in § 2, define the mission of both public service broadcasters as being to provide objective, verified, all-sided and balanced information for the free formation of opinions, to develop the cultural identity of the Czech nation and national and ethnic minorities in the Czech Republic, to provide ecological information, to serve education, the raising of the young generation, and to contribute to the entertainment of viewers.

774. We also refer to paragraphs 726 to 730 of this report.

**3. The States Parties to the present Covenant undertake to respect the freedom indispensable for scientific research and creative activity.**

775. Freedom of expression and the right to information is guaranteed by Article 17 of the Charter, cited in the introduction of the text to Article 15 of the Covenant. Freedom of expression is subject to legal restriction as a consequence of measures necessary to protect the rights and freedoms of others, as spreading national, racial or religious hatred is forbidden by law (§ 198a of the Criminal Code<sup>17</sup>), as are support and promotion of movements aimed at suppressing the rights and freedoms of citizens (§ 260 of the Criminal Code).
776. The right to gather information is also restricted in accordance with Article 10 par. 3 of the Charter, which states that *everyone has the right to be protected from the unauthorised gathering, public revelation, or other misuse of his/her personal data.*
777. In practice, freedom of expression is consistently observed in the Czech Republic. The media are independent, and can criticise state officials without any censorship (or attempt at censorship). Complaints about suppression of freedom of expression are heard almost exclusively from groups which promote racial or national hatred and groups aimed at suppressing the rights and freedoms of others (denying the holocaust, etc.). On the other hand, organisations concerned with protection of human rights generally consider repression by the state in this area insufficient rather than excessive. Judicial prosecution for spreading racial hatred or support and promotion of movements aimed at suppressing the rights and freedoms of citizens tends to be an exceptional event.
778. In June 1999 the Government submitted to the Chamber of Deputies of the Parliament a draft Act on Rights and Obligations When Publishing Periodic Press and Amending Certain Other Acts (including the Act on Radio and Television Broadcasting), the so-called Press Act, which makes censorship unacceptable and provides freedom of expression. At present the draft contains a provision which is to ensure protection of society in cases where the contents of periodic press violate the constitutional order of the Czech Republic or the democratic order of human rights and fundamental freedoms guaranteed by the Charter. However, after discussion in committees in December 1999 and January 2000, the Senate returned the draft of the new press act to the Chamber of Deputies for new discussion.
779. In these cases protection is entrusted to an independent court, which will be entitled to impose on a publisher who permits the content of a periodical published by him to be in conflict with the Act, the duty to pay the state financial satisfaction. The court can also impose a temporary prohibition on publication of the periodical, or prohibit its dissemination in the Czech Republic. The Senate will discuss the draft at its first session in January.

780. Certain difficulties also appear in the area of right to information. Journalists and other citizens often complain about the lack of openness and unwillingness of officials to provide them with information about the activities of state bodies. The new Act on Free Access to Information<sup>444</sup>, which went into effect on 1 January 2000, should help correct this situation. The Act governs the provision of information related to the jurisdiction of state bodies and territorial self-government bodies. In particular, it guarantees free access to information and sets forth conditions under which the information is provided.
